

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

ACCOUNTS AND PAPERS:

SEVENTY-SEVEN VOLUMES.

— (2.) —

ARMY ESTIMATES;
YEOMANRY (IMPERIAL) MILITARY WORKS.

Session

16 *January* 1902 — 18 *December* 1902.

VOL. LVI.

1902.

ACCOUNTS AND PAPERS:

1902.

SEVENTY-SEVEN VOLUMES:—CONTENTS OF THE SECOND VOLUME.

N.B.—THE Figures at the beginning of the line, correspond with the N° at the foot of each Paper; and the Figures at the end of the line, refer to the MS. Paging of the Volumes arranged for The House of Commons.

ARMY ESTIMATES:

- ✓ 49. Army Estimates of Effective and Non-Effective Services, for 1902–1903. p. 1

Army (Clothing Factory):

- ✓ 102. Annual Accounts of the Royal Army Clothing Factory, for the Year 1900–1901; with the Report of the Comptroller and Auditor General thereon. 217

Army (Ordnance Factories):

- ✓ 101. Annual Accounts of the Ordnance Factories, for the Year 1900–1901, with the Report of the Comptroller and Auditor General thereon. 255

Ordnance Factories Estimate, 1902–03:

- ✓ 50. An estimate of the Sum required in the Year ending 31st March 1903, to defray the Expense of the Ordnance Factories, the Cost of the Productions of which will be charged to the Army, Navy, and Indian and Colonial Governments, &c. 565

Army (Memorandum on Estimates):

- ✓ [Cd. 887.] Memorandum of the Secretary of State relating to the Army Estimates for 1902–1903. 573

Statement of Excesses:

- ✓ 79. A statement of the sum required to be Voted in order to make good Excesses of Army Expenditure beyond the grants, for the Year ended 31st March 1901. 577

Army, 1901–1902 (Supplementary Estimate):

- ✓ 30. Estimate of the further Amount required in the Year ending 31st March 1902, to meet additional Expenditure due to the War in South Africa. 579

Army Expenditure 1902-1903 :

- ✓ [Cd. 996.] Statement showing approximately the revised amounts now required under the various votes in view of the conclusion of peace as compared with the provision made in the estimates submitted to Parliament with explanations of the differences. p. 583

Army Expenditure 1902-3 (South African War) :

- ✓ [Cd. 885.] Statement showing approximately under principal sub-heads the sums still required to be expended on the Army in South Africa in 1902-3. 587

Public Accounts Army Votes (Surplus on Vote) :

- ✓ 128. Treasury Minute, dated 5th April 1902, under the Appropriation Act, 1901, authorising the temporary application of Surpluses on certain Army Votes for the Year 1901-1902 to meet Excesses on certain Army Votes for the same Year. 591

Barracks Act, 1890 (Account 1900-1901) :

- ✓ 55. Account showing the Money Raised and Issued under the Provisions of the Barracks Act, 1890, the Securities created in respect thereof, and the Amount Expended for the purposes of the said Act, to the 31st March 1901 ; with the Report of the Comptroller and Auditor General thereon. 595

Army (Imperial Yeomanry) :

- ✓ [Cd. 886.] Order relating to the Organization and Equipment of the Imperial Yeomanry. 601
- ✓ [Cd. 891.] Training return of Imperial Yeomanry for 1901. 615
- ✓ [Cd. 803.] Report of the Deputy-Adjutant General of the force regarding its Home Organization, Inspection of the Constitution of its Base and Advanced Depôts and Distribution of Stores in South Africa and proposals for future organisation called for by the Secretary of State for War, 1st June 1900, and submitted 15th May 1901. 619

Army (Military Works) :

- ✓ [Cd. 969.] Approximate estimate of Expenditure under the Barracks Act 1890, and Military Works Act 1897, 1899, and 1901. 875

Military Works Acts, 1897 and 1899 (Account, 1900-1901) :

- ✓ 81. Account, under the provisions of the Military Works Acts, showing the amount expended and borrowed, and the securities created under the Act, during the Year ended 31st March 1901 ; with the Report of the Comptroller and Auditor General thereon. 879

£. 29,310 000.				

EXPLANATIONS of the DIFFERENCES between the AMOUNTS PROPOSED in the ARMY ESTIMATES for 1902-1903 and the AMOUNTS VOTED for 1901-1902, excluding special expenditure arising out of the War in SOUTH AFRICA and the CHINA EXPEDITION.

VOTE A.—NUMBERS.

The increases and decreases in the Establishment of the Army are detailed on page 11.

VOTE 1.—PAY, &c. OF THE ARMY.

Net Decrease - - - £. 22,100.

A.—Pay, &c., of General Staff. Decrease - £. 22,300.	Due mainly to the transfer to other Votes and sub-heads of the sum taken in 1901-1902 for the additional Staff required for army corps.
C.—Regimental Pay, &c. - Increase - £. 85,000.	Provision has been made for the changes in the regimental establishments detailed in Vote A.
L.—Schools of Gunnery - Increase - £. 1,860.	Due to increases of pay and additions to the Instructional Staff.
N.—School of Musketry - Increase - £. 3,140.	Due to additions to the Staff to provide for the large increase in the number of officers instructed in musketry.
P.—Miscellaneous Army Schools. Increase - £. 3,880.	Provision has been made for a school of instruction for officers of Imperial Yeomanry.
R.—Miscellaneous and Unforeseen Charges. Increase - £. 7,800	Provision has been made in full for depot and other charges repayable to the Indian Government in respect of Indian Native Regiments employed on Colonial Service.
S.—Chaplains' Department Increase - £. 3,100.	Due to additions to the establishment on account of the increases to the Army of recent years.
T.—Army Pay Department Increase - £. 800	Due to increase in postal expenses in the payment of Militia bounties in the non-training season.
U.—Army Veterinary Department. Increase - £. 2,600.	Provision is made for the special purchase of stores for three field veterinary hospitals, and for additional expenditure on bills of civilian veterinary surgeons, medicines, &c. on account of the increase in the permanent establishment of horses.
W.—Military Prisons - Increase - £. 5,700.	Due to the reorganisation of the Military Prisons system commenced last year.
Y.—Army Reserve - Decrease - £. 90,000.	There will be a diminution in the strength of the Army Reserve in consequence of casualties amongst mobilized reservists, due to the war, and the retention with the Colours in India of men who have specially extended their service.
Z.—Appropriations in Aid Increase in Receipts -- £. 24,000.	The contributions from the Colonial Governments of Ceylon, Hong Kong, and the Straits Settlements are expected to increase, owing mainly to growth of revenue, and an increase is anticipated in the payment by the Indian Government for Home Effective Charges, partly on account of an increase in the Indian Establishment, and partly to a smaller rebate for troops lent for Imperial War Service.

EXPLANATIONS of the Differences between the Estimates for 1902-1903 and those for 1901-1902—*continued.*

<p>VOTE 2.—MEDICAL ESTABLISHMENT, PAY, &c.</p> <p>Decrease - - £. 13,600.</p>	<p>Due mainly to the transfer to the appropriate Votes of a portion of the sum taken in 1901-1902 for re-organisation of the Army Medical Service.</p>
<p>VOTE 3.—MILITIA: PAY, BOUNTY, &c.</p> <p>Decrease - - £. 152,000.</p>	<p>Due to a decrease in the provision made for the new Militia Reserve, and to the exemption from training of a portion of the Militia.</p>
<p>VOTE 4.—IMPERIAL YEOMANRY: PAY AND ALLOWANCES.</p> <p>Increase - - £. 210,000.</p>	<p>Due mainly to provision being made in full for the re-organised and augmented force of Imperial Yeomanry.</p>
<p>VOTE 5.—VOLUNTEER CORPS: PAY AND ALLOWANCES.</p> <p>Increase - - £. 57,000.</p>	<p>Due principally to the increase of Capitation and Camp allowances owing to the augmentation of the Volunteer Force during the last two years.</p>
<p>VOTE 6.—TRANSPORT AND REMOUNTS.</p> <p>Decrease - - £. 90,000.</p>	<p>Due mainly to an over-estimate of the requirements for Remounts, and a reduction in the provision for sea transport.</p>
<p>VOTE 7.—PROVISIONS, FORAGE AND OTHER SUPPLIES.</p> <p>No change</p>	<p>The charge Messing Allowance has been transferred to the Pay Votes.</p>
<p>VOTE 8.—CLOTHING - - - -</p> <p>Decrease - - £. 105,000.</p>	<p>Due mainly to diminished provision being required owing to the cessation of prime charges, and to the exemption from training of a portion of the Militia.</p>
<p>VOTE 9.—WARLIKE STORES - -</p> <p>Decrease - - £. 518,000.</p>	<p>Due mainly to a smaller sum being required for the provision of guns, mountings, and ammunition under the programme for the re-armament of fortresses.</p>
<p>VOTE 10.—WORKS, BUILDINGS, &c. -</p> <p>Decrease - - £. 114,000.</p>	<p>This decrease is due to the completion of the special provision for Hut Accommodation for increased garrisons at home, which is partially counterbalanced by the additional annuities payable under the Military Works Act.</p>
<p>VOTE 11.—EDUCATIONAL ESTABLISHMENTS.</p> <p>Increase - - £. 1,600.</p>	<p>Due to additions to the establishment of Army Schoolmasters and Schoolmistresses, and to an increase in the Educational Staff of the Staff College.</p>
<p>VOTE 12.—MISCELLANEOUS - -</p> <p>Increase - - £. 9,100.</p>	<p>Due mainly to provision being made for the Explosives Committee, and for an increase in the rewards to inventors.</p>
<p>VOTE 13.—WAR OFFICE - - -</p> <p>Increase - - £. 12,000.</p>	<p>Due mainly to additions to the Military Staff, and to provision for branches of the Accountant General's Department being stationed for local audit at Army Corps Headquarters.</p>
<p>VOTES 14-16.—NON-EFFECTIVE -</p> <p>Increase - - £. 350,000.</p>	<p>This increase is due to the inclusion in the normal portion of the Estimates of charges for pensions due to the War in South Africa.</p>

* The Pay of the Officers, Non-Commissioned Officers and Men of the Inspection Staff is provided for under Vote 1 Sub-head C.

† One is a Retired Riding Master, who, in addition to salary, is in receipt of retired pay.

‡ The present holder also receives an allowance of 150l. from the Vote for the Ordnance Factories.

§ This scale was personal to holder, who also occupied free quarters.

The Inspection Staff of the Army Ordnance Department inspects in detail both the Naval and Army Stores, as well as those supplied to the Colonies and India. The total value of the Stores to be so inspected is approximately 11½ millions. Towards the expense of the inspection, which (including 120,000l. for Stores used in proof and inspection) amounts to about 370,000l., a sum of 74,000l. is taken as an Appropriation in Aid on account of Stores inspected for the Navy.

				10,000		12,000
2,196	2,276	TOTAL for PENSIONS, &c. to WIDOWS, &c. of OFFICERS - £.		187,000		185,000

N.B.—The following are the rates at which pensions are awarded to the Widows, &c. of Officers under the Army Pay Warrant:—

To the Widow of a—	
Field Marshal or General Officer (including Brigadier General)	£.120 a year.
Colonel, if employed as such after the 31st December 1890, or if a Regimental Colonel, not being a General Officer	100 "
Colonel, not employed as such after the 31st December 1890, or Lieutenant Colonel	90 "
Major	70 "
Captain	50 "
Lieutenant, or 2nd Lieutenant	40 "
Subadar	Rs. 22-8 a month.
Jemadar	15 "

An addition to these rates of 50 per cent. may be made when the Officers have died from illness contracted during active operations in the field, or in consequence of wounds received in the execution of military duty otherwise than in action. Double rates of pension may be granted when the Officers have been killed in action or have died of wounds received in action; in the case of Widows of General Officers so killed or dying, special pensions may be awarded according to circumstances.

The rates of pension awarded to the Widows of Riding Masters, Quartermasters, and Departmental Officers are governed by the Army or honorary rank of the deceased Officers.

† The gratuity which may be allowed to the Widow of an Officer killed in action or dying of wounds received in action consists of one year's pay at the rate which the Officer was actually receiving under the Pay Warrant when killed or wounded. (Article 643, Army Pay Warrant.)

One-third of a year's pay may also be allowed for each child under the prescribed limit of age. (Article 644, Army Pay Warrant.)

		510 - -	- - -	- - -
TOTAL - - - £.		- - -	705 4 -	913 10 -

N.B.—The following are the rates at which Pensions for Wounds and Injuries received in action are awarded under the Army Pay Warrant :—

Field Marshal - - - - -	Special.	Major General - - - - -	350 <i>l.</i> a year.	Major - - - - -	200 <i>l.</i> a year.
General - - - - -		Brigadier General - - - - -		Captain - - - - -	100 year.
Lieutenant General Commanding in Chief - - - - -		Colonel - - - - -	300 <i>l.</i> a year.	Lieutenant - - - - -	70 <i>l.</i> a year.
Lieutenant General - - - - -	400 <i>l.</i> a year.	Lieutenant Colonel - - - - -		Second Lieutenant - - - - -	

Only half of these rates is allowed in cases in which the Wound or Injury is not fully equivalent to the loss of a limb.

Pensions for Wounds and Injuries received otherwise than in action may be awarded at the following rates or less according to circumstances.

General Officer - - - - -	Special.	Major - - - - -	150 <i>l.</i> a year.	Lieutenant - - - - -	50 <i>l.</i> a year.
Colonel or Lieutenant - - - - -	250 <i>l.</i> a year.	Captain - - - - -	75 <i>l.</i> a year.	Second Lieutenant - - - - -	
Colonel - - - - -					

Pensions for Wounds are awarded to Riding Masters, Quartermasters, and Departmental Officers according to their Army or honorary rank.

* These Gratuities are based upon the amount of Pay the Officer was receiving when wounded ; from three to twelve months' Pay being allowed according to the degree of severity of the wound.

* The establishment of Lieutenants is one per company. In addition to the establishment of Subalterns, supernumerary Second Lieutenants to complete the number of Subalterns to two for each company will be allowed.

† Additional Surgeon-Lieutenants and Acting Chaplains may be appointed, according to the requirements of the Service, under paragraphs 63 and 66 respectively of the Volunteer Regulations.

‡ Inclusive of additional Medical Officers, additional Acting Chaplains, and all boys enrolled as trumpeters, buglers, or bandmen.

§ Attached to 6th Volunteer Battalion.

(a) 26 ordinary companies, 1 cyclist company, and 3 mounted sections.

(b) 10 ordinary companies, 1 cyclist company, and 2 mounted sections.

(c) Includes 1 cyclist company.

(d) Includes 2 cyclist companies.

(e) Includes 1 farrier sergeant.

(f) 6 ordinary companies, 1 mounted company, and 1 cyclist company.

* Table money is granted to the General Officer Commanding in certain large Commands to meet the expenses of necessary hospitality.

General Officers Commanding, who occupy unfurnished quarters, receive furniture allowance at rates varying from 11s. to 5s. 6d. a day, according to the rank of the Officers.

Forage Allowance.—Forage allowance is governed by the average contract rates obtaining in the several military districts, plus 20 per cent. to meet the additional cost of buying retail. In these tables the calculation is made at 1s. 7d. a ration.

Stabling Allowance.—Stable allowance is granted at the rate of 9d. for the first horse, and 6d. per horse after the first.

Fuel and Light Allowance.—The rate of allowance for fuel and light varies with the season of the year and the number of rooms to which the Officer may be entitled.

REPORT OF THE COMPTROLLER AND AUDITOR GENERAL

UPON THE

ACCOUNTS OF THE ROYAL ARMY CLOTHING FACTORY,

FOR THE YEAR 1900-1901.

[*Prepared and submitted in accordance with Act 52 & 53 Vict. c. 31, s. 1.*]

1. THE customary test examination has been applied to the Manufacturing Accounts of the Royal Army Clothing Factory, 1900-1901, with generally satisfactory results. Test examination.

2. The out-turn again shows a considerable increase, owing to the continuance of the War in South Africa; the figures of the Production Account for the last three years being:— Out-turn again increased.

1898-1899	£294,224
1899-1900	363,616
1900-1901	479,324

3. It will be seen on reference to page 6 and the following pages of the Accounts, that the form of the Production Statements has been consolidated in 1900-1901, and brought into line with similar Statements in the Ordnance Factories Accounts. Change in form of Production Statements.

This simplification of the return has received the approval of the Treasury, and does not in any way weaken the check of my Department upon detail.

The correspondence relating to the change will be found in the Appendix.

Appendix (page 36).

D. C. Richmond,
Comptroller General of the Receipt and Issue
of His Majesty's Exchequer, and
Auditor General of Public Accounts.

Exchequer and Audit Department,
6 March, 1902.

CORRESPONDENCE.

3305—01.

Treasury Chambers,
6th March, 1901.

Sir,

I AM directed by the Lords Commissioners of His Majesty's Treasury to transmit, for your information, a copy of a War Office letter, &c., of the 21st ultimo, and of the Treasury reply of to-day's date, relative to reducing the detail now given in the Production Statements of the Army Clothing Factory.

My Lords are glad to understand that this simplification meets with your approval.

I am, etc.

The Comptroller and Auditor General.

(Signed) *Francis Mowatt.*

(Enclosure.)

88—Gen. No.—5.

War Office,
21st February, 1901.

Sir,

I AM directed by the Secretary of State for War to acquaint you, for the information of the Lords Commissioners of His Majesty's Treasury, that his attention has been drawn to the large amount of detail contained in Production Statements published with the accounts of the Royal Army Clothing Factory, Pimlico, as shown in the enclosed specimen page.

There appears to be no reason why the cost of materials, and details of the wages paid for various operations in manufacture, which are not shown in the printed accounts of the Ordnance Factories, should be published in the accounts of the Clothing Factory. Moreover, certain improvements in the book-keeping relating to wages and materials in the Clothing Factory are in contemplation, the result of which will be to eliminate these details in the later stages of the accounts, though they will continue to be traceable in the books of the Factory and to come under the notice of the Exchequer and Audit Department as before.

It is therefore proposed, if their Lordships see no objection, to omit from the Clothing Factory Accounts of the current and future years the columns marked * on the enclosed sheet, and thus to assimilate the form of the Production Statement to that of the Production Statements of the Ordnance Factories.

I am, etc.

The Secretary to the Treasury.

(Signed) *Frank T. Marzials.*

(Enclosure.)

3305—01.

Treasury Chambers,
6th March, 1901.

My Lord,

I AM directed by the Lords Commissioners of His Majesty's Treasury to request you to inform Mr. Secretary Brodrick that they concur in the proposed omission from the Army Clothing Factory Production Statement for the current and future years of the columns indicated in Mr. Marzials' letter (88—G. No.—5) of the 21st ultimo.

My Lords note that though the details will be omitted from the final account, they will be traceable in the Factory books, and will come under the notice of the Audit Office as heretofore.

I am, etc.

The Financial Secretary, War Office.

(Signed) *Francis Mowatt.*

REPORT OF THE COMPTROLLER AND AUDITOR GENERAL

UPON THE

ACCOUNTS OF THE ORDNANCE FACTORIES OF THE ARMY,

FOR THE YEAR 1900-1.

[*Prepared and submitted in accordance with Act 52 & 53 Vict. c. 31, s. 1.*]

GENERAL OBSERVATIONS.

1. THE customary detailed test of the allocation of Labour and Materials has been carried out at all the Ordnance Factories, together with the verification of the Production Statement from the Cost Ledgers and Production Ledgers. Detailed Test of Accounts, 1900-1.

2. The continuance of the War in South Africa has caused great activity at these Establishments throughout the year 1900-1, and the value of the output, including Semi-manufacture, has reached the sum of 4,853,289*l.*, which exceeds that of the output in normal years, before the war, by more than a million and three-quarters.

Outstanding Questions.

3. The question of the centralisation of the Accounts of the Building Works Department, referred to in Paragraph 4 of my Report last year, is still unsettled, and I have recently been informed that the matter has been referred to a Committee, which is now inquiring into the organisation and accounts of the Ordnance Factories. Centralisation of Building Works Accounts.

DISPOSAL OF ASHES FROM THE BRASS FOUNDRY AND ROLLING MILLS OF THE ROYAL LABORATORY AND OTHER FACTORIES.

4. In the examination of the Remain of the Royal Laboratory stores it was noticed that the ashes of the Brass Foundry and Rolling Mills were valued at 5*l.* 17*s.* 6*d.* and 6*l.* 2*s.* 6*d.* a ton, respectively, on the 31st March, 1901, although the price obtained for them on sale during the year was 3*s.* 4*d.* a ton only. Value attaching to Foundry ashes at the Royal Laboratory, originally treated as waste.

In reply to an inquiry as to this apparent discrepancy in rates, information has been furnished which shows that the basis adopted for valuation is correct, inasmuch as a new contract was entered into at the close of the year at the higher rates.

As the circumstances connected with the credits from the sale of these ashes are exceptional, it may be desirable to mention them.

It was decided in May, 1889, when the Building Works Department became a part of the Ordnance Factories, to issue the ashes from the Royal Laboratory Brass Foundry and Rolling Mills free of charge to the Superintendent of the Building Works Department for making roads, making up ground, &c., in the Arsenal generally, and this practice continued until June, 1900, when an offer was made by a firm of contractors to take and remove all the ashes from the Brass Furnace fireholes at the rate of 3s. 4d. a ton. This offer was accepted for a period of six months.

Towards the end of the year 1900 it was reported to the Chief Superintendent of the Ordnance Factories by the Police that some scraps and splashes of metal were being picked up and sold to marine store dealers in the neighbourhood by some building contractors' men in the marshes. A sample of the ashes which were being removed was made up, and when put up to sale realised 6l. a ton.

Tender forms were then issued to various contractors for a contract for the half-year to September 1901, and finally the tender of the firm who had been paying 3s. 4d. was accepted at 5l. 17s. 6d. and 6l. 2s. 6d. a ton for ashes estimated to weigh 780 tons from Brass Metal Foundries and Rolling Mills Nos. 1 and 2 respectively, involving a prospective receipt for the half-year of 4,700l.

In September, 1901, even higher tenders were obtained for these ashes, a contract being made at that date at 6l. 7s. 6d. and 7l. 7s. 6d. a ton for Brass Foundry, Rolling Mill No. 1 and Rolling Mill No. 2 respectively.

Foundry ashes at other Factories.

5. Foundry ashes are also obtained from manufacturing operations in the Royal Carriage Department and the Royal Gun Factory at Woolwich, but in smaller quantities. The former were disposed of at the auction sale of the Principal Ordnance Officer in 1900, and realised about 3l. a ton, while the latter were treated in the Gun Factory Foundry, and any metal found in the sifting was used up at the time.

STOCKTAKING.

Extent of independent Stocktaking in 1900-1.

6. The usual independent stocktaking of Ordnance Factory Stores by the representatives of the Accountant General's Department was carried out in 1900-1, and covered items of stock at Waltham Abbey and Enfield, as well as at the central stores at Woolwich. The discrepancies found were relatively small.

BALANCE SHEET.

Stores in Stock at 31st March, 1901.

Further increase of Remain of Stock in 1900-1.

7. The Stores in Stock at the close of the year 1899-1900 were valued at 628,106l. 5s. 9d.; and, at the close of the year 1900-1, the value was 641,422l. 15s. 5d., being an increase in Stock of 13,316l. 9s. 8d.

There was an augmentation of Stock in 1899-1900, which left the Remain 49,147l. 1s. 0d. in excess of the normal figure, and the further accretion in 1900-1 brings the excess up to 62,463l. 10s. 8d. I have recently invited from the War Office an explanation of this continued augmentation, but as yet no reply has been received.

CREDITS IN THE BALANCE SHEET.

Agreement with Credits shown under Appropriations in Aid of the Vote.

8. I append the usual statement showing the agreement between the Credits in the Balance Sheet and those in the Appropriation Account of the Ordnance Factories.

Appendix, (page 306.)

D. C. Richmond,

Comptroller General of the Receipt and Issue
of His Majesty's Exchequer, and
Auditor General of Public Accounts.

Exchequer and Audit Department,
6 March 1902.

**Memorandum of the Secretary of State relating to the
Army Estimates for 1902-1903.**

The total of the Army Estimates for 1902-03 amounts to 69,310,000*l.* while the number of men to be voted is 420,000.

The following table shows the comparison with the figures for the current year (including the Supplementary Estimate) :—

	1901-02.		1902-03.	
	Ordinary Services.	War.	Ordinary Services.	War.
Vote A .. (Personnel)	219,800	230,200	219,700	200,300
	450,000		420,000	
Votes 1-16	£29,685,000	£63,230,000	£29,310,000	£40,000,000
	£92,915,000		£69,310,000	
	Decrease { Ordinary Services .. £375,000 War Services .. £23,230,000			

The net decrease of 375,000*l.* on ordinary services is mainly accounted for as follows :—

INCREASES.

1. Increases due to policy already sanctioned by Parliament.

(a.) Volunteers. Capitation grants for additional number of efficient	£ 50,000	£
(b.) Additional annuities payable on Works Loan		75,000	
(c.) Net increase on non-effective votes for pensions, &c., caused by the war, after deducting a saving on normal charges	..	350,000	
(d.) Imperial Yeomanry. The total increase to be voted was 600,000 <i>l.</i> For the current financial year only 300,000 <i>l.</i> was required		300,000	
		<u>775,000</u>	

2. Increases due to changes now first proposed.

The principal measures are :

The provision for Additional Mounted Troops on Mobilization; increase to the Army Ordnance Department; the seconding of officers while at the Staff College, and other miscellaneous increases	150,000
		<u>925,000</u>

DECREASES.

	£
(a.) Reduced strength of Army Reserve	90,000
(b.) New Militia Reserve to be only partially raised ..	100,000
(c.) Garrison battalions. Only six will probably be raised during 1902-03	145,000
(d.) Full number of Militia battalions will not train ..	150,000
(e.) Reduced provision for re-armament of fortresses at home and abroad	500,000
(f.) Reduction on Works Vote	190,000
(g.) Miscellaneous decreases	125,000
	<hr/>
	£1,300,000
	<hr/>
Net decrease	£375,000

The decrease under war services is made up as follows :

South Africa	£21,420,000
China	£1,810,000
	<hr/>
	£23,230,000
	<hr/>

War
services

As regards South Africa the provision made is sufficient to maintain the field force at its present strength for between 8 and 9 months of the new financial year. In the case of China provision has been made for the retention of a reduced force for about half the financial year, and also for the cost of the transport back to India.

This vote shows a decrease of 4,123,000*l.*, of which 4,101,000*l.* is for war and 22,100*l.* for normal services. Vote 1.
Pay, &c.

There are various miscellaneous increases under this vote, but they are more than counterbalanced by additional receipts and a reduced provision for the Army Reserve, which is expected to be somewhat short of establishment on demobilization.

The decrease on this vote amounts to 63,600*l.*, of which 50,000*l.* is for war, and 13,000*l.* for normal services. The decrease under normal is due to the fact that in the current year's Estimates the whole of the additional sum required for the reorganization of the Army Medical Services was taken under this vote, whereas in the Estimates 1902-03 the provision has been spread over the appropriate votes. Vote 2.
Medical Services.

There is a net decrease of 1,391,000*l.* on this vote, of which 1,239,000*l.* is due to war and 152,000*l.* to normal services. The decrease under the latter head is explained by the fact that a certain number of battalions, recently disembodied after considerable service, will not be called up for training this year, while reduced provision has been made for the new Militia Reserve, whose numbers are not expected to reach more than 25,000 men in 1902-03. Vote 3.
Militia.

There is a net increase of 210,000*l.* on this vote mainly due to the increased provision for the addition to the force commenced last year. Vote 4.
Yeomanry.

This vote shows an increase of 57,000*l.*, but 7,000*l.* of this amount is only nominal, representing a transfer of that amount from Vote 7 for messing allowance of the Permanent Staff. The balance of 50,000*l.* is required for capitain and camp allowances to the increased number of efficient Volunteers. Vote 5.
Volunteers.

This vote shows a decrease of 6,735,000*l.*, of which 6,645,000*l.* is for war services, and 90,000*l.* for ordinary services. The decrease under the latter head arises mainly on purchase of remounts, the provision in 1901-02 having been in excess of normal requirements. Vote 6.
Transport and Remounts.

The decrease on this vote amounts to 4,200,000*l.*, and arises entirely on war services, the total of the normal vote remaining the same as in 1901-02. Vote 7.
Supplies.

Vote 8. The decrease on this vote is 855,000*l.*, of which 750,000*l.* is for war and Clothing. 105,000*l.* for normal services. The decrease under the latter head is mainly due to the fact that the vote for 1901-02 contained prime charges for the additions made last year to the Army, and also to the fact that, as stated above, it is not intended to train the full number of Militia battalions in 1902-03.

Vote 9. This vote shows a decrease of 5,118,000*l.*, of which 4,600,000*l.* is for war and 518,000*l.* for normal services. This latter decrease is mainly accounted Warlike Stores, &c. for by the fact that reduced provision is required for the guns and ammunition for the rearmament of our fortresses at home and abroad.

Vote 10. This vote shows a net decrease of 1,091,000*l.*, of which 977,000*l.*, is for Works, &c. war services.

The normal vote for 1901-02 included a sum of 210,000*l.* for completion of hutting at home, which has now dropped out; but on the other hand there are increases of 75,000*l.* for additional Annuities under the Military Works Act, and 21,000*l.* for services mainly of a sanitary nature, which reduces the saving on the normal vote to 114,000*l.*

Vote 11. This vote remains practically at the same figure as last year. Military Education.

Vote 12. This vote shows a decrease of 116,500*l.* on war and an increase of 9,100*l.* on normal services. This is due to the establishment on a permanent basis of an Explosives Committee for experimental services (the cost of which will be shared by the Admiralty); the salaries are provided on this vote, there being charges for buildings and stores in other votes. There is also an increase in the sum to be taken for rewards to inventors. Miscellaneous.

Vote 13. This vote shows an increase of 27,000*l.*, of which 15,800*l.* is due to the War Office. war and 11,200*l.* to normal services. The increase under the latter head is accounted for partly by additions to the staff of the Military Departments and to the appointment of an Inspector-General of Artillery, and partly to the provision of the extra staff of the Accountant-General's Department required for the local audit of expenditure at the Head-quarters of I., II. and III. Army-Corps.

Votes 14-16. These votes show as a whole a net reduction of 216,500*l.*

Non-effective services. The decrease in war services, which in the accompanying estimates are limited to gratuities and other similar charges of a non-permanent nature, amounts to 566,500*l.*

Permanent pensions arising out of the war are treated as normal services, and account for an increase under that head of 350,000*l.*

ST. JOHN BRODRICK.

WAR OFFICE,

6th February, 1902.

1900-01.

STATEMENT OF EXCESSES.

A STATEMENT of the SUM required to be VOTED in order to make good EXCESSES of ARMY EXPENDITURE beyond the GRANTS, for the Year ended 31st March 1901.

One Hundred Pounds.

Note.—The excess of actual over estimated Appropriations-in-Aid for Army Services for the same year (See House of Commons Paper 58 of 1902), amounts to 1,588,736*l.* 19*s.* 2*d.*

STATEMENT of the Amount by which the ARMY GRANTS for the Year ended 31st March 1901, were exceeded as regards GROSS EXPENDITURE.

Pages of Appropriation Account.		Amounts Estimated.	Actual Expenditure.	Sum by which Actual Gross Expenditure Exceeded the Estimate.
		£.	£. s. d.	£. s. d.
	Gross Expenditure - - - -	95,309,153	96,242,033 16 6	932,880 16 6
4 & 5	<i>Abate,</i> —			
	Out of the excess of actual Appropriations-in-Aid - - - - -	—	—	932,780 16 6
	(See Note above.)			
	AMOUNT to be VOTED . . . £.			100 - -

EXPLANATION.

The excess of gross Expenditure is mainly due to unexpectedly heavy charges for Transport, Provisions, and Stores owing to the prolongation of the war in South Africa, while the additional surplus receipts arise mainly from larger sales of supplies, stores, and captured stock than were anticipated.

War Office,
26th February 1902. }

ARMY EXPENDITURE, (SOUTH AFRICAN

Vote.					Allocation of amount provided in Estimates.	Allocation now required.	Less than original estimate.	More than original estimate.
					£	£	£	£
1. Pay, &c., of Army	9,990,000	14,690,000	..	4,700,000
2. Medical Services	600,000	600,000
3. Pay, &c., of Militia	520,000	870,000	..	350,000
6. Transport and Remounts	10,000,000	6,850,000	3,150,000	..
7. Provisions, forage, &c.	12,030,000	10,780,000	1,250,000	} ..
8. Clothing	2,485,000	1,985,000	500,000	
9. Stores	2,980,000	2,480,000	500,000	
10. Works, &c.	645,000	995,000	..	350,000
12. Miscellaneous	40,000	240,000	..	200,000
13. War Office	60,000	60,000
14. Non-effective charges (Officers)	245,000	645,000	..	400,000
15. " " (Men)	55,000	55,000
Total	39,650,000	40,250,000	5,400,000	6,000,000
								600,000

NOTE.—It is anticipated that the net excess of 600,000*l.* over the amount provided can be met by savings on normal services mainly arising on Votes 3, 4, and 6.

ST. JOHN BRODRICK.

WAR OFFICE,
6th November, 1902.

1902-03.

WAR.)

Remarks.

This excess is made up roughly as follows :—

	£
Pay of general staff (including Field Intelligence), regular troops, &c., including gratuities of pay on demobilization	2,200,000
War gratuity	2,000,000
Wages of civilian subordinates	500,000
	<u>4,700,000</u>

This excess is on account of gratuities of pay, &c., to militiamen on demobilization.

This net reduction is made up as follows :—

	£
Saving on land transport	650,000
„ purchase of remounts :	1,500,000
Additional receipts for sale of horses, mules, oxen, &c. ..	2,500,000
	<u>4,650,000</u>
Less excess on sea transport	1,500,000
	<u>3,150,000</u>

The saving on these three votes arises partly from the earlier cessation of hostilities and partly from additional receipts.

This excess is mainly on engineer services in the field and accommodation for officers. The excess would have been larger but for additional receipts to be derived from the sale of huts, blockhouses, &c.

The deficit arises mainly on compensation for losses, bank commission, medals, &c.

The excess is for gratuities, &c., on cessation of hostilities, to officers who had been re-employed from the retired or the reserve list, &c.

ARMY EXPENDITURE, 1902-3.

ARMY VOTES, 1900-1901.

TREASURY MINUTE, dated the 5th April 1902, under Section 4 of the Appropriation Act, 1901 (1 Edw. VII. c. 21), authorising the temporary application of Surpluses to defray Excesses.

5,362—02.

My Lords have before them a letter from the War Office, dated the 26th ultimo, setting out the probable Surpluses and Excesses on Grants (including the Supplementary Grant of the 27th January last) for Army Services, 1901-2, accompanied by explanations showing that it would be detrimental to the Public Service to postpone the expenditure causing those Excesses until provision can be made for it by Parliament in the usual course, and proposing therefore to defray such Excesses temporarily out of Surpluses.

Vote and Service.	Probable Excess over Grant.	Probable Surplus of Grant.
	£.	£.
Vote 2.—Medical - - - -	84,000	—
Vote 6.—Transport and Remounts - - -	2,080,000	—

* Represents the difference between the value of the Connellmore brickfields as a going concern on the 31st March, 1900, as transferred to the Military Works Loan, and the actual expenditure for the year 1900-1, chargeable to the Barracks Reconstruction Fund in respect of services at the Curragh.

BARRACKS ACT, 1890.

REPORT of the COMPTROLLER and AUDITOR GENERAL on the ACCOUNT of the Money Raised and Issued out of the Consolidated Fund under the Provisions of the BARRACKS ACT, 1890 (53 & 54 Vict. c. 25), the SECURITIES created in respect thereof, and the Amount expended for the Purposes of the said Act, to the 31st March 1901.

1. The present is the eleventh Account of expenditure under the Barracks Act, 1890.

Issues from Consolidated Fund.

2. The sum of 56,086*l.* 10*s.* 5*d.* was issued from the Consolidated Fund in the year 1900-1, raising the total issues to 4,061,086*l.* 10*s.* 5*d.*

This amount, together with the sum of 38,913*l.* 9*s.* 7*d.* credited as the proceeds of the sale of Barracks land in 1899-1900, makes up the total (4,100,000*l.*) authorised to be issued for the purposes of the Act.

Expenditure in 1900-1.

3. The expenditure in 1900-1 amounted to 63,669*l.* making with that previously incurred a total of 4,048,328*l.* 17*s.* 1*d.* On the 31st March 1901 the balance remaining to be expended for the purposes of the Act was 51,671*l.* 2*s.* 11*d.*

Terminable Annuity.

4. A Terminable Annuity of 18,425*l.* 5*s.* 0*d.* was created in the year 1900-1, in respect of 156,086*l.* 10*s.* 5*d.*, being the amount which was advanced by the National Debt Commissioners in the calendar year 1900. Expenditure amounting to 285,742*l.* 12*s.* is included in the Army Appropriation Account, 1900-1, Vote 10, Sub-Head K., in respect of "Annuities payable under the Barracks Act," which were created in the years 1892-93 to 1899-1900.

Details of Expenditure.

5. It will be noticed that "Actual Expenditure" under Head 1, Construction, &c., Item, Curragh (page 3), shows a credit of 2,290*l.* 15*s.* 7*d.* as the result of the transactions in the year ended 31st March, 1901. This unusual feature in an expenditure statement is explained in general terms in a footnote to the Account. There were actual debits amounting to 20,163*l.* 3*s.* 4*d.* against the item in 1900-1, but they have been obliterated from the Account by the credit of 22,453*l.* 18*s.* 11*d.* in respect of the value of the Connellmore Brickfields, transferred under Treasury authority as a going concern to the Military Works Loan. The charge against the Loan is included in the Military Works Account for 1900-1 under Head 2, Completion of large camps. Item, The Curragh, 37,781*l.* 6*s.* 5*d.* (page 4).

Excess under Heads of Expenditure.

6. The total expenditure to the 31st March 1901 under the Heads of Expenditure 2 and 4 in Abstract Statement II. (page 2) is in excess of the sums specified in the Schedule to the Act and set out in the Statement as "Total Estimate," to the extent of 42,370*l.* 12*s.* 7*d.* and 567*l.* 0*s.* 7*d.* respectively. Under Section 6 (2) it is enacted that "there shall be no excess of any expenditure proposed by the estimate under any head in the Schedule above the amount stated for that head in the Schedule, unless there is given a joint certificate of the Treasury and Secretary of State certifying that the excess is compensated by a saving under some other head, and that the excess will not cause the total expenditure to exceed the total sum specified in the Schedule."

It has been arranged between the Treasury and War Office that the necessary certificates, covering the excesses above mentioned, shall be given when the Barracks Act Account is finally closed at 31st March 1902, there being anticipated savings on other heads sufficient to meet the excesses.

D. C. Richmond,
Comptroller General of the Receipt and Issue
of His Majesty's Exchequer, and
Auditor General of Public Accounts.

IMPERIAL YEOMANRY.

Organization and Equipment.

I.

ROYAL WARRANT.

[*Army Order 1 of 1900, issued as a Special Army Order of 2nd January, 1900.*]

Formation of Corps of Imperial Yeomanry.

VICTORIA, B.I.

WHEREAS WE deem it expedient to provide for the formation of a corps to be entitled "The Imperial Yeomanry";

OUR WILL AND PLEASURE IS that this corps shall be added to those enumerated in the schedule attached to Our Warrant of the 28th January, 1899;

IT IS OUR FURTHER WILL AND PLEASURE that officers and men of this corps shall receive such pay, allowances, &c., as are granted to Our regular cavalry, together with such capitation rates for horses, clothing, saddlery, and accoutrements, &c., and such gratuities on completion of service as may be determined by Our Secretary of State.

Given at Our Court at Windsor, this 24th day of December, 1899,
in the 63rd year of Our Reign.

By Her Majesty's Command,

LANSDOWNE.

"THE IMPERIAL YEOMANRY" — SECRETARY OF STATE'S INSTRUCTIONS ON ROYAL WARRANT OF 24TH DECEMBER, 1899.

1. The Imperial Yeomanry will be organized into battalions of four companies each, with the following battalion staff:—

- 1 lieutenant-colonel.
- 1 adjutant.
- 1 medical officer.
- 1 veterinary officer.
- 1 acting serjeant-major.

2. Each company of Imperial Yeomanry will consist of—

- 1 major or captain.
- 4 subalterns.
- 1 colour-serjeant.
- 5 serjeants.
- 1 farrier-serjeant.
- 3 shoeing-smiths.
- 1 saddler.
- 2 buglers.
- 6 corporals.
- 97 privates.

Total 121 of all ranks.

3. A distinguishing number will be allotted to each company in the order in which it is raised by the Imperial Yeomanry Committee.

4. The selection of the battalion staffs will be controlled by the War Office.

The selection of the company officers, and the composition of each company, will be controlled by the Imperial Yeomanry Committee.

5. The head-quarters of the Imperial Yeomanry will be in London.

6. The Imperial Yeomanry will be recruited from—

- (a.) Yeomanry.
- (b.) Volunteers.
- (c.) Civilians.

7. The following will be the qualifications for service :—

- (a.) Every Imperial Yeoman must enlist for 1 year, or for the war. In the event of the war being over in less than 1 year he will have the option of being discharged at once or of completing his 1 year's service.
- (b.) He must be not less than 20 nor more than 35 years of age.
- (c.) He must, before being selected, first satisfy the officer commanding a Yeomanry Regiment, or such other officer as may be appointed for the purpose, that he is a good rider and a marksman according to Yeomanry standard.
- (d.) He must be of good character.
- (e.) He must be up to the following physical standard :—Height, 5 feet 3 inches and upwards; chest measurement, 34 inches and upwards; weight, 115 lb. and upwards. No relaxation of standard will be allowed.
- (f.) He must be medically fit for active service.
- (g.) Preference should be given to unmarried men, or widowers without children. Married men and widowers with children should be accepted only in the event of an insufficient number of single men or widowers without children volunteering.

8. Imperial Yeomen will receive from date of enlistment pay, rations, and messing and other allowances of their rank as Regular cavalry soldiers. Should a married man be accepted, his family will be entitled to separation allowance.

9. On completing his period of service he will receive a gratuity of 5*l.*, in addition to any gratuity given to the troops at the end of the war.

If discharged in consequence of wounds, injuries, or disability received or contracted while on service, he will be entitled to pension in accordance with the Royal Warrant for Pay, &c., of the Regular Army.

10. A capitation grant of 25*l.* will be allowed for the supply of the following articles :—

- Clothing.
- Personal equipment.
- Horse equipment.
- Stable necessities.

And the sum of 40*l.* will be allowed to every Imperial Yeoman who brings his own horse, if the horse is accepted. A preference should, as a rule, be given to small horses. A sum will be allowed for each company to cover the cost of camp equipment. Transport will be supplied by Government or at Government expense.

11. Applications for enlistment should be addressed to Officers Commanding Yeomanry Regiments.

12. Candidates for enlistment should be furnished with copies of Army Form B 112, and their attestations will be made out on Army Form B 111.

13. Candidates for enlistment will present themselves at the head-quarters of a Yeomanry Regiment, or at such other place as they may be directed to for the purpose of being medically examined and attested.

14. In carrying out the medical examination of candidates it should be borne in mind that it is unnecessary that they should fulfil all the conditions of fitness required of a recruit enlisting for the full term of service in the Regular Army. It is sufficient that the candidate should be free from organic disease or other defect likely to prevent him from doing his work during the duration of the present war.

15. Recruits, after attestation, will be finally approved by the officer commanding a Yeomanry Regiment, or by some other officer appointed for this purpose. Third class railway fare from home to the place of enlistment will be allowed in the case of all finally accepted candidates.

16. The original attestations of all approved recruits will be kept at the head-quarters of Yeomanry brigades.

17. After the recruits have been finally approved, the officer commanding each company will make his own arrangements for its assembly.

18. All horses for the use of the force must be passed by a veterinary surgeon as workably sound, and a certificate to this effect handed to the officer commanding the company.

19. When the company assembles, the men and horses may be billeted, unless the officer commanding the company prefers to draw lodging, forage, and stable allowance at the daily rate of 6d., 1s. 6d., and 9d. respectively. Forage and stable allowance at these rates will be allowed for each horse from date of purchase.

20. The instructions laid down in the Field Service Manual, South Africa, for a Mounted Infantry Company will be followed as far as applicable.

21. All horses will be subjected to a veterinary examination 24 hours before embarkation to prevent the spread of infectious diseases.

22. Officers will be allowed to purchase Government pistols at Government prices.

23. In Ireland any of the above-mentioned duties to be discharged by officers commanding Yeomanry Regiments will be entrusted to the officer commanding at Newbridge, and the officer commanding the 83rd Regimental District, to whom candidates for enlistment should apply.

II.

[*Special Army Order, dated 4th January, 1900.*]

The following Instructions are promulgated to the Army with the approval of the Secretary of State for War :—

IMPERIAL YEOMANRY.

1. The Imperial Yeomanry Committee referred to in the Secretary of State's instructions dated 2nd January, 1900, will consist of 7 members who will deal with the following subjects :—

- (1.) General supervision.
- (2.) Finance.
- (3.) Enrolment and establishment.
- (4.) Remounts.
- (5.) Saddlery and horse equipment.
- (6.) Clothing and equipment.
- (7.) Transport and shipping.

A secretary will conduct the correspondence.

In addition to the above Committee the following appointments are made :—

- (a.) Commandant of the dépôt at Cape Town.
- (b.) Two Staff Officers to the Commandant.
- (c.) Officer-in-charge of victualling, &c., on transports.

The names of the members of the Committee and of officers selected for these appointments, are enumerated in Appendix I. (*see page 13*).

2. Officers commanding Yeomanry regiments will correspond direct on all matters concerning the corps with the secretary of the Committee, at the offices of the Imperial Yeomanry, 12, Suffolk Street, Pall Mall, London, S.W.

3. As soon as a company is formed, the Committee will render to the War Office a report, on the receipt of which an officer will be detailed to inspect the company.

4. Should any company not be up to the standard required for service in the field, it will not be allowed to proceed to South Africa.

5. When a company is passed fit for service in the field the officer commanding it will at once transmit to the War Office, through the Committee, a return on the form shown in Appendix II. (*see page 14*).

6. Candidates for enlistment residing in Ireland, may apply to Captain the Earl of Longford, 2nd Life Guards, the Castle, Dublin, or to the officers mentioned in paragraph 23 of the Special Army Order of the 2nd instant.

WOLSELEY, *Field-Marshal,*
Commander-in-Chief.

III.

[*Army Order 28 of 1900.*]

IMPERIAL YEOMANRY.

Revised instructions for the organization and equipment of the Imperial Yeomanry have been approved by the Secretary of State, and copies will be issued to all concerned.

These instructions will supersede those contained in the Special Army Orders dated 2nd January (Army Order 1 of 1900), and 4th January, 1900, which are cancelled.

ROYAL WARRANT.

Formation of Corps of Imperial Yeomanry.

VICTORIA R.I.

WHEREAS We deem it expedient to provide for the formation of a corps to be entitled "The Imperial Yeomanry";

— OUR WILL AND PLEASURE is that this corps shall be added to those enumerated in the schedule attached to Our Warrant of the 28th January, 1899;

IT IS OUR FURTHER WILL AND PLEASURE that officers and men of this corps shall receive such pay, allowances, &c., as are granted to Our regular cavalry, together with such capitation rates for horses, clothing, saddlery, and accoutrements, &c., and such gratuities on completion of service as may be determined by Our Secretary of State.

Given at Our Court at Windsor, this 24th day of December 1899,
in the 63rd year of Our Reign.

By Her Majesty's Command,

LANSDOWNE.

"THE IMPERIAL YEOMANRY" — SECRETARY OF STATE'S INSTRUCTIONS ON THE ROYAL WARRANT OF 24TH DECEMBER, 1899.

1. The Imperial Yeomanry will be administered by a Committee comprising one department of general supervision and five minor departments. All correspondence will be addressed to the Secretary of the Imperial Yeomanry, Cleveland House, St. James' Square, London, S.W. Envelopes should be marked with the subject of the enclosure in accordance with the classification shown below—

General Supervision.

Enrolment and Establishment. Interior Economy. Drill. Military Training and Instruction. Musketry. Signalling. Arms. Ammunition. Machine Guns.

Supply. Transport. Shipping. Movements. Distribution and Quartering. Barracks. Camps. Hire of Buildings and Land for Camps. Ranges. Clothing. Equipment.

Remounts.

Saddlery and Horse Equipment.

Finance.

In addition to the Committee, the following appointments have been made at the head-quarters of the corps in South Africa:—

- 1 Assistant Adjutant-General.
- 2 Deputy-Assistant Adjutants-General.
- 1 staff captain.
- 1 paymaster.

2. The establishment of the base and remount depôt in South Africa will be as follows:—

- 1 Commandant.
- 2 Deputy-Assistant Adjutants-General.
- 2 staff captains.
- 1 major.
- 2 captains.
- 2 subalterns (1 as quarter-master).
- 1 transport officer.
- 1 medical officer.
- 3 veterinary officers.
- 1 acting serjeant-major.
- 1 quarter-master-serjeant.
- 1 farrier quarter-master-serjeant.
- 6 company serjeant-majors.
- 3 company quarter-master-serjeants.
- 1 armourer-serjeant.
- 10 serjeants.
- 1 saddler-serjeant.
- 4 farrier-serjeants.
- 20 corporals (including 2 paid lance-serjeants).
- 4 shoeing-smith corporals.
- 2 saddletree-maker corporals.
- 2 saddlers.
- 24 shoeing-smiths.
- 6 buglers.
- 500 privates (including 16 paid lance-corporals).
- 22 bätmen.

3. The corps will be organized in units of battalions of four companies each, with the following battalion staff:—

- 1 lieutenant-colonel.
- 1 major (second in command).
- 1 adjutant.
- 1 quarter-master.
- 1 medical officer.
- 1 veterinary officer.
- 1 acting serjeant-major.
- 1 quarter-master-serjeant.
- 1 serjeant cook.
- 16 privates.*

4. Each company of Imperial Yeomanry will consist of—

- 1 major or captain.
- 4 subalterns.
- 1 colour-serjeant.
- 5 serjcants.
- 1 farrier-serjeant.
- 3 shoeing smiths.
- 1 saddler.
- 2 buglers.
- 6 corporals (including paid lance-serjeants at the rate of 2 per battalion).
- 97 privates (including 4 paid lance-corporals).

Total 121 of all ranks.

* 12 bätmen, 2 clerks, 2 orderlies to medical officer.

5. Each battalion, provided it furnishes two guns, may be allowed a machine-gun section, not exceeding the following strength, in addition to the establishments for battalion staffs and companies :—

1 subaltern.
1 serjeant.
1 corporal.
6 privates.
6 drivers.
2 batmen.

Total 17 of all ranks.

6. A distinguishing number will be allotted by the Committee to each company in the order of seniority of Yeomanry corps, and to each battalion in the order of seniority of the senior Yeomanry corps furnishing a company.

7. The selection of the battalion staffs will be controlled by the War Office.

8. The selection of the company officers, and the composition of each company, will be controlled by the Imperial Yeomanry Committee, subject to approval by the War Office.

9. Individuals selected for commissions, who do not already hold commissions in the Regular Forces, will be granted temporary commissions in the Army. If members of the Militia, Yeomanry Cavalry, or Volunteers, they will be supernumeraries in their corps and reabsorbed at the expiration of hostilities.

10. The Imperial Yeomanry will be recruited from—

- (a.) Yeomanry.
- (b.) Volunteers.
- (c.) Civilians.

11. The following will be the qualifications for service :—

- (a.) Every Imperial Yeoman must enlist for 1 year, or for the war. In the event of the war being over in less than 1 year he will have the option of being discharged at once or of completing his 1 year's service.
- (b.) He must be not less than 20 nor more than 35 years of age for service in the companies; for service at the base, candidates may be accepted up to 45 years of age.
- (c.) He must, before being selected, first satisfy the officer commanding a Yeomanry Regiment, or such other officer as may be appointed for the purpose, that he is a good rider and a marksman according to Yeomanry standard.
- (d.) He must be of good character.
- (e.) He must be up to the following physical standard :— Height, 5 feet 3 inches and upwards; chest measurement, 34 inches and upwards; weight, 115 lb. and upwards. No relaxation of of standard will be allowed.
- (f.) He must be medically fit for active service.
- (g.) Preference should be given to unmarried men, or widowers without children. Married men and widowers with children should be accepted only in the event of an insufficient number of single men or widowers without children volunteering.

12. Applications for enlistment should be addressed to Officers Commanding Yeomanry Regiments. Candidates for enlistment should be furnished with copies of Army Form B 112, and their attestations will be made out on Army Form B 111.

13. Candidates for enlistment will present themselves at the head-quarters of a Yeomanry Regiment, or at such other place as may be directed, for the purpose of being medically examined and attested.

14. Candidates for enlistment residing in Ireland, may apply to Captain the Earl of Longford, 2nd Life Guards, the Castle, Dublin, or to the officers mentioned in paragraph 18.

15. In carrying out the medical examination it should be borne in mind that it is unnecessary that they should fulfil all the conditions of fitness required of a recruit enlisting for the full term of service in the Regular Army. It is sufficient that the candidate should be free from organic disease or other defect likely to prevent him from doing his work during the duration of the present war.

16. Recruits, after attestation, will be finally approved by the officer commanding a Yeomanry Regiment, or by some other officer appointed for this purpose. Third class railway fare from home to the place of enlistment will be allowed in the case of all finally accepted candidates.

17. Men who, after attestation, are found "not likely to become efficient soldiers," whether on medical or military grounds, may be discharged, without reference to higher authority, by the officers competent to finally approve recruits for those forces.

The discharges in such cases will be carried out by an entry in the record of service on the third page of attestation, and each man will be furnished with a discharge certificate on Army Form B 2079.

18. In Ireland any of the above-mentioned duties to be discharged by officers commanding Yeomanry Regiments will be entrusted to the officer commanding at Newbridge and the officer commanding the 83rd Regimental District, to whom candidates for enlistment should apply.

19. After the recruits have been finally approved, the officer commanding each company will make his own arrangements for its assembly.

20. The original and duplicate attestations of all approved recruits will be kept at the head-quarters of yeomanry brigades. The attestations belonging to corps not affiliated to yeomanry brigades will be kept by the Imperial Yeomanry Committee.

21. Muster rolls of each company will be prepared and submitted to the Imperial Yeomanry Committee, where they will be retained for reference.

22. Imperial Yeomen will receive from date of enlistment pay, rations, and messing and other allowances of their rank as Regular cavalry soldiers. Any pensioner in receipt of a Chelsea pension will retain such pension while serving with the Imperial Yeomanry. Should a married man be accepted, his family will be entitled to separation allowance, which will be issued, in Great Britain by the station paymaster of the Yeomanry Regiment, and in Ireland by the station paymaster at Belfast or Naas, according as the man is enlisted at Belfast or Newbridge. The paymaster will receive the necessary information on Army Form D 418, and reports of casualties from the officer commanding the Yeomanry Regiment in Great Britain, or in Ireland, from the Officer Commanding 83rd Regimental District, or the officer commanding mounted troops, Newbridge.

The allowance to families of married men enlisted for the base depot will be paid by the station paymaster, Hounslow, who will receive Army Form D 418, and reports of casualties from the commandant of the base depot.

Service in the Imperial Yeomanry will entitle an officer or yeoman, who at the time of his joining was borne on the strength of a Volunteer corps, to be considered efficient for the year, and the Volunteer corps, will receive the Volunteer Capitation Grant accordingly.

23. In addition to any gratuity given to the troops at the end of the war, an Imperial Yeoman will receive, on completing his period of service, a gratuity of 5*l*.

Men discharged in consequence of wounds, injuries, or disability received or contracted while on service, will be entitled to pension in accordance with the Royal Warrant for Pay, &c., of the Regular Army.

24. A capitation grant of 25*l*. will be allowed for the supply of the following articles:—

Clothing.
Personal equipment.
Horse equipment.
Stable necessities.

And the sum of 40*l*. will be allowed to every Imperial Yeoman who brings his own horse, if the horse is accepted. Officers will be allowed 40*l*. for each of two horses. A preference should, as a rule, be given to small horses. The sum of 17*l*. will be allowed for each company to cover the cost of camp equipment. Transport will be supplied by Government or at Government expense.

25. When the company assembles, the men and horses may be billeted, unless the officer commanding the company prefers to draw lodging, forage, and stable allowance at the daily rate of 6*d*., 1*s*. 6*d*., and 9*d*. respectively. Forage and stable allowance at these rates will be allowed for each horse from date of purchase.

26. Officers will be allowed to purchase Government pistols at Government prices.

27. Arms, ammunition, and tents will be supplied to the Imperial Yeomanry on demand at the public expense in the following proportions:—

Arms.

Pistols, Webley, complete—one for each acting serjeant-major, quarter-master-serjeant, farrier quarter-master-serjeant, saddler-serjeant, farrier-serjeant, serjeant-cook, armourer-serjeant, bugler, and driver.

Rifles, M.L.E., complete—one each for all other ranks.

Ammunition.

50 “cartridges, small-arm, ball, .303-inch, cordite, Mark IV.,” per rifle (for practice prior to embarkation—not to be taken on board).

25 “cartridges, small-arm, ball, .303-inch, cordite, Mark IV.,” per rifle, for 25 per cent. of the strength (for practice during the voyage—none of this is to be landed in South Africa, each commanding officer being held responsible that the whole is expended on the voyage).

24 “cartridges, small-arm, ball, pistol, Webley,” per pistol (for practice on the voyage).

360 “cartridges, small-arm, ball, .303-inch, cordite, Mark II.” per rifle; and,

36 “cartridges, small-arm, ball, pistol, Webley,” per pistol, will be issued prior to embarkation and taken on board ship for use in South Africa.

Tents.

"Tents, circular, single linen, complete," will be issued in the proportion laid down for cavalry on active service in Section II., Part II., Equipment Regulations.

Issues on prepayment.

1 pistol, Webley, complete, 1 per officer	}	If required.
36 "cartridges, small-arm, ball, pistol,		
Webley," per officer	}	Per 100 rifles.
3 gallons rifle oil		
$\frac{1}{2}$ gallon Rangoon oil		

28. Articles of clothing, camp equipment, and all other stores will be obtained by the Imperial Yeomanry, and paid for out of the capitation allowance.

29. All horses for the use of the force must be passed by a veterinary surgeon as workably sound, and the certificates forwarded to the officer in charge of the Remount Department.

30. All horses will be subjected to a veterinary examination 24 hours before embarkation in order to prevent the spread of infectious diseases.

31. The instructions laid down in the Field Service Manual, South Africa, for a Mounted Infantry Company will be followed as far as applicable.

32. As soon as the company is formed the officer commanding the Yeomanry Regiment will report to the General Officer Commanding the District that the company is ready to be inspected. In the case of special corps this report will be made by the Imperial Yeomanry Committee. The General Officer Commanding will then cause the company to be inspected, and will report to the War Office whether or not it is fit for service in South Africa.

33. Should any company not be up to the standard required for service in the field, it will not be allowed to proceed to South Africa.

34. When a company is passed fit for service in the field the officer commanding it will at once transmit to the War Office, through the Committee, a return on the form shown in the Appendix.

35. On the departure of a company from the United Kingdom, the Yeomen composing it will be supernumeraries in their corps, if they joined for service from the Militia, Yeomanry Cavalry, or Volunteers.

APPENDIX I.

The following officers form the Imperial Yeomanry Committee, and will deal with the subjects stated against their names:—

Name of officer.	Department.
(1.) Honorary Colonel A. G. Lucas, Loyal Suffolk Hussars	General supervision.
(2.) Honorary Lieut.-Colonel E. W. Beckett, Yorkshire Hussars.	Finance.
(3.) Honorary Colonel Viscount Valentia,* Oxfordshire Yeomanry.	Enrolment and Establishment.
(4.) Colonel T. A. St. Quintin, retired pay	Remounts.
(5.) Honorary Colonel the Earl of Lonsdale, Westmoreland and Cumberland Yeomanry.	Saddlery and horse equipment.
(6.) Captain the Hon. W. L. Bagot, Reserve of Officers ..	Clothing and equipment.
(7.) Colonel the Right Hon. Lord Harris, G.C.S.I., G.C.I.E, Royal East Kent Yeomanry.	Transport and shipping.

M. John Eaton Smith is Secretary to the Committee.

The following appointments have been made:—

Lieut.-Colonel H. Graham, Reserve of Officers	Commandant at Baso Dépôt, Cape Town.
Sir Simeon Stuart, Bart., late 5th Dragoon Guards ..	} Staff Officers to Commandant.
Major E. W. Baird, late 10th Hussars	
Captain R. N. S. Lewin, Duke of Cornwall's Light Infantry.	Officer in charge of victualling, &c., on transports.

* Viscount Valentia will be succeeded, after embarkation, by Colonel the Hon. H. G. L. Crichton, Reserve of Officers.

APPENDIX II.

COMPOSITION OF COMPANY, IMPERIAL YEOMANRY.

Return to be rendered by the Officer Commanding each Imperial Yeomanry Company to the Inspecting Officer.

Name.	Previously served in Yeomanry.		Now serving in Yeomanry.		Previously served in Volunteers.		Now serving in Volunteers.		Previously served in Army.			Previously served in Militia.			Previously served in Colonial Corps or Police in the United Kingdom or in the Colonies.	Qualifications of civilians.			Shooting.		Qualifications in horsemanship.

[Cd. 803.] Price 2s.

P R E F A C E .

THIS report on the organisation of the Imperial Yeomanry, has been drawn up in accordance with the instructions of the Secretary of State for War, contained in the following letter :—

“ 079/10/1426.

War Office,
London, S.W.
24th May, 1900.

“ SIR,

“ I am directed by the Marquess of Lansdowne to inform you that
“ as the work undertaken by the Committee of the Imperial Yeomanry is
“ now practically complete, his Lordship considers that the present time
“ offers a favourable opportunity for making a full report on the general
“ working of the Committee, showing in particular the difficulties which
“ were encountered, their causes, and the methods of organisation
“ adopted ; together with any defects of system which actual practice
“ may have revealed.

“ Such a report would be valuable for purposes of Imperial Defence,
“ and could not fail to be a record of the highest interest, especially if in
“ its survey it included full information as to the Base Dépôt at Cape
“ Town.

“ The report on this Dépôt should be founded on a careful observa-
“ tion of its working, conducted on the spot.

“ Lord Lansdowne wishes me to enquire whether you would be willing
“ to report as suggested, and to proceed to South Africa as soon as
“ convenient, for the purpose of local enquiry, and investigation.

“ His Lordship is of opinion that your presence at the Base Dépôt
“ would be of public advantage, in view of the necessity of dissolving by
“ degrees, but without any undue delay, an organisation, which at
“ present, controls an enormous accumulation of public stores in
“ South Africa.

“ I am, etc.
“ (Signed) R. KNOX.”

COLONEL A. G. LUCAS,
D.A.G., I.Y.

It is divided into three Sections, viz. :—I. Home Organisation ; II. South Africa ; III. Yeomanry Force of the future.

The Proceedings of the Meetings of the Imperial Yeomanry Committee, and the daily Orders, have been printed, copies of which have already been sent to the War Office, and reference to them will be found in this report.

Copies of all Army Orders, Royal Warrants, and the more important War Office circular letters, referring to the Imperial Yeomanry, from the date of its formation, are printed in the Appendices of this report.

The report of the Home organisation is divided into chapters, corresponding with the subjects mentioned in Special Army Order of the 4th January, 1900, with which the Committee was authorised to deal. A brief notice of the Imperial Yeomanry Hospital, is added, which, however, was organised quite independently of the Imperial Yeomanry Committee.

CONTENTS.

Section I.

HOME ORGANISATION.

Section I.

HOME ORGANISATION.

CHAPTER I.

ORGANISATION, AND GENERAL SUPERVISION.

1. The origin of the formation of the Imperial Yeomanry, seems somewhat doubtful, **Origin.** but it is apparent that previous to the formation of the Committee, as authorised by the War Office, several leading, and influential, members of the Yeomanry Cavalry, were doing all in their power to obtain the sanction of the Military authorities, to the utilisation of some portion of the Force, on field service.

2. The present Report has only to deal with the operations of the Imperial Yeomanry Committee and to define the duties conducted by it. Yet it is desirable, to show as far as possible, what action was taken towards the end in view, before the Committee was formed.

3. The present Deputy Adjutant-General of the Force had an interview with Major-General Borrett, Inspector-General of Auxiliary Forces, in the second week of October, 1899, and proposed that a composite regiment of Yeomanry should be mobilised at once for service in South Africa, but the answer was that there was no intention of employing the Yeomanry. Following on this interview, on the 14th November, he further addressed the War Office, and asked whether there was any chance of forming a composite regiment such as he had suggested in October. He pointed out that this would be of great service to the Yeomanry, and said he was sure they would do as well as the Cape and Natal Volunteer Horse had already shown they could do, in the field. He suggested that 10, to 15 men, should be drawn from each Yeomanry Corps, that each man should, if necessary, supply his own horse, and that none but first class shots, and men recommended by their Commanding Officers, should be accepted.

The reply received on the 28th November, 1899, was that "there was no intention at present, of utilising the services of the Yeomanry in South Africa." (Appendix No. 2.)

4. From a statement supplied by Lord Lonsdale, which forms Appendix No. 1 to this Report, it appears that he commenced arrangements for a force of 500 men, early in November, 1899, and had under consideration with Lord Chesham, the question of raising a specially equipped force of 1,000 men about the same time. The Adjutant-General, War Office, appears however, to have considered that the services of such a force would not be accepted, although towards the end of the following month this decision was reconsidered.

5. Eventually, the War Office decided to raise a force of 3,000 Imperial Yeomanry, which strength was at later dates, increased, to 8,000, and finally to 10,500 men.

6. On the 18th of December, 1899, a conference was held at the War Office; and on the 19th, a small *ad interim* Committee was formed, consisting of— ***Ad interim*
Committee.**

Lord Chesham, Lieut.-Colonel, Bucks Yeomanry Cavalry;
Viscount Valentia, Lieut.-Colonel, Oxford Yeomanry Cavalry;
Colonel A. G. Lucas, Suffolk Yeomanry Cavalry;

and work was commenced on the 22nd December at 12, Suffolk Street, S.W. It is not proposed in this report to deal in detail with the work of the Committee previous to the Army Order of the 4th January, as it was necessary first to appoint a staff and get suitable offices, and in the great pressure of work during the first few days, and the totally inadequate staff and accommodation, it was impossible to keep proper and reliable records.

7. His Royal Highness the Prince of Wales, at a very early stage of the organisation, consented to become Honorary Colonel of the Force, and it is not too much to say, that from the very commencement, the great interest which he displayed in the welfare of the Imperial Yeomanry, including his wish to inspect as many of the Companies as possible, before their final departure, had a great deal to say to its popularity, and general success. **Prince of
Wales as
Honorary
Colonel.**

Formation of Committee.

8. An Army Order of 4th January, 1900, sanctioned the formation of an Imperial Yeomanry Committee, selected as representatives of the whole force, the officers named below being (with the exception of Colonel T. St. Quintin and Captain the Hon. W. L. Bagot) all Yeomanry Commandants. The subjects with which they dealt were as follows :—

Hon. Colonel A. G. Lucas, Loyal Suffolk Hussars	General Supervision.
Hon. Lieut.-Colonel E. W. Beckett, M.P., Yorkshire Hussars	Finance.
Hon. Colonel Viscount Valentia, Oxfordshire Yeomanry	Enrolment and Establishment.
Colonel T. A. St. Quintin	Remounts and Saddlery.
Hon. Colonel the Earl of Lonsdale, Westmoreland and Cumberland Yeomanry	
Captain the Hon. W. L. Bagot, Reserve of Officers	Clothing and Equipment.
Colonel the Right Hon. Lord Harris, G.C.S.I., G.C.I.E., Royal East Kent Yeomanry	Transport and Shipping.

Colonel Viscount Valentia, and Captain the Hon. W. L. Bagot, subsequently proceeded on service to South Africa, and they were succeeded by Colonel the Hon. H. G. L. Crichton, Reserve of Officers, and Sir Robert Baillie, Bart., respectively.

All these officers, with the exception of Sir Robert Baillie, and Captain Bagot, were gazetted to the temporary rank of Colonel in the Army, as was also Colonel Lord Chesham, who proceeded to South Africa in command of the Bucks Battalion of Imperial Yeomanry. As already shown, Lord Chesham took a leading position in the initial formation, and organisation, of the force.

Personnel.

9. The branch connected with general supervision was under Colonel A. G. Lucas, D.A.G., who was also President of the Committee. He was assisted, at first, by Major R. B. Colvin, Loyal Suffolk Hussars, and Captain W. Knight (I.S.C.), and after January 18th, after their departure for South Africa, by Colonel T. Deane, C.B. (I.S.C.)

Duties.

10. A considerable portion of the work of this branch, was carried on in consultation with the Committee, which met daily for some months to consider the various questions which had to be put before it. Agenda were prepared for each day's meeting, showing the subjects to be discussed; and the proceedings of the Committee were subsequently recorded, and printed, copies being sent to the War Office for information. A very large number of callers had to be interviewed, and much correspondence in connection with the more important resolutions, and rulings of the Committee had to be prepared. There was also a good deal to do, in connection with generally supervising, and passing orders on, the most important questions, arising with regard to the work of each branch. All the more important correspondence in connection with the decisions of the Committee, was conducted by this branch of the office, other questions being dealt with by the sections concerned.

First Committee meeting.

11. The first Committee Meeting of which the proceedings were formally recorded was that of January 15th. Several meetings were however held prior to that date, and the decisions arrived at will be found in either the Committee's printed Proceedings, Yeomanry Orders, or in the circular Memoranda issued to Yeomanry Corps. Many of these decisions were not arrived at until the War Office had been addressed, through the Deputy Adjutant-General's Section.

Organisation.

12. The main consideration, was the enrolment, preparation and despatch, in the most rapid way possible, of a body of Imperial Mounted Yeomen, with all their equipment complete. It was therefore essential to despatch company units, as soon as sea transport could be obtained for them. In consequence of this urgency, Battalions could not be despatched as a whole, complete, nor could they be composed of Companies, the numbers of which ran in exact sequence. Some Companies, from various causes, as explained in Chapter IV, were ready before others, which had commenced enlistment before them, and their departure could not be delayed. The rivalry, and competition shown by the various counties, to get their units ready for despatch was very marked. A list of the first 25 companies ready to embark will be found in Appendix No. 23.

*Base and Remount Depot.***Necessity for it.**

13. The early attention of the Committee, was drawn to the necessity for the formation of a Base, and Remount Depot, at the Cape. This was required for the receipt of stores

and equipment, and their transmission to the front. It was also considered advisable that the Remount Section, should be responsible for the receipt, care, and distribution of the horses which had either been purchased regimentally, or by the Yeomanry Remount Agency. It was realised that, on a thoroughly sound organisation of such depôts, much of the efficiency, and comfort, of the force, would necessarily depend.

14. Lieut.-Colonel H. Graham, Reserve of Officers, formerly of the 16th Lancers, the Command-officer selected by the Committee for the appointment of Commandant of the Base Depôt, ^{ant.} having been consulted, as to the measures he thought necessary for its formation, submitted on January 9th certain recommendations which were as follows:—

(1) That the Depôt be administered on the lines generally of the old Cavalry Depôt at Canterbury. Recom-
mendations
as to site,
&c.

(2) Details of Staff (these were modified, see Army Order No. 28 of 1 February, 1900).

The officer commanding, however, recommended a commissariat officer, as the Depôt would be in camp some miles from Cape Town. This was not sanctioned by the Imperial Yeomanry Committee.

(3) That all ranks be specially sent out on the clear understanding that their duties would be with the Base Depôt, and that they would not be allowed to go to the front. He continued:—

“The Depôt will not only have to make arrangements to receive the various companies on their way to the front, but to complete the training of half-trained horses, to fit their saddlery, and to see that the horses were properly exercised.

“Steps should be taken to see that proper permanent buildings, or sheds, are provided where the stores can be put in safety.”

Some of the first points to be arranged in connection with the Base Depôt were:—

- (a) Early allotment of site for camp near (within driving distance of) Wyneburgh.
- (b) Tents to be allotted on Cavalry basis.
- (c) Tenders invited for corrugated iron houses for permanent staff.
- (d) Food rations (biscuits and tinned meat).
- (e) Base troops all to go on one ship.
- (f) Carbines or rifles (30) with buckshot ammunition for sentry work.
- (g) Base squadron to take out camp equipment and tools.

These recommendations received full consideration, but were thought not to be sufficient. The Committee desired that the organisation of the Base, and Remount Sections, should follow that laid down by the War Office, for war establishments, instead of that of an obsolete Cavalry Depôt.

15. The Committee thereupon, brought to the notice of the War Office the necessity for the formation of Base and Remount Depôts in South Africa, of sufficient size for organising the receipt and storage of clothing, equipment, vehicles and, to some extent, the remounts of units arriving from England, urging that the Depôts should be in working order before the bulk of the men, and horses arrived. The Committee offered to arrange for all labour, and transport at the Base and Remount Depôts, the expenditure being paid by Government. The War Office then sanctioned a small establishment of 25 warrant and non-commissioned officers and artificers for the Base, which being thought quite insufficient, a further increase was applied for. It was suggested that the age limit for men recruited should be raised to 45 years. The officers and non-commissioned officers applied for, would, it was proposed, form a nucleus for the necessary *personnel*, a portion of which it was considered might perhaps be obtained locally. The War Office, in reply, sanctioned an increased establishment for the Depôt, including 160 privates; the age limit being advanced to 45 years, and the men to be given to understand, that *they were not to go beyond the Base*. Establish-
ment.

W.O.
079/10/748.
I.Y. No. 12.

W.O.
079/10/245.

I.Y. No. 59.

The Committee then represented to the War Office that Tables V, VI and XLI of Section II, “War Establishments,” showed the number of men needed for a Base Depôt, a Remount Depôt, and advanced Depôts for a force in the field. It was urged that it was desirable to organise a Base Depôt at once, with advanced Depôts, later, if necessary; and that in addition, a Remount Depôt at the base was required, and possibly advanced Remount Depôts later on. The regulations in regard to Remount War Establishments in the Field, did not lay down details regarding the supply of line gear, clothing, office, veterinary establishment and other details, but these requirements were made out from the Field Service Manuals, India. It was recommended that the pay should be that allowed for Remount Establishments by the War Office. The Committee pointed out, that if the casualties

amongst the horses were reckoned so low as only 5 per cent. per mensem, a reserve of at least 1,000 should be arranged for at the Cape, and that establishments therefor, on the scale laid down in Table XLI, Section II, page 121, "War Establishments," were required. Taking Tables VI and XLI "War Establishments" together, a considerable increase of *personnel* was therefore still necessary for the Base and Remount Depôts.

The War Office replied that no officers were available, and the Imperial Yeomanry Committee were asked to make the best arrangements possible. The War Office however, sanctioned an increase in the number of men to 250. A division of the *personnel* into Base, and Remount Depôts, was considered unnecessary, and, as the advance would be along lines of railway, the formation of advance depôts was not apparent, at once. If such advanced depôts became necessary, the War Office considered, they would be so for the whole force, of which the Imperial Yeomanry would be a part, and not separately.

W.O.
079/10/578.
W.O.
079/10/615.

Increase in
Establish-
ment.

16. The Committee then represented that the strength of the Imperial Yeomanry Force having been raised to 10,000 men, a reconsideration of the numbers allowed for the Base and Remount Depôt had become necessary. For the present it was proposed only to arrange for 1,000 reserve horses, and as these would be mostly unbroken, it was shown that they would require some training and supervision. The number of men for the Base and Remount Depôts sanctioned to date was only 250, these at four horses per man would barely suffice for 1,000 horses. A distinct and separate division of duty, and responsibility, between the Base Company and the Remount Depôt, was urged, following the lines of the War Regulations on the subject, on which the Committee considered they could not improve; they however proposed to authorise the entertainment of Cape boys, or local labour if procurable, as found necessary for the Remount Depôt, utilising the establishments already sanctioned for the work of the Base Company, an increase of establishment being recommended, if afterwards found necessary.

I.Y.
No. 67 E.

The War Office replied that the necessity for the provision of a Base Depôt, additional to, and separate from, the Remount Depôt, was not apparent. The wants of Battalions of Imperial Yeomanry could, it was thought, be met from the Regular Base, and Advance Depôts, on the Lines of Communications. A Remount Depôt at the Base was necessary owing to the fact that the organisation for providing horses for the Imperial Yeomanry, was different from that of the Regular Army, and therefore, the work of the present staff which had been allowed for the combined Base and Remount Depôts would be almost entirely confined to remounts. The number of men allowed, however, was increased to 500.

W.O.
079/10/774.

Division of
officers and
men

17. After further discussion, the establishments for the Base, and Remount Depôt, were ultimately settled as laid down in the Secretary of State's Instructions issued with Army Order 28 of February 1st, 1900, which establishment was, however, on the representation of the Officer Commanding Base Depôt subsequently increased by four officers, viz., one captain and three subalterns, who were gazetted on June 2nd. The total establishment was divided between the Base and Remount Sections as follows:—

—				Officers.	N.C.O.'s and Men.	Total.
Base Section		7	62	69
Remount Section		8	546	554
Total		15	608	623

The Committee arranged that the responsibility for the allotment to each of these two sections, of the officers, non-commissioned officers and men, as they arrived from England, was to be solely at the discretion of the Commandant of the Base Depôt at Cape Town.

Remount
Depôt
abolished.

18. The War Office subsequently decided to take over all the remounting arrangements of the Imperial Yeomanry, and to supply the remounts required through its own agency. This decision involved the disestablishment of the Remount Section, which was taken over by the Military Authorities, and gradually absorbed in the Imperial Remount Department at the Cape.

It is necessary to refer somewhat in detail to these arrangements, in view of what was ultimately found necessary at the Base, which will be found explained in Section II of this Report.

Rhodesian Force.

19. The organisation of the 'Rhodesian Force' was considered by the Committee in Rhodesian communication, personally and otherwise, with the War Office. Much of the correspondence Force. regarding this force, was conducted in the Deputy Adjutant-General's Section, and a full account of the measures taken will be found in Chapter II of this Report.

Dissolution of the Committee.

W.O.
079/10/
1426.

20. By special Army Order of May 25th, it was announced that as the work for Dissolution which the Imperial Yeomanry Committee had been formed was now successfully accom- of the plished, the Committee was dissolved. The Secretary of State's acknowledgment of the Committee work done by the Committee was expressed in very high terms, as was also the testimony of Lord Roberts and his Generals to the excellence of the material of which the force was composed, and to the brave and faithful service which it had rendered. The thanks of the Secretary of State will be found in Appendices Nos. 4 and 14.

W.O.
079/10/
1426.

21. On the Committee being dissolved, Colonel Lucas, Deputy Adjutant-General of Report. the Force, at the request of the War Office, as shown in the Preface of this volume, undertook the compilation of a complete report on the general working of the Committee, together with full information as to the Base Depot at the Cape, *vide* War Office Letter in Section II. He was accompanied to South Africa by Colonel T. Deane, C.B. (u.s.l. Indian Staff Corps), who had had lengthened experience in the military secretariat of the Government of India, and as director of the Army Remount Department in that country, also by Lieutenant W. G. Lucas of the Loyal Suffolk Hussars. During his absence, the heavy work of the Finance Section, in addition to much other current work, was undertaken by Colonel E. W. Beckett, M.P., Yorkshire Hussars, who conducted these duties with the greatest ability. He was assisted by Colonel J. Davidson (I.S.C.) whose services were of much value.

Appreciation of Services.

22. The Deputy Adjutant-General desires to have placed on record, his highest appreciation of the work accomplished by his colleagues of the Committee, to whose endeavours the successful organisation and despatch of the force is mainly due.

23. Colonel Viscount Valentia (Oxfordshire Yeomanry) until his departure for South Colonel Africa, did much to forward the movement, and was untiring in his endeavours to make it Viscount Valentia. a success.

24. Colonel Lord Chesham previous to his taking up the command of a Yeomanry Colonel Brigade in the field, may be said to have been constantly engaged on the project of getting Lord Chesham. the Yeomanry employed on active service, and in the organisation of the force.

25. Similarly, Colonel the Earl of Lonsdale (Westmorland and Cumberland Yeomanry) Colonel the Earl of Lonsdale. had much to do with the inauguration of the force. Subsequently, his work in obtaining remounts, saddlery, horse equipment, and vehicles, was of the highest value. In such matters his Lordship is a specialist, and the Committee was therefore fortunate in having him to undertake such arduous work, until relieved of the remount portion by Colonel T. St. Quintin, a well-known authority on army horses, and their purchase.

26. Colonel the Right Hon. Lord Harris, G.C.S.I., G.C.I.E., had charge of the highly Colonel responsible work of transport and shipping—Quartermaster-General's Section—and it is Lord Harris. almost needless to say, that with his great administrative experience, the best results were obtained. During his tenure of office, he obtained the services of Rear-Admiral Sir John Hext, K.C.I.E., and Lieut.-General A. R. Badcock, C.B., C.S.I. (I.S.C.), as his assistants, and their experience in shipping, and Quartermaster-Generals' work, respectively, proved of high value.

27. To Colonel the Hon. H. G. L. Crichton (Reserve of Officers) fell the heavy work Colonel of the Adjutant-General's Section—enrolment, establishments, &c. He had to deal with all the the Hon. subjects shown in Army Order No. 28, which forms Appendix No. 9, and the success which H. G. L. attended his efforts, is most apparent by the comparatively rapid manner in which the Crichton. service Battalions were organised for the field. He was ably assisted by Major H. Le Roy Lewis (Hants Yeomanry) and Captain L. Sandwith (8th Hussars) previous to their departure for South Africa, when their duties were undertaken by Colonel J. Davidson (I.S.C.).

Colonel
E. W.
Beckett.

28. Colonel E. W. Beckett, M.P., who had charge of the Finance Section, since its commencement, inaugurated a system of accounts which proved in practice, all that could be desired. Simplicity, and clearness, were secured by this system, and although the work was at times exceedingly heavy, the accounts and estimates were always up to date. The official auditors under him were Messrs. C. F. Kemp, Sons, and Company, who were most ably represented by one of their distinguished firm—Mr. G. E. Sendell.

Captain
the Hon.
W. L.
Bagot.
Sir Robert
Baillie,
Bart.

29. Captain the Hon. W. L. Bagot (Reserve of Officers) was succeeded, in the Clothing and Equipment Section, by Sir Robert Baillie, Bart., who by his untiring energy, good method, and business capacity, proved a valuable acquisition to his departmental Head, Lord Harris, under whom the important work of clothing, and equipment, came, in addition to that, of transport and shipping.

India Store
Depôt.

30. Much of the success of the supply of clothing, and equipment, as well as for their methodical despatch, is due to the Secretary of State for India, under whose orders, the valuable experience of the officials of the India Store Depôt, was placed at the disposal of the Committee, for the inspection, packing, and despatch of the large amount of stores sent to the Base.

Messrs.
Wernher,
Beit and Co.

31. The munificent donation of Messrs. Wernher, Beit and Co., as well as of others will be referred to under the Finance Section of this Report. The Deputy Adjutant-General has, however also, to here refer to the assistance received from Lord Rothschild, in procuring horses from Australia, to Mr. Ogilvie in matters connected with transport, and shipping, and to Mr. Fitzpatrick in obtaining horses in South Africa. The Imperial Yeomanry Committee have already conveyed their acknowledgments to them.

32. Mr. J. Eaton Smith, as Secretary, proved a very energetic and useful official, and conducted the work assigned to him in a satisfactory manner.

Colonel
Deane.

33. Colonel Deane, C.B., I.S.C., as Chief Staff Officer, held a very responsible position, not only assisting in the general supervision, but also in preparing the agenda, keeping and compiling the minutes of the Committee's meetings and proceedings, throwing his whole energy into the work, and by his painstaking and methodical system added very greatly to the success of the organisation, and I desire to bring his name to special notice for recognition of his valuable services.

CHAPTER II.

ENROLMENT AND ESTABLISHMENT.

34. The following has been the *personnel* of the department which dealt with *Personnel*: enrolment and establishment, and was generally known as the "Adjutant-General's officers. Section," the department having at its head an Assistant Adjutant-General.

Colonel Viscount Valentia, (Oxford Yeomanry), was Assistant Adjutant-General from December 18th, 1899, up to January 20th, 1900, vacating the appointment on his approaching departure for South Africa on January 27th.

Captain the Hon. W. L. Bagot from December 18th to January 20th, as Assistant to the Adjutant-General, but, shortly after, was appointed to the Equipment Branch.

Captain L. Sandwith, 8th Hussars, from the commencement of the movement to January 25th, 1900.

Colonel the Hon. H. G. L. Crichton (reserve of officers), who had been engaged from December 29th, 1899, in establishing a Remount Dépôt at Southampton, succeeded Colonel Viscount Valentia (on the latter's approaching departure for South Africa) on January 20th, 1900, and had charge of the office until the Committee was dissolved on May 25th, 1900, when he proceeded to take command of the Portsmouth Volunteer Brigade encamped at Bisley.

Major H. Le Roy Lewis, Hants Carabiniers, who succeeded Captain Sandwith, as Assistant to the Assistant Adjutant-General from January 18th to March 17th, on which date he joined the 15th Battalion as second in command prior to sailing for South Africa.

Colonel J. Davidson (Indian Staff Corps), who succeeded Major H. Le Roy Lewis on March 17th.

35. This branch dealt with a great variety of subjects, all more or less connected with enrolment and establishment shown in Appendix No. 24. These are referred to in alphabetical order, in the following paragraphs:—

Addresses of Letters, &c., South Africa.

36. It was ordered that all letters addressed to officers or men of the Imperial Yeomanry in South Africa should give the following particulars:

Number (for all ranks except officers).

Rank and name.

No. of Company, or whether belonging to Base Dépôt or Headquarter Staff of a battalion, in which case its number to be stated.

Mode of
addressing
letters to
men in field
and
prisoners.

Letters, parcels, &c., for prisoners were to be addressed as laid down in Imperial Yeomanry Order 1 of April 26th.

Appointment of Officers.

W.O
079/10/364.

37. The Imperial Yeomanry Committee made a general rule, that no officer would be accepted for the Imperial Yeomanry, who had not had previous military training either in the Army, or Auxiliary Forces. It was decided by the War Office, that officers of the reserve, or those of the Regular Army on half pay, Militia Officers, or Volunteer Officers might be accepted for the Imperial Yeomanry, but no officer of the British or Indian Army on full pay. The Mobilisation Army Board, however, ruled that officers of the Regular

Previous
Military
experience.

Militia officers. Army could not be spared, but officers of the Reserve might join the Force. It was ruled that all gentlemen not holding commissions in the militia or reserve, nominated for commissions, should be attested and would receive acting commissions, and militia Officers would be seconded in their regiments. Officers who resigned their commissions in the embodied militia "at the present juncture" (save under very exceptional circumstances), were not eligible for any military employment. It was ruled that Yeomanry Adjutants were not to be allowed to proceed to South Africa. W.O. 079/10/371.

Yeomanry adjutants. W.O. 079/10/465.

First appointments. 38. The first appointments gazetted were those of the "London Gazette" of January 9th, 1900, and in this Gazette H.R.H. the Prince of Wales, K.G., &c., was nominated Honorary Colonel of the Corps. The monthly Army List of February, 1900 (page 179), contains the first entry of the Imperial Yeomanry consisting of 21 names.

Selection. 39. Appointments of officers to companies were left as much as possible to battalion commanders, or Yeomanry regimental commanders, but the selections of officers as battalion commanders, and seconds in command, were retained in the hands of the Yeomanry Committee. Recommendations for other battalion staff appointments, such as quartermaster, machine-gun commander, medical officer, veterinary surgeon, were submitted by battalion commanders for the approval of the Imperial Yeomanry Committee. Recommendations for all appointments when approved by the Committee, were transmitted to the Under-Secretary of State for War (Military Secretary's Division). Books were kept in the Adjutant-General's section, in which were entered the names of any officers who were candidates for appointment. These were freely consulted by officers, who were interested in organising companies.

Supply of Officers limited. 40. By about April 1st, when the 20 battalions (minus two companies, 64th and 80th) had been organised, it was found that the supply of officers with the necessary qualifications was running short. No fully qualified veterinary officer could be obtained for the XVIIth battalion. It was difficult to obtain medical officers; and, though there were several officers still available on the Committee's list of candidates for commandant and second in command of battalions, there were few who could have been recommended as captain or lieutenant.

Vacancies in the field. 41. After May 24th, 1900, no names were submitted by the Committee to the War Office, for the commissioned ranks, it being considered desirable that any vacancies should be filled up in South Africa, on the recommendation of the Field-Marshal Commanding the Forces there.

Arms, Ammunition and Tents.

Arms. 42. The arms authorised per company were :—
Rifles, 113.
Revolvers, 3.
Cavalry Swords, 3.
and for a battalion staff :—
Rifles, 14.
Revolvers, 3. W.O. 079/10/133.

43. Enrolled volunteers possessing rifles, were permitted to take their rifles if they joined the Imperial Yeomanry, arms to be charged to the unit to which the men joined. W.O. 079/10/216.

Revolvers. 44. All arms were to be marked in the usual manner and three (3) gallons of rifle oil and $\frac{1}{2}$ gallon of Rangoon oil (being a supply for six months for 100 rifles) were issued. Officers were allowed to buy revolvers with 36 rounds of ammunition, at Government prices, indenting for them on the Director-General of Ordnance at the War Office. W.O. 57/Cape/7337.

Ammunition. 45. Mark IV ammunition was allowed for rifle practice before embarkation, most precise orders being given that none of this mark was to be taken to South Africa, as Mark II only was permitted during the present hostilities. It was also forbidden to take mushroom pattern bullets for revolvers to South Africa. This ammunition of all ranks for revolvers "must be made up as a solid bullet." This cancelled a former decision (War Office, No. 179/10/619 of February 10th, 1900), that the authorities did not intend to interfere in the question. W.O. 079/10/133. W.O. 57/Cape/7944.

Battalion Staff. 46. Arms for the staff of battalions, were to be indented for through the Yeomanry Corps to which they were attached.

Tents, &c 47 Demands for arms, ammunition, and tents were to be sent to the Army Ordnance Department by commanding officers of companies. Instructions regarding these and ammunition are contained in Appendix No. 22.

48. Rifle slings being necessary, though not supplied by the State, were supplied from the capitation grant. Originally, it was proposed to supply slings for only one-third the number of rifles, but eventually they were issued to the whole force.

Attestations.

49. In September, 1900, it was ruled that the discharge documents of men of the Imperial Yeomanry were to be sent to the Assistant Adjutant-General for Cavalry, 41, Pall Mall, S.W., all references on Army Forms and books of regulation to the Officer Commanding 2nd Cavalry Brigade, as the officer in charge of cavalry documents, to be amended accordingly (*see* Appendix No. 18). This amended Army Order 115 of May, and Imperial Yeomanry instructions, issued with Army Order 28 of February, 1900.

Base Depot at Home.

50. The organisation of the Base Depôts, is dealt with under Chapter I, but their establishments, method of enrolment, &c., are here detailed.

51. The Commissioned Staff for the Base and Remount Depot having been approved, the Imperial Yeomanry Committee, with a view to raising and equipping as soon as possible the establishments required, early in January, opened a "Home" Base Depot Office, and appointed Captain Derriman to the charge thereof. Major H. Le Roy-Lewis, J.P., was appointed Approving Officer, and continued to perform this duty, until 17th March, 1900, when he embarked for South Africa. Dr. Hastings Stewart of 8, Albany Court Yard, Piccadilly, W., was appointed medical examining officer for the Base Depot on the 7th February.

52. Captain Derriman at once set about arranging for the supply of all clothing, necessities and equipment requisite for the men, as enlisted, and commenced recruiting about the 18th January at Cleveland House, St. James's Square, S.W. By the end of the same month he had enlisted, clothed, and fully equipped, the major portion of the senior non-commissioned officers required for the Base and Remount Depôts to be established at Cape Town, and, as it was essential that these depôts should be formed, and in working order as expeditiously as possible, Captain Derriman with 23 of all ranks under his command was despatched to South Africa on the 2nd February in the ss. "Monteagle," the commandant and other officers appointed for duty with the Base and Remount Depot having at this time sailed for the Cape. As matters subsequently turned out it would have been better had they completed and taken out all establishments with them.

53. Captain Stafford succeeded Captain Derriman, in charge of the "Home" Base Depot Office, to which charge Major Moore and Captain Calverley followed in quick succession. These officers, between them, enlisted, clothed, and equipped, 99 Yeomen, 97 of whom, were despatched to South Africa, viz. :—

40 on 3rd March under command of Major Moore; and
57 on 13th March under command of Captain Calverley.

Thus, up to 13th March, 122 men had been enlisted, 120 of whom proceeded to South Africa. Amongst these was a master tailor, entertained as a sergeant.

54. Captain C. Cook, of the retired list, was the next officer selected for the charge of the "Home" Base Depot Office, and continued in charge, until 30th June when it was closed and his services dispensed with.

He enlisted, clothed, and equipped, 124 Yeomen, 122 of whom embarked for the Cape, viz. :—

3	on 25 March	in ss. "Glengyle";
65	" 14 April	" "Canada";
4	" 28 "	" "Oratava";
28	" 11 May	" "Assaye";
10	" 19 "	" "Avondale Castle";
8	" 6 June	" "Aurania"; and
4	" 30 "	" "Norman."

55. In all, 246 Yeomen were raised in London. Of these 242 were sent out to the Cape—1 was discharged for reason of his being a Reservist, 1 owing to illness, and 2 in consequence of misconduct. About 5 Yeomen were enlisted at the Base Depot at Cape Town.

56. It having been found impossible to get artificers for service with the Base Depot, in March, a bounty of £10 each, to be paid on approval, was allowed for shoeing smiths,

and in May, the same bounty for a saddler was sanctioned, in conformity with the War Office precedent in cases of artificers joining the Royal Artillery. The services of 7 shoeing smiths, were thus secured for the Base Dépôt, but a saddler could not be found, though every endeavour was made to secure one. Almost every man who joined the Base Dépôt, expressed a desire to serve at the front. Owing to instructions received from the War Office, that the Committee was to cease recruiting and that no drafts were to be allowed, the services of many promising men were lost to the Base Dépôt, hence the reason for a greater number of men not having been enrolled.

**Total
number
enlisted.**

57. The full enlistment of the 608 non-commissioned officers and men sanctioned for the Base and Remount Dépôt was never completed; when 246 warrant and non-commissioned officers and men, including artificers, had been enlisted in London, all recruiting for the Imperial Yeomanry was finally stopped under orders from the War Office, which decided that the total strength, drafts and base combined, was not to exceed 10,500 men.

Inspections.

58. Each unit prior to embarkation was inspected by the Deputy Adjutant-General, or other members of the Imperial Yeomanry Committee, who complimented the men on their physique and soldierly bearing: a very large proportion of those who joined had experience in the management of horses, and were in some measure, drilled, or had been accustomed to the use of arms.

**Arms,
saddlery,
Camp equip-
ment**

59. Each Base Dépôt unit as it left this country, was supplied with arms, camp equipment, saddlery, and documents, &c., exactly the same as the men of the 78 companies of Imperial Yeomanry, so that on disembarkation in South Africa, it might be complete in every respect.

**Clothing,
equipment.**

60. After the establishment of the equipment branch, of the Quarter-Master-General's section, all articles of clothing, necessities and equipment, were obtained by requisitioning that section, and there was thus, no occasion to make any separate purchases.

Storage.

61. The space allotted to the Base Dépôt Office at Cleveland House as storage for clothing, necessities, and equipment was exceedingly limited. The officers in charge, however, overcame all difficulties and clothed and equipped the men as enlisted. Every one was also provided with saddlery, arms and camp equipment complete, as passages for South Africa were provided for them.

**Sugges-
tions.**

62. The following suggestions might be found useful, in the event of a future organisation of a similar force for work in the field:—

(a) The officer in charge of the organisation of the Base Dépôt at home should be directly under the Assistant Adjutant-General of the enrolment section, and not independent of him.

**Staff
requisite.**

(b) The staff requisite for the "Home" Base Dépôt to be as follows, viz.:—

- 1 commissioned officer in charge;
- 1 quarter-master sergeant;
- 1 sergeant as pay clerk;
- 1 sergeant to assist in recruiting duties; and
- 1 private, as storeman.

63. An officer possessing practical experience of pay, recruiting, quarter-master's duties, and matters pertaining to discipline, &c., should be secured, as he would at all times have ample work to do: he should be relieved from work and responsibility in connection with tenders, or estimates, or entering into contracts, whether for clothing or anything else. This work and responsibility, should devolve upon the clothing and equipment section, from which the officer in charge of the Base Dépôt Office should be able to obtain every article, to clothe, equip, and fit out, his men.

**Storage
accommoda-
tion.**

64. Suitable and adequate storage accommodation properly fitted up with shelves and racks, should be allotted for the use of the Base Dépôt, to admit of the numerous articles of clothing, necessities, &c., which must be stored, and on hand, ready for issue, being properly cared for. One large room should be set apart for the storage of clothing, necessities, &c., one room adjoining the same in which to receive and count the garments, or articles on delivery from contractors, and in which the fitting of the men could be carried out, and one room as a waiting room, for the men. These would be in addition to the requisite office, which should be spacious enough to accommodate the staff above detailed.

Drill.

65. Arrangements should be made that the men of the Base Dépôt should receive a certain amount of drill at some barracks daily, as in many cases men were sent out without an adequate knowledge of discipline or drill.

Casualties.

66. The War Office having found it impossible to undertake the work of notifying casualties as regards the non-commissioned officers and men, the Imperial Yeomanry Committee was requested to arrange for this. Information received by the War Office regarding casualties was immediately transmitted to the Imperial Yeomanry Committee, and that part of the casualty list was held back by the War Office from publication for a short period, to allow information to be at once despatched to the relatives. The work of notifying the casualties of officers to the nearest of kin was however undertaken by the War Office. Information regarding casualties of every kind (whether killed, wounded prisoners, missing, sick, or recoveries from sickness) was at once telegraphed from the Adjutant-General's Section to the nearest of kin when known, or, if not known, to the Yeomanry Brigade or the Dépôt concerned. This arrangement held good to August 16th.

N.C.O.'s and men.

Officers.

67. As the Imperial Yeomanry was largely recruited from people in a high social scale, the number of callers to inquire about casualties of all kinds was sometimes very large. There were occasions when the entire time of three or even four clerks, was taken up in notifying to relatives of men reported dead, wounded, missing, convalescent, &c., information regarding them.

Enquiries.

68. The necessity for keeping up, from the date on which companies were first embodied, a register of all deaths occurring, was brought to the notice of Commanding Officers by Imperial Yeomanry Orders of the 13th July, also for reporting from South Africa to the nearest of kin the occurrence of all fatal casualties.

Deaths.

69. Late in July, the War Office ordered that nominal rolls of all Imperial Yeomen invalidated from South Africa, should be reported by the Embarkation Staff Officers to the Deputy Adjutant-General, Imperial Yeomanry. They were then printed and circulated to all concerned. Private telegrams enquiring regarding casualties at the Cape, were allowed to be addressed as in Imperial Yeomanry Order No. 2 of April 19th, 1900.

Invalids.

Chargers.

W.O.
079/10/
2717.

70. On August 25th the War Office announced that the number of horses for which capitation would be granted was to be:—

Chargers, officers.

Commanding Officers of Battalions	3 each.
Medical Officers			
Quartermasters...	} 1 "
Veterinary Officers			
All other officers	2 "

Clerks.

W.O.
079/1/81.

71. Two clerks were allowed for the headquarters of each battalion, receiving private's pay, and 1s. per diem extra duty pay. Pay of a clerk was also sanctioned for the headquarters of battalions remaining at home at the same rate as for a clerk of a battalion going abroad, viz.:—1s. per diem extra duty pay; but it having been represented that the remuneration granted thereby, was not proportionate to the work, it was eventually ruled that 10s. per mensem to each company affiliated to the Imperial Yeomanry, would be payable to officers in charge of attestations, with effect from July 31st. This allowance ceased on 30th September.

Clerks.

Clerks (home).

W.O.
079/10/
3051.

Discharges.

W.O.
069/10/748.

72. Officers commanding Yeomanry regiments were empowered to discharge recruits not finally approved, under the provisions of paragraph 1805 (III) Queen's Regulations.

Discharges.

Discipline.

73. Commanding officers of Yeomanry regiments were answerable, under General Officers Commanding Districts, for the completion, embarkation, and discipline of the companies they were preparing.

Discipline.

(8470)

D

Drill.

Drill,
training.

74. In some special cases the hire of horses for purposes of training, was sanctioned. A riding-master for the Belfast drafts was also sanctioned, on captain's pay, in addition to his pension, and Riding-Master Captain H. McGee, late of the 10th Hussars was selected, and employed for about seven weeks. Certain allowances were granted to officers and medical officers and veterinary surgeons, and non-commissioned officers who had assisted in training the Imperial Yeomanry, and in organising the force, as published in Imperial Yeomanry Orders of the 19th April.

W.O.
079/10/
1212.

Training of
Irish
Companies.

75. The General Officer Commanding Curragh Camp having mentioned the great assistance given to the Imperial Yeomanry units training at the Curragh by the 3rd Dragoon Guards, 6th Dragoons, 8th Hussars, 14th Hussars, 21st Lancers, the Committee marked their appreciation of the work done, by sending £25, divided between the five corps, either for the benefit of some regimental institution, or as extra pay to the non-commissioned officers who had been employed on the work.

Embarkations.

Embarka-
tions.
Rules.

76. Seniority rolls of all officers detailed for transports, were sent by the Adjutant-General's Department to Embarkation Staff Officers showing dates of commissions. The rules for embarkation on certain transports, are contained in Imperial Yeomanry Orders 2 of 21st February, 1900, *see* Appendix No. 27.

Enlistment and Enrolment.

First
announce-
ment.

77. Her Majesty's Government having decided to raise, for service in South Africa, a Mounted Infantry Force to be named the Imperial Yeomanry, the Committee arranged for this announcement to be made in the public Press on the 20th December, 1899. This announcement will be found in Appendix No. 6, and showed that this force was to be raised as follows:—

"2. The force will be recruited from the Yeomanry, but Volunteers and civilians who may possess the requisite qualifications (as given below) will be specially enrolled in the Yeomanry for this purpose.

"3. The force will be organised in companies of 115 rank and file, five officers being allotted to each company, viz., one captain and four subalterns, preference being given to Yeomanry officers.

"4. The term of enlistment for officers and men will be for one year, or for not less than the period of the war.

"5. The officers and men will bring their own horses, clothing, saddlery, and accoutrements. Arms and ammunition, camp equipment, and regimental transport will be provided by Government.

"6. The men will be dressed in Norfolk jackets of woollen material of neutral colour, breeches and gaiters, lace boots, and felt hats. Strict uniformity of pattern will not be insisted on.

"7. The pay will be at cavalry rates, with a capitation grant for horses, clothing, saddles, and accoutrements. All ranks will receive rations from date of joining. Gratuities and allowances will be those laid down in Special Army Order of the 10th May, 1899.

"8. Applications for enrolment should be addressed to colonels commanding Yeomanry regiments, or to general officers commanding districts, to whom instructions will be immediately issued."

Royal
Warrant
and
Secretary of
State's
instruc-
tions.

78. On the 2nd January, 1900, a Special Army Order was published, promulgating to the Army a Royal Warrant regarding the formation of the Corps of Imperial Yeomanry (*see* Appendix No. 8), and conveying the instructions of the Secretary of State regarding its pay and allowances, capitation rates for horses, clothing, saddlery, accoutrements, &c., and its gratuities. The organisation of the force—its staff, and company establishments, qualifications required, date of enlistment, family allowances, pension, gratuity for wounds, and many other details—was made known in this order. This Army Order was afterwards cancelled and revised in Army Order 28 of February, 1900, which is contained in Appendix No. 9.

79. Although it was thought at one time doubtful, whether the Yeomanry could furnish any force at all for service abroad, or whether they should even be permitted to do so, the result of the promulgation of this order was that by the 15th of January it was certain that 3,000 (three thousand) men would be ready to sail for South Africa on or about the 22nd January, and 5,000 by about the 5th February, (total, 8,000). The first 25 companies reported ready to start were those detailed in Appendix No. 23.

Commence-
ment of
enlistment.

80. The enlistment of men for the Imperial Yeomanry was commenced in conformity with a memorandum dated 20th December, 1899, attached as Appendix No. 19, and a subsequent circular memorandum (Appendix No. 20) announced several measures decided on by the Committee concerning enlistment, organisation, equipment, uniform, &c.

81. Mr. Seton Karr, M.P., having proposed to raise an independent corps, it was in consequence, decided to draw up rules for any "Independent Corps," i.e. not affiliated to the Yeomanry Cavalry, which might be raised. A copy of these is given in Appendix No. 30. Lieut.-Colonel Colvin was on the 7th February nominated Deputy-Assistant Adjutant-General for "Special Corps," and a report showing what special measures were taken in regard to these is given in Chapter III. The number of companies which were ultimately raised as "Independent Corps" amounted to 21, as shown in Chapter III.

W.O.

079/10/892.

82. By the end of January, the War Office had decided that the number of men to be enlisted was an open question, depending on how many could be raised, but 8,000 was the limit which was not to be exceeded. Total strength.

83. About this time, the question of the augmentation of the force for the supply of drafts to meet field casualties in South Africa came under the consideration of the Committee. It was at first proposed that five dépôts should be formed for this purpose, viz. :— Drafts.

One in Scotland : Edinburgh.

Three in England : York, Birmingham, Trowbridge.

One in Ireland : Newbridge.

Dépôts for raising drafts.

84. To carry out the system of employing the machinery of the Yeomanry organisation in raising men, which was what the War Office desired in the initial formation of the force, it was thought desirable by the Committee to detail an officer commanding a Yeomanry brigade, with his adjutant and staff (supplemented by other permanent staff establishments if necessary), to carry on the work. By this method it was thought that men to the strength of about a company could be raised at each dépôt; this, it was hoped, would supply the wastage of the war, or such additional numbers as the War Office might require over and above the 8,000 already demanded. The towns in England selected by the Committee were those where companies had been trained, and where accommodation and the requisite Yeomanry staff existed. In Ireland, Newbridge was suggested because there also accommodation was available. The Committee proposed that a specially selected officer of Yeomanry should be sent there, the dépôt being affiliated for quarters, rations, and instruction to the Cavalry regiment there stationed. The Committee considered that a plentiful supply of men might be raised in the country, but that officers of the requisite military experience were difficult to obtain. Irish Dépôt.

85. It was ultimately resolved to defer the question of raising more men through the proposed dépôts pending a reply to a reference to the War Office concerning the strength of the force, which had been brought up to 8,000 (as desired), and a decision was requested as to whether it was to be increased, and if so, to what extent— Increase in strength.

- (1) By way of additional strength?
- (2) For the supply of men to meet casualties?

86. In connection with this increase, the Committee thought it necessary to make special enquiry as to the financial basis on which the increase, if any, was to be made, and it observed in a letter to the War Office: "Hitherto county and other funds have been drawn upon to meet necessary expenses which have been incurred, in addition to those covered by the Government grant, but in future, these sums cannot be expected to meet such charges, and it appears desirable to clearly define the financial position. In fact the Committee consider that from the time when fresh enrolments have to be made beyond the strength of 8,000 men required by the War Office, a fresh start should be made."

Financial basis.

In the event of the proposal being accepted to increase this force through the agency of brigade dépôts, as already detailed, it was said that such additional brigade staff as might be required for the purpose would be supplied by the Committee, but be paid for by the War Office. It would comprise an officer commanding a Yeomanry brigade, an adjutant, and such non-commissioned officers and clerks as were necessary.

The War Office was asked whether it would defray all necessary expenses for this organisation, such as had hitherto been met from the funds referred to. It was shown that the surplus men who had been attested in various Yeomanry corps could be collected at dépôts, together with fresh recruits, and trained ready to send out as drafts to companies requiring men, preferentially to the county company to which they belonged. This scheme was not meant to interfere with Yeomanry regiments which were raising fresh companies, but to provide a supply of drafts for the service companies after the maximum strength laid down by the War Office had been reached, viz., 8,000. The Committee observed that if the War Office accepted the responsibility of such charges as might be in excess of the grants allowed by Government, a scheme would be submitted detailing the manner in which the strength could be increased to any extent desired by the War Office.

87. The War Office replied that whilst the proposal was accepted to raise, if possible, additional battalions beyond the limit originally named (8,000 men), it was not intended to fix any limit at present. It was requested that provision should be made for a first draft for the battalions already embarked or about to embark for South Africa. The first draft should be 10 per cent., and one officer per battalion would be sufficient to take out the 12 or 13 men per company thus to be raised. With regard to any additional corps which might be raised, it was said that the State would defray "all expenditure incurred in connection with the raising of the additional battalions, as well as of the drafts required to maintain the Yeomanry force at the effective strength with which the units embarked."

88. The Committee made enquiries of officers commanding Yeomanry Corps, as to the best method to introduce regarding the raising of additional companies and drafts, and on February 12th it was decided to suggest to the War Office that in England the Yeomanry organisations should be utilised at their respective headquarters as locally desired; that in Scotland a dépôt should be formed under orders of the General Officer Commanding at Edinburgh, or Glasgow; and that in Ireland a dépôt should be formed under orders of the General Officer Commanding and attached for instruction to a cavalry regiment at the Curragh or Newbridge, as non-commissioned officers of the permanent staff could not be spared from Yeomanry Cavalry Regiments in England or Scotland. It was also proposed "that cavalry pay and allowances should form the basis of the pay of the necessary officers, non-commissioned officers, and men, other than the Imperial Yeomanry, who have been doing the work of raising the companies, and will still have to do the work of raising fresh companies and drafts." The Committee having sanctioned the raising of drafts under brigade, regimental, or special corps arrangements at a strength of 10 per cent. of the numbers embarking for South Africa, commanding officers were allowed to hire horses for training the men, if necessary.

89. The Committee then reported to the War Office that the formation of drafts was proceeding, but difficulties were experienced, chiefly in regard to:—

- (a.) Provisions of quarters in barracks for the men.
- (b.) Want of drill instructors.
- (c.) Want of horses.
- (d.) Want of a decision as to the amount of money over the £25 capitation grant which was to be sanctioned, and they recommended that, in the absence of good quarters, men might be allowed to go to their own homes after passing the shooting and riding tests.

It was shown that the difficulty of finding instructors was due to:—

- 1st. Paucity of adjutants.
- 2nd. Paucity of permanent sergeants.

90. As regards the three companies raised in Belfast the subject was shown to be very pressing and exceptional; the Officer Commanding 83rd Regimental District having reported that he could not train drafts unless an officer was detailed. It was suggested that the services of a retired officer might be obtained, if the pay of his rank and allowances (cavalry) were approved.

91. In a letter dated March 3rd, the War Office ruled that the strength of the Imperial Yeomanry was not to exceed 20 battalions of 500 each, together with 1,000 for drafts, or 11,000 men. On March 23rd, however, this decision was changed, and it was settled that the total strength of the Imperial Yeomanry should be 10,000 men, or 1,000 less than that previously sanctioned.

In consequence of this decision the Committee on March 24th issued instructions for all recruiting for companies or drafts to cease, and on March 27th the War Office was informed that the strength previously sanctioned was:—

20 battalions at 500	10,000
For drafts, one-tenth	1,000
Base Dépôt, all ranks, excluding officers	608
Total, excluding officers ...				11,608

W.O.

1183.

I.Y.
103 (A).

The calculations in regard to the Base Dépôts were based on War Office No. 079/10/1023 of March 6th, 1900, and Army Order 1 of January 1st, 1900, and it

was shown that up to March 27th there had been recruited for battalions, drafts, and Base Depôt, 10,500 non-commissioned officers and men.

W.O. 079/10/1364. In reply, on March 31st, the War Office decided that the limit of the force should be 10,500 (including 1,000 for Rhodesia), and admitted its liability for the cost of equipment which might have been ordered for the 11,608 men originally sanctioned.

92. The recruiting for the force had now ceased. It had attained a strength of 20 battalions, or 78 companies, two battalions, viz., the VIIIth and XVIth being short of one company each. In the VIIIth Battalion, the 64th, or 2nd Manchester Company, had already taken shape, and could easily have been raised, but for the War Office Order of March 31st which fixed the limit beyond which recruiting was not to proceed, viz., 10,500 men in all. Final strength.

93. Arrangements, however, had been made to send out drafts to the extent of 8 officers and 460 men for 39 Companies (or a total of 474 non-commissioned officers and men) some of which were to meet demands already named to replace field casualties, and these, with the exception of 14 who had already sailed for the Duke of Cambridge's Own Company, were despatched per ss. "Canada," on April 14th, 1900. Drafts.

I.Y. 134 A. 94. But doubts still arose as to whether further drafts were to be sent or not, as reports had been received that 150 men had been sent to Bloemfontein from the base to replace casualties at the front, whereby the Base Depôt strength was accordingly weakened, and on May 16th the War Office was asked whether more drafts would be required, 10,346 non-commissioned officers and men having been sent out up to this date. The War Office replied that no more drafts need be sent out by the Imperial Yeomanry Committee.

95. The grand total number of men and horses of the Imperial Yeomanry up to July 1st was:— Total strength.

Officers and men	10,921
Horses	13,512

The details are shown in Appendix No. 35.

96. There can be no doubt that a much larger number of men could have been enrolled had this limit not been fixed. The men of the Yeomanry Cavalry formed the backbone of the force, but amongst all classes, the service rapidly became popular. Many of the men were of very good social position and the majority belonged to the middle classes. The composition of the force is shown in Appendix No. 36, from which it appears that the Yeomanry Cavalry supplied about one-fifth of the total. Number of Yeomanry Cavalry in Imperial Yeomanry.

W.O. 079/10/748. 97. Orders were issued that the names of all Volunteers entering the Imperial Yeomanry were to be made known to their commanding officers. The War Office ruled that the number of non-commissioned officers of the permanent staff of the Yeomanry Cavalry who might accompany the whole force of Imperial Yeomanry (including battalions and Base Depôt) was not to exceed 74; no company to have more than two; and no Yeomanry Corps to provide more than half its total number, or if it have an odd number, its higher half. Temporary vacancies caused by the departure of some of the Permanent Staff of the Yeomanry for South Africa, were kept open for them and not filled up, the duties being performed during their absence by utilising the services of men not serving on an Army engagement, who were to be paid under para. 174 Yeomanry Regulations. The War Office called upon General Officers Commanding to report whether there were any non-commissioned officers serving in the Cavalry in their command (preferably reservists who had recently re-joined) who were willing to be attached to regiments of Yeomanry Cavalry temporarily for service on the Permanent Staff during the absence in South Africa of the Imperial Yeomanry, descriptive returns on Army Form B 241, being submitted. Volunteers. Permanent Staff, Yeomanry.

W.O. 0061/1044. of the Yeomanry for South Africa, were kept open for them and not filled up, the duties being performed during their absence by utilising the services of men not serving on an Army engagement, who were to be paid under para. 174 Yeomanry Regulations. The War Office called upon General Officers Commanding to report whether there were any non-commissioned officers serving in the Cavalry in their command (preferably reservists who had recently re-joined) who were willing to be attached to regiments of Yeomanry Cavalry temporarily for service on the Permanent Staff during the absence in South Africa of the Imperial Yeomanry, descriptive returns on Army Form B 241, being submitted.

W.O. 0070/2524. Non-commissioned officers of the Yeomanry Permanent Staff who were employed with the Imperial Yeomanry in South Africa, arriving home invalided, were to re-join the Yeomanry Regiments at home to which they were previously attached, when fit.

W.O. 079/10/3196.

W.O. 079/10/11. 98. Cavalry Reserve men recalled to the colours between January 18th and 22nd, 1900, were allowed to be taken into the Imperial Yeomanry (artificers and substantive non-commissioned officers excepted); and reservists might (on sanction from the War Office) volunteer for the Imperial Yeomanry serving on Imperial Yeomanry pay from the date they were called up from the reserve. Not more than four men of the above two classes were to be in any company. They might receive acting rank during the war. Cavalry Reservists.

Approving
officer.

99. The Imperial Yeomanry Committee having enquired whether the approving W.O. officer referred to in Army Order 28 of February, 1900, para. 16, would be 079/10/893. appointed by the War Office or by the Imperial Yeomanry Committee (a special approving officer being requisite for the Independent Corps not affiliated to the Yeomanry Cavalry) the Committee was directed to appoint "officers for the purpose of approving the recruits of Special Corps"—they were to be field officers—"such as Lords Chesham or Valentia. If these officers were not available other equally responsible and qualified officers were to be appointed."

Explanation regarding Contingent for Rhodesia.

Strength.

100. In regard to the force for Rhodesia the War Office decided to send 1,000 men W.O. of the Imperial Yeomanry to Beira for service in that province, and enquiry was made 17.3.00. as to the earliest date on which the Committee could place at the disposal of the War Office the number of men and officers required, so that the necessary shipping might be arranged for. Enquiry was also made as to how many horses could be made available. The Committee replied that the men required could be got ready by the end of the month

Horses.

(March) and that 1,000 horses could be sent direct from Fiume. The Committee proposed to select the XVIIth and XVIIIth Battalions commanded by Colonels Moore and Parke respectively. After the matter had been personally discussed by the Committee, with Mr. Fleetwood Wilson, C.B., Assistant Under-Secretary of State at the War Office, who was always of the greatest assistance to the Committee, the War Office officially stated as follows:—

"1. Lord Lansdowne concurs in your proposal as to the composition of the force, W.O. which he notes will be ready to sail by 31st instant. 21.3.00.

"Full details as to sea transport for these companies will shortly be furnished to your Committee, by the Quartermaster-General, who will also inform you as to the route which will be adopted.

"2. In regard to the provision of horses, the remounts now being shipped from Fiume should, in accordance with your proposal, be despatched to South Africa, and any essential additional cost will be borne by this Department.

"I am to add that the supply of horses (over 1,000) necessary for remount purposes will be undertaken by this Department.

"3 In regard to saddlery, the Committee need take no action, as an ample supply awaits the Imperial Yeomanry in Rhodesia.

"4. As to the provision of supplies, including camp equipment and regimental transport, I am to say that steps have been taken to furnish in Rhodesia, whatever may be required in these respects by the force.

Pay.

"5. In regard to the scale of pay, the men of the Rhodesian force will be paid at the rate of 5s. a day, and the officers and non-commissioned officers at proportionate rates.

"6. In regard to the possibility that lighter clothing, than that in use at the Cape, will be required by members of this force, I am to inform you that all necessary charges incurred through the provision of such clothing will be borne by this Department.

"7. In regard to the fact that no Yeomanry organisation exists at Beira, and that instructions are, therefore, required by your Committee, as to the steps to be taken by them in regard to equipment, transport, horses, and supplies for this force, I am to say that after the disembarkation of the Imperial Yeomanry at Beira, everything connected therewith will be undertaken by the Imperial authorities."

Saddlery.

101. With regard to the saddlery referred to in para. 3 of this letter it was subsequently decided that the 50th, 60th, 61st, and 71st Companies were to be supplied by the Committee and the 65th, 67th, 70th, and 75th Companies were to obtain it at Beira from the Military authorities, the War Office, however, accepting liability for the whole lot, as saddlery had been provided for the last four companies, to be delivered at Cape Town. The rates of pay of this Force are given in Appendix No. 31.

Equipment.

Equipment.

102. The General Officer Commanding Thames District, after inspecting the 36th Company, made several practical suggestions (which were adopted, for reserve stores), and amongst others, that each officer should have a prismatic compass, recommending the Ordnance pattern, as used at Woolwich and Sandhurst, for night and day work, and that an issue of signalling flags, should be available on board ship to train a few men.

Inspections.

H.R.H. the
Prince of
Wales.

103. On 1st January a letter was received from Sir Dighton Probyn saying that "H.R.H. the Prince of Wales was taking the keenest interest in the raising of the Imperial Yeomanry force for Service in South Africa. His Royal Highness also asked for information as to

the probable date of the departure of the first detachment, as he was most anxious to personally inspect at least some part of the force." H.R.H. was good enough to inspect various Battalions of the Force on five separate occasions. A list of the Companies so inspected will be found in Appendix No. 39, as well as those inspected by General Trotter, Commanding the Home District.

W.O. 079/499. 104. The War Office issued detailed instructions to General Officers Commanding Districts, in regard to the inspection of companies, in view to ensuring their efficiency in the matter of musketry, riding, equipment, and other details laid down in Army Orders. These instructions are contained in Appendices Nos. 40 and 41. **Efficiency of Companies.**

W.O. 4823/7/695. 105. As only a short time usually elapsed between the medical inspection of candidates for the Imperial Yeomanry and their embarkation for South Africa, the provisions of para. 1460 Queen's Regulations were allowed to be set aside, as regards any further parties about to embark, but the provisions of para. 1461, Queen's Regulations, in regard to the individual medical inspection of every soldier on the day of departure from stations for embarkation, or on the previous day, were ordered to be strictly enforced. **Medical.**

Intelligence.

106. An issue of maps was arranged for on arrival at Cape Town, through the General Officer Commanding. These maps were on the same scale as those issued to the Army, but were required on a much larger scale. It was also settled with the Chartered Company, British South Africa, that 700 maps of Rhodesia, printed on pegamoid, should be supplied to the troops on arrival, some being put on board the "Galeka" for use of the men on the voyage. **Maps.**

107. The War Office having suggested that the Yeomanry Force should be supplied with the best information regarding emigration and colonisation, in South Africa, the Colonial Office was asked to forward for distribution such books on the subject as were considered most suitable. These were obtained, and Handbook No. 9 South African Colonies, "Cape Colony with Map"; Handbook No. 10, "Natal Handbook with Map"; and "South African Republic: Transvaal" (all being publications from the Emigrants' Information Office) were issued to units, viz., 2,000 sets (three in each set), some on transports, and some for distribution at the base. These proved specially useful, for men who had intentions of settling in South Africa. **Handbooks.**

Machine Guns.

W.O. 079/10/748. 108. As Government was unable to supply machine guns or their equipment, authority was given for the Yeomanry to supply their own, provided the nature of the gun was stated. The Machine Gun Section for each battalion was to be of the strength given in page 84 "War Establishments," 1898, (*see* Imperial Yeomanry Order 10, of February 15th), but the section was to be put through a course lasting about three weeks at Hythe: the Hythe course might be dispensed with in those cases where the trained Gun Detachment was inspected and passed by the Local District Inspector of Musketry. The strength of the various gun detachments which embarked, and other information on the subject of carriages, &c., is given in Appendix No. 37. The authorised strength of the various details of the sections is shown in the Royal Warrant issued with Army Order 28, of February 1st, 1900. (Appendix No. 9.) **Machine guns.**

109. The War Office decided that only Colt guns should be tried at Hythe, and that if galloping carriages were sent, four horses should be with each detachment. Harness was to be provided by commanding officers of battalions, or commanding officers of Yeomanry regiments which raised the battalions. **Harness.**

W.O. 57/Cape/7380. W.O. 57/Cape/7547. 110. Sir Charles Ross, Bart., of Balnagown, having offered the War Department a complete battery of machine guns, viz., four 1-pounder automatic quickfiring Maxims, sighted to 3,000 yards, the only gun, excepting the "Colt machine gun," then available in the market, the War Office transferred the offer to the Imperial Yeomanry Committee. Major Lord Athlumney notified Sir C. Ross's offer to equip these within three weeks from date of acceptance, mounted in any way considered most fit for active service. The Committee were most reluctantly compelled to decline Sir C. Ross's offer, as the guns (Maxims) did not carry service ammunition. Lord Athlumney, on behalf of Sir Charles Ross, then offered four Colt 0.303 quickfiring guns, mounted on galloping carriages, which most generous offer was thankfully accepted. **Presentation by Sir Charles Ross.**

Sir W. Ingram. 111. Sir W. Ingram, Bart., presented two Colt guns, which were given, one to the Loyal Suffolk Hussars, and one to the East Kent company.

Medical Officers.

- Appointment.** 112. Medical officers were of two classes, viz., those who were gazetted with the rank and pay of (surgeon) captain, and allowance of Army officers of relative ranks, and those who were on a civil contract, and had no Army rank. The contracts signed by the latter were as in Appendix No. 33, at 20s. per diem, and certain privileges. They were all attached to battalions, and their names, when approved by the Committee, were submitted to the War Office. W.O. 079/10/423.
- Equipment.** 113. Medical officers were to provide their own medical, and surgical equipment, under the orders of officers commanding battalions. Application was made and declined by the War Office, to increase the strength of each company by two, for enlistment of two bearers. Medical officers were required to provide three attendants, for the voyage to South Africa, who were not to be Imperial Yeomen. Their engagement was to cease, at the end of the voyage. W.O. 079/10/743.
- Attendants on board ship.**
- Hospital dressers.** 114. Some misunderstanding with the War Office occurred, in respect to a proposed establishment of hospital dressers, who were, at first, authorised at 10s. per diem on January 29th, but abolished on February 28th.
- Orderlies.** 115. Orderlies for medical officers on board ship, were allowed from companies, at the rate of 1 to 100, or 150 men. The equipment allowances of medical officers, whether military, or civilian, were to be the same. Medical officers were ordered to communicate with the Director-General Army Medical Staff, in regard to the articles necessary to be taken to South Africa, the cost of which would be paid by bills, sent through the Imperial Yeomanry Committee. Steps were taken to inoculate against enteric fever, any of the Imperial Yeomanry, who so desired it, this being done whenever possible on transports. Medical requirements in the field, were to be provided from Army Medical Stores. W.O. 079/10/423. W.O. 079/10/502.
- Allowances.**
- Equipment.**
- Vaccination.**
- Field requirements.**

Musketry.

- Travelling expenses.** 116. The Committee was authorised to disburse all necessary travelling, and subsistence expenses, which were to be recovered from the War Office, in connection with testing for musketry, and men who had failed, with rifles incorrectly sighted. Men who had already shot through a course under the supervision of an officer, and attained the standard of "marksmen," were not again required to be exercised. Men were to be exercised under supervision of a Yeomanry Brigade Adjutant, who were to be responsible that this standard was attained. Railway fares of men enlisted in the Imperial Yeomanry proceeding to rifle ranges for test in marksmanship, before final approval, were to be borne by the public. W.O. 079/10/274. W.O. 079/10/672
- Standard.**
- Tests, railway fares.**

Officers.

- Pay and allowances.** 117. Retired officers serving in the Imperial Yeomanry were allowed to draw either retired pay, or the pay of the rank in which they served in the Force: and the allowances drawn were those of their rank in the Imperial Yeomanry. W.O. 079/10/335.
- Attestations.** 118. Officers who did not already hold commissions in the Auxiliary Forces were ordered to be attested before appointed. This, however, was subsequently modified, and about April such formal attestations ceased.
- Rank.** 119. A reference having been made to the War Office, whether officers were to wear badges of their Imperial Yeomanry rank, or any other to which they might be entitled, it was ruled that they could only have the rank, and wear the badges, of the position held in the Imperial Yeomanry. The precedence of officers was determined according to date of being gazetted to the Imperial Yeomanry, and their rank and standing, according to the considerations mentioned in Imperial Yeomanry Order 2, of February 26th, 1900.
- Precedence.**
- Rank.** 120. Representations were made to the Committee that some dissatisfaction existed among officers owing to complications which had arisen through the War Office ruling, that officers in the grade of captain, and lieutenant, took seniority according to the date of gazette, to that rank, and not according to their grades in the Reserve, Militia, Volunteer, or Yeomanry services. This matter was carefully discussed by the Committee, and it was

decided that there was no possible remedy, as it was believed the majority of officers knew they would have to take their rank according to their new position, for the time being, in the Imperial Yeomanry.

121. All officers were directed to procure the four books of regulations mentioned in Books Clause I of Queen's Regulations, para 653.

Orders, Issue of.

122. The orders of the Imperial Yeomanry, were typewritten daily, and copies sent to I.Y. the officials mentioned in Appendix No. 32. If issued on days when the Committee met, Orders. they were submitted for the confirmation of the Committee. All important War Office rulings, Gazette notifications, and all casualties were published in them. The orders were printed at the end of each fortnight, or month.

Organisation.

W.O. 079/10/348 123. Servants of officers of regimental staff, were supernumerary to company establishments, but were put through a course of musketry, unless qualified in a military sense. Servants.

124. Men, already in possession of a number, in the Regular Forces, were to be entered in nominal rolls, thus :— Regimental numbers.

J. Smith, $\frac{5 \text{ D.G.}}{1056}$

W.O. 079/10/298. 125. The number of battalions, were in Roman figures, I, II, III, &c., and those of companies, in ordinary figures, 1, 2, 3, &c. Numbering of battalions and companies.

126. Members of the Imperial Yeomanry, being soldiers and part of a regular corps, were ordered to be provided with all the documents prescribed for soldiers of the Regular Army, "Small Books," Army Form B 50, being specially ordered.

127. Each company commander, was ordered to submit the following returns :— Company Returns.

1. Complete list of officers.
2. Composition return (*see* Appendix 2 of Army Order 28 of February, 1900).
3. Nominal roll, with regimental number.
4. Returns showing next of kin—
 - (a) For officers.
 - (b) For non-commissioned officers and men.
5. Returns showing names of members of Parliament, serving in the company.

128. Officers commanding companies, were called on to furnish daily returns to the Adjutant-General's Department, showing the strength in officers, warrant officers, non-commissioned officers and men, horses (including officers' chargers, but battalion staff horses to be shown separately), guns, vehicles, date when ready to embark, as in Appendix No. 26. From these returns, the allotments of units to different transport ships were made. At least 14 days' notice was required for the fittings of ships. Embarkation returns.

129. Commanding officers of the battalion staff and machine gun sections, were attached for payment to one of the companies, and shown in the daily state of that company. This company went by the name of the headquarter company of the battalion, and, in the case of battalions affiliated with the Yeomanry Cavalry, was attached to the Yeomanry Regiment which raised the company. Pay of battalion staff, &c.

130. Sir William Martin Conway, on February 15th, 1900, proposed to form a Scouts. company of scouts, composed of men who were trained mountaineers, i.e., members of such clubs as the Alpine, Scottish Mountaineering, or of persons who had a mountaineers' training, the men to be trained by Major the Hon. C. G. Bruce, of the 5th Ghorkas, whom he described as "the greatest expert alive in organising, and training, such men." The proposal was not carried into effect, as the Committee was unable to obtain the services of Major Bruce, from the India Office.

131. Notwithstanding the dissolution of the Committee (under special Army Order of (8470) E Routine of work at

- I.Y. Headquarters after despatch of Force.** May 25th, 1900), the work in the Adjutant-General's section continued heavy for several weeks, and, so far as interviewing visitors and writing work went, increased. It partook largely of what might be considered "Depôt" work, principally on behalf of the special, or independent companies, but, in a measure, of the whole force. A very large number of letters was daily received from the relatives and friends of Imperial Yeomen, enquiring for their welfare, their movements, nature of casualties, &c.; and much statistical information had to be prepared.
- Invalids from South Africa.** 132. When a few men had reached England invalided, the War Office issued a "Memorandum of the arrangements made for dealing with the sick and wounded arriving in this country from South Africa." A copy is in Appendix No. 42. This, in brief, directed that all men arriving in England would be conveyed to one of seven General Hospitals (Netley, Woolwich, Aldershot (2), Devonport, Colchester, Shorncliffe), those permanently unfit being discharged, as soon as desirable, or they would be sent on sick furlough, or to convalescent homes, and, when fit for duty, they would join the Provisional Battalion, Shorncliffe. Enquiries connected with the utilisation of convalescent homes for men granted sick furlough, were to be made to the "Soldiers' and Sailors' Help Society," 17, King Street, St. James', S.W. Sick and wounded officers desirous of availing themselves of treatment in private hospitals or convalescent homes, were to apply to the Secretary, Sick and Wounded Officers' Fund, Hampden House, Green Street, London, W. Men on landing, if not retained at a general hospital, would be granted railway warrants to their homes, or convalescent hospitals. On the expiration of sick furlough, men were required to rejoin at the military station, (ordinarily the station nearest to their homes), to which they had received warrants for the purpose of medical examination, in view of being then ordered to join the Provisional Battalion, Shorncliffe, or having their furlough extended. Advances of pay were to be made to all men requiring it when proceeding on furlough. The kits of all invalids from South Africa were to be completed according to a list published in Imperial Yeomanry Order 2 of June 22nd, 1900; men about to enter convalescent homes, were to receive certain additional articles, and men on discharge were to receive suitable plain clothes. Invalids who were fit to travel and who gave a written undertaking that they, or their friends, could guarantee the responsibility for medical attendance and that no claim for medical attendance would be admitted against the public, were allowed to proceed to their homes at the public cost. In addition to the provisional settlement of pay, sanctioned by Army Order 61 of March, 1900, advances of pay to the extent of £5 were sanctioned for men returning from South Africa, as explained in Imperial Yeomanry Order No. 1 of June 26, 1900. Other details concerning invalids are given in Appendices Nos. 45 to 49. W.O. 079/10/ 2037.
- Kits of invalids.**
- Provisional battalion, Shorncliffe.** 133. On June 23rd the War Office notified that all Imperial Yeomen returning from South Africa, would be attached to the Provisional Battalion, Shorncliffe (*see* Appendix No. 44). Those fit for service would be sent back to South Africa as soon as it was possible to dispense with their services; those in the United Kingdom would be allowed to take their discharge, and those electing to serve their full year would remain for the present attached to the Provisional Battalion, Shorncliffe. W.O. 079/10/ 2113.
- Invalids. Nominal Rolls.** 134. On the 30th July, the War Office ordered that nominal rolls of all Imperial Yeomen returning from South Africa, should be sent by disembarking staff officers to the Deputy Adjutant-General, Imperial Yeomanry, and copies were printed and sent from Cleveland House to Yeomanry brigades or dépôts of special corps. W.O. 120/Cape/ 9833.
- Current work.** 135. All current work of the Imperial Yeomanry was taken over by the War Office on August 16, a very small establishment being left at Cleveland House to wind up the work and collate information for the final report on the working of the Committee.
- Discharge of men.** 136. On September 4th, the War Office issued a circular regarding the disposal of Imperial Yeomen arriving in this country from South Africa, and granting discharges to men desirous of terminating their engagement or allowing those who wished to continue in the service to return to their corps in South Africa. A copy of the orders is given in Appendix No. 50. The arrangements finally made for the clothing of invalids or men proceeding on furlough are given in a War Office Memo. of October 2, 1900, contained in Appendix, No. 51. W.O. A.C.D./ 62/R.D./ 921. A.C.D./ R.A.M.C./ 5295.
- Invalids clothing.**
- Demobilisation.** 137. In the "Regulations for Demobilisation of the Force mobilised for service in South Africa, 1900" (substituted for Section IV B, "Demobilisation" in "Regulations for the Mobilisation of a Field Force for South Africa, 1899") issued with Army Order 226 of 1900, the procedure to be followed on demobilisation was laid down in considerable detail, some of the most important rulings being the following:— A.O. 226, 1900.

The units of Imperial Yeomanry were to demobilise at the places of formation;

officers were to be allowed to resign their commissions in accordance with the rules governing the discharge of soldiers; Imperial Yeomen were to receive the option of—

- (1) Taking their discharge
 - (a) At once in South Africa, or (b) on return home; or
- (2) Completing their year's service at home.

Those who elected to take their discharge would receive a gratuity of a month's pay, ration, and messing allowance. Those who elected to complete their year's service were to be posted to the Provisional Battalion, Shorncliffe. Discharges in South Africa were to be carried out under the instructions of the Field Marshal Commanding the Field Force, and at home, in accordance with the Queen's Regulations, Officers Commanding units of Imperial Yeomanry being empowered to authorise and confirm the discharges. Enrolled members of the Yeomanry Cavalry and Volunteers were to revert, on discharge from the regular forces, to the conditions of enrolment in the Corps to which they belonged prior to enlistment for Army Service. Saddlery, clothing, necessities, great coats, accoutrements, were to be retained by the men.

138. By Special Army Order of 20th December, 1900 (Army Order 6 of January, 1901), certain additional regulations for the demobilisation of the Imperial Yeomanry were issued as follows:—

Units were to proceed direct from port of disembarkation to the places ordered for demobilisation. Any recommendations which General Officers Commanding may desire to make for carrying out discharges elsewhere, should be submitted to the War Office with the least possible delay. On the return of the first unit of Imperial Yeomanry, a pay office will be opened at Shorncliffe to adjust all outstanding claims of the whole corps. The Paymaster, Imperial Yeomanry, Shorncliffe, was the paymaster to whom final pay lists were to be rendered under the orders laid down in Sub-section F of the "Regulations for Demobilisation."

139. By the Royal Warrant for the South African Constabulary, issued with Army Order of 1st of January, 1901, Imperial Yeomen were allowed to volunteer for that corps, being granted free discharges from the Imperial Yeomanry.

South African Constabulary.

Patriotic Fund.

140. Applications for grants from the Patriotic Fund were ordered to be sent direct to the Secretary, Royal Commission, Patriotic Fund, 53, Charing Cross, London, W.C. Certain relatives of Imperial Yeomanry officers or men were eligible under conditions mentioned in Imperial Yeomanry Orders 1 of June 13, 1900.

Patriotic Fund.

Rank.

141. In regard to the relative position, rank, &c., of quartermaster sergeant and acting regimental sergeant-major, it was recommended to the War Office that the rank of regimental sergeant-major should be permanent. Yeomanry Colonels had represented that the position was superior and much more responsible than that of quartermaster-sergeant. The quartermaster-sergeant's rank is substantive, and under Class 16, he draws higher pay than the acting sergeant-major classed as colour-sergeant, in Class 17. The War Office regretted the substantive rank could not be granted, and decided that the acting-regimental sergeant-major, must remain classed as colour-sergeant, and with allowances under Class 17.

Rank.

W.O.
079/10/955.

Recruits.

142. The time for final approval of recruits was to be extended as circumstances might require. Returns of recruits were sent by officers commanding Yeomanry Regiments every Saturday morning to the Inspector-General of recruiting.

Recruits.

W.O.
079/10/748.

Returns.

143. Monthly returns were ordered to be rendered, viz., Army Form B 104 (Home) by Yeomanry Regiments for companies prior to embarkation, and Army Form B 105 by companies after embarkation, to the War Office. Battalion commanders were directed to send monthly states of service companies, Army Form B 170 (Queen's Regulations, para. 2128), to Imperial Yeomanry Headquarters, London, and it was intended that the information necessary for keeping attestations up to date, should be collated and sent from Cleveland House to officers in charge of attestations. These returns had not reached Cleveland House before the transfer of all current work to the War Office was effected.

Returns.

W.O.
27/9712.

Monthly states.

Reserve Battalions.

Reserve battalions. 144. Ex-soldiers, serving in the Imperial Yeomanry, were not allowed to join the Royal Reserve Battalions, nor entitled to receive the 22*l.* bounty given to men joining those battalions.

Separation Allowance ; Allotment of Pay.

Separation allowance and allotment of pay. 145. In many cases owing to the great pressure of work at the time of enlistments, the necessity for filling up Army Form D 418 (Certificate for separation allowance), and Army Form O 1796 (statement showing rates of allotments) was overlooked. This caused great hardship to many families, and on a representation being made to the War Office, it was eventually ruled, that the separation allowance of men who had gone abroad without supplying evidence as to their marriage, as required by regulations, might be issued on receipt of satisfactory evidence of their marriage, also family allotments pending the receipt of Army Form O 1796.

Suggestions.

146. The following suggestions are offered for future consideration in regard to any similar organisation at home :—

Drafts. 147. That drafts be allowed for the Force at the same percentage, and on the same system as that fixed for the regular Forces. Up to December, 1900, the casualties in the Imperial Yeomanry, amounted to over 20 per cent. of its strength, and for these, practically, no provision was made. The 1,000 men at one time sanctioned by the War Office, for drafts, was subsequently disallowed. Later events proved this to be an unfortunate decision. See Appendix No. 56.

Casualties. 148. The subject of casualties embraced a very wide field of correspondence, for, as time went on, answers had to be given to numerous verbal or written enquiries regarding Imperial Yeomen. Frequently questions were asked by the War Office, or other departments, "can any such person as A B C be traced, as having been enlisted in the Imperial Yeomanry?" This entailed the searching of about 113 rolls, many of which were not alphabetically rendered. Eventually, six months after the commencement of the organisation, it became necessary to make a complete alphabetically nominal roll of the whole Yeomanry, a work which involved much labour. It would have saved a very great deal of time if this had been done from the very first.

Illegible writing. 149. The illegible writing of names, towns, and streets, in recording particulars regarding next of kin, has resulted in great waste of time and labour to all sorts of departments such as pay, post, and telegraph; experience points to the desirability of requiring these to be rendered in capital letters or if possible typewritten. This would save much inconvenience, and be well worth the extra expense or trouble. In the case of double names, or hyphen names, great confusion has arisen, and often telegraphic announcements from the Cape, have rendered the names differently from the manner in which they have been recorded; if some system could be devised by which this could be avoided it would save much time.

Attestations. 150. Attestation Army Form B 111, should contain a notice to be printed in red or other conspicuous letters, drawing attention to the urgent necessity for the correct reply to Question 8 "Are you married?" and the legible recording of the answer to Questions 10, 11, 12 of page 4. With hasty enlistments, at a time of emergency, it is not so easy to arrive at the truth of these matters, as in line regiments in time of peace, and failure to record the true answer, results in great hardship to families left behind.

Separation allowance and allotment of pay. 151. A second notice should be printed drawing attention to the necessity of at once filling up Army Form D 418 "Certificate for Separation Allowance," and Army Form O 1796 "Statement of rates of allotments of pay of men on the married establishments. The incorrectness of attestations of men of the Imperial Yeomanry in these matters, and the omission to render Forms 418 and 1796, has resulted in a great deal of unnecessary trouble, and much hardship to the families of the men.

Organisation, orders, circulars. 152. The first issue of Army Orders organising such a force should, if possible, embody all rulings which were made applicable by the War Office to the Imperial Yeomanry, such as those announced in Imperial Yeomanry Orders 3 and 4 of January 24th, 3, 6, and 7 of January 25th 3 of February 1st, &c., or at least as many as may be applicable at the time in question. Before these rulings, issued in 1900, are lost sight of it might be well to print them all in a pamphlet, or in such a form, that they could be ready for reference immediately a similar force is raised, in order that so many as are then suitable may be announced without delay as applicable to the Force. Most of these, of later dates than of January 23rd, 1900, are re-published in the Imperial Yeomanry Orders.

153. Officers who are nominated to the command of companies, may often be such as have either lost touch of army routine, or perhaps have never held the command of a company. In the hurry of preparing for a Campaign they can hardly be expected, even if they had the time, to read up the King's Regulations, Royal Warrant (Pay), Allowance regulations, and other books; some of these would probably not even be readily available. This being the case, one of two courses seems desirable:—

- (a) It would be of assistance to all such officers if a short pamphlet could be prepared drawing attention to the most important duties of officers in respect to enlistment, discharge, pay, casualties, &c., in all cases quoting the paragraph of the regulations concerned; or if this is not considered desirable:
- (b) To direct the attention of officers to the most important regulations such as: Discharges (King's Regulations); Regimental Debts Act (Manual of Military Law); Troopships (King's Regulations), Casualties, Death Reports, &c.

154. Cases containing Army Forms, and books, which are requisite for daily work, when organising a company, might be prepared at Yeomanry brigade centres, and sent off, at once, for the use of company commanders, so as to obviate the necessity for having to write, and telegraph, to a variety of authorities. The more important are those shown in Appendix No. 94. Army forms and books.

155. One instance as an example of the necessity for doing what is here proposed is quoted where the want of "Discharge Certificates," and "Proceedings on discharge" (added possibly to the want of knowledge of the routine proceedings) led to a large unnecessary expenditure; certain men having been discharged without all the formalities required by these documents, they had to be brought on the strength of the army, and formally discharged, after five months' delay, resulting in law processes, &c. Discharge papers.

156. The numbering of any Orders such as those of the Imperial Yeomanry should be consecutively from first to last of the whole series, not recommencing at No. 1 daily. Imperial Yeomanry Orders.

157. The subject of officers' rank has given rise to much discussion both here, and in South Africa. It is therefore desirable to refer to it, lest it be thought it has been overlooked. A remedy to the course adopted by the War Office is not at present apparent, but if one is possible, it should at least receive very careful consideration. The following suggestions on the subject have, amongst others, been named:— Rank of officers in Imperial Yeomanry

(a) It would be of assistance if an official list of the officers of Imperial Yeomanry could be issued, giving their names and rank as well as rank in *former service* with date of commission in both cases, to which reference could be made in order to settle seniority. At present, there is nothing to go by, and cases are constantly occurring when in camp with regulars, where it is important that there should be an official book of reference, or list like the Army List.

(b) As to the date of Imperial Yeomanry commissions, it seems hardly fair to allow the arrangement made to always stand, as, in some cases, it places old soldiers with medals for active service, junior to Yeomen, Militiamen, or Volunteers, and the latter, who may have served for many years in the Auxiliary Forces, as junior to civilians. In one case a captain in the Yeomanry, who volunteered to go as quartermaster, was junior to a subaltern, who served in the ranks of the regiment, up to about a fortnight before the battalion sailed for South Africa.

(c) It also seems reasonable, that although all officers should be granted pay, from the day they joined for duty, the commissions should all bear one date, as of course, the dates upon which names were sent in, and commissions granted, were in no way governed by superior efficiency, or any condition of that kind, but often by mere accidental circumstances.

(d) It might be perhaps possible, to divide the officers into different classes, such as:—

- (a) Ex-army officers, according to their previous army rank;
- (b) Militia;
- (c) Yeomen;
- (d) Colonial forces;
- (e) Volunteers; and
- (f) Civilians.

(e) An officer who holds a commission as captain in the Yeomanry, or Militia, or Volunteers, ought, at least, to go to the head of subalterns in the Imperial Yeomanry. If it is impossible to grant the concession of one date for all commissions, there ought to be no difficulty in making the sub-divisions as proposed.

Extras.

158. Great difficulty was found in regard to the provision of extras while on service. Where a battalion was composed of companies, drawn from two, or more, counties complications were created by the present system. One county was found to have exhausted all its County Fund, and to have no more money available, either because the fund was a smaller one, or because more than one company was raised. Officers commanding companies have been in many cases permitted by their commanding officers, or lord lieutenants, to make use of their funds, as they liked, and those having a surplus, were able to spend it either in purchasing luxuries for the men of their own companies, in buying extra horses, or in contributing to the mess, and other expenses of the officers, or even by making an addition to the pay. This made the position of the commanding officer an extremely difficult one. He had no power to prevent one of his junior officers commanding a company from doing as he liked with his own money. If he suggested that the money should be spent equally over the battalion, he was exposed to a refusal, on the part of one of his junior officers, and great discontent, and jealousy was caused in the battalion, when men of the same rank, found that in one company advantages were possessed which were not enjoyed in another. The effect of the present system was, to give special advantages to some company officers, who in many cases, did not know how to use them with tact and discretion, and to put the commanding officer in respect of these matters in a very difficult and invidious position. To remedy this defect it has been proposed in Section II of the Report (para. 496) that all funds should be centralised.

Irish companies.

159. Some valuable suggestions will be found in Colonel Graves's report on the raising of the Irish (Belfast) Companies Imperial Yeomanry, under "General Remarks" in Appendix No. 53.

CHAPTER III.

SPECIAL CORPS.

160. The Imperial Yeomanry Committee resolved that a Sub-section under an officer designated Deputy-Assistant Adjutant-General, Independent Corps, should be formed to attend to all matters connected with these battalions and companies. Lieut.-Col. R. B. Colvin, Staff Officer, was selected for the appointment, which he held until he sailed for Africa with the XXth Battalion, (to the command of which he had been nominated,) on the 14th April, 1900. Colonel Colvin deserves special notice for the tact and zeal he displayed in a difficult position, and to his untiring efforts the success of the Special Corps was largely due.

161. The following is a list of subjects which were dealt with by it:—

Subjects
dealt with.

Appointments of officers.
Attestations.
Discipline.
Enlisting and approving of men.
Inspections.
Musketry arrangements.
Pay, including separation allowance and allotment of pay.
Returns.
Small books.
Training of officers and men.

W.O.
079/10/748.

162. The Imperial Yeomanry Committee was authorised to raise certain independent corps specially enrolled by private persons, the organisation of which was to be similar to that of other Imperial Yeomanry Companies, i.e. 115 rank and file, or 121 of all ranks.

Authority to
raise Special
Corps.

The following were the corps that were raised:—

List of
Special
Corps and
Companies.

47th Company (D.C.O.), the Earl of Donoughmore's Special Corps.
The XVIIIth Battalion, "Sharpshooters" Imperial Yeomanry.
The XIXth Battalion, "Paget's Horse" Imperial Yeomanry.
The XXth Battalion, "Rough Riders" Imperial Yeomanry.

In addition to the above, the following companies, which were not affiliated to any Yeomanry Brigades, came under the general supervision of the officer appointed specially to carry on the work connected with the Independent Corps:—

45th (Irish, Dublin).
46th (Irish, Belfast), and
54th (Irish, Belfast) Companies.
(of the XIIIth Battalion, Imperial Yeomanry).
60th (Irish, Belfast), and
61st (Irish, Dublin) Companies
(both of XVIIth Battalion Imperial Yeomanry).
74th (Irish, Dublin) Company.
(of the XVIth Battalion).
The 77th (Manchester) Company (of the VIIIth Battalion).

**Rules of the
Special
Corps.**

163. Rules and conditions under which Independent Corps could be enrolled with the sanction of the Imperial Yeomanry Committee, were drawn up, and a copy of these will be found in Appendix No. 30.

**47th Com-
pany.**

164. The 47th Company (Duke of Cambridge's Own) Special Corps was recruited in London, the dépôt being at 48, Duke Street, by a Committee of gentlemen with Lord Donoughmore at its head as President, the recruits being finally approved by Lieut.-Col. Colvin, the D.A.A.G. Independent Corps, after they had passed the required standard of riding and shooting. The Company was inspected by H.R.H. The Duke of Cambridge on the 14th, and sailed for South Africa on the mail steamer "Dunvegan Castle" on the 17th February, 1900, Lord Donoughmore's Committee being permitted to make their own arrangement for passages for the men by this steamer, the cost being defrayed by themselves, and their pay being allotted to the War Fund. The 47th Company forms part of the XIIIth Battalion Imperial Yeomanry, Commanded by Lieut.-Col. Basil Spragge, D.S.O.

**XVIIIth
Battalion,
"Sharp-
shooters."**

165. The XVIIIth Battalion "Sharpshooters," Imperial Yeomanry, consisted of four Companies, the 67th, 70th, 71st, and 75th. The Battalion was raised by the Earl of Dunraven, K.P., assisted by a Committee of 11 gentlemen. Three companies of this Battalion (the 67th, 71st, and 75th) were recruited in London, and throughout England, the men being finally approved of by Lieut.-Col. Colvin, after complying with the conditions as to shooting and riding, the standard of shooting being higher than that in the remainder of the force. The 70th Company was raised in Scotland by Lieut.-Col. T. A. Hill (late Commanding 12th Lancers), 2, St. Andrew's Square, Edinburgh, who was officially appointed Approving Officer, and who represented in Scotland, the Committee of the "Sharpshooters" Companies of the Imperial Yeomanry. The battalion was selected to form part of the Rhodesian Field Force, and after being inspected by H.R.H. The Prince of Wales, on the 29th March, 1900, sailed direct for Beira on the 6th April, 1900, on board the ss. "Galeka," under the command of Col. R. K. Parké (late 3rd Dragoon Guards).

**XIXth
Battalion,
"Paget's
Horse."**

166. The four Companies (51st, 52nd, 68th, and 73rd) of the XIXth Battalion Imperial Yeomanry, "Paget's Horse," were raised in London by Mr. George Paget. The recruits were approved finally by Lieut.-Col. Colvin, D.A.A.G., Imperial Yeomanry, after complying with the conditions as to riding and shooting. The battalion after being duly inspected, sailed for South Africa as follows:—

Three Companies (the 51st, 52nd, and 68th) by the "Tagus" on the 16th March, 1900, and the 73rd (the Headquarter Company of the Battalion) on board the "Delphic" on 31st March, 1900. This battalion took out a Machine Gun Detachment. The battalion is under the Command of Col. H. Paget, C.B. (*p.s.c.*), late 7th Hussars. A report on the organisation of "Paget's Horse" is contained in Appendix No. 54.

**XXth
Battalion,
"Rough
Riders."**

167. The XXth Battalion, "Rough Riders," Imperial Yeomanry, raised in London by Lord Lathom, and a Committee, consisted of the 72nd, 76th, 78th, and 79th Companies. Lieut.-Col. R. B. Colvin, the D.A.A.G. Special Corps, Imperial Yeomanry, was appointed to the Command of the Battalion, giving up his Staff Appointment for this purpose. The approving of the recruits was carried on under the same conditions as that of other battalions, and, after the inspection of the Corps by the General Officer Commanding the Cavalry Brigade at Aldershot, (where the corps was accommodated in the East Cavalry Barracks), it sailed for South Africa on board the "Canada" on 14th April, 1900.

Attestations.

168. Under paragraph 20 of the Secretary of State's instructions issued with Army Order 28 of 1st February, 1900, the custody of the Attestations of the Independent Corps and the corps not affiliated to Yeomanry Brigades came under this Department. These important documents on being examined were found very incomplete (owing to the pressure of work during the early part of the recruiting), entailing their return to corps for correction, signatures, completion or explanation. The result was, that as some of the battalions had departed for South Africa, a number of these attestations were in an incomplete condition on their receipt by the D.A.A.G.'s Department. It would be advisable in the event of such a corps as the Imperial Yeomanry being raised on any future occasion, that instructions be given for the careful preparation of this document, from which all information regarding the recruit is obtained, and from which his own and family pay, if married, is regulated.

Discipline.

169. Cases of breach of discipline were few, in fact there was not a serious case on record. Some few men at the recommendation of commanding officers, were dealt with under paragraph 17 of the Secretary of State's Instructions on the Royal Warrant issued with Army Order 28 dated 1st February, 1900, and discharged as "not likely to become efficient soldiers."

170. The inspections of the Independent Corps, prior to embarkation, were carried out by the general officers commanding the districts in which the corps were raised. Inspections.

171. The following were the returns rendered by the Deputy-Assistant Adjutant-General in connection with the Independent Corps:— Returns.

(1) Daily returns showing unit, its station, strength of officers, warrant officers, non-commissioned officers, and men, horses, guns, vehicles, and date when ready to embark, forwarded every morning to the Adjutant-General's Branch Imperial Yeomanry for information in connection with the embarkation of the unit, see Appendix No. 26.

(2) Return showing the number of recruits for the Imperial Yeomanry finally approved by the officers commanding up to every Saturday, rendered to the War Office every Saturday evening, see Appendix No. 52.

W.O.
079/10/398,

172. The final approval of the recruits obtained in the neighbourhood of London was carried out by the Deputy-Assistant Adjutant-General Special Corps up to the time of his appointment to the command of the Rough Riders, XXth Battalion Imperial Yeomanry, after which date commanding officers of the several battalions Independent Corps, carried on this duty themselves. Enlisting and approving of men.

173. Under Army Order 121 of May, 1900, small books (Army Form B 50) were ordered to be issued to all Imperial Yeomen, and to be kept up in accordance with paragraphs 692 to 695 of the Queen's Regulations. The work of completing these books as far as practicable, for the Independent Corps and those corps not affiliated to Yeomanry brigades, fell on the Deputy-Assistant Adjutant-General, as the officer in charge of the attestations. The greater portion of the information in these books was completed from the data extracted from the attestations, and despatched to the officers commanding the companies. Small books.

174. The names of officers recommended for commissions in the Independent Corps were, in the first instance, submitted by the Committees to the Deputy-Assistant Adjutant-General. Those selected, after due enquiry by him as to their fitness for appointment, were forwarded for the approval of the Imperial Yeomanry Committee, who finally sent on the names of those approved for the sanction of the War Office. Appointment of Officers.

175. The Station Paymaster, Hounslow, was instructed to make such cash issues as were requisite for the payment of the men of the companies raised in London, viz. :— Pay and family pay of the married.

W.O.
079/10/
1065.

Mr. Paget's Corps, XIXth Battalion Imperial Yeomanry,
Sharpshooters, XVIIIth " " "
Rough Riders, XXth " " "
47th Company Duke of Cambridge's Own, XIIIth Battalion Imperial Yeomanry,

and to pay family separation allowance and allotments of pay. Other details concerning pay are enumerated in Imperial Yeomanry Order 3 of 5th March. The general instructions contained in War Office letter 079/10/18 of 1st January, 1900 (vide Appendix No. 29), were applicable to these corps.

176. With the sanction of the War Office the following companies proceeded to military stations, for the purpose of drill and instruction in equitation :— Training of officers and men.

51st Company (Paget's) (XIXth Battalion) to Colchester on 16th February, 1900.
71st Company (Headquarter Company) "Sharpshooters" (XVIIIth Battalion) to Aldershot on 10th March, 1900.
Headquarters and 4 companies "Rough Riders," XXth Battalion, to Aldershot—
2 companies on 17th March, 1900, and 2 companies on 24th March, 1900.

The other companies of the independent corps, were instructed in London in drill, and riding, by duly qualified military instructors under the surveillance of their respective commanding officers.

177. Lieutenant George Payne, 3rd Middlesex Volunteer Artillery, was appointed Musketry.
range officer at Bisley to superintend the shooting tests of men wishing to join the com-

panies of the special corps, Imperial Yeomanry, with instructions that the men must pass the standard of marksmanship as laid down for the Yeomanry, and it was particularly impressed on him, that the tests must be carried out in strict accordance with the prescribed rules, and the registers properly signed and sent to the Deputy-Assistant Adjutant-General's office.

Correspondence.

178. The correspondence of this section was kept by companies, it being found easier for reference than if it had been classified according to subjects. An inward and an outward register was kept, and a letter book for outgoing letters, and a journal in which was entered everything that transpired at the Imperial Yeomanry Committee meetings, in connection with the Independent Corps. Each company compilation has an index to the correspondence that has taken place since its formation.

Reports on Special Corps.

179. Reports on the organisation of the following corps are contained in the Appendices, viz.:—

Appendix No. 54.—Paget's Horse.

Appendix No. 53.—The 46th, 54th, and 60th Companies Irish (Belfast), by Colonel Frank Graves, commanding 83rd Regimental District, Belfast.

Appendix No. 55.—The 77th (Manchester) Company, by Colonel R. Bridgford, C.B., V.D., 2nd Volunteer Battalion Manchester Regiment.

Offers.

180. Several gentlemen offered to raise corps to be affiliated to the Imperial Yeomanry, which offers however could not be accepted, and the following is a summary of these:—

Lieut.-Col. Eldon Serjeant.

I.—On the 27th December, 1899, Lieutenant-Colonel William C. Eldon Serjeant, 5th Battalion the Rifle Brigade, who had seen a good deal of service in Africa, proposed to raise a complete corps in the City of London containing officers, non-commissioned officers, and men who had seen active service in the South African irregulars, the corps to be composed of 4 companies 540 strong, and to be designated "The City of London Imperial Yeomanry Corps." Colonel Serjeant was prepared to assist in obtaining the services of an influential Committee in the City of London, to provide such funds as might be deemed necessary, and to interest City men generally in the scheme. He wished to be recommended for the command of the proposed corps. This offer was refused.

II.—Mr. Sievier, Mr. Cavendish and Colonel Gourand all offered to raise Independent Corps but the Committee were unable to accept their help.

Lord Loch's Corps.

III.—Lord Loch, on the 23rd January, 1900, telegraphed suggesting that his South African Company should be embodied in the Imperial Yeomanry, which offer was at first accepted, but on the 29th January he informed the Committee that since he was in communication with them, he had, with the sanction of the Secretary of State for War, been in direct communication with Lord Roberts, whose sanction he had received to send his corps direct to South Africa, to join one of the regiments being raised in that country. On 1st February the matter was brought to the notice of the War Office, and it was pointed out that Lord Loch's action had placed his corps outside the control of the Imperial Yeomanry Committee, and that it was presumed the corps would come under the direction of the Under-Secretary of State for War. On the 10th February a further letter was sent to the War Office intimating that Lord Loch's contingent was originally comprised in the Imperial Yeomanry, and the Committee understood that it was to be bound by the Imperial Yeomanry conditions, and further that Lord Loch had been granted privileges for his contingent, to which, if it were to be a part of the Imperial Yeomanry, it could not be entitled, and which was prejudicial to the Yeomanry Force.

The privileges referred to were:—

1. No tests or official inspection.
2. No discipline on board.

As Lord Loch's contingent was to receive a higher rate of pay than Imperial Yeomen, a serious complication might have arisen if his corps had been embodied in the Imperial Yeomanry.

Captain F. E. Lane-Fox.

IV.—Captain F. E. Lane-Fox, 3rd West Yorkshire Regiment, applied on the 30th January, to be permitted to raise a company of Imperial Yeomanry; he had already had promises of 60 men who were good riders and fair shots, and if their services were accepted he said he would be glad to command the company, having had some experience of South African life. He was informed that the Imperial Yeomanry Committee were willing to grant him permission to raise this company of mounted infantry provided he could obtain permission from the Officer Commanding Yorkshire Hussars Yeomanry Cavalry, to be affiliated to that regiment.

V.—Major A. Jobling, late 2nd Battalion The Border Regiment, and 1st Battalion The Yorkshire Regiment, on the 30th January, 1900, applied to be permitted to raise, discipline, and command, first, a company, and, that being satisfactory, a battalion of Imperial Yeomanry, the company to be raised in London. This application which was brought before the Committee on two occasions, was negatived. Major A. Jobling.

VI.—Mr. J. C. Denham Parker, late King's Dragoon Guards, applied on the 5th February, 1900, to raise a company in conjunction with Mr. W. Allen, M.P., with saddles, clothing, &c., complete within a fortnight; his only stipulation was that he should command the company, and that Mr. Allen should be his senior subaltern, but in the event of their raising two companies, that Mr. Allen should command the second one; this application the Committee regretted they could not authorise, as the total number of companies sanctioned by the War Office had already been raised. Mr. J. C. Denham Parker.

VII.—Mr. E. A. C. Pinson, late 2nd Lieutenant 3rd Battalion East Yorkshire Regiment, on 12th February, 1900, offered his assistance in raising a company of mounted infantry for employment in South Africa; he knew of many men who were anxious to volunteer for the front, and felt sure he would be able to raise the number required. In reply to his application he was informed that it would be necessary for him to communicate with an Officer Commanding a Yeomanry Regiment, and act under his direction and sanction. Mr. E. A. C. Pinson.

VIII.—Mr. Mildmay offered to raise a corps in Australia, and it was, at first, proposed to accept this offer, he having obtained the services of 43 men. The War Office, however, declined to allow these men to join the Imperial Yeomanry, and they afterwards formed part of the Bushmen Contingent from Australia. Mr. Mildmay.

IX.—Captain E. G. M. Short, on 14th February, 1900, requested permission to raise a corps of mounted infantry of over 400 strong, and to be given command of it. He was prepared to find better and cheaper horses than those imported into South Africa. To this application the Committee replied by requesting that particulars should be submitted as to where, and, how, Captain Short proposed to raise this corps. On 26th February, 1900, his proposals were sent, which were as follows:— Captain E. G. M. Short.

Companies (121 of all ranks) to be raised throughout the British Isles.

Medical examination and attestation in London.

Accepted candidates to be housed in London until clothed and equipped.

Horses to be obtained abroad.

Three companies to be composed of volunteers, or civilians, already marksmen, and capable of passing riding test, within a given limited space of time.

One company of young gentlemen desirous of obtaining commissions in the line, and who could pass the tests.

One Maxim gun would be taken.

After an interview with Colonel Colvin, regarding matters on which the Imperial Yeomanry Committee required further information, his application was negatived.

X.—Mr. W. H. Partridge, late Monmouthshire Engineer Militia, on 17th February, 1900, intimated that he would be glad to raise a company of mounted infantry, he having lately assisted to horse and equip a very smart troop. He was informed that it would be necessary for him to communicate with an Officer Commanding a Yeomanry Regiment, and act under his direction and sanction. Mr. W. H. Partridge.

XI.—Proposed corps of roughriders (Fauvel's). Headquarters, 8, Buckingham Gate. Mr. Fauvel.

The corps was to be organised as a regiment of irregular cavalry, consisting of 1,000 men with 1,000 horses, and 500 men with 1,000 horses to carry Maxims, mounted guns, food, &c., to be ready about 20th December.

The men on landing were to be enlisted under the "Short Enlistment Act." (Cape and Natal.)

Two hundred and fifty (250) men had been selected up to 13th December, 80 per cent. being time expired men, and men who had seen service in various parts.

A force of trusty Zulus as spies, or despatch riders, were to accompany the force.

The offer was not accepted as the Imperial Yeomanry Committee did not consider the organisation, terms of pay, enlistment, &c., would harmonise with those for the rest of the Imperial Yeomanry.

CHAPTER IV.

TRANSPORT AND SHIPPING.

Personnel.

181. The *personnel* of the Quartermaster-General's section, Imperial Yeomanry, consisted of the following :—

Colonel the Right Honourable Lord Harris, G.C.S.I., G.C.I.E.
Rear-Admiral Sir John Hext, K.C.I.E. } In attendance.
Lieutenant-General Badcock, C.B., C.S.I. }

Subjects dealt with.

182. The following is a list of subjects which were dealt with by it :—

Barracks.
Camps.
Clothing.
Equipment (excluding saddlery).
Food.
Forage.
Hire of buildings and lands for camps.
Movement of troops.
Ranges.
Sanitary questions.
Supply.
Transport.

Clothing and equipment.

183. Clothing and equipment were, however, dealt with in a sub-branch which was in charge of Sir R. Baillie, Bart. (*Vide* Chapter VII of this Report.)

Sea transport.

184. The above *personnel* was not completed until the 15th January, 1900, previous to which the work had to be conducted under considerable difficulties. At first, the Committee considered that the business of taking up sea transport would devolve upon them, and accordingly arrangements were entered into for the following ships :—

" Kent."	" Lake Erie."
" Monteagle."	" Mount Royal."
" Lusitania."	" Fort Salisbury."

Before any of the Imperial Yeomanry were embarked, this arrangement was found to be inexpedient, firstly, because the Committee had no means at their disposal for conducting surveys; secondly, because they would have been indirectly competing with the Admiralty in chartering transports; and lastly, and chiefly, because the Committee would have been intravening the law, under which troops have to be carried as passengers under the Board of Trade Act, or in troopships chartered by the Admiralty. A consultation was, therefore, held with the Admiralty, who agreed to undertake the provision of the necessary transports, and took over the ships above-named, with the exception of the " Lusitania " which they refused as unsuitable.

Embarkation of units.

185. The procedure under which work in connection with the embarkation of the Imperial Yeomanry was conducted was as follows :—

The Adjutant-General's section received daily progress reports from the various head-quarters of companies, which were communicated to the Quartermaster-General's section, as battalions, and companies, were in readiness for service; the Quartermaster-General's section furnished the Quartermaster-General at the War Office with embarkation sheets, giving the totals of officers, men, and horses ready for embarkation on a certain date; the Quartermaster-General, War Office, then intimated the transports which were available, when allotment lists were prepared in this section; submitted to the Quartermaster-General, War Office; intimated to commanding officers concerned; and published in Imperial Yeomanry orders. Subsequent orders regarding inland movements to the port, and all details of embarkation were carried out under the orders of the Quartermaster-General, War Office. That the Imperial Yeomanry Committee received very considerable aid from the fact of the Admiralty and War Office making arrangements for all sea transport is patent, but the work of allotment was by no means an easy task; the ideal allotment would have been a battalion complete in a transport, or transports, starting together. This ideal was, however, only achieved in one or two instances, and from a variety of causes, such as unreadiness of perhaps one company, in a battalion, incompleteness of a battalion staff, and sickness amongst horses, it was generally necessary to accept the company as the unit, and to allot as many companies, as would be approximate to the accommodation available, from those first reported ready for service.

186. In the month of January the first four transports to sail for South Africa were **Transports**, the "Cavour" on 27th January, the "Winifredian" on 28th January, the "Lake Erie" on 30th January and the "Goth" on 31st January, embarking:—

80 officers.

3 warrant officers.

1,463 non-commissioned officers and men.

Total 1,546 of all ranks, and 1,213 horses.

187. During the month of February eight transports were despatched, viz.:—

"Monteagle"	2nd February.
"Montfort"	3rd "
"Kent"	7th "
"Kumara"	7th "
"Norman"	10th "
"Afric"	11th "
"Carthaginian"	23rd "
"Cymric"	28th "

Embarking:—

201 officers.

15 warrant officers.

3,195 men.

Total 3,411 of all ranks, and 1,684 horses.

188. During the month of March eight ships were despatched, viz.:—

"Manchester Merchant"	1st March.
"Cornwall"	3rd "
"Mahratta"	7th "
"Hilarius"	13th "
"Montrose"	13th "
"Winkfield"	13th "
"Tagus"	16th "
"Delphic"	31st "

Embarking—

149 officers.

5 warrant officers.

3,288 men.

Total 3,442 of all ranks, and 1,589 horses.

W.O.
28.3 00.

In addition to the above numbers the War Office sanctioned the mail ss. "Carisbrooke Castle," which left Southampton on the 31st March, taking out sundry details comprising—

13 officers.
1 warrant officer.
46 men.

Total 60 of all ranks, and 3 horses.

**Rhodesian
Force.**

189. On the 6th April, 1900, the "Galeka" sailed with—

52 officers.
2 warrant officers.
964 men.

Total 1,018 of all ranks, and 53 horses,

from Southampton to Beira. This contingent was to form part of the Rhodesian Field Force. The lump sum paid by Government to the Union Castle Company, the owners of the "Galeka," for this service was £45,000, which included everything for the men and horses, and freight of stores, and allowed four consecutive days for the disembarkation of the troops and horses, and the landing of the stores at Beira, after which demurrage was payable at the rate of £150 a day.

Transports.

190. The transport "Canada" was the last vessel despatched with Imperial Yeomanry, and she sailed from Southampton on the 14th April carrying—

55 officers.
1 warrant officer.
1,411 men.

Total 1,467 of all ranks, and 26 horses.

Total force.

191. The total force embarked under the arrangements described above, and during a period of *78 days, was 550 officers, 10,394 non-commissioned officers and men, total 10,944†, and 4,568 horses (including officers' chargers).

**Embarka-
tion of
47th Com-
pany.**

192. It should also be noted that the 47th Company Imperial Yeomanry (Duke of Cambridge's Own) was permitted to arrange for the passages of the men to the Cape by the mail steamer "Dunvegan Castle," which left on the 17th February, the men of this special company defraying the cost of their passages, and further, that arrangements for a number of individual passages, chiefly for officers, were carried out during the months of January, February, March, and April, in communication with the War Office authorities.

**Transport
for
remounts.**

193. Special arrangements were, however, necessary for embarking horses which could not be conveyed with units, and the following ships—

"Mount Royal"	"Ashanti"
"Monarch"	"Montcalm"

were chartered by the Admiralty, and a contract as regards the "Mount Royal" taking 999 horses in February made with Messrs. Sheppard and Grand, of Liverpool, as follows:—The contractors undertook to erect North American horse fittings in the ships, to find forage, attendants, foreman, veterinary surgeon, superintendent, medicines, and to take full charge of the horses to Cape Town for the sum of £12 18s. per head. The terms of this agreement were concurred in by the War Office, and return passages were to be provided by them for the foreman, attendants, &c.

Cost.

194. In the case of the "Monarch," which took out 849 horses in March, the rate was increased to £13 8s. per head, an increase of 10s. per head on the contract made with Sheppard and Grand for the "Mount Royal," and this rate was also accepted for the "Ashanti," which vessel embarked 393 horses in the month of March for South Africa. W.O. 120/Cape/7313.

195. The "Montcalm" also embarked 808 horses at Liverpool on 6th April under the same arrangements as the "Monarch" and "Ashanti." The "Heloopes" embarked 194 horses for the Imperial Yeomanry at Liverpool on 27th April, but she also carried remounts on account of the War Office, all the arrangements being made independently of the Imperial Yeomanry.

* 27th January to 15th April.

† These figures differ slightly from those given in Appendix No. 35 and page 29, showing the total strength of the Imperial Yeomanry. The difference is due to a number (23) of individual passages being included in the Statements of Embarkations.

196. A contract was entered into with Messrs. H. T. Van Laun and Co. for the supply of transport for all the horses purchased for the Imperial Yeomanry in Hungary, in full cargoes, on first class British steamers from Fiume or Trieste at £26 3s. 4d. per head for the first 1,500 and £28 per head for all over that number, to include supply of fodder, water, fittings, attendants, and insurance to Cape Town, and also feed of attendants and transport from Szabadka to the ship. Demurrage at £85 per day. Messrs. Van Laun to pay demurrage at £60 per day should the ships not be ready on the date they specify. Under these arrangements the following ships sailed from Fiume:—

On 23rd February, "Mount Lebanon," with 483 horses.
On 7th March, "Glenmorren," with 508 horses.
On 18th March, "Elmdene," with 507 horses.
On 22nd March, "City of Lucknow," with 850 horses.
On 29th March, "Monkseaton," 657 horses.
On 9th April, "Dunmore," 801 horses.

Ships from Fiume.

197. In the case of the "Dunmore," which sailed from Fiume to Beira on 9th April, 1900, with 801 horses, the original terms were altered in consequence of its being decided to send this consignment through the Suez Canal and Red Sea. The owners of the vessel claimed £1,000 on this account, which the Committee paid. There was also an increase of £10 10s. percentage for insurance on the horses for going through the Red Sea, and the Suez Canal dues, and Messrs. Van Laun had to be paid for 150 horses shut out on account of the vessel not being able to take the full number of horses which they calculated on, through going via the Red Sea. The total amount for this consignment, therefore, worked out as follows:—

Horses for Rhodesian Force.
Cost of transport.

	Amount.
	£ s. d.
800 horses at £28 per horse	22,400 0 0
Increased insurance	520 0 0
150 horses shut out at £28, less £2 1s. 7½d. insurance per horse and £2 for forage, &c.	3,587 19 4½
Extra cost of steamer	1,000 0 0
Suez Canal dues (one way) about	1,040 0 0
Total	28,547 19 4½

198. The Imperial Yeomanry Committee placed a sum of £22,500 with the Bank of New South Wales, to be at the disposal of Mr. Tayloe for the purchase of horses in Australia for the Imperial Yeomanry. The Dutch ship, "Fulmena," was chartered to convey some of these horses from Australia to the Cape, the Government, however, objected to this, and required that the horses should be despatched under the British flag, but as the contract could not be broken, the difficulty was overcome by an agreement being made that the cost and freight was only to be paid at destination on horses delivered. The "Fulmena" eventually took to the Cape 625 horses.

Australian horses per ss. "Fulmena."

199. Under these special arrangements transport was provided for 3,242 horses from Liverpool, 3,806 from Fiume, 750 from Australia, or a total of 7,798 horses, in addition to those embarked with units of the Imperial Yeomanry.

Horses, total number.

200. The appointment of Medical and Veterinary Officers devolved on the Adjutant-General's section, but the work of arranging for the provision of their equipment and board-ship supplies was carried out in the Quartermaster-General's section. The Director-General Royal Army Medical Corps and Principal Veterinary Officer afforded much assistance in personally instructing the officers concerned, as to what equipment and supplies were required, and how the articles were to be obtained. In most cases the purchase of equipment was made by the officers concerned, and the bills submitted through the Imperial Yeomanry Committee to the War Office. The medical supplies were usually placed on board the transports by the Government department concerned.

Medical and Veterinary supplies.

201. It was found undesirable to keep the records of the Quartermaster-General's section by subjects; a system was therefore adopted of keeping all correspondence connected with each transport together, giving the compilation a number, thus the "Mount

Correspondence.

Royal" compilation was given No. 42, and in the register of inward and outward letters the outgoing and incoming correspondence would be marked thus:—

$$\frac{\text{Q.M.G. (B)}}{42-1}, \quad \frac{\text{Q.M.G. (B)}}{42-2}, \quad \frac{\text{Q.M.G. (B)}}{42-3},$$

and so on consecutively. Therefore, to trace any specially-quoted letter was very simple, as an index of the numbers allotted to the several vessels was kept in the register. The register of inward and outward correspondence shows the major number (*i.e.* the ship's number), consecutive numbers, date of letter, from whom received or to whom sent, subject, reference to previous or subsequent numbers, action taken, and date.

CHAPTER V.

REMOUNTS.

202. Colonel Lord Lonsdale was originally in charge of the Remount Department, until Colonel T. A. St. Quintin succeeded him, when, however, he continued to conduct the responsible work of the Saddlery, Horse Equipment, and Vehicle Section. Officer in charge

203. Lord Lonsdale in his report, on the remount operations, at its commencement shows that—

In the afternoon of December 22nd, the Under Secretary of State for War sent for him, and asked if he could provide 1,700 horses, by January 2nd, 1900 (eight working days), and that he guaranteed to find 1,200, of this number. He, immediately, telegraphed to Sir Henry Simpson, Veterinary Surgeon, instructions to wire to about 23 dealers (names given in Appendix No. 81) in the south of England, and to at once proceed to examine these horses himself, but in no instance to buy, until he had personally seen them. Mr. John Bell, of Carlisle, and other principal dealers, in various parts of the country were also communicated with, and asked the probable number of horses that could be seen. Within 24 hours, Lord Lonsdale had ready for inspection, through these channels, nearly 4,000 horses. He also telegraphed to Lieutenant Clarence Wilson, of the Westmoreland, and Cumberland Hussars, who was then in Melbourne, Australia, asking him for full details as regards Australian horses, Mr. Wilson being in a position to know all the horse markets in that part of Australia. It was ascertained that he was prepared to provide 2,000 at Cape Town within a month at £30 each, exclusive of incidental and travelling expenses. Telegrams received from him are shown in Appendix No. 82. Preliminary arrangements for purchasing horses.

204. Lord Lonsdale arranged all the transport of the horses with the railway companies, so that they could be sent to Liverpool ready for shipment, and on January 2nd there were 2,000 at the disposal of the Imperial Yeomanry. But as after purchasing the horses there was no accommodation or stabling provided for them, he had to make arrangements for the erection of stabling at Southampton and for 2,000 horses at Liverpool. He asked Colonel St. Quintin, to undertake the selection of horses in Ireland, which the latter did. Railway transport and accommodation.

205. Subsequently, Colonel St. Quintin, on March 24th, embarked for South Africa, to report to the Committee, on all arrangements in connection with the reception, stabling, and distribution of the horses of the Yeomanry force, but before he arrived, the War Office decided to take over the Yeomanry remount arrangements, and Colonel St. Quintin was so informed, and that he would be, in future, under the Army Remount Department. Col. St. Quintin's departure for Cape.

Meanwhile, Lord Lonsdale, continued to give his advice, and assistance, in remount matters, as well as those of the saddlery, horse equipment, and waggon sections, of the office.

Personnel.

206. The *personnel* of the Home Remount and Saddlery Sections, was temporarily increased* by the daily attendance of the following officers. The names of the clerks employed are shown in Appendix No. 99 :—

Colonel J. C. F. Gordon, C.I.E., I.S.C.
Major H. W. Webb, I.S.C.
Lieutenant Charles Grant.

It should be noted, that the services of these officers, were not concurrent, Lieutenant Grant being the first to go, leaving for the Cape on February 10th, to take up his duties as Quartermaster to the Buckinghamshire Yeomanry. Major Webb's services extended over a period of two months only, from March 1st to April 30th, whilst Colonel Gordon's services lasted just over three months, from February 21st to May 31st. The same remark applies to the clerical staff, each of whom left on the completion of his own particular work; the final duty of collecting data, for drawing up a report upon the working of the department being left to Mr. W. M. Porter, the chief clerk.

207. The following is a list of the subjects dealt with by this section :—

Subjects dealt with Remounts, horseshoes, fodder, transport of horses.
Saddlery, horse clothing, horse equipment, field transport.

Remounts. 208. The undermentioned countries were drawn upon for the supply of remounts, for the use of the Imperial Yeomanry, the numbers against each, showing the number obtained :—

Austria	3,811
Australia	750
The Cape	1,278
Ireland	1,355
Great Britain	6,318†
Total	13,512

Cost. 209. The purchase price of these 13,512 horses, worked out to a total sum of £463,666 showing a general average cost of £34 6s. per horse.

Average price. 210. Taken in detail, the average price was for :—

	£	s.
England	...	39 11
Ireland	...	31 6
Austria	...	29 2
Cape	...	29 13
Australia (including freight)	...	30 3

Keep and transport. 211. To these charges, a very heavy item, must be added for keep, before embarkation, and for transport to the Cape. And it should be noted, that, although, orders were received on December 22nd, 1899, to have 1,200 horses ready by January 2nd, 1900, no arrangements had been made for their forage, and stabling; although the horses were ready at the time mentioned, and stabling arrangements subsequently made, yet no ships for transport were available, until some weeks had elapsed, which caused unavoidable expense and delay. With the exception of those horses purchased in Austria, and Australia, all the transport arrangements were arranged by the Admiralty, in conjunction with the transport section of the Imperial Yeomanry.

English Horses.

How obtained. 212. Of the 6,318 horses purchased in Great Britain, 3,789 were obtained by the commanding officers of Yeomanry Corps and as many as possible, were embarked for South

* W.O. No. 57, 2.2.00.

† Of which 3,789 were obtained regimentally.

Africa with the unit to which they belonged; these did not really come under the direction of the Remount Section. The balance, viz., 2,529 were obtained by the Remount Section, through purchasing agents, in various parts of Great Britain; a complete list will be found in Appendix No. 81.

213. It was found necessary, at first, to assemble horses at one or more, of the Remount likely ports of embarkation, and with this end in view, Remount Depôts were established at:—

- (a) Liverpool;
- (b) Southampton;
- (c) Alexandra Park;

and, in each case, the system adopted worked satisfactorily.

(a) The Liverpool Depôt, was established in the last week of December, 1899, by the Earl of Lonsdale, who made all arrangements with the help of Mr. D. H. Grand, of Prescott Road, Stanley, Liverpool, and appointed Mr. Stafford Jackson, M.R.C.V.S. of Low Hill, Liverpool, to render all necessary veterinary services, and supply all medicines, bandages, &c., that might be required, in fact to take entire veterinary charge of the remounts at the depôt. A very large number of horses passed through this depôt, over 1,700 being present there at one time. It remained open until the 22nd of June, on which date, the remounts still remaining (61 in number), were taken over by the Imperial authorities, and sent to Colchester. The remounts were frequently inspected, both by Lord Lonsdale and Colonel St. Quintin, always prior to the departure of any horse transport. A list of those sailing from Liverpool, giving full details, will be found in Appendix No. 80. The cost of keep of the horses was arranged for, at 3s. per day per horse, and the total working expenses, including this charge, reached about £15,000. Horses were sent to this depôt, from all parts of the country, in special trains, as Liverpool was used for Yeomanry embarkation purposes, on many occasions, and any remounts purchased by commanding officers, and for which no space had been allotted on board the ship in which their unit sailed, were conveyed to Liverpool with their regiments, and left at the depôt to follow in one of the Imperial Yeomanry horse-transports. Of the 1,355 horses purchased in Ireland, 1,164 were shipped from Waterford, and Dublin, direct to Liverpool, and placed in the depôt.

Liverpool
Depôt.

Cost of
keep.

Irish horses.

(b) Colonel the Hon. H. G. L. Crichton undertook to relieve Lord Lonsdale, of the management of the Southampton Depôt, and all subsequent arrangements connected therewith, were made by him through Lieutenant Lister, and some non-commissioned officers of the Southampton troop of the Hampshire Yeomanry, and from the very first, the system adopted worked smoothly, and well. No. 8 shed at Southampton Docks was taken from the London and South Western Railway at a rental of £100 per week, and this practically formed the depôt. The maximum number of horses present at any one time, was 602, and the daily average, for the period the depôt was open, was 272. On April 6th, there were 73 Imperial Yeomanry remounts still at Southampton, and it was arranged to send all fit to travel to the Liverpool Depôt. This was done, and by the 21st April all the horses had been removed from the depôt, and the shed and fittings, &c., as well as Lieutenant Lister's services, were taken over by the Imperial authorities. The total cost of working this depôt, including the keep of the horses was about £6,900. Colonel St. Quintin inspected the depôt on two occasions prior to his departure for South Africa, and Colonel Crichton made frequent reports, upon the condition of the horses and the management generally.

South-
ampton
Depôt.

Cost.

Closing of
the Depôt.

(c) The Alexandra Park Depôt was, by Lord Lonsdale's special request, lent to him for Imperial Yeomanry purposes, and opened on the 25th January, 1900, in order to have a supply of remounts, ready for embarkation, at any time from the port of London. Messrs. Pratt and Barbrook, of 9, George Street, Hanover Square, very generously provided stabling for over 100 horses free of cost, and the New River Company gratuitously provided the necessary water. Lord Lonsdale wrote to these firms, on behalf of the Imperial Yeomanry, thanking them for their generosity. Sir Henry Simpson, took entire veterinary control, and daily returns showing the number of remounts present, and their condition, were regularly received. The maximum number of horses present, at one time, was 116, and the daily average number 47. Colonel St. Quintin inspected the depôt, on February 19th, and caused certain changes in the personnel to be effected. Horses were despatched from this depôt, to the Cape, via the Albert Docks. Major Webb inspected the depôt on the 28th March, prior to its being closed, and, as in the case of Southampton, all the remounts fit to travel, were sent to the Liverpool Depôt, and those found unfit were cast and sold. The fittings, utensils, &c., were sold on March 29th.

Alexandra
Park
Depôt.

Closing of
the Depôt

Lord
Lovat's
diseased
horses

214. Owing to an epidemic of "pink-eye" (amongst the horses belonging to Lord Lovat's Scouts) having been discovered on the ss. "America," which called at Southampton on the 14th March, 1900, the whole of these horses (135 in number) were disembarked by order of Colonel Stacpole, the Embarking Staff Officer, and placed among the Imperial Yeomanry remounts, at the dépôt. This procedure caused considerable inconvenience to the officer in charge of the Southampton Dépôt Imperial Yeomanry, as at that time the ss. "Ashanti" was about to embark Imperial Yeomanry remounts; it was feared that it would not be safe to do so owing to the liability of the disease spreading. He was therefore compelled to find extra stabling in the town of Southampton, for the Yeomanry remounts. However, after some controversy, it was agreed between the Yeomanry, the Quartermaster-General, Lord Lovat, and the Inspector-General of Remounts, that Lieutenant Lister should take charge of the horses until the Imperial authorities were able to do so, and after some days delay the "Ashanti" was allowed to leave. The War Office was addressed on the matter, and from the correspondence relating thereto, Colonel Stacpole's action was justified, on the grounds of its being in the interests of the public service.

Expenses of
purchasing
agents

215. The expenses of the purchasing agents, were fixed at the scale set down in "Regulations for the Allowances of the Army," except in the case of Sir H. Simpson, who received a bonus upon each horse purchased, in addition to his charges for services rendered, and his travelling expenses. Sir Henry Simpson acted, in regard to purchases, under orders from Colonel St. Quintin, and not from Lord Lonsdale.

Horses
purchased
by units.

216. Regarding the 3,789 horses purchased by the commanding officers of regiments, it should be noted, that although the Remount Section of the Imperial Yeomanry had no responsibility in their purchase, full descriptive rolls of these horses, were required by and, in most cases, furnished to the section for entry in its horse registers. Great difficulties were met, in obtaining accurate information, from the units, as to their horse requirements.

Horses
required by
units.

217. Whenever an application for horses was sent to the Remount Section, by any regiment, steps were taken to ascertain how long a time would be likely to elapse before the sailing of the unit, and what number of horses already purchased by the Remount Dépôt, were standing in the locality, with a view to, if possible, complying with the request. It often happened, however, that on the embarkation of the various corps, space was not allotted for the conveyance of their full complement of horses, and the remounts thus shut out, were re-transferred to one of the dépôts referred to, and finally, sent to South Africa in horse transports. These were received at the Base Dépôt, Capetown, and distributed to regiments, which arrived with any deficiency. Dépôts were subsequently formed at Kimberley, and Bloemfontein, for the purpose of supplying the requirements of regiments in the field.

Irish Horses.

Number
purchased.

218. Ireland provided 1,355 horses for the use of the Imperial Yeomanry, all of which were purchased under direct orders from Colonel St. Quintin by Major Charles Studdert, of Corofin, co. Clare, from various dealers, as per list in Appendix No. 83.

Cost.

219. The first batch of 354 cost £35 per horse, and the balance of 1,001 were paid for at the rate of £30 per head. Of these Irish horses 1,164 were shipped to the Liverpool Dépôt; the balance (191) being sent direct to the Albert Docks, London, for embarkation on the ss. "Winkfield," which sailed on March 13th.

Complaints
re class and
condition
of horses.

220. Complaints were received from the Veterinary Officer in charge at Liverpool, of the class, and condition, of the horses arriving from Ireland, and Mr. Grand, who was in control of the dépôt, also wrote on the subject, refusing to take any responsibility, in connection with their shipment to South Africa. A special inspection was ordered by the Imperial Yeomanry Committee, and Colonel Gordon was deputed to proceed to Liverpool and draw up a report upon the whole matter. He there met Major-General Truman, Inspector-General of Remounts for the Army, who also made a report upon the condition of the horses. (*See Appendix No. 84.*)

Major Studdert was asked to explain his action in the matter, and to account for his having purchased certain horses which were considered unfit for the work required of them. He attended a Committee Meeting at the Imperial Yeomanry offices, on May 25th, 1900, and was placed under a searching examination, the members of the Committee expressing their views freely as to his conduct in the matter. Enquiries were ordered to be made, with the result that a lawsuit was authorised by the War Office. The remaining horses were sent out to South Africa, and those found unfit were cast and sold.

Hungarian Horses.

221. A great number of offers to supply horses for the use of the Imperial Yeomanry were received from horse dealers and breeders in Hungary, and after considerable negotiation, a contract was fixed with Mr. W. W. Lewison, of Waterloo Lodge, Newmarket, (who was in touch with all the principal dealers in Hungary) by which he undertook to supply 1,500 remounts, in every way suitable, to be inspected and passed by two officers appointed for the purpose by the Imperial Yeomanry, at Szabadka, Hungary, at a cost of £33 16s. 8d. per head. On January 24th Colonel St. Quintin deputed Colonel Alan Maclean, of Brook House, Bracknell, and Veterinary Lieutenant A. C. Webb, of Naas, co. Kildare, to proceed to Hungary, and to examine and certify as fit, for service, the horses assembled for inspection. Colonel Maclean sent back favourable reports upon the class, and style, of animal submitted to him, and proceeded to purchase them at the average rate, of about 100 per day.

Numerous offers.

Appointment of Colonel Maclean.

222. On February 24th, 1900, a fresh contract was signed for a further supply, the price being lowered to £26 per head, and 2,311 horses were purchased under this second agreement. The same class of horse was insisted upon, as in the first contract, and Colonel Maclean reported that the standard of excellence was well maintained, though it involved rejecting a larger number, than had previously been necessary owing to the dealers attempting to pass off inferior animals upon him, thus prolonging his work. Colonel Maclean wrote in favourable terms of the service rendered by Veterinary Lieutenant A. C. Webb. Altogether the purchasing of these Austrian horses occupied some 10 weeks. Colonel St. Quintin reported that these horses arrived in good condition, and that they compared favourably with the other remounts, both in appearance, and for work.

223. Arrangements were entered into for the transport of all the Hungarian horses from Fiume, and Messrs. H. T. Van Laun and Co., of 1, St. Helen's Place, E.C., were entrusted with the business. They chartered six vessels for the purpose, and had them expressly fitted up for the work. A list giving all details is in Appendix No. 80. The price charged for this freight was £26 3s. 4d. per head for the first 1,500 horses, and £28 per head for all over that number. This included insurance, and all extra charges for attendants, &c. One vessel, the ss. "Mount Lebanon," had the misfortune to break the shaft of her propeller when nearing Cape Town, and was towed into port by a collier, after spending some 49 days upon the voyage. In spite of this contretemps, the horses arrived in good condition, and out of 483 embarked 462 were landed. The provision of surplus fodder in this instance was most useful. Major A. C. Webb, who had been passing these Hungarian horses, left Fiume in the "City of Lucknow" to take up his position on the Veterinary Establishment of the Base Remount Depot, whilst Colonel Maclean returned to England, on the completion of his duties as purchasing officer.

Transport.

Cost of freight.

224. In connection with the despatch of the Rhodesian Force, it became necessary to alter the destination of one of the steamers, and under instructions from the War Office, the ss. "Dunmore" sailed for Beira through the Suez Canal, instead of going to Cape Town, and landed 744 of the 801 horses she had taken on board. The mortality was not so great as might have been expected from the excessive heat in the Red Sea. No deviation of the route taken was provided for in the contract, and Messrs. H. T. Van Laun and Co. had some difficulty in arranging the change. Eventually a sum of £1,000 was paid to the shipowners and all the extra costs, such as Canal dues, &c., were met by the Imperial Yeomanry Committee.

Rhodesian Force.

Extra cost of freight.

Australian Horses.

225. Lord Rothschild had several interviews with the Committee, upon the subject of obtaining remounts from Australia, and through his influence, and the medium of the Alliance Marine and General Assurance Company, Limited, of Capel Court, E.C., an agreement was entered into by their Agent in Sydney, Mr. Tayloe, and Mr. Cotton, the horse dealer of Sydney, to procure, and ship to South Africa 750 suitable horses, all of which should be inspected and passed by Major Thompson, who was at that time in Australia, purchasing and passing horses for the Imperial Government. This agreement is dated December 30th, 1899.

Arrangements for supply.

226. The transport of these Australian horses was carried out by Messrs. Houlder Bros. and Co., Limited, of Young Street, Sydney, with whom Mr. C. C. Tayloe, the Agent in Sydney of the Alliance, Marine and General Assurance Company, entered into a contract on January 18th, 1900. By this contract freight was arranged for the conveyance of 625 horses, and the price paid, inclusive of all veterinary charges and insurance was £18

Transport

Cost of freight.

per head. This added to the £12 paid for each remount made the total cost of each horse landed in South Africa from Australia, just £30. The last consignment of 125 horses from Australia cost £2 per head more to carry, freight having risen considerably by this time. They were not embarked until the middle of June. The vessels by which these horses were shipped are shown in Appendix No. 80.

Cape Horses.

Early arrangements. 227. Some remounts were also obtained at the Cape, and as early as December 22nd, 1899, Messrs. Wernher, Beit and Co. offered to supply 2,000 horses at Cape Town for the use of the Imperial Yeomanry through their agents Messrs. J. Weil and Co. Messrs. Wernher, Beit and Co. accordingly wired to Messrs. Julius Weil and Co., at Cape Town, instructing them to make all the necessary arrangements provisionally, to expedite the supply of this number of horses. There was a question at first, as to who should pass the remounts, and it was at first arranged that Sir A. Milner should nominate the inspecting officer, but eventually Captain Boyle of the Imperial Yeomanry was despatched to South Africa for this purpose. Late in January information was forthcoming that it would scarcely be possible to obtain the 2,000 remounts arranged for, and as at this period the Imperial authorities were in doubt as to the total strength of the Yeomanry that they would sanction, it was considered advisable to curtail the purchases in South Africa, and Messrs. Wernher, Beit and Co. were accordingly instructed to reduce the order to 1,000 horses. There was also another reason for this measure, as the Government were purchasing in South Africa for their own immediate needs, and competition was only increasing the price. On February 17 a cable was received from the Cape showing that the order had been reduced to 1,000 horses, and eventually only 562 remounts in all were obtained under this particular contract. A few more horses were, however, purchased at the Cape, for the use of the Imperial Yeomanry. The Remount Officer of the Base Depôt purchased 37, and Lord Chesham 48, whilst two regiments of Yeomanry had made arrangements to obtain 300 between them, at the Cape, before they left England, viz.:—the West Kent, 100, and the Northumberland Yeomanry, 200. These 300 horses were allotted by the Base Depôt to the respective regiments on arrival. The price paid was £30 per horse. A further number of horses and mules was afterwards supplied to Lord Chesham by Julius Weil; viz., 239 remounts and 12 mules, and 80 horses were purchased by the Duke of Cambridge's Own, Imperial Yeomanry.

Number procured.

Price.

Miscellaneous.

Rules for purchasing horses. 228. In all cases of purchasing horses for use as remounts, certain rules as to age, size, colour, &c., had to be observed, and each purchasing agent was informed officially by letter as to these important particulars. The limits were, age, 5 off, to 10. Height 14·2 to 15 hands. Colour, no greys. No stallions, and no mares in foal. Attention was drawn particularly, to the nature of the work that would probably be required from the remounts, and to the character of the ground over which they would most likely have to operate. Owing to the need for procuring horses within a short space of time, a certain percentage of remounts were purchased which were subsequently not found suitable; in Great Britain 356 were cast and sold, and 51 died from disease contracted in various ways, such as strangles, and colds through taking long journeys by rail in open trucks, during bad weather. In all cases, the orders laid down by the Queen's Regulations for the conveyance of horses were carried into effect, and the remounts were conveyed on railway warrants at privileged rates.

Railway transport.

Gifts of horses. 229. In some cases, horses were presented to the Yeomanry as free gifts, and the London Stock Exchange most generously gave 100 remounts. Private individuals also offered horses, and when these were found of a suitable size, age, and colour, they were accepted and the donor suitably thanked.

Handbooks on horses. 230. Five hundred copies of a small handbook on "Horses," by Lieutenant F. B. Moody, of the Devon Artillery, and late veterinary officer of the Royal East Kent Yeomanry, were given to the Imperial Yeomanry by the Author, and distributed to the various units going out; also 5,000 copies of Professor Wallace's book on Horse Sickness were purchased, and despatched to South Africa for the use of the Yeomanry. Certain instructions were also printed in handy form, upon cards entitled "Hints for Mounted Troops in South Africa," which were distributed.

Purchasing operations stopped. 231. Some difficulty was experienced in deciding the number of horses to be purchased, as from the first, the ultimate strength of the force was never a certainty. No horses, however, were purchased after March 29th, 1900, from which date it was

settled that all further arrangements as regards the remounting of the Yeomanry would be undertaken by the Imperial Authorities. From returns received from the Base Depot at Cape Town, it appears that the number taken over by the Army Remount Department from the Yeomanry was 1,684.

232. Some attempts were made to force contracts upon the Committee on the Contracts. strength of preliminary negotiations, and two cases of the sort were settled.

233. Provision for shoeing the remounts was made at the Liverpool Depot by Lord Horse-Lonsdale, and for supplying extra sets of shoes for the horses at the Cape. This was also done at Southampton, and in addition some 5,016 sets of shoes and 150,000 nails were shipped to the Base Depot, between April 16th and May 16th, 1900, ample provision being thus made for all requirements.

234. The question of fodder, with the exception of some surplus shipped upon the vessels conveying remounts from Liverpool and from Fiume, did not come under the direction of the Committee. Messrs. Shepherd and Grand arranged all details of the Liverpool Depot horses, placed extra fodder, &c., upon the vessels conveying these, and this was taken over at the Cape and used by the Base Remount Depot. Messrs. H. T. Van Laun and Co., who shipped all the Austrian horses from Fiume, placed certain extra fodder on board the transports, leaving that port, and this was taken over by the Army Service Corps.

235. Two claims for "demurrage" were received and settled, both of which arose from the fact that beside the horses, the vessels had "fodder" on board and this was not discharged with the horses. It is known, however, that the Imperial authorities had a number of similar claims, due to the necessity of ships putting back into the outer harbour after discharging only that portion of their cargo immediately required at the docks.

236. Descriptive returns of all the horses purchased in Great Britain, Ireland and Austria, were furnished to the Remount Section and all these horses were branded with a Yeomanry general number on the hind foot and with I.Y. on the near fore. The Australian horses were all branded I.Y. on the near fore, and numbered from 1 upwards on the off fore, but no descriptive returns were furnished. Six horse registers were kept by the Section, and the remounts were entered therein.

237. It should be noted that no detailed particulars were supplied to the Remount Section of the number of chargers taken out to South Africa by officers.

Veterinary.

238. It was decided that veterinary surgeons should be regimental, not departmental. They were all engaged on a contract, of which a form is given in Appendix No. 34. They received the pay and rank of veterinary lieutenants. In conformity with the general instructions contained in the Royal Warrant, Pay and Promotion, paragraph 431, and Regulations of the Yeomanry Cavalry, paragraph 40, every candidate for appointment should have been a member of the Royal College of Veterinary Surgeons, and the names of all candidates should have been sent to the Director-General, Army Veterinary Department, for his concurrence as to their fitness. It was, however, impossible to find duly qualified veterinary officers for every battalion, although endeavours were made to do so.

239. Universal pattern field veterinary medicine chests, were supplied by the Army Veterinary Department to each company. These chests were in most instances sent direct to the ships by the officer commanding the company, and the veterinary officer in charge of the ship was written to, and informed that they were on board, and where to find them. The field chests which contain medicines, necessaries, instruments, stationery, books and forms, were calculated to supply 100 horses for three months in the field.

240. Veterinary wallets (one per company) for use when the veterinary medicine chest might not be at hand, were put on board transports, for the Imperial Yeomanry, also the following books:—

Handbooks. "Suggestions for the General Management of Horses, Mules, Oxen, while on Field Service in South Africa with notes concerning their more common ailments," and "Hints to Farriers in charge of Horses on board ship."

Sea medicine chests. 241. Sea medicine chests were put on board each transport. They contained medicines for use on the voyage, the unexpended portion of the contents being handed over to the Army Veterinary Department on arrival in South Africa.

Requirements in the field. 242. Veterinary requirements in the field were supplied by the Army Veterinary Department from stores at the Base.

CHAPTER VI.

SADDLERY, HORSE EQUIPMENT, AND VEHICLES.

Saddlery.

243. The question of providing suitable saddles for the use of the Imperial Yeomanry was one in which Lord Lonsdale took much interest, and after careful inspection of many samples, and obtaining expert reports upon them, orders were given to Messrs. Champion and Wilton, of 457, Oxford Street, W., Messrs. Wilkinson and Kidd, of 5, Hanover Square, Messrs. G. Parker and Sons, of 17, Upper St. Martin's Lane, and Mr. B. Ellam, of 213, Piccadilly, W., for the immediate supply of some 500 saddles, whilst 2,000 were obtained in Austria, and with slight alterations, adapted for the use of the Imperial Yeomanry. This was only a first order, as it became necessary to find out exactly how many regiments were in a position to provide their own. Preliminary supply.

244. Messrs. Allen Bros. and Co., East India agents, of 14, Devonshire Square, Bishopsgate Street, arranged for the supply of 3,500 Indian saddles from Messrs. Cooper, Allen and Co., of Cawnpore, and these were shipped direct to the Cape from Calcutta and Bombay through the Indian Transport Department. This saddlery was all inspected and passed, by Col. Baddeley, R.A., late Superintendent, Government Harness and Saddlery Factory, Cawnpore, and although cheap, it proved very satisfactory. Indian saddles.

245. In all, 6,951 saddles were purchased, with complete equipment, at a total cost of £51,947 4s. 6d., including the freight of the Indian saddles, averaging £7 9s. 6d. per set. As before mentioned, all the Indian-made saddles were shipped direct to Capetown, and of the remaining 3,451 purchased in Austria and England, 660 were despatched to the base, 743 were disposed of in England, and the remainder (2,048) were allotted to the different units requiring them previous to departure. Total number and cost.

246. Certain Yeomanry units took out with them obsolete, or old saddles, which should never have been passed, with the result that these corps had to be provided with suitable saddles from the stores at the Base Dépôt. A board of enquiry was held upon the unsuitable saddles, and copies of the proceedings, as well as samples of the condemned articles, were sent to this country. Obsolete saddles

247. All the hunting saddles, 585 in number, that were unsuitable, ordered by the officers commanding units before January 16th, 1900, upon which date the purchase of such saddles was forbidden, were taken over by the Imperial Yeomanry Committee, and sold to Messrs G. Parker and Son for the sum of £1,000. This entailed a considerable loss, but it was considered only fair that where the commanding officers had acted in good faith, and ignorance of official requirements, they should be relieved of pecuniary liability. Hunting saddles.

248. No special pattern of saddlery for officers was laid down; the staff pattern saddle with soft wallets and saddle-bag was recommended, and generally adopted. Officers saddles.

**Pack
saddles.**

249. In addition to the supply of saddlery for use of the officers and men, a few orders were given for pack saddles. The Military Equipment Company, of 7, Waterloo Place, S.W., supplied 305 at a cost of £7 7s. per saddle. Of these, 252 were sent direct to Capetown, and 53 were distributed among the units prior to embarkation. Some complaints were made that the pack-saddles were too small. Samples were ordered to be returned, and on their arrival it was found that these complaints arose from a complete misunderstanding as to the packing of the saddle, as the straw and horse-hair stuffing, only placed to prevent the trees breaking during transit had not been removed. These saddles were shown to some members of the Imperial Yeomanry Committee at Cleveland House, and it was considered that there was no more suitable saddle than that sent—the French military pack. Several officers who did take them, and understood that the stuffing should be removed and a blanket placed underneath, were satisfied that, far from being too small in the tree, they would fit even a large horse.

Harness.

250. Sets of mule transport harness and lead harness (183 in all) were also obtained, one firm alone, Messrs. Whippy, Steggall and Co., providing 165 sets. This harness was sent direct to the Base Depot, Capetown, and there utilised.

*Horse Equipment.***Articles
supplied.**

251. The articles supplied by this section both for use at the depôts, and for units in the field, were horse equipment, horse clothing, horse blankets, horse rugs, head collars, ear nets, eye fringes, nosebags, numnahs, picketing gear, line gear, rifle buckets, waterproof sheets, watering bridles, halters, hobbles, and head ropes.

252. One firm alone, Messrs. Chase and Co., of 55, Farringdon Street, supplied 13,103 horse rugs and 9,042 ear nets, and these were distributed to the various units requiring them before embarkation, any surplus being despatched to the store at the Base Depot, Capetown. The Westmoreland Woollen Company, of Kendal, supplied 4,121 horse blankets, which were despatched to the Liverpool Depot, and to different units.

253. Every detail of horse clothing and equipment was supplied under the immediate direction of Lord Lonsdale in this Section, and it should be noted that in no single instance was there any complaint as to the unsuitability of the articles provided.

*Vehicles.***Wagons
and tongas.****Indian
tongas.**

254. With regard to the field transport, wagons, tongas, ambulances, &c., Lord Lonsdale, who has considerable experience in all such matters, caused inquiries to be made as to when it would be possible to obtain quickly the necessary wagons and tongas, with the result that some 75 tongas were ordered from Mr. H. A. Hamshaw, of 37, Humberstone Gate, Leicester, and these were all sent out to South Africa between February 15th and May 15th, 1900. These tongas were all made to one pattern, that in use in India being copied exactly, and the identical tonga sent from India being one of those supplied. They were intended to serve in the dual capacity of ambulance and kit transport. Complaints as to these tongas were received, but these were due to shafts having been provided, instead of the pole, and currie-bar draught. The matter is explained in detail in the South African Section of this report.

**Wagons
condemned
at Cape.**

255. In addition to these vehicles 60 wagons and 5 tongas were built by the Gloucester Wagon Company and ordered through the Military Equipment Company, of Waterloo Place, Pall Mall, S.W. These wagons were the cause of some unfavourable comments in South Africa, and the War Office entered into correspondence on the subject with the Committee, and a special report upon them was made by Colonel Bridge, C.B., Director of Transport at the Cape, and forwarded for information. This report showed that the wagons inspected, were unsuitable, and it is a matter of regret that any such were taken out, but many similar mistakes were made in the supply by the military authorities, which had large numbers of unsuitable vehicles at Cape Town.

256. With regard to the complaints about these wagons it is worthy of note, that several were in actual use and did well. One was found with Lord Roberts' personal escort, and had trekked from Edenburg to Pretoria and proved satisfactory. Lord Lonsdale thinks that he omitted to have strong enough brakes put on, but the wagons which

were used, answered adequately without them. He on previous occasions sent several of these to Africa, which were used in the Matabele and other wars, and proving satisfactory were copied by the Boers.

257. Two four-wheeled ambulance cars were given to the XIIth battalion by Dr. Manders, similar to those generously presented to the VIth battalion by Mr. Coats. Arrangements for transport were made through Dr. James, the Secretary of the Flying Hospital Committee, and the cars were finally sent to South Africa on March 6th, 1900, per ss. "Mahratia." These ambulances not being of the authorised pattern, the War Office at first declined to sanction their utilisation in the field, but subsequently permission was obtained to use them under certain conditions.

Work of the Branch.

258. Lord Lonsdale desires to draw attention to the loyal and unselfish manner in which the entire staff of his Section worked to bring their portion of the labour to a successful issue. Very long hours were spent in arranging all the details, and the Deputy Adjutant-General desires to add, that to the personal direction of Lord Lonsdale much of the credit for the measure of success achieved, is due.

CHAPTER VII.

CLOTHING AND EQUIPMENT.

Personnel.

259. The *personnel* of the Clothing and Equipment Department consisted of :—

Captain the Hon. W. L. Bagot until his departure for South Africa on January 27th, when he was succeeded by Sir Robert Baillie, Bart.

Captain T. W. Gunton, until 25th May.

Captain W. Webster, until 27th January.

The clerical staff will be found in Appendix No. 99.

260. Any report on the operations of the Clothing and Equipment Section of the Imperial Yeomanry, must be prefaced by the remark, that the necessity for prompt supply was of primary importance, in the earlier days of organisation. The active work of organising this Section commenced on the 27th of December, 1899, when arrangements were entered upon, for providing the following articles of clothing and equipment, or material for the same, to a force, at that date, consisting of 43 units, in 43 different parts of the Kingdom. The strength of these units was then placed at 121 officers and men. The materials, or articles of clothing and equipment which had to be arranged for by this Section were as follows :

**List of
articles
supplied at
Head-
quarters.**

Drab Drill	or Drab Serge (double width).
Frocks (2) 6½ yards	„ Frocks 3½ yards.
Trousers (1) 3 yards	„ Trousers 1½ yards.
Breeches (2) Bedford	„ Velvet cord 6 yards.
Cloaks and belts.	Bandoliers.
Hats and puggarees.	Rifle buckets.
Puttees, pairs (2).	Rifle arm loops.
Jerseys.	Waist belts and frogs.
Worsted caps.	Water bottles and straps.
Flannel belts (2).	Mess tins and straps.
Men's blankets.	Clasp knives and lanyards.
Waterproof sheets.	Wire nippers 10 per company.
Kit bags.	Hoof pickers.
Housewives.	Picketing gear.
Holdalls.	Corn sacks.
Haversacks.	Flannelette pull throughs.
Field dressings.	Numerals I.Y. and Co. number.
Dubbin 2 tins.	Emergency rations.

Material only for frocks, trousers and breeches, was issued, and it was left to regiments to have this material made up locally.

**List of
articles
supplied by
units.**

261. The following articles were left for regimental supply :—

Boots, ankle, 2 pairs, with laces.	Brush, hair.
Shoes, canvas.	Comb, hair.
Socks, worsted, 3 pairs.	Brush, clothes.
Shirts, flannel, 2.	Brush, shaving.
Drawers, flannel.	Razor and case.
Braces or belt.	Soap.
Handkerchiefs.	Table knife, fork and spoon.
Field cap.	Plate, enamelled iron.
Towels 2.	Mug, enamelled iron.

262. The fact that the movement was initiated at Christmas time, entailed arrangements being made, for obtaining supplies, at the most inconvenient time of the year. Further, all the usual sources of supply were being drawn upon by the War Office, and it was necessary that supplies should be obtained without delay. The time, from the 27th December, 1899, till the 22nd January, 1900 (21 working days), when 3,000 men were clothed and equipped was short for the accomplishment of work of this sort. There was neither an agency nor facilities, in the hands of the Committee, for inspecting, and passing material, or for checking contracts, nor would suppliers bind themselves by contract to provide articles within a specified time. The utmost they would say was that they would do their best. No written contracts were made, for the first supply of stores, for 5,500 men. **Early difficulties.**

263. The officers who organised the Clothing and Equipment Section did a large amount of work in a very short space of time, under most disadvantageous circumstances; with the result, that, in view of the fact, that the Imperial Yeomanry were urgently required at the front, 15 companies together with their various headquarter staffs, hospital and veterinary establishments, gun sections, and details, sailed before the end of January, or within 28 working days from the date when the first order for clothing and equipment was given. Notification of the requirements of the Committee was made through the Press.

264. When stores had been secured, the method adopted, was to send to suppliers the lists of regiments to which articles were to be sent, and at the same time, to send invoices of such articles to regiments, and the suppliers were instructed to notify to regiments, the date of despatch of the various articles, and in order to ensure speedy delivery, stores were in all cases sent by passenger train. The suppliers, in most instances, acted with promptitude, and gave satisfaction; although in some cases, complaints received from regiments, as to unsatisfactory material, and articles supplied, were only too well grounded. Delay occurred also, in the delivery of such articles as cloaks, belts, waist belts, frogs, rifle arm loops, mess tins, and straps, &c., many of which had to be manufactured. **Method of distribution.**

265. The manner in which the various companies were equipped is shown in a circular of 4th January, 1900, a copy of which forms Appendix No. 21.

266. A list of the stores obtained is given in Appendix No. 86.

List of stores.

267. On the 1st February, 1900, the Committee authorised an increase in the supply of clothing, and equipment, up to that requisite for a force of 8,000 men; and at the same time decided, that every endeavour should be made to rectify errors which had occurred in the past, and where stores could not be recalled, replacements were to be made of defective articles, to such extent as was feasible. The assistance of the Store Agency of the India Office, had been obtained for a survey report on all articles hitherto supplied. This report was favourable, except as to the following:—

Additional supply.

Chin straps.
Nose bags.
1 supply of waterbottles.
A detail in connection with the picketting gear.

268. An unfavourable report had previously been made on a supply of Bedford cord; and as the velvet cord, issued, was not found to be suitable for riding breeches, it was as far as possible recalled. **Bedford cord.**

269. Waterproof sheets were also unfavourably reported upon. The greater portion of these, had been supplied by a firm, recommended by the War Office. The examination of waterproof sheets, however, at the India Store Depot, is very searching, as all articles issued from there, have to stand the test of the Indian climate. Sheets of a better quality were sent to the Base Depot, Cape Town, to replace defects. The Clothing and Equipment Section had now more time at its disposal, for regulating this new supply. Contracts were entered upon for all new supplies and samples of all articles were previously submitted to the India Store Depot for report. This arrangement still, however, had the drawback of lacking means for ensuring that the bulk delivered by the contractors, was in every instance, equal to the sample submitted. To take the instance of waterbottles, it is impossible to ascertain their freedom from internal rust, unless each individual bottle is specially tested for that purpose. **Waterproof sheets.**

Contracts.

270. On the 12th February the strength of the Imperial Yeomanry was raised to 10,000, and on the 8th March the final strength was fixed at 11,608 men and officers inclusive of 1,000 for drafts. Clothing and equipment was procured for this number, and while, in all cases, a better quality of article was obtained than under original arrangements, contractors' prices, owing to various circumstances, had risen considerably, not only for articles purchased by the Committee, but also, for those procured by Commanding Officers; **Additional supply.**

Higher prices.

and it was found that this increased cost and other additional expenses, could not be met, unless the capitation grant were increased by £10, i.e., £35 in lieu of £25. The larger portion of this increase was for saddlery, which was not dealt with by this section.

Surplus stores.

271. On the 2nd April a letter was received from the War Office, regarding the final limit, to be placed on the strength of the Imperial Yeomanry. The total number was to be 10,500 inclusive of the Base Establishment, and the War Office agreed, to accept all liabilities for a total strength of 11,608 men and officers, which had already been sanctioned, on the understanding that no more stores were to be obtained for this number, without the sanction of the War Office. This decision, left a large quantity of clothing, and equipment, on the hands of the Committee.

Reserve stores.

272. The authorised quantity of reserves of clothing, and equipment, for despatch to the Base Dépôt, Cape Town, had already been contracted for (*see* Reserve Stores), but wherever an opportunity presented itself, portions of the above surplus, were worked into this reserve supply, and considerable quantities were disposed of in this manner. The remainder, was carefully inspected, and packed, at the India Store Dépôt, and was taken over by the War Office. There was, however, £500 worth of irregular, or unserviceable stores, due to (1) returns from regiments, carelessly, or negligently, packed; (2) articles used by regiments, and then returned without notification that they had been used; (3) inferior articles purchased. At the end of January, it was found necessary to establish a dépôt, to which regiments might return surplus stores, and from which, these stores could be re-issued to other regiments. Accommodation, considered suitable, was found at Harrod's Stores, Ltd., Brompton Road, S.W., and the Managing Director also undertook the checking, and re-issue, of the stores. This turned out to be a very much larger undertaking, than was at first contemplated, as over £15,000 of returned stores were received, and after being checked, were re-issued in various ways. The work on the whole was done satisfactorily, though had the dimensions which this transfer of stores was to assume been anticipated, other arrangements would have been made.

Dépôt for returned stores.

273. The transfer was not made easier by the careless way in which some regiments returned stores—without name or address of sender, letter of advice, or other means of identification. And it was these regiments which were more specially aggrieved, at any non-crediting in their regimental accounts, of articles returned. In many cases these could only be arrived at by a process of exhaustion. It is difficult to see what course, under the circumstances, could have been pursued by the Committee for the distribution of stores, other than that adopted; though in the light of subsequent experience this course was found to have many grave drawbacks. Everything attempted, however, during the early organisation, was practically an experiment, and no precedents were available, to refer to, for guidance.

274. So far as the clothing, and equipping, of the men was concerned, it would have been advantageous, in the long run, to have postponed the first date of sailing of the Yeomanry, for a month. Certainly, clothing, and equipment, of a better quality in some instances, could have been procured, and both at the Central Office, and at local headquarters, greater attention could have been given to many necessary details, and the Committee might have been able to have obtained some larger powers of redress, against suppliers; although at the same time, there would have been no efficient means of inspection, and checking.

Inspection and checking of stores.

275. It is most important, that should any similar force be embodied in future, adequate provision should be made for the detailed inspection and passing, by experts, of all articles of clothing and equipment before issue. On the general question of the possible future manner of the supply of articles of clothing, equipment, and necessaries, there are three courses open :—

Methods of supply of stores to units.

1. That adopted by the Committee—

(a) Of selecting a number of articles, not readily obtainable, at local headquarters, and supplying them from the Central Office;

(b) Leaving other stores to be obtained locally.

2. For each unit to supply itself throughout, with all articles of clothing, equipment, &c.

3. All articles to be supplied from Central Office.

Committee's method.

276. No. 1 seemed to be the only method open for the Committee to pursue, with a view to expediting to the utmost, the departure of the Yeomanry. The method adopted for the distribution of stores, was as follows :—Alphabetical lists of the English, Scottish, and Irish, companies, detailing the articles to be supplied to each, were sent to contractors, who, as no preference was indicated, started working through the lists in alphabetical order.

Thus, in some cases, regiments which had completed their number and had passed their riding and shooting tests, if low down on the list, were unsupplied with clothing, &c., while other regiments, higher up the list, which were incomplete in other respects, had received full supplies of clothing and equipment. This, however, was rectified as soon as possible, and on the approaching date of sailing of a regiment being notified, attention was paid to the complete equipment of this regiment. Some cases of apparent hardship, however, occurred before things were put right, as instance the Lothian and Berwickshire Yeomanry, who, on account of their position on the list under Scotland, were late in receiving various articles of equipment, though prepared to report themselves ready in all other respects. At the same time, unreasonable demands were in some cases, made to complete equipment of regiments, whose backwardness in shooting, riding, or numbers, precluded all possibility of despatch till a late date.

277. No. 2 cannot be recommended,

- (a) Owing to the difficulty of obtaining many of the stores locally, in the small quantities, required for a unit.
- (b) To the very high prices paid in many instances for such local supply, *e.g.*, boots, which were procured regimentally, cost at least 50 per cent. more than contract prices for reserve stores, and were, in many cases, not suitable for the work expected of them.
- (c) To the want of uniformity which would result, in stores so procured.

All stores to be supplied by each unit.

278. No. 3.—It is desirable, in every way, that all articles of clothing, equipment, and necessaries, should be supplied direct from a central office, on the grounds of economy, uniformity, and quality, and to ensure this, it is necessary that accommodation should be secured, where all stores would be received and examined prior to issue to regiments. This might entail some slight delay, but the result would be more satisfactory in every way, and the saving, would be considerable.

All stores to be supplied at Headquarters.

279. It was open to regiments, when stores were not forthcoming when expected, or if they preferred it, to order stores for themselves; hence cases arose, of duplication, with the result, that the Committee had some £15,000 worth of stores returned from time to time. Most of these were re-issued; but the double carriage, the depreciation of stores in transit, and the cost of the depôt established to deal with these transfers, would have gone far to cover all charges in connection with the establishment of a receiving and distributing depôt. An inspection, such as would ensure that the whole supply, was in every respect equal to the sample, would be well worth its cost. Some articles, such as one supply of cloaks and belts, and a large quantity of the first supply of Bedford cord, and all the velvet cord, would have been refused acceptance, at the outset, at such a central receiving depôt. The exact pattern, and style, of all articles of clothing, and equipment, should be laid down. In the following instances some confusion, and certainly extra cost, was caused by a change in the shape of rifle buckets, from that originally approved. The same with regard to nose-bags. A sudden demand was made by some Officers Commanding, that helmets should be substituted, for the felt slouch hat, originally approved.

Duplication of supplies.

Receiving and distributing Depôt.

Fixed patterns to be laid laid down.

280. Suitable premises for a receiving and distributing depôt, having been secured, and patterns for all articles fixed, it would be necessary to engage the services of two experienced inspectors, one for cloth and one for leather, who, with a small staff, would receive, inspect in detail, and despatch all articles to various local headquarters. There would be no difficulty in organising an establishment of this sort. The cost entailed would not be great, and the benefits accruing are obvious, as such an establishment would also undertake all matters in connection with the arrangement for building up, and despatch of reserve stores. A roster of regiments, according to their dates of sailing, should be determined and this should be worked through systematically. Of almost equal importance to the establishment of a central depôt, is the necessity, that, before anything is done at local headquarters, the services of a thoroughly efficient quartermaster, should be obtained who would keep check on all stores received, and make careful return of any possible surplus. Some regiments left nothing to be desired in this respect, but in many cases it was evident that a certain confusion existed, out of which it was difficult to educe order. A frequent complaint from regiments was, that in the multitudinous duties of organising a new force, and of training recruits, there was no time to attend to the clerical work of checking, and acknowledging receipt of stores, or of advising the return of surplus stores, and that it was only afterwards, when work was slack, that attention could be paid to these things. Meanwhile, in many cases, records had been mislaid or were otherwise unavailable. The employment of an experienced quartermaster at the outset, whose duty it would have been to attend to these matters, would have obviated this. While on this subject it may not be amiss to point out, that the apparent absence, in many instances, of any management as above, inattention to orders issued, and a lax method of keeping accounts, entailed a

Inspectors.

Efficient. Quartermasters at local Headquarters.

large amount of unnecessary clerical work on the Clothing and Equipment Section, and rendered an accurate adjustment of accounts, a matter of great difficulty.

Clothing and Equipment—Descriptions and Recommendations.

**Frocks,
trousers,
pantaloon.**

281. Two frocks, 2 pairs of pantaloons, and 1 pair of trousers for 10,000 men, entails the cutting, making, and trimming of 50,000 garments. The experience of the Clothing and Equipment Section in building up a reserve of these, for 10,000 men, or 30,000 garments, is, that in busy times, contractors are very slow, and though the contracts were placed with seven different firms, complete delivery was not made, till a date which would have most unduly delayed the departure of the last of the Yeomanry. It is suggested, therefore, that the material for these, after being inspected, should be issued to regiments to be made up by local tailors. The required number of sealed patterns should previously be made, and one pattern, together with full particulars as to stitching, staying, buttons, &c., should be issued with each consignment of material, for tailors to work to. This would have the double advantage of saving time, and of ensuring a better individual fit, than if the garments were made to a size roll, though it is possible that the make, stitching, &c., would not in some cases be of so high a standard, as would be exacted by an experienced clothing inspector.

282. An exact description of the Yeomanry uniform, and kit, is here given, as it, in some respects, differed from that of the Regular Service:—

**Khaki
uniform.**

The khaki uniform was almost identical with the universal Service drab serge frocks and trousers, and Bedford cord, or whipcord pantaloons, issued by the Royal Army Clothing Department.

Frocks.

Difference in frock:—

Overlaid raised seams,
Sleeves lined silesia,
Collar roll (stand and fall).
Pockets, four outside patch with flaps to button and box-plait down centre, the two lower pockets being lined with stout brown holland.
Vandyke cuffs.
Facings deeper and carried through to shoulder.

Boots.

Description of boots:—

Whole soles, *i.e.* without clumps.
Soles not to unnecessarily project in order to give room in the stirrup.
Uppers to have grain inside—flesh outside.
Steel-billed soles well driven in.
Standard screw make.
Heel to be specially screwed through.
Brown leather (and being for the use of mounted infantry) soles should be flatter than in infantry boots in order to lie in the stirrup.
Boots to have a double semicircular row of nails at the toes clear of the stirrup.

**Cloaks and
belts.**

283. The material from which cloaks and belts were made was not satisfactory, but at the time of ordering, the regulation waterproofed material was not procurable. The cost would have been about 15s. more, per cloak. In colour, drab was generally preferred, but the material proved too heavy.

Description:—Regulation cavalry cloak.

Hats.

Hats should be stiffened with insoluble stiffening as in Vero and Everett's hats, sent out with reserve stores, otherwise after repeated wettings the hat will become floppy and mushey.

Description:—Drab slouch felt, turned up at left side, with Prince of Wales' feathers or county, or company, badge. Pugari wound round, and tacked.

Puttees.

The wear on puttees in cavalry work is very hard, and they should be woven, not torn off the piece, with raw edges.

Jerseys.

Special attention should be paid to the make, weight, and quality of jerseys, and their colour should be drab. Warmth is required, not thickness. They were issued for wearing *over* the shirt in cold weather. Some of the heavier ones were too small under the arm-pit.

Description:—Light fisherman's jersey. Colour, drab. Jerseys or vests for under-wear should in future be supplied.

A small number of Balaclava caps were supplied, but the main supply were knitted pull-over caps, drab colour. Worsted caps.

Difficulty was experienced in getting a good supply of flannel shirts, for Reserve, as many samples purporting to be flannel, contained a large percentage of cotton. Flannel shirts. The weight, quality, and strength of the flannel, should be carefully tested, and that being satisfactory, the make is a matter of taste.

The above remarks apply also to flannel belts, except that special attention should be paid to procuring them of the regulation shape and make. Flannel belts.

Great attention should be paid to the weight, texture, and softness of socks, as they have to go inside somewhat unyielding boots. Socks, worsted.

Drawers should be of the finest lamb's wool, or merino, with double seat-piece. Drawers.

Description of blankets: brown. Weight and dimensions in accordance with Army pattern. Much greasy rubbish, is always in the market to meet a sudden demand. Blankets.

Waterproof sheets require strict examination in all details, as strength, and quality of cotton, quality of rubber. Waterproof sheets.

Kit bags should be of waterproof material. Cavalry pattern. Kit bags.

Khaki drill is quite unsuitable for haversacks which should be of canvas. Army pattern. Haversacks.

Samples of field dressings should be carefully analysed to ascertain that they are antiseptic. Field dressings.

A woven web bandolier with a double row of loops to hold 100 cartridges was issued. If satisfactory in other respects this bandolier should be woven on the bend, i.e. with one edge shorter than the other in order to sit flat on the shoulders, and perpendicularly under the arm. Being woven straight, the weight of a full bandolier would press unduly on the outside point of the shoulder. Bandoliers.

The pattern of rifle buckets was changed, and a report is required as to the most serviceable, and convenient make, and shape. Rifle buckets.

Two shapes of water bottles were issued, viz., Army pattern, and pattern used by Government of India. The latter is recommended, as being concave in the inner side, it fits closer to the body. It also holds a half-pint more, which is not a disadvantage to a mounted man. Water bottles.

The provision of telescopes for officers and field glasses for non-commissioned officers was urged by the General Officer Commanding at Cape Town. Telescopes and field glasses.

Items left out, require no further remark, except that each should be the best of its kind.

284. A list of the stores, and equipment obtained, with the names of the Contractors and the prices paid will be found in Appendix No. 86. List of stores.

Reserve Stores.

285. On the 27th January, a letter was written to the War Office, pointing out the necessity for the provision of a reserve of clothing and equipment for the Base Depot, Cape Town, and at the same time drawing attention to the fact that the cost of the same could not be covered by the Capitation Grant. Necessity of reserve stores.

286. On the 7th February, a proposal was received from the War Office with regard to this supply, which was approved, and after careful enquiry into prices then ruling, a letter was sent to the War Office on the 1st March stating that the War Office estimate would be exceeded by about £14,500 owing to enhanced prices. Estimate of cost.

List. 287. The following are the stores enumerated on the lists accompanying War Office letter:—

	No.		No.
Boots, ankle, F.P. (pairs)	10,000	Belts, flannel	10,000
Caps, field, with chin straps	3,800	Trousers, drab serge	10,000
Cloaks and belts	1,000	Bandoliers	500
Frocks, drab serge	10,000	Bottles, water	1,500
Haversacks	6,000	Slings, rifle	500
Hats, felt, slouch	10,000	Belts, waist, and frogs	500
Pugaris	10,000	Brushes, cloth	3,000
Pantaloon, cord (pairs)	10,000	„ hair	3,000
Puttees	10,000	„ shaving	2,000
Spurs	1,000	Caps, worsted	10,000
Bags, kit, cavalry	1,000	Dressings, field	10,000
Braces	6,000	Forks	5,000
Drawers, flannel	10,000	Jerseys	10,000
Grease, tins of	20,000	Knives, table	5,000
Holdalls	5,000	„ clasp	1,500
Housewives	1,000	Lanyards	5,000
Razors and cases	2,000	Shoes, canvas (pairs)	10,000
Shirts, flannel	10,000	Socks, worsted	20,000
Mess tins and straps	1,500	Towels	10,000
Straps, chin	5,000	Spoons	5,000

Inspection and shipment by India Store Depôt. 288. This scale was drawn up for 10,000 men for six months, and the War Office letter stated that should the Imperial Yeomanry remain in South Africa for a longer period further provision would be made. As the Imperial Yeomanry Committee had no machinery to deal with this large supply, the India Office was asked for assistance in the matter. This was readily granted, and the India Office undertook the inspection, passing and shipment, of all supplies, and in addition obtained the stores enumerated in the last para. beginning at "Belts, waist, and frogs, 500" to end of list. All these stores were obtained under contract, and the officers of the India Store Depôt spared neither time, nor trouble, in ensuring the excellence of all articles despatched. Weekly shipments were made to the Base Depôt, Cape Town, by the intermediate boats of the Castle Union Line, sailing in the middle of the week, from the Thames, all stores being taken down by lighter, direct from the India Store Depôt to the ship's side.

Delivery at Cape Town. 289. As these stores had to be accounted for as public property, great care was taken in the preparation of invoices, and the despatch of bills of lading covering shipments, and it is satisfactory to know that all consignments of reserve stores were received by the Commandant, Base Depôt, Imperial Yeomanry, Cape Town, safely, but in some instances after considerable delay. The causes for this are explained in Section II of the Report, under *Stores, their Collection and Distribution*. Credit for help accorded must be given to the Store Department of the India Office, as without the ready and generous co-operation of the officials there, the Clothing and Equipment Department of the Imperial Yeomanry would not have been able to cope with the purchase and despatch of reserve stores of the high quality sent to Cape Town. For list of Reserve stores, see Appendix No. 87.

Memorandum re Camp Equipment.

Excess of Camp Equipment. 290. Owing to a misapprehension as to the strength of the Yeomanry unit, camp equipment for the Imperial Yeomanry in South Africa was ordered in excess. The original organisation consisted of 48 Companies, each of which was considered to represent a unit, and camp equipment was ordered accordingly. This error was continued when the numbers of the Imperial Yeomanry were increased and camp equipment to the value of £6,981 9s. 5d. was sent to the Base Depôt, South Africa, to be issued to the troops on arrival. This was supplied in a satisfactory manner by Messrs. Buck and Hickman, 2 and 4, Whitechapel Road. On representation being made to the War Office the grant for camp equipment was increased to cover this sum, on the understanding that all surplus should be handed over to the War Office for general Army purposes. A list of camp equipment and entrenching tools made out in numbers requisite for the strength of an Imperial Yeomanry battalion will be found in Appendix No. 88.

Increase in grant. List per Battalion.

Extra food, comforts, &c. 291. On March 9th the Committee decided to send extra food comforts, tobacco, &c., to the Imperial Yeomanry in South Africa, consisting of Maggi's concentrated soup, chocolate, condiments and pickles, potted meat, sauces, condensed milk, cigars, cigarettes, tobacco, &c. These stores were assorted in cases:—One set of five cases being calculated to supply a reasonable amount of comforts for a mess of five officers, for about four weeks; while a pair of cases, would supply suitable extras, for a mess of 20 men for about six days.

292. No assortment was made of the tobacco, &c., which was to be forwarded to Non-various units from the Base Dépôt. These cases were all consigned to the Officer Commanding, Base Dépôt, Cape Town, who reported a non-delivery of no less than 172. As these stores were embarked in Government transports, the "British Princess" and "Canada," the matter was brought to the notice of the War Office, but the stores were subsequently traced.

(For list of stores, method of packing and prices, see Appendix No. 90.)

293. On the 30th March the Committee decided that in addition to the Reserve Stores being sent out to South Africa for 10,000 men for 6 months, ordered under authority of War Office letter 7th Feb., an additional supply of warm articles, should be sent. And on the 2nd April it was decided to expend 4,000*l.* on the following articles:—

2,000 each—

Shirts, flannel.
Drawers, wool.
Cardigan jackets and warm jerseys.
Mufflers, loose knitted woollen.
Pantaloon (pairs).

These were procured by the Clothing and Equipment Section, and after inspection at the India Store Dépôt were despatched to Base Dépôt, Cape Town. For particulars see Appendix No. 89.

294. Gifts of stores were received by the Committee and acknowledged with thanks, as shown in Appendix No. 98.

CHAPTER VIII.

FINANCE.

Initial advances

295. "Funds were, to commence with, placed to credit to the extent of £20,000, with a capitation grant at £65 per mounted man = £520,000, representing the amount required for 8,000 men, and the Imperial Yeomanry Committee were to apply to the War Office for as much more money as they might require.

"The Yeomanry pay was fixed at cavalry rates, and the allowances to be as in paragraph 19 of Special Army Order, dated 2nd January, 1900 Messrs. C. F. Kemp, Sons and Co. were nominated accountants from the date of commencing work"

U.O. from Mr. Wyndham. 22/12/99. U.O. Conference, W.O. d., 27/12/99.

Disadvantages.

296. In the early stages of the proceedings the Finance Section was labouring somewhat under a disadvantage in consequence of the absence of definite instructions, and owing to the fact that it was in an unprecedented position with regard to many matters of administration. At the date of the formation of the Imperial Yeomanry there was an enormous amount of pressure on the War Office, and therefore the Committee had to accept—with the duties—the responsibilities of the position, and act upon its own discretion in many matters. The general proposals originally laid down with regard to the conduct of this Section were approved by the Accountant-General, War Office, and it was understood that the scope of the duty assigned was limited to dealing with matters relating to Finance.

Personnel.

297. In addition to Col. Beckett, A.A.G., M.P., the *personnel* of the staff of this department was as follows:—

Accountants.

Mr. G. E. Sendell, A.C.A., of the firm of Messrs. C. F. Kemp, Sons and Co., Chartered Accountants, 71, Lombard Street, E.C., and three clerks, shown in Appendix No. 99. Assistance was also rendered from time to time by temporary clerks.

Duties.

298. The ordinary duties of the office consisted of—

- (1) *Receiving and acknowledging subscriptions* forwarded to the Voluntary Fund of the Imperial Yeomanry (Account No. 2) as per Appendix No. 58.
- (2) *In connection with the Capitation Grant and General Expenditure.*
 - (a) Applications to the War Office for advances from time to time, accompanied by estimates of expenditure for the following week, and a summary of expenses already disbursed.
 - (b) The checking and settling of the various accounts submitted by the other Sections, including the payment of salaries and wages incurred by them.
 - (c) Making advances to local corps for horses and equipment.
 - (d) The examination of accounts submitted by local corps.
 - (e) Written communications relating to the disbursements referred to above.
 - (f) The conduct of heavy correspondence arising from a large number of queries raised from time to time by local companies' officers, non-commissioned officers, and their friends, not only in connection with questions of finance but in respect of matters only remotely connected with it.
 - (g) A large proportion of the official correspondence with the War Office.

Advances by War Office.

299. The total sum advanced by the War Office for the purpose of defraying the Capitation Grant, and providing for the various disbursements which were made from time to time on behalf of the War Office, at the request of, or in accordance with instructions received from, that department was £1,265,000.

300. Instructions regarding advances, were issued to Commanding Officers on the 11th January as in Appendix No. 57. Appendix No. 59 was also forwarded for the use of Commanding Officers, in order that the purposes for which the advances were required might be clearly stated. Each department was desired, when requisitioning for payments, to forward complete evidence that the various articles had been received, examined, and approved, as per Appendix No. 60. In response to applications for advances, moneys were placed to the credit of Commanding Officers of corps at the local banks (Appendix No. 63), and the Commanding Officers were also advised as shown in Appendix No. 64. Circulars were also issued asking Commanding Officers for a return in duplicate, showing articles supplied by the Committee retained by the corps, and those which were returned to the Committee's Stores (Appendix No. 65).

Advances
to Com-
manding
Officers.

301. Forms of certificate in support of claims for Capitation Allowances were also issued about the same time (Appendix No. 62). A large proportion of these certificates were returned in due course, but in many cases, constant, and earnest endeavours had to be made to obtain them from Commanding Officers.

Capitation
grant.

302. After the various companies had been fully equipped, and despatched, to South Africa, it became necessary to obtain further returns from the Commanding Officers, showing how the advances to them, had been disbursed, and what further sums, if any, they were entitled to. This task involved a considerable amount of labour, and trouble. A large number of necessary queries was raised, on the accounts rendered. Two letters of the 3rd July (Appendices Nos. 67 and 68) were also addressed to those officers who had neglected to complete their accounts in connection with the Capitation Allowance, as well as those with whom the Committee had made provisional settlements. Frequent efforts were made, involving considerable trouble, to assist local corps in the management of their accounts, so that order might be substituted for confusion. In making the final returns in connection with the grant, Commanding Officers were required to certify the number of officers, and men, who sailed, as well as the number of remounts, and the various deductions for amounts due to the Remount, Saddlery and the Clothing and Equipment Sections. These returns involved numberless interviews with commanding, and other officers, and the inter-departmental accounts had also to be agreed to before final settlement with each company could be arrived at. (Appendix No. 60.)

Settlement
of company
accounts.

Capitation
grant.

303. The requirements laid down in Colonel Beckett's Circular Letter of the 11th January were not, in many instances regularly complied with, and a number of circulars reminding officers of the requirements of the War Office, and of this Committee, were also issued as in Appendices Nos. 66, 67, 68, 70.

304. The forms and books recording the various items of equipment received, and showing how they were disposed of, together with particulars of their cost, were prepared for the use of each Section of the Committee. (Appendix No. 71).

Pro forma
accounts.

305. Circulars were also despatched, asking for particulars of remounts in various parts of the country, showing where the horses were purchased, where they were standing, and requiring Veterinary certificates; as per Appendices, numbered 72, 73, 74.

Horse
returns.

306. Monthly claims in respect of sums disbursed on behalf of the War Office, after being analysed in detail, were forwarded to the Accountant General, in the form shown in Appendix No. 75. The total disbursements to date of report amounted to £291,609 4s. 11d. The various queries raised thereon on audit have been dealt with, and the Committee has been credited with the amount of the authorised expenditure.

Disburse-
ments on
behalf of
the War
Office.

307. Directly the Imperial Yeomanry movement, became general throughout the country, it was evident that the sum of £25 per head allowed by the War Office, for the cost of clothing and equipment, was insufficient, more especially as emergency prices were ruling during that period. The Finance Section thereupon, desired commanding officers to forward them statements (Appendices Nos. 76, 77) showing the average cost of each article of equipment supplied to their companies, and after a careful selection from the schedules, of the most representative of the companies, statistics were compiled, which showed that the average cost throughout the country amounted to nearly £35 per man. These statistics were forwarded to the War Office, with a request that a further allowance might be made, and eventually the Secretary of State for War, agreed to a revision of the Capitation Allowance, raising it from £25 to £35 per head, and commanding officers were duly advised in the terms of a circular of the 3rd May, 1900 (Appendix No. 78).

Increase of
Capitation
Grant.

308. Among other duties undertaken by this Section, there was a large amount of work arising from the necessity of obtaining from various departments from time, to

Liabilities
of local
contin-
gents.

time, details of the liabilities incurred by the local contingents in respect of horses, articles of equipment, &c., supplied direct by the Committee in order to regulate the advances to the companies.

Generally.

309. The preparation of circulars, and forms, to be issued from this Section and from others, also occupied a large amount of time, and returns of liabilities incurred, estimates of current and prospective expenditure were obtained and compiled with difficulty. Special financial statements, were drawn up from time, to time, for the information of the War Office, and very numerous enquiries were addressed to that department for information required by the Committee. There were also large numbers of interviews with the War Office officials, in addition to the correspondence; and visitors applying for information financially, and on every conceivable subject in connection with the Imperial Yeomanry, necessarily occupied no small amount of time and attention.

Pay, and extra duty pay.

310. Amongst many other duties the directions of the War Office as set forth in the various Imperial Yeomanry Orders relating to pay, and extra duty pay, were carried out.

Base depôt, Cape Town.

311. There was a considerable amount of correspondence in connection with the distribution of moneys, which had been advanced from the Committee. Some of the charges disbursed by Paymasters have been borne by the War Office, whilst other moneys have been paid on behalf of the Committee.

Help from War Office.

312. The many difficulties of finance were smoothed owing to the ready services and willing help rendered throughout the administration by the Accountant-General of the War Office and his staff.

Patriotic subscriptions received.

313. Much of the success of the Imperial Yeomanry organisation is due to the generous and valuable financial assistance rendered by patriotic subscribers to the Central Fund. Messrs. Wernher, Beit and Co. alone gave the munificent donation of £50,000 in aid of the Yeomanry force in the field, and left the question of how this sum was to be expended entirely at the discretion of the Committee, which has, of course, hereafter to submit to the donors an account of the expenditure. In very many instances when doubt arose as to whether the War Office would or would not defray certain expenses of the force, some of which had to be incurred at once, this sum in reserve was invaluable, and it indeed proved one of the principal factors in the rapid and efficient organisation of the Imperial Yeomanry. Other liberal donations were also received, a list of which is given in Appendix No. 97. So much is due to this assistance that the matter will be separately referred to under the head of "General Observations" in Section II of this report, in view to showing how much can be done through patriotic public help when official action is irresolute as to the necessity for immediate expenditure.

County funds.

314. Besides these donations, there were large subscriptions received at the various county headquarters of Yeomanry corps. Over such subscriptions the Yeomanry Committee had no control, but they also were of very great assistance in the rapid organisation of the Force. It seems thus apparent that the Yeomanry can place reliance, in times of emergency, on the generous aid of its supporters to a greater extent than any other of the Auxiliary Forces of the Crown. For this reason, it is clearly desirable to develop and assist its future organisation, and to give far more recognition to its services than has hitherto been done.

Equipment: Grant.

315. A grant towards the cost of equipment was made from the private funds of the Imperial Yeomanry Committee to meet the expenses of equipping some companies, *e.g.*, £100 was advanced to equip the Staff of the 13th Battalion, which had no county funds to assist it. The Irish Battalions were in this respect at a considerable disadvantage, and it may also be said that county funds varied much in the amounts available for their expenses. This condition forms the subject of special proposals in Chapter II of the Report. It was in fact officially represented that some dissatisfaction existed owing to the fact that very large county subscriptions were available for the assistance of some companies, and not for others. For instance, in one company it was alleged that "our men are all really being punished because we did our best to act up to the call made on us and turned out three companies instead of one. If we had only raised one company, our men would have had as much money for all these purposes as most of the others. We had the same funds as Gloucester and Glamorgan, rather less than more. They equipped one company each out of their funds, while we equipped three out of ours; hence the difficulty."

County funds.

Gratuities.

316. The nearest of kin, of Imperial Yeomen, who were in need of relief funds, were recommended to apply to some of the managers of the following public organisations, in aid of the war:—

The *Daily Telegraph*, London.
 The *Daily Mail*, London.
 The Secretary to the Lord Lieutenant of the County.
 The Patriotic Fund, 53, Charing Cross, W.
 and it is understood that in most instances they met with a liberal response.

- W.O.
079/10/483. 317. Officers Commanding Battalions engaged in inspecting their companies, were allowed to draw their actual travelling expenses, including cab hire, and also the allowances provided for officers absent on duty from their usual places of residence. Inspections, allowances.
318. It was arranged that all questions arising with regard to the gratuity of £5 sanctioned by Army Order 116 of 1900, to the representatives of Imperial Yeomen dying in the service, and correspondence regarding their estates were to be addressed to the Under Secretary of State for War, War Office. Gratuity to representatives of deceased men.
- W.O.
079/10/545. 319. It was settled that the pay of officers was issuable from date of enrolment, i.e., date of taking up duty, as certified to by Brigade Adjutants. Pay of officers.
- W.O.
079/10/836. 320. Men enlisting in the Imperial Yeomanry who had formerly served in the Army, resumed the good conduct pay to which they were entitled on leaving their former regiments. Good conduct pay.
- W.O.
079/10/237.
W.O.
079/10/33. 321. Retired Officers enrolled in, or employed by the Imperial Yeomanry drew either retired (or half) pay, or the pay of the rank in which they served in the Imperial Yeomanry, whichever was most beneficial to them, together with the allowances of their rank in the Imperial Yeomanry. They were permitted to draw the pay and allowances referred to in Army Order 186 of 1900, in the amended paragraphs 601A to 601D of the "Warrant for the Pay and Non-effective Pay," and paragraph 675 of the "Allowance Regulations." (*Vide* also Army Order No. 27 of 1901.) (*See* Appendices No. 16 and 17.) Warrant and non-commissioned officers of the permanent staff of the Yeomanry, if enrolled in the Imperial Yeomanry, retained the emoluments of which they had been in receipt, or had the advantages in regard to the pay of any higher status given to them. Pay of retired officers.
322. Regulations regarding the method of drawing pay are contained in Appendix No. 29. Method of drawing pay.
323. Companies received contingent allowances (Allowance Regulations, pars. 661, 665) similar to squadrons of cavalry (postage included), and the expenses of postage of a battalion staff, were similar to those of an Orderly Room. Contingent allowance.
324. Regulations regarding the necessary travelling expenses of men, and of officers, and allowances according to allowance regulations to meet hotel expenses of officers, as well as the actual and necessary expenses for board and lodging for men, are shown in Imperial Yeomanry Order 3 of March 22nd, 1900. Travelling and other expenses.
- W.O.
079/10/905. 325. Allowances for miscellaneous stores, cleaning materials, &c., as in "Regulations for Allowances," paragraph 679, were sanctioned for each company the same as for a squadron of cavalry. Miscellaneous allowances.
- W.O.
079/10/1240. 326. An extra billeting allowance of 1s. per diem was sanctioned for the men, raised in excess of 8,000 (the original strength of the Imperial Yeomanry) until their departure for South Africa; this represented the sum paid hitherto by county funds. Billeting allowance.
327. In September, 1900, a Royal Warrant amending paragraph 954 of the "Royal Warrant, Pay and Non-effective Pay" (published in Army Order 185), announced that the pay of a prisoner of war was not necessarily forfeited, and issued instructions for dealing with all such cases. (*See* Appendix No. 15.) Pay of prisoners.
328. The War Office, having been asked whether the Army Pay Department would pay the Imperial Yeomanry in South Africa, decided to nominate a special paymaster for this purpose. Chief Paymaster and Hon. Colonel H. W. Feilden, retired pay, was therefore appointed Paymaster to the Imperial Yeomanry in the Gazette of February 2nd, 1900. He proved a valuable acquisition to the Force. Field paymaster.
- W.O.
079/10/1674. 329. By Army Order No. 115 of May, 1900, 12 warrant and non-commissioned officers were sanctioned as pay clerks for the Paymaster's Office, Cape Town, after he had represented his difficulties in organising his office. There is no doubt that these men, Paymaster's office

or some such establishments, should have accompanied him from England in the first instance. On May 1st, a representation was received from Colonel Feilden regarding the inadequacy of his staff, (the Force, being then, far in excess of what was originally contemplated when he was appointed). Application was therefore made to the War Office for an officer experienced in the duties of the Pay Department to assist him, and Captain J. G. T. Bruce of the Army Pay Department was appointed for the purpose, with excellent results.

**Duties of
paymaster.**

330. The duties of the paymaster, as detailed by the War Office, were :—

W.O.
079/10/373.

- (1) To pay the Imperial Yeomanry Force.
- (2) To audit its accounts.

The Imperial Yeomanry Committee were, at first, under the impression that the several units of the Force up country would receive their pay in the same way as the regular Army units, through the pay circles to which they might be attached, and a staff of trained clerks was, therefore, not applied for to the War Office. As the accounts were to be embodied in the various Parliamentary votes in a general state (Army Form N 1506), totals of which are included in the accounts of the Chief Paymaster, Army Pay Department, the paymaster appointed virtually became the head of an integral branch of the Army Pay Department in addition to discharging the duties of a regimental paymaster.

**Paymaster's
clerks.**

331. In the event of any such organisation, as the Imperial Yeomanry, being again required, it is very necessary that the paymaster should, from the commencement, have a competent staff of clerks. It is also essential for the protection of officers commanding companies, and rendering pay lists, that the lists be as promptly examined as possible, so that over-issues may at once be brought to notice. This can only be done by the organisation of a regular office establishment.

**Pensions
and
gratuities.**

332. The widows and orphans of officers and men of the Imperial Yeomanry losing their lives in the war (and in certain special cases other relatives) were held to be eligible for grants from the Patriotic Fund, or in the case of non-commissioned officers and men (failing the ability of that fund to award allowance) to gratuities under Article 1262 of the Pay Warrant. Grants from the Transvaal War Fund were not issuable to those receiving grants from Army Funds. It was decided that the widows and families of officers dying from the effects of active service in South Africa were entitled to pensions or gratuities from Army Funds. (*See Appendix No. 12.*) It was also settled that pensioners enlisting in the Imperial Yeomanry were allowed to draw their pensions, and the pay of their rank in the Imperial Yeomanry concurrently.

W.O.
079/10/201.

**Supplemen-
tary Report
and State-
ment of
Accounts.**

333. It is proposed that a Supplementary Report and Statement of Accounts duly audited should be submitted to the Secretary of State for War, when a final settlement has been made between the Department and the War Office.

CHAPTER IX.

SECRETARY.

334. A Secretary, Mr. J. Eaton-Smith, was appointed with effect from December 22nd, 1899.

335. It is stated in the special Army Order of January 4th that his duties were "to conduct the correspondence;" this, however, might, without some explanation, give an erroneous view, for as subsequently arranged, as work developed, each branch of the Imperial Yeomanry Headquarters had its own office, which was, to some extent, at all events, independent in the matter of correspondence.

336. All correspondence for the Imperial Yeomanry office was ordered to be addressed to the Secretary, Imperial Yeomanry, and headed with the name of the department for which intended, such as—

General Supervision,
Adjutant-General's Department,
Quartermaster-General's Department,
Finance,
Remounts and Saddlery,

and the Secretary distributed these letters to the departments concerned for disposal.

337. The General Post Office, on the request of the War Office, supplied a "frank" stamped "Imperial Yeomanry," which was kept by the Secretary. All letters, parcels, and inland telegrams on the public service were stamped with this frank, and transmitted free. Foreign cables, when franked, were sent to the War Office for transmission.

338. An official telegraphic address, "Yeomanlike London," was registered.

339. The Secretary made all the necessary arrangements for commissionaires, boy messengers, typewriters, rental of offices, furniture, stationery, coal, daily communications to the press, and tickets of admission at inspections and at ports of embarkation on the departure of transports.

340. The number of callers to obtain information on a great variety of topics was very great, and a large proportion of these, viz., persons who had no specific business, which could be appropriately dealt with by one of the heads of the office, was interviewed by the Secretary or his clerks. For this purpose an enquiry office for visitors was instituted.

341. A memorandum drawn up on Office Management will be found in Appendix No. 7.

CHAPTER X.

THE IMPERIAL YEOMANRY HOSPITALS.

Appoint- ment of Committee.

342. The Imperial Yeomanry Hospitals were inaugurated in December, 1899, as an organisation entirely independent of the Imperial Yeomanry Committee. H.R.H. the Princess of Wales became President, and T.R.H. the Duchess of Connaught and the Duchess of York, Vice-Presidents of the Imperial Yeomanry Hospital Fund Committee. Lady Georgiana Curzon (now Countess Howe) was appointed Chairman, and the Countess of Warwick and the Viscountess Valentia, Vice-Chairmen.

343. The Committee consisted entirely of ladies and were assisted by the following gentlemen :—

Major-General the Hon. Herbert F. Eaton.
The Viscount Curzon, M.P. (now Earl Howe), Honorary Secretary.
Mr. Ludwig Neumann, Honorary Treasurer.
Mr. J. G. Hamilton, Honorary Civilian, Director, and Treasurer in Africa.
Mr. Oliver Williams, Honorary General Agent.

First Press Notice.

344. The scheme was originated by Lady Georgiana Curzon and Lady Chesham, who expressed their views on the matter to the Press on the 29th December, 1899. The primary object was naturally to benefit the Imperial Yeomanry, though they undertook to admit the sick and wounded of all branches of Her Majesty's forces engaged in South Africa.

345. The scheme was approved by the Secretary of State for War, the Red Cross Committee and the Director-General, Army Medical Department, all of whom rendered every assistance to the Committee.

346. At the end of August, 1900, four Hospitals and a Bearer Company had been established in South Africa, through the exertions of the Hospital Committee.

Deelfontein Base Hospital.

(a) The permanent Base Hospital at Deelfontein, with 19 doctors and 50 nursing sisters, was under the charge of Col. A. T. Sloggett, R.A.M.C., Military Commandant and P.M.O., with Mr. Alfred D. Fripp, M.V.O., F.R.C.S., &c., as Senior Civil Surgeon, and Dr. John W. Washbourn, M.D., &c., as Senior Physician. It had a *personnel* of 210 (exclusive of supplementary labour) and accommodation for 1,000 patients.

Maitland Branch Hospital.

(b) The Branch Hospital at Mackenzie's Farm, near Maitland, which was originated by Col. Graham, Commanding the Base Depot, Imperial Yeomanry, was taken over by the Imperial Yeomanry Hospital Committee, Col. Sloggett providing the staff from Deelfontein, appointing as P.M.O. Mr. William Turner, F.R.C.S., temporary Captain, R.A.M.C., &c., assisted by one Junior Civilian Surgeon, three nursing sisters, and a staff of orderlies, &c. This branch had accommodation for 100 patients.

Field Hospital.

(c) The Field Hospital was under Major Stonham, R.A.M.C., Military Commandant and P.M.O., assisted by four civilian surgeons and doctors, six dressers, and a *personnel* of 70, with equipment for 100 beds.

Bearer Company.

(d) The Bearer Company was under Major Hale, R.A.M.C., D.S.O., Military Commandant and P.M.O., assisted by one civilian surgeon and one civilian doctor, with 99 drivers, bearers, &c.

(c) and (d) rendered exceptional service to the Yeomanry and others at Roodeval, during the engagement, in which they were taken prisoners by the Boers and subsequently recovered by the British.)

(e) A Branch Hospital was opened by Lady Roberts at Pretoria, under Surgeon-Major Kilkelly, Grenadier Guards, Military Commandant and P.M.O. (formerly P.M.O. of the Portland Hospital), assisted by Civilian Doctors Sandwith and Langdon-Brown, eight other civilian medical men, 40 nursing sisters, and 80 orderlies and others. This branch had accommodation for 500 patients. **Pretoria Branch Hospital.**

347. The Interim Report of "The Imperial Yeomanry Hospital Fund," issued by Lady Georgiana Curzon, gives a detailed statement respecting the financial position of this Civil Hospital Organisation. **Report.**

348. The hospitals have proved to be thoroughly efficient and were most highly appreciated by patients coming from all branches of Her Majesty's service, more particularly those belonging to the Yeomanry for whose benefit they were originally inaugurated.

349. The subject of the practical working of the Imperial Yeomanry Hospitals, is referred to in Section II of this report (para. 495).

1. The first part of the paper discusses the importance of the study of the history of the United States. It is argued that the study of the history of the United States is essential for a full understanding of the country and its people. The paper then discusses the various methods used by historians to study the past, including the use of primary and secondary sources, and the importance of critical thinking in the study of history.

2. The second part of the paper discusses the role of the federal government in the development of the United States. It is argued that the federal government has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the federal government, and the impact of these policies on the country.

3. The third part of the paper discusses the role of the states in the development of the United States. It is argued that the states have played a central role in the development of the country, and that their actions have shaped the course of American history. The paper then discusses the various policies and programs of the states, and the impact of these policies on the country.

4. The fourth part of the paper discusses the role of the people in the development of the United States. It is argued that the people have played a central role in the development of the country, and that their actions have shaped the course of American history. The paper then discusses the various policies and programs of the people, and the impact of these policies on the country.

Section II.

SOUTH AFRICA.

15. 10001876

1. 10001876

CHAPTER XI.

SOUTH AFRICA.

INSTRUCTIONS RECEIVED FROM THE WAR OFFICE REGARDING THE REPORT.

079/10/
1915.

War Office, London, S.W.

June 1st, 1900.

SIR,

I am directed by the Secretary of State for War, to acknowledge the receipt of your letter of the 29th ultimo, and, with reference to previous correspondence, to inform you that the Commander-in-Chief, has approved of your proceeding to South Africa (a) to enquire into and prepare a report upon the working of the Base Depôt, of the Imperial Yeomanry at Cape Town; (b) to wind up the business of the Depôt, and bring its operations to a close.

I am to request you will hold yourself in readiness, to embark accordingly, at an early date.

A copy of the letter which has been addressed to the Field-Marshal Commanding-in-Chief the Forces in South Africa, on the subject, is enclosed for your information.

I am, &c.

(Signed) EVELYN WOOD,
Adjutant-General.

Colonel A. G. Lucas,
Cleveland House,
St. James's Square, S.W.

079/10/
1915.

War Office, London, S.W.

June 2nd, 1900.

SIR,

I am directed by the Secretary of State for War, to inform you that upon the dissolution of the Imperial Yeomanry Committee, promulgated by Special Army Order of 25th May, instructions have been issued for the preparation of a full report on the general working of the Committee.

As it is considered specially desirable, that the report should include full information as to the Base Depôt, of the Imperial Yeomanry at Cape Town, Colonel Lucas, Deputy Adjutant-General for Imperial Yeomanry at Headquarters, has, with the concurrence of Lord Lansdowne, been selected by the Commander-in-Chief, to proceed to South Africa, at an early date, for the purpose of preparing such a report, and bringing the operations of the Depôt to a close.

I am to add that Colonel Lucas has been selected for the above duty, from the consideration that his presence at the Base Depôt, is likely to be of public advantage in view of the necessity of dissolving gradually, but without any undue delay, an organisation which at present controls a large accumulation, of public stores in South Africa.

I am, &c.

(Signed) EVELYN WOOD,
Adjutant-General.

The Field Marshal Commanding the Forces in South Africa,
Field Force, South Africa.

079/10/
2012.

War Office, London, S.W.

June 15th, 1900.

SIR,

With reference to a letter from Colonel A. Lucas dated 29th May, I am directed by the Secretary of State for War to inform you, that sanction has been given for you to proceed to South Africa as a Special Service Officer with Colonel Lucas, on his proceeding thither to report on the general working of the Yeomanry Committee, &c.

You should be prepared to proceed at an early date, placing yourself in communication with Colonel Lucas, who is arranging for passages.

I am, &c.,

(Signed) EVELYN WOOD, A.G.

Colonel T. Deane, C.B. (I.S.C.),
c/o Colonel A. Lucas,
Cleveland House,
St. James's Square, S.W.

Extent of Tour and Inspections made.

Instruc-
tions
regarding
report.

350. A copy of the instructions received from the Secretary of State for War regarding the report, which was to be prepared in South Africa, in connection with the Imperial Yeomanry, precedes this section, as well as of those issued, by the same authority, to the Field Marshal Commanding-in-Chief.

Endeavour has been made to carry out these instructions, as closely as possible, in this section of the report, and to avoid going beyond their limits, by remarking on the military operations of the Yeomanry in the field, or on matters of its military organisation, which will doubtless be dealt with by the proper authorities, hereafter.

The Third Section of the report, however, contains suggestions for the future organisation of the Yeomanry, or of an Imperial Yeomanry Force, based on past experiences, and therein, I have not hesitated to make use of the opportunities afforded me, by a visit to South Africa, during the campaign, to freely remark, and suggest, on what might possibly be done to improve the efficiency of the Force, under a new organisation.

Route.

Officers
consulted.

351. During my visit I inspected the Base Yeomanry Dépôt, at Maitland, and the advanced dépôts at Kimberley, and Bloemfontein, thence I proceeded to the headquarters of the Army, at Pretoria, and returned via Johannesburg, Ladysmith, and Pietermaritzburg, to Durban, and Cape Town. The return journey through Natal was undertaken, in view of making enquiries in regard to a considerable quantity of Yeomanry stores, which had been shipped to Durban, by mistake. These were subsequently traced, and forwarded to General Rundle's Force, at Harrismith, under whose command, there were two battalions of Yeomanry, much in need of clothing. Many opportunities occurred, during this tour, of consulting general officers regarding matters connected with the Yeomanry. Staff officers, who have served with the Force, Yeomanry commandants, and company officers were often questioned about it. Finally, the Field Marshal Commanding-in-Chief, Lord Roberts, was good enough on more than one occasion, to discuss matters with me, as was also his Chief of the Staff, Lord Kitchener. The Yeomanry was represented at Army Headquarters, by Major-General Brabazon, C.B., and Colonel Viscount Valentia, who were also consulted. From all, every possible help, and facility, was given, to enable me to obtain information required, and to see what was desirable. All enquiries made regarding the Yeomanry base, and advanced dépôts, and suggestions for their improvement, in regard to the distribution of stores, and supplies, were submitted through the General Officer Commanding the Lines of Communication, Lieut.-General Sir F. Forestier-Walker, K.C.B., C.M.G., whom I had the advantage of being always able to consult, when in Cape Town.

352. The great distances between the base dépôts, and the Army Headquarters Staff, as well as the continuance of active operations, in the field, prevented my consulting, as much as I otherwise, would have desired, the general officer responsible for Yeomanry organisation at Headquarters—General Brabazon—but all official proposals, were made through the authorised channel, viz., the General Officer Commanding the Lines of Communication.

Maitland Base Dépôt.

Maitland
Base
Dépôt.

Organisa-
tion.

353. In the report made regarding this dépôt, it may be observed, that it was inspected after the service companies of the Imperial Yeomanry had passed through, and that therefore, the main difficulties of the situation had been overcome. It is apparent, however, that certain fixed principles should have been, and must in future be, observed, in any similar organisation, to secure improvements in matters which need remedy. There were many difficulties to overcome, and no doubt, these were faced, and surmounted, by a very inexperienced staff of officers, in a highly creditable manner. All were willing, and keen on their work, and the mistakes made, were less due to their endeavours, than to their want of knowledge of organisation, in the usual conduct of the particular work they were called on to perform. The remarks and suggestions made in this section of the report, are therefore, put forward in no captious spirit, but with a view to pointing out defects which may be in future remedied. The organisation of the Imperial Yeomanry was effected in a comparatively rapid manner, and there was little time allowed, to carefully consider, weigh, and ascertain, the capabilities of the numerous candidates for staff employ. In future, it should, however, be borne in mind, that for the important work of the distribution, and collection of vast quantities of stores, and supplies, for the formation of a base dépôt, to draft troops to the front, to horse them suitably, and to keep them supplied with all that may be required, considerable powers of organisation are necessary, coupled with the experience, which is only obtained in the Supply Departments, and Staff of the Army, after years of study, and practice.

354. Taking this into consideration, it may be said that the comparatively, untrained staff of the base did well. No doubt, much better results would have been achieved with greater knowledge, applied in a somewhat different manner, but under the circumstances the results were as good as could be expected.

355. The site selected for the Yeomanry Camp, was at Maitland, about 5 miles from Site. Cape Town, easily reached by train, or tram, to within about $1\frac{1}{2}$ miles from the encampment. This was laid out, adjacent to the Military Camp of the same name, which may be said to be almost adjoining. The site did not seem to be a particularly good one, in many respects, as on two sides it was bounded by water, the land being low-lying, and marshy. However, the place seemed fairly healthy, and as it was understood to be the only one in this direction, available for the Military Rest Camp, no objections can reasonably be made to it for the Yeomanry. The site comprised sufficient area for the encampment, at one period, of several Yeomanry battalions, a large remount dépôt, or horse kraal, a small hospital, and subsidiary buildings, such as companies' huts, canteens, mess houses, store sheds, transport lines, latrines, &c. This land was named McKenzie's Farm, and had a residence upon it, which was let, with the rest of the estate, to the Dépôt Commandant.

356. The farm house, with stabling, and barns, attached, proved very useful. The main Buildings. building, was utilised by the Commandant, and some of his Staff, as a mess house, office, and residence. Rent at £10 per mensem was paid by him, for this portion of the estate, and the military authorities paid the balance, for the lands. The stabling was used for officers' horses, and some of the barns proved useful for stores.

357. New buildings had to be constructed, for dépôt use, as occasion required. These were iron-roofed buildings, with wooden walls, and floors, inexpensive but which answered the purpose well. These were as follows:—

1 store room, with shoemaker's and tailor's shop attached, also small remount office.

All were subsequently taken over by the Engineer Department, less 25 per cent. of original cost.

1 shed for 25 transport horses, of the Base Company.

1 large mess house for company officers, with kitchen, attached; subsequently used for quarters, and various other purposes.

Latrines, sentry boxes, cooking sheds; constructed by the Royal Engineer Department, on requisition.

Sheds at the Remount Dépôt, and kraals, and troughs, for horses. All subsequently taken over by the Imperial Government.

Canteen, constructed by a contractor for canteen supply.

1 building, used as a sergeants' mess.

6 buildings for 36 men each, for the Dépôt Companies.

1 guard room.

1 orderly room.

In addition, a "Soldiers' Home" was erected by a Doctor Sharpe, and a tea room by a Mrs. Forbes, which proved very useful, to the non-commissioned officers; and men.

358. A small hospital was, at first, formed, with some outbuildings, constructed under Hospital. dépôt arrangements. These were afterwards taken over by the Imperial Yeomanry Hospital Committee, and subsequently accommodated 60 patients, 2 surgeons, 3 nursing sisters, and 12 hospital orderlies.

359. All these buildings were well constructed, and arrangements were made with Disposal of the military authorities, to take all over, less 25 per cent. of the original cost, except buildings. the mess house, which formed the subject of discussion. It should be noted, that the buildings referred to, were constructed under dépôt contracts, at a period when they were urgently required, and when it would have been almost impossible to have had them got ready so soon by the Engineer Department.

Stores—their Collection and Distribution.

360. In Appendices Nos. 86 and 87 of this report, is shown the amount of stores, sent out Committee's for the Force. They comprised clothing, and equipment, for a six months' supply for 10,500 men, stores. as sanctioned by the War Office, and a considerable quantity of additional stores, secured by the Imperial Yeomanry Committee under private contracts, also, food supplies in provision boxes, as extras, and luxuries, such as tobacco, cigars, cigarettes, &c. In addition to these, there was a very large amount of stores, of all descriptions, sent out by battalions, and companies, Private on their own account, purchased out of county, or private funds. Great difficulty was stores. experienced in collecting all these together, at Cape Town. The main cause of this difficulty,

was the fact, that invoices were not always sent with each consignment. The Committee notified the despatch of all stores sent, by general list and letters, giving the number of cases or bales, with their marks and contents. When despatched by mail steamers, invoices were always sent. When forwarded by troopship, lists were only despatched. As a rule, the stores which were sent by battalions or companies, were not enumerated, in any way, and this was particularly the case with stores which accompanied the embarking units. There was, consequently, great confusion in delivery. Bills of lading, and invoices, very seldom tallied with the goods landed at Cape Town, the reason being, that nearly every consignment by mail steamers or transport, was shut out, wholly, or in part, at the English port of embarkation at the last moment from want of space, and came on later, in some other vessel, of which no advice was given.

**Despatch
and arrival
of stores.**

361. There was, apparently, no agency at the English ports to make out fresh invoices of such stores, and often, there was no officer detailed by the Yeomanry, at Cape Town, to see the goods off-loaded, at the docks, and to keep in touch, with them, until they reached Maitland. The consequence of this was, that many of the Yeomanry stores, were often carried off by others, or left in the docks, for weeks, or months, undelivered. Some were indeed accidentally taken away with consignments, belonging to others. The Base Commandant should have been kept advised by cable, of any consignment sent by steamer, so that he could have arranged to take over, on arrival, what had been despatched.

**Transport
of stores
from dock
to Maitland.**

362. Had this been done, much confusion, and uncertainty, would have been avoided. The Yeomanry consignments were stacked, at four places, at Cape Town. These were either the docks, store houses belonging to the shipping firm of A. R. McKenzie and Co., of which there were two in the town, or at Maitland depôt. There was, often, difficulty and delay, in getting the stores sent from the docks, to the shipping agents, and thence out to Maitland. For this reason, it was no easy matter to sort, and arrange, the various consignments, prior to despatch to the front, and from a personal inspection of the arrangements made, it was too often apparent, that information was faulty, in regard to what stores were available, and what not.

**Sorting of
stores.**

363. The private kits, and stores left behind by the various units proceeding to the front, formed a considerable portion of the whole. Of these, no lists appear to have been left behind, and therefore, all that could be done was to stack them in bulk, either at the store houses of the shipping agents, or at Maitland. The firm of shipping agents referred to, conducted most of the loading, and unloading arrangements at Cape Town, supplying their own transport, traction-engines, &c. Their business is so large, that it seemed impossible to expect from them that amount of order and care in the sorting and arrangement of Yeomanry stores, which was essential. Towards the end of July, this defect became more pronounced, and the Commandant of the Base therefore very rightly decided to remove the stores from their charge, and to place them under Messrs. William Watson and Co., who hired a large store room close to the docks, for the purpose. This permitted the resorting, and re-arrangement, which appeared to be much required.

**Receipt of
stores.**

364. The necessity for this is evident from the remarks of the Base Commandant, regarding invoices. He says, "In the absence of a full statement as to what was really shipped, I cannot say how many stores are missing. No invoices were, as a rule, sent of stores shipped, on transports. No bills of lading were delivered, and no notice given to me of the arrival of stores, on board a transport. The masters of the transports, gave no list of stores either shipped, or delivered. They disembarked them, wherever they chose, either at Cape Town, Port Elizabeth, or Durban, without any reference at all as to what port they were consigned to." "The shipments, per mail steamers and from India, were made in a businesslike way, and can be accounted for. Stores in possession of units, on landing were not taken on charge by the Base Depôt." It may thus, be understood that with the vast quantity of stores, and supplies, shipped for the regular Forces, most of which was consigned by bulk, or number of cases, the Yeomanry consignments were difficult to obtain at all, and when obtained, were often not complete in number. The collection, sorting, arrangement, and despatch had then to be conducted by what may be termed an amateur military agency. When help was required, it was most freely given by the military authorities, but undoubtedly, the work would have been better done had the Yeomanry Staff formed a part of the Military Ordnance and Supply Departments, to look after their own receipts, and issues. Failing this, an Army Service Officer, and an Ordnance Store Officer, or even Warrant Officers, attached to the Yeomanry Base Depôt, would have been invaluable for the proper arrangement and despatch of the stores. The nucleus of a knowledgable staff, would have been more really useful, than too many willing, keen, but unfortunately, untrained officers. Method, business habits, and good office arrangement, are essential in the successful management of the Base, for any Force, but the capacity, ability, and knowledge, for the efficient conduct of such work, is not easily found, even amongst officers of considerable military service.

Action taken to Dispose of Surplus Stores and Establishments.

365. Every endeavour was made by me, to accelerate the despatch of stores to the front, for, after return from Kimberley, Bloemfontein, and Pretoria, it was very apparent that there was need of clothing and many other articles for the Yeomanry in the field, and that there was a considerable surplus at Cape Town which might be used for the regular forces as well as for the Yeomanry, when the congestion on the rail was relieved. The instructions issued by me on the subject of the disposal of these stores, have, I trust, resulted in making much now available for both Services, but this is a matter which has to be decided by the General Officer Commanding the Lines of Communication, through whom my letter was addressed in the following terms. He was best aware of the difficulties of the position, and how these could be overcome:—

Despatch of stores to the front.

Mount Nelson Hotel,
Cape Town,
15th September, 1900.

Sir,

1. I have the honour to forward, for your information, a copy of the instructions conveyed to me by the Secretary of State for War, regarding my deputation to South Africa, together with copy of a letter, addressed on the subject to the Field Marshal Commanding-in-Chief the forces in the country, by the same authority.

Instructions to Base Commandant.

2. From this correspondence, you will observe that the duty on which I have been detailed is to—

(a) Enquire into and prepare a report upon the working of the Base Depot of the Imperial Yeomanry at Cape Town.

(b) To wind up the business of the depot and bring its operations to a close.

The required report will be hereafter submitted by me in London, to the Secretary of State for War direct.

3. In regard to the winding-up of the business of the depot and of bringing its operations to a close, I invite your attention to the remark of the Secretary of State for War to Lord Roberts in the letter enclosed, as to "the necessity of dissolving gradually, but without any undue delay, an organisation which at present controls a large accumulation of public stores in South Africa."

4. I understand, from the correspondence forwarded, that it is considered desirable I should first convey you instructions regarding the stores referred to, and next, my views regarding the organisation by which they are controlled. As has hitherto been the case with all instructions sent you by me, these are forwarded through the General Officer Commanding the Line of Communications, and it will, of course, be for him to convey you his orders upon my proposals, with such remarks as he may desire.

5. My proposals in regard to the Yeomanry Stores include those at Cape Town, McKenzie's Farm, Kimberley and Bloemfontein, which depôts I have carefully inspected.

These stores are of three classes:—

- 1st. Public Stores.
- 2nd. Imperial Yeomanry Committee Stores.
- 3rd. Private or Company Stores.

With regard to the 1st, a vast supply has been accumulated, inclusive of a six months' supply for the Yeomanry Force of 10,500 men. These were supplied, as a rule, under War Office supervision, and were passed by authorised inspecting officers. The War Office officially informed the Imperial Yeomanry Committee that it agreed "to accept all liabilities" for stores purchased for this Force, and there should be, therefore, no question as to their being taken over, and credit given for them in the accounts. I am of opinion that the time has now arrived when these stores should be considered as available, if required, for the regular service, as well as for the Yeomanry Forces. They should now be freely utilised for the Army, whenever, or wherever, required. The Ordnance Department has been most helpful in issuing stores to the Yeomanry when their own were deficient, and it would much simplify matters now to make them over to that department for distribution. The difficulties in securing transport to the front, are, no doubt, very great, but these difficulties are only increased when a separate organisation like that of the Yeomanry has to be dealt with. Moreover, it is obviously objectionable that any portion of the regular Army should be in want of stores which the Yeomanry can make available. I have observed many instances in which Yeomanry Stores should have been so utilised, instead of being left at the base and advanced depôts comparatively useless. Under these circumstances, I request that all stores under Class 1 be made over without delay, receipts being, of course, taken, and accounts hereafter adjusted. Even if they be not immediately required, they will doubtless be useful in the future, for the Army

Public stores.

of Occupation, and it will be more economical to store them, than to subsequently have to obtain similar articles from England. I consider that the stores to be taken over should comprise those belonging to the Yeomanry Force for which the War Office have agreed to accept "all liabilities," including vehicles, transport, tools, &c., and that in the event of any of them being not required, they should be disposed of by sale, or otherwise, under the rules applicable to public property of the departments concerned.

Committee
stores.

6. With regard to articles of the second class, *i.e.* "Imperial Yeomanry Committee Stores," these are mostly articles of *extra* clothing, of a superior description to those issued to the Army, such as Cardigan jackets, flannel shirts, jerseys, drawers, mufflers, cloaks and belts, waterproof sheets, and spare material for clothing. There are also some cases containing luxuries in the way of extra food supplies, tobacco, cigars, cigarettes, &c. The disposal of these must to a great extent be left to your discretion, but I consider you should be generally guided by the principle already laid down, that the Army should not remain in want of any stores which the Yeomanry can spare (except perhaps the luxuries referred to). When made over they should be accounted for, and credit given for them at Army rates, the difference in loss being borne out of the Committee's private funds if the War Office will not defray it. When taken over, you should, if possible, arrange with the department concerned, that the Yeomanry should have preference in obtaining the enumerated articles of the Committee's stores and supplies, which are entirely separate from, and extra to, the War Office fixed scale or complement.

Private or
company
stores.

7. With regard to articles of the third class, *i.e.* "Private or Company Stores," these comprise large quantities, subscribed and paid for out of county or private funds, also kits and baggage, belonging to officers and men, which were left behind when the Yeomanry landed and moved to the front. These cannot be interfered with. I understand that the returning forces will probably be sent by rail to selected rest camps at some distance from Cape Town, and will thence proceed right through to the transports, on which they will embark. The kits and stores of Class 3 should therefore be carefully sorted, so as to be made readily available for the embarking forces. These stores should be either kept together at McKenzie's Farm, or in the Yeomanry store shed in Cape Town, and this can be the more easily arranged when the surplus stores of Class 1 and 2 are made over as proposed to the Army departments. Lists should be made out, so that each returning company may know exactly what it has to obtain. This is necessary, as in many instances companies left Cape Town without furnishing lists of what was left behind. Officers in charge of the advanced depôts should be instructed by you to make out these lists as soon as possible, and it may perhaps be convenient to collect all the private stores and kits at Cape Town, ready to make over on embarkation. None of these effects can be sold, or disposed of, without the written authority of the owners.

Reductions
in staff
proposed.

8. Under the instructions I have received from the War Office, the organisation which has hitherto controlled this accumulation of stores has now to be dissolved, subject, of course, to the confirmation of the military authorities of my views in this matter. The *personnel* of the Base and advanced depôts, both in officers and men, appears to me to be much in excess of actual requirements. The main object of the formation of these depôts was the supply, and distribution, of stores to the Yeomanry force in the field, and not the organisation of small military camps, with their attendant necessary arrangements.

The following is the strength of these camps and the reductions I propose :—

McKENZIE'S FARM, MAITLAND.

Present, 11th September, 1900.

Officers	1	Base Commandant (Colonel).
"	1	Staff Officer, A.A.G. (Major).
"	1	" " " " " "
"	1	Transport Officer (Captain).
"	1	Quartermaster (Captain).
"	4	Duty officers attached (subalterns).
		<hr/>	
		9	
Sergeants ...	42	{ Base dépôt and attached, orderlies, transport grooms and batmen, cooks, police, clerks, saddlers, tailors, guards, &c.	
Rank and file ...	313		
		<hr/>	
Total ...	364		

Proposed :

Officers	1	Depôt Commandant (Major Moore).
"	1	Adjutant (Captain).
"	1	Quartermaster.
Sergeants ...	6	{ One as Depôt sergeant-major, storemen, and mis- cellaneous duties.	
Rank and file ...	24		
		<hr/>	
Total ...	33		

BLOEMFONTEIN.

Present :

Officers	1	Commandant, A.A.G. (Major).
"	1	Adjutant (Captain).
"	1	Quartermaster subaltern (attached).
"	1	Duty officer " "
Sergeants ...	6	{ Miscellaneous duties.	
Rank and file ...	70		
		<hr/>	
Total ...	80		

Proposed :

Officers	1	Captain in charge of stores and accounts.
Sergeants ...	2	{ Store men, clerks, and miscellaneous duties.	
Rank and file ...	10		
		<hr/>	
Total ...	13		

KIMBERLEY.

Present. (No change at present required).

Officers	1	Captain in charge of stores and accounts.
Sergeants ...	3	{ Store men, clerks, and miscellaneous duties.	
Rank and file ...	10		
		<hr/>	
Total ...	14		

9. These reductions should, I consider, be effected with the least possible delay. It will be for the military authorities to decide how the surplus officers and establishments are to be disposed of, and when further reductions are feasible they should be similarly carried out. I propose to defer my departure from South Africa until the 3rd of October, so as to endeavour to see the proposed reductions made within that period. The stores remaining, as already detailed, should be placed under the Regular Army Departments, with the Yeomanry officers to assist in their distribution, and to be utilised in any other work required of them. Men returning from the front, or proceeding thereto, belonging to the Yeomanry, should join the Yeomanry Dépôt, which should be included in the Maitland command, and should be then dealt with as a portion of the Regular Army. It seems unnecessary to keep up a separate organisation on this account for them.

McKenzie's
farm.

10. If effect is given to this arrangement, the house and lands at McKenzie's Farm can be given up, and with this end in view, the owner should now be given a month's notice, which, it is understood, is required. After that period, it will be for the military authorities to decide whether the place is required by them or not. All huts and buildings should be made over to them, and the adjustment of accounts in connection therewith should be effected in the usual manner. Some of the buildings have been paid for out of Yeomanry funds, but the liability for the whole account is one which the War Office should, in my opinion, accept.

11. The Dépôt Yeomanry Hospital at McKenzie's Farm is very well organised and in good working condition. It has now been taken over by the Yeomanry Hospital Committee, and it will doubtless be retained for the present.

Accounts.

12. In the settlement of accounts for anything taken over, cash payments should not be made. Transfers should be effected under credit vouchers, subject to the final audit of the War Office.

13. The Yeomanry pay accounts have been well, and ably, conducted by Colonel Feilden, and I request you will be good enough to obtain his personal advice and assistance, in all financial matters in connection with the dépôt, which he should occasionally visit for this purpose. If he thinks it requisite, he might be empowered to detail his assistant, Captain Bruce, to the advanced dépôts for similar assistance. By these means, I trust, the accounts of the dépôts, will be accurately rendered for final adjustment.

14. I have to express my thanks to you, for the assistance you have given me on the duty for which I have been detailed, and to express a hope that your valuable services will meet with the recognition they deserve, from the military authorities.

In conveying his orders to you on this letter, the General Officer Commanding the Line of Communications, through whom it is forwarded, will no doubt inform the Field-Marshal Commanding-in-Chief in South Africa and his Staff, of the decision arrived at with reference to the enclosed letter to his address.

I have, etc.,
(Signed) ALFRED G. LUCAS,
Colonel,
D.A.G., Imperial Yeomanry.

To Officer Commanding
Base Dépôt,
Imperial Yeomanry.
(Through the General Officer Commanding the Lines of Communication.)

Transport of Stores from the Docks to the Maitland Dépôt and beyond.

Transport
of stores
from the
docks to the
Maitland
Dépôt
and beyond.

366. The arrangements made for the transport and collection, of stores from the Docks at Cape Town were as follows:—Those sent to the store rooms of the Shipping Agents (McKenzie and Company) were collected, and despatched by that firm, the rate allowed being 2s. per ton. If taken direct from the docks to the railway, dépôt transport was used, and if this was not available, the agents moved the stores at a similar charge. For stores taken from the transports to trucks alongside, the charge allowed was 1s. 6d. per ton.

367. In some cases the stores were carted by the Army Service Corps direct from the docks to the Base Dépôt at Maitland, but this cartage was not always satisfactory, owing to the great amount of work the mules and horses had to do, though latterly it improved. Traction engines, and "trailers" were subsequently used, which proved very satisfactory, particularly for heavy stores. Owing to the congested state of the rail, there was much difficulty in obtaining trucks for despatch to the front, but as many as could be spared were asked for. Endeavour was made to obtain a regular service of one truck, per week, for Kimberley, and three for Bloemfontein, but this was not found possible, so what was required had to be obtained at irregular intervals. Private contract for despatch to

Kimberley by rail was arranged with a local firm, for a small quantity of stores, and these were safely delivered. The total number of trucks despatched to Kimberley, Bloemfontein, Mafeking, and Pretoria, between June 11 and September 14, 1900, was 33, which shows the difficulty in obtaining transport by rail, and is also indicative of the surplus of stores as yet to be sent forward. The opening out of fresh lines of communication, will, no doubt, much relieve the railway, but meanwhile the Yeomanry Force in common with the rest of the Army, had to remain without many articles of clothing and equipment of which it was in need. There were 24 horses allowed for local transport at the Base; these were utilised in wagons, for the transport of stores to and fro, and in some instances mules were also made available for the purpose.

Regimental or Company Transport.

368. Some companies brought out their own wagons and Scotch carts. Others, not being satisfied with what vehicles they brought out, sold them, and obtained those of the Imperial Yeomanry pattern, from the Base Depot. The latter were sent out nominally for depot work, but as there were 55 imported, the number was much in excess of what was required for this purpose. The arrangement made with the War Office, was, that all regimental or army transport, was to be supplied to the Yeomanry by the transport service in South Africa. Regimental transport was practically abolished, and a general transport train formed, instead, when the rail was not made use of. Each regiment was, however, permitted to retain one wagon per company, of the capacity of a buck-wagon, or Scotch cart, on the understanding that it supplied horses to draw it. Wagons.
Company transport.

369. Each company when it left the depot, took with it a horsed wagon, but occasionally, when entrained, the wagon was refused transport and had to be sent back to the depot. Company wagons.

370. One of the most notable features of the operations in the field, was the proved necessity of having (apart from ordinary transport) some sort of light vehicle such as the Cape cart, to lighten the load of both the trooper and his horse and thus to secure increased mobility. The Cape cart, or Scotch cart, answers fairly well for this purpose. The lighter it was, the better it was found for the purpose. A good cart will probably have to be designed, as the results of recent experience, and this subject will no doubt occupy the attention of the proper authorities when there is time available. The Cape, and imported mules, were excellent, and did very good work, and were better for rapid movements than the spans of oxen in buck wagons. The subject of the provision of a cart, of the description required, is referred to in Section III, dealing with suggestions for the Yeomanry Force of the future. Light vehicles required.

Hospital—Base Depot, Maitland.

371. There was a very good hospital, formed by the Imperial Yeomanry Hospital Committee close to the main camp at Maitland. It was sufficient for a detention hospital, of 100 beds, and had a sufficient staff of surgeons, nursing sisters, and orderlies. There was also a surgeon in the Yeomanry camp, who examined cases, to commence with, and passed them on to the detention hospital for treatment, if he considered it necessary. This arrangement seemed superfluous, and the services of the camp surgeon might well have been dispensed with, and this was recommended. In fact, if the Yeomanry details and men, going to and fro, had been all placed under the command of the Commandant at the regular Maitland Military Camp, and that of the Yeomanry (at McKenzie's Farm) had been broken up, the separate hospital and its staff would probably have been no longer required. Site and Establishment.

372. No doubt, to commence with, when the Yeomanry arrived in large numbers, separate hospital accommodation was necessary, but the military authorities seemed to have considered that slight cases might be treated in the men's tents and the remainder sent to the adjacent hospital at Woodstock. The commandant of the Imperial Yeomanry Base Depot made the necessary representations on the subject, with the result that large marquee tents were provided, and a hut was built sufficient to accommodate 30 patients. This was subsequently taken over by the Imperial Yeomanry Hospital Committee, and enlarged as described above. Necessity for it.

Site. 373. There has been some discussion about the site selected for this hospital. It was placed at a little distance from the camp to avoid flies. The soil is sand, on hard rock, and the water collects in pools, close to the hospital, in wet weather. Apparently, it would not have been a difficult matter to have selected a better site close by, by paying for it, but the present one has not proved unhealthy. The water supply from Table Mountain is excellent, and the latrine arrangements good. The Commandant of the Base, Colonel Graham, considers that a branch of the Imperial Yeomanry Hospital, should, in the first instance, have been established at Maitland, as well as at Deelfontein, and that all Imperial Yeomanry patients who were coming to the Cape Peninsula should have been sent there. Doubtless, however, the Imperial Yeomanry Hospital Committee, fully considered this matter, and have good reasons for preferring Deelfontein, which is a very much better and more healthy site.

Sickness in camp. 374. The prevalent sickness at the camp seems to have been a severe form of diarrhoea, which often occurs when a large number of men and horses are encamped together for any length of time. The Commandant reports that out of 9,000 men passing through camp, there were only 9 deaths: 6 at Woodstock, and 3 at Maitland.

Management. 375. The management of this Branch of the Imperial Yeomanry Hospital Committee's hospital left nothing to be desired, and when it was once decided that a small hospital should be established there, no time was lost in supplying it with everything necessary. The Imperial Yeomanry passing through, must all have appreciated what was done for their comfort by this famed organisation.

Personnel and Organisation of the Base Dépôt.

Establishment. 376. The establishment in officers and men allowed for the Base Dépôt by the War Office will be found in Appendix No. 38. This establishment, for Base, and Remount Dépôts combined, was asked for in accordance with the War Office regulations on the subject, as shown in Tables VI and XLI of the Line of Communications. It was really more than ample for the purpose had it been utilised for the objects for which allowed, and had it reached the Base before the Imperial Yeomanry began to arrive. This, however, was not the case. The Commandant, should not have been permitted to leave England, until he had gathered together the majority of the staff and establishments sanctioned, instead of proceeding to Cape Town without them. The organisation and despatch of the dépôt staff, was unfortunately delayed, in consequence of a considerable amount of correspondence between the Imperial Yeomanry Committee, and the War Office as to whether drafts were to be allowed for the Yeomanry, or not. Eventually, the decision arrived at was, that no drafts were to be allowed, and that the maximum strength of the Force, was to be 10,500 men, of which 500 were to comprise the establishment of the Base Dépôt, not for the service companies, but for the duties detailed in the tables referred to—Base and Remount combined.

Drafts. 377. This decision had to be observed, but it may be remarked, that it was unique, as the Yeomanry Force in South Africa, thus became, perhaps, the only one, for which drafts were not allowed. The result was that with its heavy casualties and sickness, it soon dwindled away. Battalions were broken up, their staffs became surplus, with often nothing to do, and in many cases companies almost entirely disappeared, or their strength had to be made good from others.

378. Whilst the discussion, as to whether drafts should be allowed, or not, was proceeding, certain men, properly forming a portion of the 500 allowed for the Base Dépôt, were sent out to South Africa, and as heavy losses had already taken place at the front in Colonel Younghusband's command, these were sent forward to make good deficiencies, and thus, the Base Dépôt requirements suffered. This procedure was followed for some time, with other companies, still further to the detriment of the Base Organisation, until the Committee were able to convey to the Base Commandant the final decision of the War Office, that no drafts were to be allowed. Even then, however, urgent demands for the services of both officers, and men, were made on the Base, and as field requirements were thought paramount, they were met. Instead, therefore, of the Commandant at the Base, having at his disposal 15 officers and about 500 men for Base Dépôt work alone, he had very much less, and in fact, an insufficient number to carry out the duties, for which the regulations allow a certain fixed establishment. He appears to have met demands made on him as well as he could, and he had in fact in addition to send forward some of his establishments, in officers and men, to the advanced dépôts of Kimberley and Bloemfontein. When the decision was given that the remount portion of the Base Dépôt was to be merged into that of the

Imperial Remount Department, his staff was still further reduced, though as a matter of fact, the Base Establishment was not complete until the Remount Depot was about to be given up, and all the service troops had left for the front, taking with them some of his establishments.

379. The duties of the Base Commandant are to see that the Force passing through his command, proceed on service as efficient as possible, both in *personnel*, equipment, clothing, and horses. Thereafter, he has to see that it is, as far as possible, kept supplied with all its wants, from the stores at his disposal. Under the circumstances, Colonel Graham had many difficulties to contend with at the commencement. Afterwards, his main duties were those of the distribution of stores, and not the exercise of military command, in a camp primarily kept up for store and distribution. For the latter purpose, when the troops went forward, his staff appears to have been sufficient, and could no doubt have been reduced, had the drafting, payment, invaliding, &c., of details, been made over to the adjacent military rest camp at Maitland. It seemed unnecessary to indefinitely, prolong a separate Yeomanry organisation for this purpose, or to treat it as a distinct and special body. Had this transfer been effected, there would have been more time and supervision available for the very important work of the collection, arrangement, and distribution, of the vast amount of Yeomanry stores which were in many cases urgently required at the front.

Duties of the Base Commandant.

380. In considering the distribution of the staff, Colonel Graham observes—"It must be remembered, that the staff had to be organised as the *Staff of a Division*, in addition to that of a Base, as for many weeks, there were two brigades in camp, and for some time as many as three." In his general observations on the subject, he also reports that—"The first person to consider is the Base Commandant. I think this officer should have the local rank of Brigadier-General, and that he should have the entire charge of the Base, and lines of communications, as far as these relate to the Imperial Yeomanry, and of all advanced depôts, and that all line of communication correspondence, should pass through him, exactly as if he occupied the position of the General Officer Commanding the Division, a post which has been proved to be quite futile, by itself, as it has been found in practice, that it is but rarely that even a brigade of Imperial Yeomanry has been kept together. As the General Officer Commanding was in this instance at the front, endless delays were caused by the necessity of sending correspondence from the General Officer Commanding the line of communications to him, which could, and should, have been dealt with at the Base, and which in the end was so dealt with. The Base Commandant should remain at the Base, but with power to visit his advanced Base Depôts, when he thinks fit. By amalgamating into one, the General Officer Commanding the Division, and the Base Commandant, a vast amount of correspondence could be got rid of, and the work generally simplified by the concentration of authority. Brigadiers, could, of course, be appointed by the Chief to command brigades in the field."

Staff of a division.

Rank of Base Commandant.

381. On this proposal, I have some hesitation in offering an opinion. It is one, which comes within the province of consideration of the Military Authorities, and Major-General Brabazon, C.B., was the officer appointed by the Field Marshal Commanding-in-Chief, to conduct the organisation of the Imperial Yeomanry at Army Headquarters. When I had an opportunity of consulting him at Pretoria, on various subjects connected with the Force, this proposal had not been made, and it is for him to consider its necessity, or otherwise. So far, however, as I am able to judge, from observing the work of the Base Depot, and advising on "the organisation which controls a large accumulation of stores in South Africa"—this being the duty assigned to me—I may say, that, I consider this proposal one which should not be accepted. On the contrary, the staff of the Base Depot, might well have been reduced, both in rank, and numbers, in the manner I suggested to the General Officer Commanding the lines of communication, page 83 of this report.

382. The exercise of *Military Command* by the Base Commandant, in regard to drill, training, musketry, riding, &c., virtually disappears, when the service companies proceed to the front, and as no company was allowed for the supply of drafts, his duties thenceforward became mainly those of the collection, arrangement, and despatch, of stores to those in the field. His work in camp would be lightened considerably, were drafts passing through, sent to the adjacent military camp for payment, &c., as has been proposed.

Command.

383. The want of a proper *clerical staff* for the depot has been urged by the Commandant as having caused great inconvenience, and as resulting in correspondence being much in arrears, and of no records having been kept. It appears that clerical assistance was awaited from England. From enquiries made, it seems impossible to understand why

Clerical staff.

an efficient office was not at once locally organised, for which the Imperial Yeomanry Committee would have paid, if the charges therefor were not sanctioned by the War Office, which however has been most liberal in passing all necessary expenses. Cape Town was, and is, full of men able, and willing to work, if adequately paid, and there was no scarcity of men well fitted for office work, who could have been obtained through any of the numerous agencies in the town.

Postal.

384. A post office section was allowed for the Yeomanry Dépôt, but only three untrained men were available for the purpose. This was insufficient, and if the required and authorised number could not have been obtained from the Military Authorities, it would have been better to have had the letters sorted at the General Post Office, in the ordinary manner, and then daily collected for those who were in camp.

Riding establishment.

385. A *riding establishment* was considered necessary by the Base Commandant, but it seems scarcely possible to have organised anything of the kind, for the brief period the Remount Dépôt was in existence. Many of the horses were unbroken, but if the service companies had to wait, until they were trained, much valuable time would have been lost. Unbroken horses were issued everywhere, during the war, and the men had to make the best of them they could. The Yeomanry did very well in this respect likewise.

Artificers

386. Armourers, shoemakers, tailors, and farriers, arrived too late; this has been made a cause of great complaint, but it must be remembered, such artificers, were most difficult to obtain during a period of considerable pressure in England.

387. The defect in the position in regard to the Base Dépôt was this: An establishment was sanctioned for it in the first instance, but instead of keeping it for the exact purpose required, it was depleted, for what was thought more important duties at the front, and "the system of detailing storekeepers, &c.," from the several companies who wanted to get rid of their "most worthless men" was adopted instead. It is scarcely necessary to point out, that this was not the best method of securing an efficient *personnel*, for a dépôt, on the careful working of which, much of the comfort of the Force was dependent.

Command.

388. Colonel Graham brings to notice the cordial assistance given him by the local Military Authorities, the General of the line of communications and his Staff. All orders appear to have been conveyed to him through the Base Commandant at Cape Town, but he considers the situation was complicated, by the appointment of Major-General Brabazon, to whom, of course, all correspondence ought to have been sent, as responsible for the organisation of the Yeomanry. This caused such delay, however, that the method was tacitly altered, and matters were settled on the spot.

Remounts.

Remounts.

389. The number of horses purchased, under the orders of the Imperial Yeomanry Committee, in England, and elsewhere, is shown in Chapter V of this report, and need not be repeated here.

Disposal.

390. The horses were taken over from the ships and issued to the troops as soon as possible. All surplus that could not be so dealt with, were made over to the Imperial Remount Department. Those which were considered unfit for the service, and unlikely to become fit, were sold. A statement of the sums realised on this account is under preparation, and will be submitted, for audit, with similar accounts, which will have to be finally adjusted with the War Office.

Remount Dépôt.

391. The Remount Section of the Base Dépôt, as constituted at home, and shown in the Statement of *Personnel* given in Appendix No. 38, never got into working order, as both officers, and men, arrived too late. Colonel Graham makes the following remarks on this subject:—"There seems to have been some idea, that the drafts could have been utilised for the Remount Dépôt, but, independently of other considerations, as these drafts did not arrive until May 6, and the dépôt was started on February 24, it is rather difficult to see what good they were to it, particularly as the order to hand the whole concern over to the Imperial Government reached us the same week." This remark shows that much the same mistake was made in regard to the Remount Section of the dépôt, as towards that of the Base Dépôt. No drafts were allowed by the War Office, and the 500 men sent

out should have been regarded as entirely for depôt work. It is unfortunate that the correspondence on the subject was so prolonged, that delay occurred in sending out the establishments which were required for this duty.

392. In addition to the number of horses despatched and landed at Cape Town for the Remount Section, a few were taken over by it from various companies of Yeomanry, viz :—

Northumberland Yeomanry	194
West Kent	"	100
Lieutenant Connop	23
Worcester Yeomanry	14
Total	331

Horses
taken over
from
Companies.

393. The Yeomanry companies, which brought out their own horses, were entirely responsible for them, and took them away at once. Doubtless, this system of shipping horses, with the units to which they belonged is by far the best, and has been admitted so, on many occasions in the transport of troops across sea. But the difficulties of securing transports for men and horses together were, for many reasons, almost insuperable. The system of Yeomanry corps purchasing and being responsible for their own horses, answered well, and, if it had been universally adopted would have saved much trouble, but it should be remembered, that many corps declined to take this responsibility, and asked to be supplied with remounts under arrangements made by the Committee.

Horses
brought by
companies

394. One director, with a capable staff of remount officers, to be responsible for the purchase, shipment, and landing of horses, and the formation of a depôt, is the right system to adopt in future. Depôt organisation should not be left to untrained and inexperienced officers; otherwise, results are likely to be as unsatisfactory as expensive.

Depôt.

395. The horses at the Yeomanry camp were placed in four kraals, or wired-in enclosures, capable of holding about 2,000 in all. Picketing gear had not arrived, so the horses were turned loose, and fed from troughs. Establishments were wanting, though it does not appear clear why local Kaffir labour was not obtained, as was done in the regular Remount Department; I observed, that remounts were comparatively well looked after in this manner, and with adequate arrangements such labour can always be obtained, though wages are high.

Horses
at camp.

396. With large numbers of horses, which have to be drafted away as rapidly as possible, breaking in, and riding is of course impossible, the utmost that can be done is to walk them at exercise, and the regular Remount Department appears to consider this sufficient. In this, and many other matters, the untrained Yeomanry staff would have done well to have consulted officers, or seen the arrangements made in the regular service, instead of relying entirely on its own devices.

397. The method of distribution was to set apart a certain number of horses for each corps, to select from. Officers were allowed a free choice of chargers by seniority, and had to pay £40 for each, or sign a certificate, that they had not received this allowance.

Method of
distribution.

398. All horses were inspected before disembarkation by a Government veterinary officer, and all suspicious cases, or horses too feeble, were sent to the Army Remount Sick Hospital at Greenpoint. It is noticeable that reports received show that many excellent cobs, could have been obtained in Basuto Land, in December and January. Cobs of this class have done excellently during the campaign, and if a competent remount officer, and veterinary officer, had been sent out to purchase them, the results would have been good financially, and otherwise. These cobs were obtainable at £12 to £15 each.

Basuto
cobs.

399. The Australian horses imported for the Yeomanry were favourably reported on, but as they had a protracted voyage and no time to rest and recover before going to work, like all others imported for remount purposes from that colony, they did not last long: without rest and acclimatisation as well as plenty of food, the waler is of little use, as this campaign has proved. The Hungarian horses were well reported on as a rule. They did good service in the field, and many officers and men liked them. Many were seen at various places up country, and at remount depôts, and they appeared to do well. English horses were generally preferred if good, but those ex the "Mount Royal" and "Montcalm" were unfavourably reported on. The remounts from the last-named ship (513) were handed over to the Army Remount Department. Had all the shipments been given a

Australian
horses.

Hungarian
horses.

Best horses. little rest, the horses would have doubtless much improved, but this is just what it was almost impossible to give them in any direction during the war. Opinions in regard to horses vary so much, that it is almost impossible to arrive at any decision from them, as to which class of horses proved best for service, but it may be said, that those which did the greatest amount of work and lasted longest were the breeds of the country, whether Cape, Free State, Transvaal, Natal, or Basuto.

Horses taken over by Army Remount Department. 400. In cases where any of the Yeomanry horses were made over to the Army Remount Department, as with those of the "Mount Royal," it was done with the understanding, that an equal number should be drawn from that department subsequently if required. Out of the total number of 750 Australians imported for the Yeomanry, the last shipment of 125 was landed at Port Elizabeth, and was taken over by the Army Remount Department.

Remount officers. 401. The officers of the Yeomanry who were detailed to do remount work before it became merged into that of the regular service were :—

Major Moreland.
Captain Derriman.
Lieutenant Connop.

These officers' services are highly spoken of by the Base Commandant.

Horses despatched to advance depôts. 402. The following is the number of remounts which were despatched to the advanced depôts :—

Bloemfontein	485
Kimberley	248
Total	733

These horses were drafted away to Yeomanry corps in want of them as demanded, and copies of rolls and issues of all horses so transferred were kept.

Closing of Remount Depôt. 403. The Yeomanry Remount Depôt was closed on June 16, and all horses remaining were made over to the Army Remount Department, which, it may be observed, had taken over direct, the Yeomanry remounts, on ss. "Hellopes" and "Cornwall." A general statement of the total number of Remounts thus taken over is under preparation.

Most suitable horse. 404. It is noticeable, that with the Yeomanry, many of whom not being Yeomen proper were indifferent riders, the small horse proved the most suitable. The spectacle of a fully-equipped rider trying to mount a tall horse was not a very edifying one, though perhaps instructive. Dismounting was often equally curious, and one General officer of great experience, remarked that once the men reached the saddle, with rifle, &c., safely, they were often unwilling to try and get off. With large bodies of mounted riflemen, whose efficiency and existence depends on mobility and celerity of mounting and dismounting, this fact should be in future borne in mind. Were it not that many of the large horses were extremely quiet, and physically incapable of doing much, owing to short commons and much privation, it would have been very difficult to have made the men so useful on horseback, at first, as they undoubtedly proved. After a while, they gained confidence, and became good riders, but even then the smaller horse proved the most suitable, and should in future have preference to others. This was what the regulations provided for—i.e., preference to the smaller horse—but the majority of purchases were of too high a standard for real efficiency. Most of the Boers are mounted on ponies, and with sometimes two or three each, they obtain that mobility which has been such a marked feature in the recent military operations.

Veterinary, Horse Hospital.

Veterinary, horse hospital. 405. The Veterinary Horse Hospital was not organised until just before the Remount Depôt was broken up. Its want was much felt at first, but trained establishments were not available for it. There was an excellent horse hospital close by, at the Maitland Military Camp, composed almost entirely of native Indian employes, from Indian cavalry regiments. Wherever syces were obtainable, they did good work, and this was noticeably the case at Bloemfontein. The sick horses were picketted in separate lines at the Imperial

Yeomanry Base Dépôt, and the best treatment possible was given them, assistance being obtained from the adjacent military camp, and from the service companies. The veterinary officer placed in charge was Veterinary Captain Crole, who does not appear from the Commandant's report to have organised the horse hospital as well as might have been expected from him. Subsequently, Veterinary Major Webb took charge; sheds, and a pharmacy were constructed, and a rapid improvement took place. There appears to have been, at one time, 190 sick and lame horses to look after, and no men for the duty, for the same reason as the Base Commandant has given, regarding the non-employment of men who were really originally detailed for this work, and not for the service companies.

406. The necessity for a good horse hospital and pharmacy is obvious, and when horses are rapidly collected, and have to be drafted away quickly, the best plan is to leave its organisation to an efficient veterinary officer, making him responsible for it, and allowing him funds, both for local labour, and such appliances as he is unable to secure from the military authorities, under the regulations on the subject. The best organised hospitals in the country have been managed in this manner. Funds would have been made available, if necessary, by the Imperial Yeomanry Committee for the purpose required.

Harness.

407. Considerable quantities of harness, of English manufacture, were sent out. A great deal of it was made for mule draught, being of the breast pattern for span work. As a general rule, it was of too good and expensive a kind and not sufficiently rough and strong. The harness in use in South Africa is of untanned hide, very thick and durable. The English pattern is not capable of undergoing such rough usage as that to which the local harness is subjected, and it would have paid better to have had the harness made in England, of the exact South African pattern sent from there. The mules vary in size very much, Americans of 16 hands and over, and country mules, below 13·2 hands. The harness has, therefore, to be made of a very adjustable pattern, or it is useless. That sent out for tonga work was of no use whatever for the purpose, it had all to be recut, and remade, to make it suitable for use with the currie pole and bar. Having been made for shaft, and span work, this was difficult, and expensive.

408. For dépôt use with Artillery horses and wagons, the breast harness did not appear to be of much use, and it was therefore altered for collars, though it would have seemed preferable to have obtained, if available, Artillery harness from the Ordnance Department for this purpose.

409. Some Yeomanry companies brought out their own harness, with the "Scotch Cart," which was used regimentally. Doubtless, this will be reported on by the proper authorities hereafter, but it may be said generally, that the locally-made, very rough, harness was the best for use in South Africa.

Saddlery.

410. Three patterns of saddlery were sent out by the Imperial Yeomanry Committee; these were:—

1. The ordinary English cavalry saddle.
2. The Austrian pattern saddle.
3. The Indian saddle.

411. As far as can be ascertained from the many officers who have been consulted on the subject, and who have had practical experience of its use, this saddlery, and horse equipment, answered, as a whole, very well.

412. The Indian pattern (Cooper Allen's) was by far the cheapest, and though rough in appearance, in comparison with the English-made article, it did good work, and was well thought of by those who used it. The English pattern did well also and was perhaps more generally preferred to any other. The Austrian saddle was condemned by the Ordnance Department, which at one time, refused to take over a considerable number which was surplus in the Yeomanry Stores, although much in need of saddlery for the regular service.

413. Reports received regarding these Austrian saddles, were, however, so favourable, that upon the matter being brought to the notice of the Chief Ordnance Officer for South Africa at Cape Town, he ordered all to be taken over. The accounts for these were to be subsequently adjusted. There may be, possibly, a want of elasticity in the regulations for making use of any article whatever, which is not of service pattern, of which this is a fair

example. The Austrian cavalry are, perhaps, as good as any in Europe, and their service saddlery, of which this supply formed a portion, is the result of years of trial and careful experiment. It was obtained for the Yeomanry as a matter of favour, at a period of great pressure, when neither the Ordnance Department in England, nor the English factories, were prepared to supply any more. It was very favourably reported on in South Africa, by the Yeomanry which used it, but it was not thought fit, because not of service pattern.

Suggestions.

414. It is no doubt desirable in this report to confine remarks to the suitability, or otherwise, of the supplies obtained by the Yeomanry Committee for the use of its Force in South Africa, and to avoid treading on the province of those who will have to deal with the results of experience gained in the field. This report, however, will be of comparatively little use, unless every opportunity is taken of giving the experience which has been gained as the result of local enquiry and investigation, regarding military equipment. Such recommendations as may be made on this subject therefore will be put forward in Section III under the heading of Suggestions for the Future Organisation of the Yeomanry, which will no doubt be considered when the much more weighty and valuable opinions of the Field Marshal Commanding in Chief in South Africa, and his generals, are being discussed.

Saddlery equipment.

415. The other articles of saddlery equipment sent out, which chiefly require notice are the bit and headstall, and the rifle sling and bucket. The cavalry pattern bit seemed unsuitable, and the plain Pelham was the best for general use, particularly with horses unbroken and of varying sizes. The rifle sling and bucket are susceptible of improvement, and it is indeed a question whether they should not in future be abolished, and a method of carrying the rifle on the back adopted instead. This, however, opens out the question of a lighter pattern rifle, which will be separately discussed.

Haltering. Pegs. Horseshoes.

416. The other articles of saddlery supplied, seemed all suitable, of their kind, though if their weight could be reduced, without impairing strength and durability, it would be advantageous. Knee haltering is strongly advocated. Wooden pegs are generally condemned for picketting purposes. Lighter horseshoes for the veldt are thought desirable. Taking the saddlery supplied as a whole, however, it was quite as good as what was in use in the regular service, if not better, and, therefore, future alterations will be required in one service, as much as the other.

Line Gear.

Line gear.

417. The line gear sent out was not sufficient, at first, and inconvenience was experienced in getting the remounts properly picketted. The picketting gear supplied with the men's saddlery should not have been considered as available for this purpose. What were required were good strong head-stalls, and ropes, with a supply of knee ropes and iron pegs, with rings, to tether the horses; also, the usual supply of brushes and curry combs, stable buckets, hand rubbers, &c. Of rugs and blankets, there was a plentiful supply. The long ropes sent out were useful for tethering purposes. The required supply of line gear was subsequently sent out by the Committee, but in future it should be remembered that if possible, all articles required for a remount camp should be sent out before the horses arrive, so that they may have everything ready to receive them.

Board ship equipment.

418. The head collars and other gear used on board ship, are not available for this purpose, unless they are supplied with the remounts in the first instance. Usually, they belong to the ship. It would be best, perhaps, to supply each remount at the time of embarkation with a head-stall and watering bridle, leaving the other articles to be supplied on arrival at the remount camp. A few camp requisites, such as wheelbarrows, rakes, spades, &c., are always necessary, but these, as well as water and manure carts, can be obtained locally. In all standing remount camps, the men's picketting gear and horses' kit should be kept separate from what is required for remounts, and provision should therefore be made accordingly.

Vehicles.

Number sent.

419. The number of vehicles imported by the Imperial Yeomanry was 80 tongas and 55 wagons. In addition, there were various wagons, and carts, sent out by the Yeomanry companies for their own use. Of these latter, no report can be made, until it is ascertained how they answered in the field. There were, also, certain ambulances sent out by the Yeomanry Hospital Committee, which were stored at the Maitland Camp, as well as a few of the "Manders Flying Ambulance Cars," of which, doubtless, separate reports will be made by the authorities concerned.

Ambulances.

420. Tongas were mostly found at the Maitland Camp unused, the remainder were lying in the Ordnance Store Department, in the town, unpacked from their cases. A Committee was called on to report as to whether they could be made use of or not, with the result, that the vehicles were declared unfit for any military purposes whatever. The letter from the Chief Ordnance Officer, South Africa, on the subject, forms Appendix No. 85 to this report. For some reason unknown, the tongas were sent out with *shafts*, and as the principle of the tonga draught is that of balance, with pole and currie bar, it is obvious that they were found too heavy for use with shafts. No attempt was made to alter them, nor did there appear to be anyone in Cape Town acquainted with the systems of Indian tonga draught and harness. At Pretoria, it was observed, that tongas (30) were in use by the Medical Department, of the Army Headquarters. They were found to be of exactly the same pattern as those at Cape Town discarded, the only exception being, that they had the Indian method of pole and bar draught. Enquiries showed, that they had done excellent service, over difficult ground, and long distances. They had been provided from India (Danjeebhoy) with ponies, and syces, complete. The matter was explained to the Chief of the Staff, and to the Principal Medical Officer, with the result that under orders from Lord Roberts, 50 of the Imperial Yeomanry tongas were directed to be sent to Pretoria, after being altered to the Indian draught. Arrangements were made to despatch a currie bar, and harness to Cape Town to guide in conversion, and this work was well forward, with the total number when I left Cape Town. It is manifest that if endeavour had been made to alter the tongas at an earlier period they might have been of great use at the front. Such vehicles are very much of the kind required with mounted troops, to carry the men's kits and lighten the present load which the troopers' horse has to bear.

Tongas.

421. With the wagons sent out, much the same thing occurred. No doubt, those imported had defects which, according to South African experience, rendered them somewhat unsuitable for the country. But these defects were not irremediable, nor were the vehicles of the Imperial Yeomanry Committee the only ones which were faulty. At the "Amsterdam Battery," Cape Town, where surplus vehicles belonging to the Transport Service were kept, it was observed, that many of all sorts, and patterns, were lying unused. Possibly, they were not required at the front, but the fact is noticed, as showing that mistakes will happen, for which the Yeomanry should not alone be held financially, or otherwise, responsible. One of the rejected patterns of Imperial Yeomanry wagons, made at the Gloucester Carriage Works, and pronounced quite useless at Cape Town, was found in use with the Commander-in-Chief's escort. It had done excellent service on the march from Edenburg to Pretoria, and was reported as very useful by the officer who had utilised it. Certain slight alterations in the springs would have been an improvement, but even these had not been effected. It had been made use of, for the conveyance of surplus kit and stores.

Wagons.

422. Some of the "authorised War Office pattern" wagons were not all that could be desired, and the general impression seemed to be that the best of all was the locally-made strong "buck wagon," without springs, and with a brake in rear, which was applied by a hand screw, or lever. Hickory wheels, are mostly thought highly of for transport carts, and for wagons, those made in Indiana, of wood seasoned for 7 years, and cut by machinery, were by far the best and much preferable to the Bristol pattern, which cost the Army about £70 each, and the Yeomanry, at Gloucester £75.

Buck wagon.

Wheels.

423. To attempt anything like a description of the number of vehicles, good, bad, and indifferent, in use, or rejected, would be a treatise in itself, but this is here unnecessary. It may be useful to observe, however, that amongst the numerous ambulances seen, nothing appeared to compare, in simplicity, lightness, and serviceability with the McCormac-Brook "Wheeled Stretcher Carriage." No doubt, these will be noticed, and favourably reported on by those responsible for the ambulance and hospital train of the future.

Ambulances.

424. The question of the disposal of the surplus Yeomanry wagons referred to, is dealt with, in the letter (page 83) regarding the reduction and closing of the Maitland Dépôt, to the General Officer Commanding the Line of Communications, after personal consultation with the Director of Transport. It is to be hoped they will be eventually taken over, with the rest of the Yeomanry surplus, war *matériel*.

Surplus wagons.

425. In future, it would be well to avoid sending abroad, any vehicles whatever for general transport purposes. For this kind of work there appeared to be an ample supply available under the Transport Department, both for the march, and for local dépôt work. The Medical Department is, to a great extent, responsible for its own kind of ambulances, and auxiliary forces should not endeavour to compete therewith. Almost every Colonial Force had something new in this respect, but it is very doubtful if many of the various vehicles brought, were suitable to local conditions. Regimental transport was practically

Separate supply unnecessary.

abolished during the Campaign, and, therefore, there remains only to consider what is the best kind of *light cart* to be adopted in future with mounted troops, to lighten the horse's load as well as that of the rider. This appears to be one of the most important points to settle, in connection with recent operations, and will no doubt be the subject of very careful enquiry. Suggestions concerning it are separately made in this Report, under Section III (page 125).

Roads, Culverts, Water and Troughs, Latrines.

Roads. 426. A good road passes through the centre of the Imperial Yeomanry camp, from Cape Town, the other road, from the railway station at Mowbray, 2 miles, was bad, but the local authorities relaid it and constructed a very necessary bridge, which was required over a spruit or marsh. The site at McKenzie's Farm was sufficient for the encampment of six regiments.

Latrines. 427. All latrines were constructed by the Royal Engineer Department, and were satisfactory. Water of excellent quality was obtained from the town supply. Storage tanks were constructed, in addition, by the Royal Engineer Department. A limited supply was also obtained from wells on the farm, worked by wind pumps. Water carts were supplied by the Ordnance Department. The requisite number of horse troughs were constructed by the Engineer Department, the water supply being regulated by ball cocks. Horses could also be watered below the camps, when requisite, at the river.

Water-troughs.

Buildings. 428. The camps were surveyed and laid out by the Base Commandant and his Staff. He reports that all buildings required by him were supplied by the end of March, by the Engineer Department, notwithstanding great difficulty in obtaining workmen. All the buildings were of corrugated iron, and wood, and left nothing to be desired. The method of laying out the camp was good, and doubtless, most of the buildings can hereafter be utilised elsewhere, as they are removable. All were taken over by the Military Authorities.

Canteen.

Canteen. 429. There was a camp canteen which was arranged for by a contractor, who built the premises, and put up also a large marquee. A separate bar was kept up for non-commissioned officers. Beer and mineral waters were sold, but no spirits. Light refreshment was available. A "Soldiers Home" was erected by a Dr. Sharpe, and tea and light refreshments were sold there, at a nominal price. This was under private management, as was a similar institution, kindly provided by a lady, Mrs. Forbes. The canteens were well managed, under some difficulties, and there was no complaint regarding them. The private home and tea rooms were greatly appreciated. The Commandant of the Base proposes to make a grant of £15 or £20 to that provided by Dr. Sharpe out of private funds, as an aid to the private subscriptions by which the home was raised. This seems reasonable, and the request will be borne in mind when the camp is being finally broken up.

430. Taking all arrangements together, there seems no doubt that the Yeomanry soldier was comfortably provided for in this camp, and the provision thus made kept the men contented, within their own environment, and prevented their going to Cape Town, which was desirable. There were good football and recreation grounds, and the place was made as attractive to the men as possible.

Food and Rations.

Mode of supply. 431. In regard to these supplies, the Base Commandant reports that they were drawn from the adjacent military camp at Maitland, from the Army Service Corps, on requisitions. It is thus evident that after the despatch of the service companies to the front, the details of the Yeomanry invalids, &c., might, very suitably, have been transferred to the military camp referred to, under its commandant, by which arrangement the necessity for a separate camp and a large staff would have ceased.

Quality. 432. The food was reported good, and such kitchens as were required were constructed by the Royal Engineer Department. Whilst the companies were in camp, the regimental cooking was reported as indifferent, but it seems scarcely to be expected, that men unused

to camp life, can readily become experts in cooking. The sickness (diarrhoea) which occurred, is attributed to the men buying "trashy food" outside. The commandant recommends that in future, trained and qualified cooks, should be provided for each company, with a sergeant regimental cook in charge, and that a deduction should be made from the men's pay (compulsory) for a supply of fresh vegetables. This deduction has, however, been objected to by the men themselves, and it cannot be enforced. Similar difficulties were experienced in the regular service, but it may be observed, when the Yeomanry settled down to their work in the field, they did very well indeed under their own arrangements, and saw the necessity of choosing from their number, men who were good at cooking, and who soon became comparative adepts at this work.

Camp Equipment, and Tents.

433. It was, at first, understood by the Imperial Yeomanry Committee, that all require- Camp
ments in this respect would be met locally. Subsequently, however, the grant for camp equipment.
equipment was increased, and it was settled that regiments should make their own
arrangements.

434. In many cases, tents were not used at all on service or on the march, and the Tents.
tents remained at certain centres, or standing camps, until they were required at some
other site. It was essential, however, that each company should have tents wherever they
could, for the time being, be most conveniently kept. Those supplied by the various
companies proved generally suitable. They were of the bell-shaped pattern, which seems
inferior, in many respects, to the Indian General Service Field Pattern Tent. Those
known as the "Tortoise" pattern, answered well, particularly in standing camps and
hospitals. No doubt, separate and definite proposals will be made by the proper authorities
regarding the camp equipment of the future, after the experience of this campaign.

435. The Base Commandant makes the following report on the subject:—

"Tents were brought out by the regiments. In the first one, or two, cases
there were not a sufficient number. This was particularly the case, with the 3rd Regiment,
Imperial Yeomanry. A limited supply was obtainable here from the ordnance, from
time to time, and deficiencies were made good before most of the regiments left the base.
Tents should have been calculated, and supplied, on the basis of 10 men to each tent, with
the regulation number allowed for staff officers and non-commissioned officers. Bell tents
only were used.

"Much inconvenience was caused, in some instances, by the tents being stowed
on board ship, under other baggage, and stores. They were consequently, not to be got
at until these had been discharged, and so the camps could not be pitched until
after dark though the disembarkation took place early in the morning. The tents should
invariably be the last things put on board ship, so as to be got at at once on reaching
the port of disembarkation.

"In my opinion, it would have been preferable to have sent tents for the Base
Depôt, and for at least one regiment, in advance of the troops. This would have
allowed the depôt staff to pitch the tents before a regiment marched into camp, a course
that would have added materially to the comfort of the men, and have permitted
them to give undivided attention to their horses. This was advised in my letter of
January 14th, 1900.

"There was an ample supply of camp kettles except for a short interval. A few
were bought locally, to supply troops, at this period, but only Kaffir kettles were to be had,
and these are unsatisfactory.

"The deficiency, at this period, is mainly attributable to the fact, that those on the
ss. "British Princess" were not landed on her arrival.

"Camp equipment was sent up with the advance depôts.

"All the tents brought out by the companies were bell tents, and serviceable.

"There was no want of lanterns and other articles of camp equipment."

Imperial Yeomanry Pay Office.

436. This branch of the Yeomanry organisation, was in charge of Colonel Officer in
H. W. Feilden, who landed in South Africa in March, 1900. Some difficulty was, at first, charge.
experienced, in consequence of its being found impossible to obtain the services of qualified
military pay-clerks from the ranks of the Yeomanry. With the consent of the War Office
the following office establishment was allowed:—

(8470)

N

**Office
establish-
ment.**

- 1 Staff Sergeant Major.
- 2 „ Qr.-Mr. Sergeants.
- 3 „ Sergeants.
- 3 Sergeants.
- 3 Corporals.

Five of these were engaged in England and sent out. The remainder were drawn from the ranks of the Imperial Yeomanry, young men being selected who showed some aptitude for clerical work. It must be borne in mind, however, that results show, the audit of pay lists, requires a special training, and considerable experience.

In addition to the clerical staff above detailed, Captain J. G. T. Bruce, of the Army Pay Department, was appointed, for special duty, under Colonel Feilden. He arrived at Cape Town on June 11.

Accounts.

437. The instructions Colonel Feilden received were, that, after being supplied with funds, by the Chief Paymaster in South Africa, he was to pay the various Yeomanry Corps in the usual way. The accounts were to be audited by Colonel Feilden, and embodied by him in a general state (Army Form No. 1506).

It will thus be seen, that the task of auditing the monthly pay lists, devolved on the Imperial Yeomanry Paymaster in addition to payments, an arrangement which was not originally contemplated by the Imperial Yeomanry Committee, and that thus an auditing department had to be formed for the War Office, which relieved it of work, at a period of great pressure, which would, otherwise, have been imposed on the Army Pay Department.

**System of
payment.**

438. The following was the system of payment to the Force, which comprised 72 units, or companies:—Each of them had to render separate pay lists which included the pay of eighteen battalion staffs, and gun detachments, the allowances of over 500 officers, and the charges for native transport, attached to units. On the requisition of Officers Commanding units, cheques on the Standard Bank of South Africa were sent to them. When the units were in touch with a field paymaster, as at Mafeking, Kimberley, Bloemfontein, and Pretoria, advances were drawn from that source, and adjusted by Colonel Feilden. Many of the officers commanding units, however, preferred to have the subsistence for their companies, lodged to their credit at the Standard Bank, Cape Town, cashing their own cheques with the storekeepers and traders in remote parts of the country.

439. As the units comprising the Imperial Yeomanry were scattered over a vast area, from Cape Town to British Bechuanaland, and the borders of the German Protectorate on the west, over the Orange River Colony, from Kimberley to Basutoland, and to the still more remote regions of the Transvaal, it proved a matter of the greatest difficulty to keep in touch by letter with the units of the Force. Communication by post was uncertain, in many cases impossible, and months often elapsed before a reply could be received. Without the incessant use of the wires, therefore, correspondence would have resolved itself into chaos, and auditing would have become impossible. On the whole, results seem to have undoubtedly proved, that the station system of paying troops engaged in a campaign, over vast distances is, as far as the Yeomanry Force is concerned, most unsatisfactory, and a mistake.

**Pay duties
of C.O.'s.**

440. On the abolition of the regimental paymaster, the duties of that official have been thrown on the combatant officer. It is obvious, that in time of war, this additional strain should not be imposed upon the Officer Commanding the unit. To receive money, and pay the men of the troop, or company, during a period of active hostilities and incessant marching, and to prepare a single pay list, is surely a sufficient call upon the Officers Commanding units, but under the present system, very considerable financial responsibility has in addition, been thrown on them. During the present campaign, he has not only had to pay his men, but also to pay for the transport attached to his unit, to prepare vouchers, amounting, in some cases, to hundreds of pounds, to render the allotments of pay to the wives, and families, of men, to arrange for remittances, to be responsible for the notification of every casualty, to recover barrack damages, stores issued on repayment, in fact, to be responsible for the duties, which formerly were performed by the regimental paymaster. In any future campaign, in which Imperial, or other Yeomanry, may take part, this mistake should not be repeated, and for them, at all events, the regimental pay system should be re-established.

**Regimental
paymaster.**

441. Considering how many of the gentlemen commanding units of the Imperial Yeomanry had no previous experience of Army Accounts, and, probably, had never seen a pay list before engaging in this campaign, it is a matter for wonder how well they have been rendered as a whole, and how willingly they have responded to the incessant calls

which Colonel Feilden had to make on them for explanations of charges, and answers to objections.

442. This want of experience in the compilation of accounts was also very apparent in the management, and control, of all the depôts visited. Vast quantities of stores and supplies had to be accounted for, and in some instances, cash payments were made, and recorded, when the credit voucher system should have been adopted. Considerable delay occurred in sending replies to War Office references, in connection with depôt expenditure, as regards buildings, horses, vehicles, transport, clothing, and almost every item in the Yeomanry organisation. Accounts were not prepared or kept in a proper manner, and in some instances, vouchers for expenditure were wanting. It was, therefore, evident that all such accounts should be brought under the audit and control of the Yeomanry Paymaster, Colonel Feilden, and he was instructed to do this, in addition to pay audit—in a letter addressed to the Commanding Officer of the Base Depôt at Maitland, *vide* page 83. In this communication, the instructions received by me, from the War Office, regarding the final adjustment of the vast quantities of stores, were repeated, and suggestions were made for the reduction of a depôt organisation which appeared considerably in excess of actual requirements. These suggestions were forwarded, through the General Officer Commanding the Lines of Communication, after the subject had been personally discussed with him, and I trust, that in public interests, they may be given effect to as soon as possible. The matter has been referred to in detail under the heading of "Yeomanry Stores," but is here mentioned, as it has a direct bearing on the financial side of the duty on which I have been deputed. The adjustment and control of these accounts would have been more easily effected, had the entire depôt staff sanctioned for it by the War Office been kept intact for depôt work, instead of being sent away on various combatant duties to the front, which was not the original intention. Further, the formation of separate Yeomanry rest camps, with their attendant military duties, still more depleted the staff remaining, and rendered the work of store distribution, and finance, all the more difficult. The camp work of receiving, and sending men to and from the front, payments, invaliding, &c., could have been equally well, or better performed, at the military rest camps at Maitland and elsewhere.

Management of depôts.

443. In the final adjustment of accounts, of the Imperial Yeomanry, it will be found advisable to retain either at the War Office, or that of the Deputy Adjutant-General, Imperial Yeomanry, the services of Colonel Feilden and his assistant, Captain Bruce, who are well acquainted with all details of expenditure both of *personnel* and material. This will probably lead to a more expeditious and satisfactory settlement than any other course which can be adopted.

Adjustment of accounts.

444. It must be borne in mind that the Imperial Yeomanry has to be settled up with on its disbandment. The Field Paymaster has managed to audit a considerable number of pay lists, but at least half the companies are several months in arrears in sending them in. In some cases, companies have not rendered any pay lists since landing in South Africa. It has been very difficult in fact, to merely keep officers commanding companies supplied with cash. In every company there have been numerous transfers. Men have received pay, or advances, from a variety of sources, and others have received no pay. The adjustment between companies will be almost innumerable. All the last pay lists must be obtained, probably at home, and in nearly every unit, it would be necessary for an accurate settlement, to get the Commanding Officer and the Pay Sergeant, into personal communication with the Field Paymaster.

445. In all matters connected with the payment of the Force, and the control of its accounts, Colonel Feilden's services have been invaluable. He is an officer of great experience in military finance, and was ably assisted by Captain Bruce. In any future similar organisation, it should be borne in mind that the technicalities of the military system, can best be conducted by officers of previous experience, in such directions, as pay and audit—Quartermasters, Depôt Commandants, &c. The efficient administration of these offices is of the greatest advantage to the fighting line, but efficiency in management and organisation, can scarcely be expected without former staff experience in the lines referred to.

Colonel Feilden.

Paymaster.

446. It is quite open to question whether it would not have been better, to have had the Field Paymaster's Office at the Maitland Camp, but this would not have been so convenient for officers passing through Cape Town. His assistant, however, might have been placed there, to control and look after the accounts of the depôt, and of men passing through invalided, &c. The necessity for a separate paymaster for the Base Camp itself, as has been urged by the Base Commandant, is not apparent.

Location of Pay Office

*Officer's Services.***Officer's services.**

447. Colonel Graham makes the following remarks, in regard to the officers serving under him :—"I need not speak of the services of Major Baird, and Major Sir Simeon Stuart. Both learned their duties very quickly, and have performed them most cheerfully, and zealously. Major Baird in particular, I consider, would make a singularly able staff officer."

Major Moore also has proved invaluable as officer commanding the Base Company, and I think we are most fortunate in having secured his services.

The Transport Department, under Captain Stafford, has been admirably managed, and leaves nothing to be desired. Lieutenant Currie, Quartermaster, is also well spoken of. Captain Derriman, at Kimberley, appeared to have his advanced dépôt in excellent order, and to be a capable, hard working officer.

*Kimberley.***Officer in charge.**

448. This dépôt was visited after leaving Cape Town, with the intention of marching across to the other advanced dépôt at Bloemfontein. Owing to difficulties in securing transport for the march, however, the return journey was made by rail. The Kimberley Dépôt was well controlled by Captain G. L. Derriman of the Imperial Yeomanry, who took charge of it from June 14th. It had been formed, at first, as an advanced Imperial Yeomanry Remount Dépôt, but the Army Remount Department, having taken over the horses on July 5th, it thereafter became one for the distribution of stores, and for forwarding men of the Force to their various companies. The stations dependent on this dépôt, for their stores, were as follows :—

Stations.

Campbell.	Douglas.	Mafeking.
Kuruman.	Bretstown.	Spennet's Drift.
Griquatown.	Boshof.	

Buildings.

449. No buildings were constructed at Kimberley for the storage of Yeomanry clothing, &c. A warehouse was hired in the town for £6 per mensem, which answered all requirements. The stores were all, subsequently, transferred to Mafeking, which became the advanced dépôt for troops operating in that direction. The establishment kept up for the Kimberley Store Dépôt was a very small one, of one sergeant and two men, but was sufficient for the purpose. The books of issues, and receipts, were carefully kept, and the arrangements generally have been found satisfactory. A small camp was formed, about two miles from the town, for the reception, and despatch, of men returning from or proceeding to the front—one non-commissioned officer, and eight men, were sufficient for its management. Considerable difficulty was encountered in forwarding stores to the units requiring them. The call on the railway, was, necessarily, great for urgent requirements, but every assistance was given by the military authorities to forward stores, when transport was available. A good many of the stores were despatched by convoy or by rail, and convoy combined, such as to Campbell, Kuruman, and Douglas.

Despatch of stores.**Issue of clothing and equipment.**

450. In cases where men of the Yeomanry were deficient in clothing and equipment as a first supply, requirements were met by the Ordnance Department, which issued a considerable amount, especially at De Aar. The issue of such stores was sanctioned by the General Officer Commanding Lines of Communication in March, with the understanding that reserves were not available in the Yeomanry dépôts. It was decided that subsequent requirements, and upkeep of clothing, &c., were to be met from their dépôts; but in many instances the Ordnance Department, issued such stores to the Yeomanry, as were found necessary and unobtainable, in their own dépôts. The quantity of stores at the Base Dépôt, Maitland, was more than ample to meet all requirements, but the congestion of traffic on the line of rail, often rendered it impossible to forward what was required to the advanced dépôts. In some instances, there were surplus stores at the Kimberley Dépôt, of which the Regular Forces were in want, such as saddles, blankets, and horse equipment. In others, there were deficiencies, mainly in serge jackets, trousers, and vests. The latter were *en route* from Maitland, but delay in transit was almost always inevitable. The officer in charge of the Kimberley Dépôt considered it would have been better to have made over the Yeomanry stores and necessities, to the Ordnance Dépôts at the base, for transmission to the Army Ordnance Dépôts at the front, rather than to have had a separate agency at work. This view is concurred in, and will form the subject of separate proposals (see page 104).

Quartermasters.

451. The necessity for a trained quartermaster, or quartermaster-sergeant, for each battalion is strongly urged by the dépôt officer at Kimberley, on the ground that actual

requirements in clothing and necessities, were not accurately known or specified. An instance is quoted, in which a battalion passing through, returned more articles to store than it had demanded two days previously. Had the correct amount been originally, accurately ascertained, it is manifest that much time, labour, and transport, would have been saved. The necessity for a better trained quartermaster's staff, in future, is one which should be borne in mind.

452. Great inconvenience is reported to have occurred, at this dépôt, in consequence of men passing through, without their last pay certificates, or of any documents to show what was due to them. It was, therefore, almost impossible to make them advances, for the purchase of such necessities as were required. On this subject, definite proposals will be separately made. Pay certificates.

453. All supplies and necessities appeared to be very expensive at Kimberley. Saddlery fetched high prices in the open market, and, doubtless, had it been possible to sell surplus horse equipment here from the Yeomanry, it would have been sold at remunerative rates. The officer in charge of the dépôt brought to notice that warm jackets ("coats, British warm") were much in demand. None of these were obtained for the Yeomanry, but should, in any future similar operations, be supplied, as they proved most useful as overcoats in the cold season. They were deficient in supply for the regular forces, it being understood that a large consignment, of them, was captured by the enemy, and burnt. Warm jackets.

454. Previous to the Army Remount Department having taken over the horses of the Yeomanry, about 200 were issued from this dépôt. Opinions very considerably differ in regard to the kind of horse most preferred, but it may be noted, that the Argentines, and Americans were not so much in request as the English cobs. The Hungarians appear here as elsewhere to have been liked, Australians did well when sufficiently fed, and the country breeds, including the Basuto, were best for the most prolonged work. Issue of horses.

455. In considering the question of future advanced dépôt arrangements, it may be borne in mind that the one at Kimberley, with a very small establishment, did good work. For the receipt and distribution of stores, what is most required, is that the work should be controlled, by officers, or men, who have some previous acquaintance with the duties required of them, but as this is difficult in the Yeomanry, the best plan to adopt, is to place novices under the control of the Regular Supply Departments, to learn their work, help it, and to be responsible for the issue and receipt of the stores of their own Force, which should form a part of those of the Army Ordnance Department. The Imperial Yeomanry Committee's private contracts, which included certain articles of clothing of a superior description, luxuries in supplies, such as soaps, vegetables, tobacco, cigars, cigarettes, &c., could have been similarly dealt with, and had this been done, it is not improbable that the Yeomanry would have been more readily reached, through the Regular Supply Dépôts than through the smaller and fewer dépôts of its own. Future advanced dépôt arrangements.

456. The Kimberley Dépôt, as well as others, towards the front, although dependent for stores on the Yeomanry Base at Maitland, was, according to the view of the Commandant of the latter, quite independent of it, and in no way under his control. This appears a mistaken assumption. All advanced dépôts on the line of communications should be in touch with and under the supervision of the Commandant of the base, who should have exercised control over the whole, so as to ensure their being kept supplied with whatever was required. He should be, in fact, responsible for this, and have frequently visited and inspected them. Command.

457. Arrangements for treating the sick at Kimberley were conducted by the Royal Army Medical Department there, and proved excellent and adequate. A small, separate, post-office was kept up in the Yeomanry store. This was unnecessary, as the work could have been better done by the Regular Army Postal Service. Treatment of sick.

458. Such transport as was required at this dépôt was supplied by the Regular Service for local purposes—transfer of stores to the railway, &c. Transport.

459. Captain Derriman brought to notice, the efficient manner in which the Yeomanry subordinates under him conducted their duties, and, no doubt, though deficient in the training required, they did their best.

Bloemfontein.

460. The advanced dépôt at this station was under the charge of Major Sir Simeon Stuart, Bart., Deputy-Assistant Adjutant-General of the Imperial Yeomanry, who was originally appointed to the Base Dépôt, Maitland. He assumed charge at Bloemfontein on Officer in charge.

the 4th of June, and as his depôt was the centre of supply of flying columns, for considerable operations in the field, he had much to do. In September, his stores, office, and establishments were under orders from the front, transferred to Pretoria. A careful list of all stores used by him was kept, as well as receipts for all which he received, from Maitland. He was not, it is understood, under the control, or orders, in regard to supplies and stores, of the Commandant at the Base Depôt, which appears, as at Kimberley, to have been a mistake.

Command.

461. In a report called for regarding his depôt, he makes the following remarks:—

Stores.

“In my opinion, everything obtained for the use of the Imperial Yeomanry, should have been handed over, in bulk, to the Army Ordnance Department, and that department would have, in time, credited the Imperial Yeomanry, with the same. Special supplies for various units, are all very well in theory; but it is of small value to a man in the field to know there is a change of clothing waiting for him, in one place, if it is inaccessible, and because of this, he cannot draw from the nearest Ordnance Officer. The fact of having separate Yeomanry stores, to those of the Ordnance, is at once cumbrous, and tends to confusion. Certain Yeomanry officers, might have been attached to various Ordnance depôts, to assist them in any extra work thus brought on it.”

462. This opinion is entirely concurred in, and it is one, which I have heard repeated by General Officers, and others of great experience. Everything possible was done at Bloemfontein, to keep the Yeomanry Forces in the field supplied with stores, as well as provision boxes, and other luxuries, but there seems little doubt that had the supply agency been one, instead of separate, matters would have been considerably facilitated.

463. Major Sir S. Stuart shows, in his report, that he was almost entirely dependant on the good will of the Army Supply Departments, in getting his stores forwarded, and that their assistance was always forthcoming when possible.

Distribution of stores.

464. The distribution of stores from Bloemfontein, had to be mostly conducted by rail. The constant wreckage of the line, paucity of trucks, and the necessity for priority being given to food supply trains, led to delays in the distribution of stores to units which required them. The rapid movement of troops also made it exceedingly difficult to keep them supplied with clothing, as required. Forces had often moved away the day previous to the arrival of stores, by rail, at their destination. In other cases, stores had to be distributed by convoys moving slowly, and often liable to interruption and halts, owing to the movements of the enemy. Endeavours were made to obtain a regular despatch of trucks daily, but this was found impossible, owing to precedence having to be often given to certain supplies in war material, urgently called for from the front. The Yeomanry, however, obtained railway transport whenever it could be made available, and Sir S. Stuart reports, this was often secured by application to the Chief of the Staff, when the Army Supply Departments were unable to forward on their own responsibility.

Site.

465. The Yeomanry stores at Bloemfontein were placed in a fenced enclosure, just outside that of the Ordnance Department, some two miles from the town. The site selected was close to the line of rail, with an unloading ramp opposite the tents, wherein the stores were held. In this manner, no separate rail, or special transport, was required, as the stores were shunted, unloaded, or despatched, with great facility. Fatigue parties were, however, necessary, with a separate officer, quartermaster, quartermaster-sergeant, and men, and the necessity for these, would have been obviated, had everything been handed over to the Army Supply Departments for distribution.

Organisation.

466. The store tents were well arranged, and articles required could be easily got at, without delay, and in this respect there was a good deal of organisation at Bloemfontein, which was not noticeable elsewhere. The Committee's private contracts—food cases, provisions, tobacco, and private stores—were kept in a separate tent. The supply of tents for this purpose appeared deficient, as cases of saddlery, bales of rugs, and other articles had to be stacked under pawlins outside.

Clothing.

467. The quantity of clothing which reached Bloemfontein from the base, was, at first, quite insufficient. During June and July, serge frocks, and riding breeches, were deficient, but such deficiencies were made good by the Ordnance Department. Complaints seem to have been received as to the drawers supplied being too thick for general use, as also were the great-coats obtained from Harrod's Stores.

Vehicles.

468. In his report on the vehicles obtained by the Yeomanry, Major Sir S. Stuart makes some remarks, which seem very noteworthy. He considers that no vehicles should have been sent out from England, as there is a certain scale of brigade or regimental transport

laid down, which was promptly met by the Local Transport Department on demand. Anything in excess of this, was not allowed, and therefore, often had to be left behind. In the same way, the requirements of the dépôt in water carts, and other necessary vehicles, were always met.

469. These remarks, however, are separate from the question, of the supply of light carts to squadrons or companies, to lighten the load now carried by the trooper's horse, for which there is a great necessity, which will be subsequently referred to. Light carts.

470. In regard to harness, it may be noted, that although some cases of mule harness were sent up, none was issued from this dépôt, as what was required in this respect was obtained from the Transport Department, mostly of the South African pattern, of harness and yokes. Harness.

471. The saddlery supplied from this dépôt was nearly all of the Indian pattern, and obtained from Messrs. Cooper, Allen, and Co., Cawnpore. Major Sir S. Stuart observes regarding it, "It seemed to give general satisfaction, and to be very serviceable. I was able, under pressure of service, to hand over a large amount to the Mounted Infantry, and the pattern was pronounced a great success by the Officer Commanding that corps." As this pattern of saddlery is the cheapest obtained by the Yeomanry, the fact should be borne in mind, particularly as there has been much difference of opinion regarding the serviceability of other patterns obtained at a much higher price. Saddlery.

472. With regard to line gear, this is shown to be essential for standing camps, quite irrespective of the picketting gear supplied to the trooper with his horse. Head and heel ropes are required, and iron pegs with rings; wooden pegs being useless. The supply of these articles should be, in future, made on a larger scale than what was made by the Committee, which at first only arranged for rope in coils, to which remounts were to be tied. Line gear.

473. At Bloemfontein, the sick of the Yeomanry were treated in No. 3 Field Hospital, where everything for their care, was most satisfactory. It is quite unnecessary to have a separate Dépôt Hospital, and staff, when existing, adjacent, medical organisation is sufficient for the purpose. Treatment of sick.

474. The Yeomanry Remount Dépôt, was merged into that of the Imperial Remount Department, under orders from the War Office, and no doubt this is the correct system to adopt, but there seems every probability that a better supply of horses could have been kept up for the Yeomanry, under its own agency, than otherwise. When once secured, the officers, and horses, should join the permanent department, to help in general arrangements, and to assist in the distribution of the horses to their own force, in the same manner as has been suggested in regard to the distribution of stores. Opportunity was taken, of seeing horses drafted in large numbers from the Remount Dépôt at Bloemfontein, with the result, that although selections were made doubtless in the best general interests of the services, which had to be supplied, the Yeomanry obtained by far the worst. For this reason, it is considered that in future, the purchases should be made by the Yeomanry Agency, and the issue should also be similarly made, but under the direction of the Imperial Remount Department. Remounts.
Mode of supply.

475. The same remarks are made by the Dépôt Commandant here, as at Kimberley, concerning the necessity of having a trained quartermaster, and quartermaster-sergeant, with each battalion. Much confusion and friction, it is said, would have been thus avoided. Untrained officers, and men, though anxious and willing to work, have not the requisite knowledge of returns and their compilation, to give good results in the issue and distribution of stores. Trained quartermaster.

476. There was a Yeomanry rest camp, formed at Bloemfontein, at a very good site, adjacent to the large camp, pitched for a similar purpose for the regular service. An adjutant of the Imperial Yeomanry, one subaltern, and some 70 non-commissioned officers, and men, were present, and all arrangements were found in excellent order. Mess, and store tents, guards, sentries, and all the usual conditions of camping, were well thought out, but it was very manifest, that to have such a separate camp for the Yeomanry was quite unnecessary, as men of the force, going to or from the front, might have been well accommodated in the large military rest camp close by. The Yeomanry camp had to supply men for military duties in the station, patrols, police, orderlies, &c., and occasionally to strengthen 2 companies, which supplied outlying pickets on adjacent hills. These arrangements could have been more suitably conducted from the military camp formed for that purpose, than by keeping up a separate organisation for the Yeomanry, whose duties at this advanced dépôt might have been confined to the receipt and issue of stores. Rest camp.

Sir S. Stuart was at one time with the fighting line himself, as were indeed other officers who were originally appointed solely for dépôt work. The result of such deputation being that the dépôt staff was often depleted, and thus work suffered, and was difficult to get through. Moreover, it was very apparent that the more there was to do in the usual routine of camp work, payment of men, drafting to and fro, guards and sentries, &c., the less time there was available for the important business of despatching stores to the front, and organising their storage and collection, which proved a very difficult matter, as is shown under the heading of the Maitland Base Dépôt.

Major Sir
S Stuart.

477. Major Sir S. Stuart conducted his duties in a very satisfactory manner, and it is due to his good tact, and judgment, that the Forces dependent on his dépôt were so well supplied with requirements. He very favourably notices the services under him of Lieutenant and Quartermaster Cumming Butler, Quartermaster-Sergeant Armstrong, and Corporal Lister.

Pretoria and General Observations.

Base dépôt.

478 The provision of a Base Dépôt for the Imperial Yeomanry proved of distinct advantage to the Force, which could not well have done without it, particularly to commence with.

Establish-
ment.

479. The establishments, in officers and men, allowed for the purpose by the War Office, were ample, if not excessive, and had they arrived in time, and been strictly kept for the purpose required, results would have been far better; as has been shown, however, delay took place in sending these establishments out, and when they arrived they were considered as being required for the service companies, instead of being kept for the work for which they were engaged. In any future similar organisation, it should be regarded as a fixed rule, that officers and men of the base are not to be made available for duties at the front (except advanced dépôts) until the work is so reduced, that the dépôt, and its establishments can be gradually dissolved. It is not advisable to keep up a large Base Dépôt indefinitely, and that of the Yeomanry might have been gradually reduced, sooner than the commencement made in the present instance.

480. The War Tables, showing the establishments required for Base and Remount Dépôts, were framed with much care, and very accurately show what is required in this respect. The Yeomanry differs very little from any other Force, and any endeavour to show that it requires something entirely different in the way of base organisation, should be resisted.

Base dépôt
of future
Imperial
Yeomanry
Force.

481. Endeavour has been made to show in what respects the Base Dépôt system failed, or was, at all events, capable of improvement. The suggestions for such improvement are made after observing the work of the Dépôt at Maitland, and it is thought, if these be adopted in future, there will be every probability of practical improvement, on which much of the efficiency of the Force must depend. The main change recommended, is the non-duplication of store and supply agencies, and their being worked as a portion of the regular departments of the army. To commence with, Base and Remount Dépôts for the Yeomanry should be formed; they should, if possible, be not separate, but attached to the general base or rest camps of the regular service, and the establishments should form a portion of its staff, Remount Dépôt inclusive. By this means, duplication of work will be avoided, as well as unnecessary expense. The separation which occurred resulted in the Yeomanry Force being, to a certain extent, regarded as one distinct and different from anything else. This was a mistake. In the matters of resignation and leave, invaliding, discharge, &c., many questions arose which had to be dealt with as for a new Force, which was claimed to be under peculiar rules, as might suit the individuals concerned best. Had all such questions been dealt with by the military commandant of a regular base camp, things would have been much simplified and Army Regulations enforced, instead of having to make constant references to Army Headquarters. If new regulations on all such subjects are to be made for the Yeomanry, work will be increased and friction must be unavoidable.

Separate
organisa-
tion not
needed.

482. Instances occurred in which Yeomanry officers and men returning from the front had for long periods to await orders as to whether they were to rejoin, get leave home, or be discharged. Resignations were in some cases accepted, in others refused, and those concerned were put to much unnecessary expense through awaiting a decision. No doubt the distance between Army Headquarters where the General Officer responsible for the organisation of the Yeomanry was stationed rendered delay in sending orders to the base unavoidable, but had the

Yeomanry been under precisely the same rules as the regular service and under the orders of officers belonging to it at the base, delays and difficulties would not have arisen. With the Colonial Forces the system was somewhat different. A staff officer belonging to them obtained orders direct from the Military Commandant regarding his men, and references to the front were unnecessary. Thus, work was much simplified mainly in consequence of the Colonial Corps being treated exactly the same as the regulars, and having no separate organisation.

483. After companies, or battalions have been despatched to the front, it is unnecessary to keep up, for them, an entirely separate organisation at the base to pass men to and fro. The system adopted should be the same as that in the regular service, where there is always a rest camp to which "details" can be sent to await orders as to what they have to do—payment, invaliding, &c. To these rest camps, the Yeomanry should be likewise sent, as in fact, the less difference there is made between them and the regular troops, the less likelihood is there to be any difficulty or friction. Separate Yeomanry rest camps for this purpose at Bloemfontein and Kimberley, were unnecessary. If required there, rest camps would be required for them everywhere. Separate rest camps not required.

484. Similarly as regards stores, supplies, and horses. If, as seems probable, the Yeomanry service is enabled to procure for itself, all these, of a somewhat better, more liberal, and expensive kind than what is allowed for the regular service, then, it is at least reasonable to allow the Force an agency for their collection and distribution to commence with. But this should be done by the agency, or *personnel*, being attached to the Regular Departments kept up for the purpose, and not by having separate departments of its own. When the distribution is effected, the officers attached should be employed in the general interests of the service, as may be most desirable. The arguments in favour of this arrangement are, it is hoped, made good in the foregoing notes, regarding inspections made of the system as seen at work. They are not generally acceptable to all Yeomanry officers employed, but they have received, in principle, the concurrence of General Officers who are best able to judge, and generally with the observation:—"It is satisfactory that you found this out for yourself." The principle, moreover, has the high advantage of the approval of the Field Marshal Commanding in Chief, whom I was privileged to consult on the subject, and who, I understand, is of opinion that a duplication of departments or systems is unnecessary. Forwarding and issue of stores.

485. The Commandant of the Imperial Yeomanry Base Dépôt has made certain proposals as to the necessity for their being an Assistant-Adjutant General at Army Headquarters, subordinate to himself, and with access to the Commander-in-Chief. This subject is outside my province, being one of military organisation in the field, regarding which I do not feel called upon to advise. Command.

486. The work of the Base Dépôt, can, in future, be much facilitated, by an assurance that service companies reach it, in the first instance, fully equipped. The Commandant brings to notice that this was not the case. Some companies arrived without cloaks, others without hats or helmets. Some had worn-out cast military saddles. It is therefore suggested that a more rigid inspection should be made, before departure, to ensure everything required being complete. This would save re-equipment at the base, and prevent useless delay. A reserve at the base is, of course, necessary to supply unavoidable deficiencies on first arrival. Equipment of companies before embarkation.

487. Many of the Yeomanry Companies were out of touch with their own Base Dépôts, advanced, or otherwise. They indented for what they required, on the nearest Ordnance Store, and these indents were always met when the stores were available; such being the case, it seems obvious that the upkeep of separate advanced Store Dépôts for the Yeomanry is unnecessary, particularly, as there were often held therein, surplus stores, of which the Regular Forces were in want, which might suitably have been made available for them. Separate store dépôts unnecessary.

488. The difficulty in reaching Forces marching over vast distances, with stores or supplies, was very great. As an instance in point, it may be noticed, that information of a gift of £500 to each battalion made by the Imperial Yeomanry Committee, to expend as they pleased, on necessities, luxuries, &c., reached only 7 out of 20 battalions, and in few instances was any portion of the money expended. They were subsequently informed by wire, and warmly acknowledged the grant. Difficulty of communication.

489. The question of *colonisation* is an important one for the country, and affects the Yeomanry Force, many of whom, were candidates for gifts of land: opportunity was taken to consult His Excellency, the Governor, Sir A. Milner on the subject, who was good

enough to express himself in favour of any scheme which could be adopted to induce yeomen to settle in the country. At his suggestion, rolls were called for concerning all men wishing to remain, showing their trade or profession, and whether they had any agricultural experience, and any capital. Confidential remarks were to be made on these rolls, by Commanding Officers, regarding the applicants' reliability, or otherwise. The total number required for the Cape Colony alone was estimated at 10,000, to 15,000, in small settlements. In this colony, it seems almost more necessary to encourage the men to settle, than elsewhere, as disaffection is rife. His Excellency was of opinion, that many small farms would be soon available—cheap—as the owners were clearing out, being obliged to sell. Capital would however be always required, the amount depending on the size of the farm, and the kind of farming undertaken. Agricultural farming of say, 500 acres, was not recommended, except in the vicinity of towns, where produce could be readily disposed of.

Stock-raising.

490. The most profitable pursuit was considered to be stock-raising—cattle, horses, and mules. There was thought to be a great future for horse-breeding in the Colony, if organised for settlers on a carefully thought-out system, somewhat on the lines of that adopted in India, under the Agricultural Department. The surplus mares, after the war, should it was thought be made available for settlers for breeding purposes, and an organised system introduced, for the supply and distribution of suitable stallions, to be imported from England and elsewhere, under competent advice, after a study of the question.

Capital required.

491. Capital was considered essential for either agriculture or stock-farming, and help in some form, from the State, imperative, in addition to grants of land on easy terms. Irrigation was also thought almost imperative, as a State undertaking. His Excellency was of opinion, that the settlement of yeomen, and others, was unlikely to commence for at least six months. Large tracts could be made available for them, if they would combine, and if any system could be adopted, of giving them help from Yeomanry funds, or subscriptions, such assistance would go far towards settling this difficult problem. Mr. Arnold-Forster was also interviewed, on this subject, and such information given him, as he required.

Irrigation.

Help from Yeomanry funds to settlers.

492. With regard to the help that might be given from Yeomanry funds it is not at present possible to say what amount will be forthcoming. The final settlement of the question will depend on the manner in which the members of the Imperial Yeomanry Committee (whom it is proposed to again assemble to consider the subject), may decide to allocate the surplus. It will also depend on the decision of the War Office, as to whether any savings from the capitation grants may be devoted to helping those for whom the grants were made at a period of public emergency. Presuming, however, that there be a substantial sum to dispose of, as seems probable, it is thought that there are few directions in which it might be more appropriately spent, than in assisting Imperial Yeomen to settle in South Africa. If the most profitable pursuit be that of stock-raising, then, it would be desirable to initiate a scheme by which they could be helped in the provision of suitable mares to breed from, with a proportion of good stallions, and donkey sires for horse and mule breeding. For the produce of these, there will be for many years to come, a great demand, and no pursuit in which they can engage is likely to be eventually so remunerative. Provided the sites selected be suitable for the purpose, and men be encouraged to combine in the formation of small adjacent settlements or stock-raising farms, with competent advice to guide them in the undertaking, there is every prospect of successful results. Proniscuous endeavours over distant and separated areas, are, however, likely to be of doubtful value. What is wanted is less of the individual exertion in the matter than co-operation amongst the settlers, with guidance in a pursuit to which many must be novices. Moreover, the money grants would be made for a specified purpose, on a well thought-out plan, and a lien might be kept on the produce raised, with a view of sale to Government at fixed prices. Remounts and mules thus forthcoming, would, if suitable, command a ready market, which would be both of advantage to the Government purchaser and to the yeoman settler. For the latter, a certain proportion of stock raised should be reserved for his private or farm purposes, but the certainty of having a market at fixed prices for the remainder would be an additional incentive to engaging in this industry. The scheme would, in fact, be a form of rearing stud depôts. Government control or supervision of horse-breeding is not advocated generally in England, because private enterprise has done much in the production of stock of all kinds. We are still, however, much behind Continental nations in the useful nature of horses produced, particularly for military purposes. The settlers in South Africa will require help and guidance in horse and mule breeding. Suitable stallions of various classes must be provided for them, so that defects may be eradicated and improvements in breeds secured. Help and guidance should be given them in mating the sires with the mares available, so that judicious crossing may be obtained. This is the work of an expert, whose time and

Horse-breeding.

study should be devoted to earning the history of the past country breeds, with a view to the retention of their excellent characteristics, and their possible improvement. The breeds of the country are good. The past war has proved this. The Boers were better mounted than our Forces because they used the horses of the country. The enduring qualities of the Cape horses are well known. They were proved during the Mutiny in India, and elsewhere. In many respects they are superior to the Colonial horses, or any which have been imported from other directions in South Africa. There will be a great field for their utilisation in future, not only in that country, but as exportations, if their improvement in breed and numbers be conducted on sound principles. If these principles be left to individuals who are unacquainted with the theory of horse-breeding, and suitable stallions be not provided, it is probable that more harm will be done than good. To do good in this direction seems of national importance. The conclusion of a war is not the period usually looked to for the provision of funds for the peaceful pursuit of stock-raising. The lessons of the past are often forgotten, but the problem of the pacification of South Africa is so dependent on satisfactory colonisation, that everything possible should be done to provide the yeoman settler with a profitable occupation.

This cannot be obtained without financial help, as well as guidance in the directions proposed. Yeomanry funds may do much to commence with, and public subscriptions through county and other influences can do more. It would be better to rely on private enterprise to commence with, in such a matter, than to await aid from the State. Such may be eventually forthcoming, but meanwhile much valuable time may be lost, as official wheels work slowly, and plans of this sort require much inter-departmental consideration and debate. This is not the place to submit a detailed scheme of what might be done in the proposed direction, but official sanction and approval to the suggestion will suffice to commence with, and this is asked for.

Having been obtained, it is proposed to formulate details of what should be done to organise a system which it is hoped may be of great assistance to the yeomen settlers in South Africa. The knowledge that some such steps were being taken for their assistance would have a direct and beneficial influence towards causing men to elect for a settler's life. As things stand at present, they are often undecided, because their future method of living is not defined or assured. The Land Settlement Commission may possibly have had this question under consideration, but any suggestions it has to make will be of little avail unless it is proposed to show where the necessary funds are to come from. The grant of land, and confiscated farms will do much, but substantial help in the directions named, for the industry, will do more. The Nation's wants in horses are likely to increase, and annually more are being obtained from abroad. It needs time to cultivate our own fields in this direction, and there are few better grounds for the purpose, than in South Africa. It has been said that it will pay English breeders handsomely to produce horses for themselves instead of placing reliance on foreign markets. It will equally pay yeomen settlers to do so. There are many breeders in South Africa who spend time and money in the production of horses for the turf, but this breeding is mostly for pleasure, and not for business. There are a few also who tend heavy horses for draught, and these fetch high prices. What is required is the provision of suitable stallions, of various classes, to mate with the mares available, for the production of all round useful and serviceable horses. The various Commissions which have written on the subject in England are many. Whilst their proposals are "under consideration" the yeoman settler may have to wait for help and guidance, unless practical assistance be given him, in the only direction really essential, viz, the provision of good sires, the distribution to him of all available surplus mares, and a certain amount of guidance and financial help. This should not be delayed, but should receive the serious attention and practical co-operation of those who have his welfare at heart. The subject of the provision of suitable horses for military purposes, as one of Army Reform, will doubtless be considered elsewhere. It is here referred to as part of the Colonisation question for the yeoman settler. The matter is one, indeed, which less requires official sanction than its co-operation, support and sympathy. Promises have already been received of powerful aid in this direction from persons of influence and wealth concerned in the settlement of South Africa, and future arrangements may be left, with the support asked for, to a Committee whose names will be hereafter submitted for approval.

493. It was considered that the best commencement to be made was that of Police. encouraging the Yeomanry to join the Police Force, of which it is understood over 10,000 will be required in the Transvaal alone, under Major-General Baden Powell, who was consulted. By joining the Police, yeomen would have opportunities of looking round and deciding on the district they would like to remain in. At Johannesburg, one of the Yeomanry Companies, has been turned into Local Police *en bloc*, but that vicinity has more attractions for such employment than elsewhere. The conditions of services in the various Police Forces were usually:—Men, 5s. to 10s. per diem; non-commissioned officers, 12s. 6d.; after two years, officers 20s. to 25s., with free rations for self and horse. Horses provided. As yet, rations are not definitely given in addition to the rates

of pay specified, but it was understood from the Inspector-General of Police at Pretoria (Colonel Maxsie) that this had been recommended. Additional concessions such as: permission to get out wives and children after two years' approved service, both of whom were to be given a small allowance for the first six months, stocks of necessaries, and groceries to be kept at certain selected centres, and issued at cheap rates, were also proposed.

The yeomen are reported as making very good Police, but their non-commissioned officers were considered wanting in experience, and not, therefore, generally suitable. It was thought that the counteracting influence of the importation of yeomen's wives, and families, over the Dutch, would be most beneficial to the country, but such questions as period of enlistment, pension, &c., have yet to be decided, and until this is done, yeomen cannot be expected to do more than engage for brief periods; three to six months.

Colonisation.

494. There seems little doubt that much good might be done towards the settlement of the country, by giving yeomen encouragement to remain, and by promoting emigration, amongst men of this class, at home. The excellent service they have rendered during the war perhaps entitles them to this. If their powerful organisation and Committee were to take this matter up, and use their influence towards the collection of funds which would enable the men to settle, much might be thus effected towards the pacification and prosperity of South Africa.

Imperial Yeomanry Hospital.

495. No report on the Yeomanry arrangements in South Africa would be complete without reference to what the Imperial Yeomanry Hospital Committee has done for this Force. Their admirable report on their home organisation will doubtless be hereafter supplemented by one in regard to the practical working of the system in the field. Every opportunity was taken of visiting their hospitals at Deelfontein, Pretoria, and elsewhere. Their excellent branch hospital at the Base Camp at Maitland, has been already alluded to. It is unnecessary here to go into details about these hospitals, but it will perhaps suffice to say, that all yeomen who have made use of them, speak in the highest and most grateful terms of the treatment, they received. There seemed nothing left to be desired in their management, and nothing was wanting which care and money could secure to make them a true haven of comfort to the sick and wounded soldiers. In all these arrangements, the able management of Colonel Sloggett, Major Kilkelly, and Dr. Fripp, assisted by a valuable, and highly trained staff of civilian doctors, was above praise. The personal influence and presence of Lady Chesham added much to the success of this unique organisation, and the staff of nursing sisters was perhaps the strongest and best, ever brought together. The Base Depot was able to contribute help in a supply of blankets and other necessaries, and arrangements were also made to send up a supply of clothing, to issue to returning convalescents.

Centralisation of funds.

496. In many instances, regarding stores and supplies, it was observed that money was wasted, in obtaining articles which were either useless in the field, or which never reached the front from the base. These were, mostly, purchased out of county funds or subscriptions, by the various companies privately, and with this the Imperial Yeomanry Committee had nothing whatever to do. In any future similar organisation, however, it is strongly recommended, that county funds or private subscriptions be centralised for the common good of the Force. The money thus subscribed would be better utilised, and the general arrangements for its application would be more effectively dealt with. In this recommendation, it is not overlooked that some county funds were large, and others comparatively small. If the division of the funds subscribed is not to be for the common good, even then, the controlling authority could advise regarding expenditure, and the despatch of stores which otherwise might never reach the companies concerned.

Machine guns.

497. As an instance, the case of the machine guns may be quoted. These were privately subscribed for by certain individuals or companies, and they could not, therefore, be withdrawn from those to whom they belonged. The guns, as a rule, did excellent service. The better system, however, would have been not to have guns of this sort with particular companies if there be only a few available, but to have massed them in batteries, so that they could have been drawn on by sections, detachable with any force as required. Under the existing system this could not be done.

Colonel Deane.

498. I was accompanied during my visit to South Africa by Colonel T. Deane, C.B. (I.S.C.), who was appointed a "special service officer" for the purpose of compiling this Report. I cannot speak too highly of the services rendered by this officer during my visit to South Africa, and subsequently for his assistance in compiling this report. His advice and experience were of the highest value, being always ready and willing to help me in every way in his power.

Lieutenant Lucas.

499. I was also accompanied by Second Lieutenant W. G. Lucas, Loyal Suffolk Hussars, who, as orderly officer, carried out his duties to my entire satisfaction.

Section III.

YEOMANRY FORCE OF THE FUTURE.

CHAPTER XII.

YEOMANRY FORCE OF THE FUTURE.

Constitution.

500. The Yeomanry Cavalry in Great Britain is composed of 38 Regiments, and there are in addition, two Regiments of Volunteer Light Horse (Fifeshire and Forfarshire). The Force is divided into 18 Brigades, as shown in the Army List, and the total established, and enrolled strength is as shown on the following page.

Consti-
tution.

501. The established strength has fluctuated from 14,139 in 1889-90 to 11,891 in 1898-99 mainly owing to want of encouragement, and insufficient pay and allowances. When the enrolled numbers declined, the established strength was reduced, a method, which, if applied to other branches of the service, would, no doubt, have had dubious effects. The average established strength of the 38 corps is about 300 men, and the enrolled strength 270.

Strength.

502. The cost of the maintenance of this Force in 1898-99 was £76,499 per annum. The cost of the maintenance of a single British Cavalry Regiment is £59,680 per annum.

Cost.

503. It is not desired to claim for the Yeomanry Cavalry of the country more than is its due, or to say that the actual men of which it was composed were able "to add to the Forces of Her Majesty more than a whole Army Division of well equipped fighting men," during the recent operations in South Africa. But unquestionably, it formed the nucleus of that Force, and aided by the "untiring energy and intelligent administration" of those who controlled it, no less than by the position, influence, and wealth of those who belonged to it, the Imperial Yeomanry was raised. The results were briefly and gracefully placed on record by the Secretary of State for War on May 24th, 1900, as follows:—

Value of
Yeomanry.

"This valuable Force has now taken its appointed place in the Field Army, and Her Majesty's Government gratefully note the testimony of Lord Roberts and his Generals to the excellence of the material of which it is composed, and to the brave and faithful service which it has rendered."

504. There will, no doubt, hereafter be still further testimony to the merits of the Force, since this communication was received, and it is only here quoted in support of the suggestions which follow for giving the Yeomanry more liberal treatment, with a view to an increase in its strength.

505. In considering this question it should be borne in mind that it is not altogether desirable to be wholly guided by the lessons of the past war, which were in many respects peculiar if not unique. One lesson, however, must be remembered, and that should settle the much vexed question of whether Yeomanry are to be in future called *cavalry or mounted infantry*. This designation is more or less immaterial, so long as they are equipped with the rifle of the best and lightest possible description and having the longest range. On this understanding the future Force might be called "Imperial Yeomanry," because it is a designation which will always be remembered in connection with its services in the field. Existing Yeomanry Corps might then be named: "Imperial Yeomanry" ("Buckinghamshire—Royal Bucks"); "Imperial Yeomanry" (Royal East Kent—the Duke of Connaught's Own); and so on.

Cavalry or
mounted
infantry.

Alteration
in name.

506. The Yeomanry should be brought under the Army Act of 1881, in the same way as the Militia.

Army Act.

TABLE showing Total Established and Enrolled Strength of the Yeomanry Cavalry in Great Britain.

Years.											
	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99.	1899-1900.
	Number.	Number.	Number.	Number.	Number.	Number.	Number.	Number.	Number.	Number.	Number.
Total establishment of all ranks	14,139	14,086	14,086	14,095	11,790	11,790	11,678	11,678	11,891	11,891	11,891
Total numbers enrolled (date of inspection)	10,710	10,697	10,710	10,579	10,400	10,014	9,745	10,184	10,191	10,207	10,114
Present at training (date of inspection) ..	9,262	9,251	8,885	9,118	9,011	8,498	8,499	8,498	8,829	8,914	8,804
Absent from training	1,448	1,446	1,624	1,466	1,389	1,358	1,252	1,208	1,362	1,293	1,310

Source from whence it is to be Expanded.

507. The Yeomanry Cavalry Regiments of Great Britain cannot be regarded as providing more than the nucleus of any large force for service abroad. But their associations and traditions will always be useful in the provision of men who, on any great national emergency or on the occurrence of war abroad, will be keen to serve. As statistics show in Appendix No. 36, the regular yeomen formed only about one-fifth of the total strength of the Imperial Yeomanry which was formed. The majority of the remainder joined the Force, more or less, from a spirit of adventure, which was largely fostered in counties of the country, by the encouragement of Yeomanry officers of position and wealth, who, as in the period of the feudal system, exerted their influence for the desired object. The balance was made up of men of every social position and calling, of which a good many were obtained in London and other large centres. Ireland, although without Yeomanry, furnished a contingent of six companies, and had that country possessed an organised Yeomanry Force, or even well established centres for recruiting, the number obtainable might have been largely increased. It is therefore apparent that what is wanted for the future is (a) to strengthen the present Yeomanry recruiting centres by increasing the composition of existing corps, and (b) to form such additional nuclei, or corps as may be useful towards the end in view.

Composi-
tion of
Imperial
Yeomanry.

508. (a) This might be done by increasing every Yeomanry Corps by the addition to it of a special squadron, formed of men obtained throughout its various troops, who would engage for service abroad. For these, an additional grant of £12 per annum would be required as a retaining fee for their engagement to serve abroad. It is estimated that in round numbers this would, at 100 men per squadron, of 38 regiments, give an addition to the Force of 3,800 men and cost £45,600 per annum in the retaining fee required, alone.

Additional
strength to
existing
corps.

(b) The additional corps required could, it is considered, be raised by the formation of six Yeomanry Cavalry regiments in Ireland. To do this, legislation would be necessary, but the war has evoked such patriotism in Ireland, at Belfast and elsewhere, that it is thought it would be only a suitable method of recognising this loyalty, to establish, subject to His Majesty's gracious approval, a Yeomanry Force in that country. From enquiry made, it is thought that considerably more than six Yeomanry Corps could be raised in Ireland, but this force of six regiments to commence with would probably be thought sufficient. The estimated strength of this force is taken at approximately 1,800 men.

Additional
corps.

Ireland

509. In addition, there are the great mercantile centres, which must not be overlooked, such as London, Edinburgh, Glasgow, Manchester, Newcastle, Plymouth, and others. Those named supply about 65 battalions of Volunteers. London alone, contributes 30 to that force. It is probable that these sources might be drawn on to supply a considerable number of Imperial Yeomen. There are many young men in these centres willing to serve if help be accorded them towards the provision of horses and equipment. London will always be the chief centre from which such a force can be drawn in future. The recent decision to raise a Constabulary Force for the Transvaal may be referred to as an example of the numbers forthcoming for such a service. Within a few days after the call had been made for 1,000 men, the recruiting officer had received many thousands of applications. Most of these were from men in a comparatively good social position, who were prepared to at once undergo the required tests for shooting, and riding. The prestige attached to the Imperial Yeomanry, would, it is considered, result in large numbers being obtained.

Mercantile
centres.

510. It is very difficult to even approximately estimate the numbers which would be obtained for an Imperial Yeomanry force from these localities. Much will depend on the terms offered. If, however, they be sufficiently liberal, the result will be proportionate and therefore it is desirable to take the towns, as well as the counties, into consideration for future expansion. At an approximate estimate, they would probably produce 1,500 men, which figure is less than one-tenth of the Volunteer supply from those localities.

511. Additional corps could, it is thought, be also raised in some of the English counties, which at present have no Yeomanry, such as Sussex, Lincolnshire, Surrey, Huntingdon, Northamptonshire, Herefordshire, and others, as well as adjacent counties in Wales.

Counties.

512. These counties, if encouraged to do so, could produce four regiments of nominally 300 men each, inclusive of a service squadron, as already proposed. This would increase the force by 1,200 men and provide in all, the following:—

Total
additional
strength.

	Men.	Special Service Squadrons, say.
(a) Ireland—6 regiments—300 each	1,800	6
(b) New corps in other counties—4 regiments—ditto	1,200	4
(c) Service squadrons, from existing corps—100 each	3,800	38
(d) Town centres, as detailed	1,500	5
Total	8,300	53

Total
resulting
strength.

513. This would raise the total strength of the Yeomanry Force in Great Britain and Ireland, to over 20,000 men, and give 53 special squadrons, to form the nucleus of an expansible Force for foreign service amounting to 5,300 men. On these 53 squadrons, there is no doubt, a large fighting force might be raised; for taking past statistics as a guide, and assuming that the real yeomen formed only about one-fifth of the strength of the Imperial Yeomanry, this should be the basis for the formation of an Imperial Force for service abroad of over 25,000 men. This is about the figure which it is desired to reach in the future organisation, and it is thought it can be attained.

Pay and Allowances.

Pay and
allowances.

514. It may be estimated, roughly, that it has cost the Yeomanry officers and men on the average, £100, and £5, per annum, respectively, for the privilege of belonging to the Force, entirely separate from their pay and allowances. This can scarcely be called an encouragement from the State to a Force which has proved so valuable, and which at the utmost, should only be called on to give its time towards making itself efficient. The question of pay and allowances is one which should hereafter be very carefully considered by a committee of officers appointed for this purpose. For this report, however, it is necessary to make some definite proposals, and to show approximate financial results as a basis on which to form the detailed scheme of the Yeomanry of the future. Some such estimate will be doubtless required in order to make budget provision for the future, but the estimate must be regarded as subject to any alteration which the proposed committee may think desirable when the details of the scheme are worked out. It is manifestly desirable that these details should be discussed and closely enquired into by those who have had practical experience of the working of the Yeomanry. They should not, it is thought, be left to any other authorities whatever.

Proposals.

Proposed
permanent
Committee.

515. It is suggested that a permanent Committee be formed for this, and other purposes, composed of 2 staff officers, the Deputy Adjutant-General of the Imperial Yeomanry, with another of his nomination, and also 3 additional officers of Yeomanry regiments, the latter to be elected triennially by the Yeomanry commandants to represent the force. There would thus be a quorum of five officers, who should be authorised to submit their proposals to the War Office through the Inspector-General of Auxiliary Forces, or to the Inspector-General of Yeomanry, should one be appointed. If the force reaches the strength assumed, or approximates thereto, it would certainly be desirable to create such an appointment, as it is considered that the existing Inspection Staff is, or will be, quite inadequate for the duty to be undertaken. There are many details besides that of pay which have to be worked out. These cannot be considered in a hurry, but should be carefully planned, after reference to those who have been connected with the Force at Home and in South Africa.

516. It is the want of continuity of supervision, of knowledge and sympathy with the requirements of the Yeomanry, which in the past has had a very detrimental effect on its efficiency and expansion, and there is no better manner of remedying this defect in future than by the appointment of a permanent Committee of the kind proposed. This Committee should form a branch of the War Office, as is proposed in para. 580 of this report.

Financial Results.

517. The expenditure on the Yeomanry Cavalry during the years 1897-98 and 1898-99 has been as follows:—

Expenditure on Yeomanry Cavalry.

TABLE I.

	Years.	
	1897-98.	1898-99.
	£	£
A.—Regimental pay—		
Permanent staff	13,661	13,759
Yeomen	33,596	33,091
B.—Contingent, clothing, and other allowances	27,465	28,649
C.—Miscellaneous charges.. .. .	812	1,000
Total.. .. .	75,534	76,499

518. The pay allowed during the years above referred to, has been 7s. per diem for the period, not exceeding six days, in each year during which Yeomanry regiments were assembled for permanent duty. No allowance has been given for the hire of horses except at manœuvres with Regular Forces.

519. The contingent and clothing allowance has been:—

	£	Contingent and clothing allowance.
(1) For each Non-commissioned Officer and Yeoman who qualifies in drill and passes out of Class III in musketry	8	
(2) For each Non-commissioned Officer and Yeoman who qualifies in drill without qualifying as a second-class shot	2	
(3) For each Non-commissioned Officer and Yeoman who qualifies as a second-class shot without qualifying in drill	1	

520. What is proposed instead is a consolidated allowance of 10s. pay per diem for 21 days' training, instead of 7s. per diem for six days as formerly. Also, a permanent £5 bonus for each man providing his own horse during the period of his annual training. Allowances for drill and musketry to be merged in the 10s. per diem; clothing, and contingent expenses, &c., to be as shown in the details given below, which are those, with some slight modifications, temporarily sanctioned in Army Order 90, of 1900:—

"3. The contingent allowance referred to in para. 234—(1) Yeomanry Cavalry Regulations will be increased to £5 for each efficient who attends in camp for at least 14 full days, and fires the whole of the special course of musketry. The allowances, (2) and (3) of £4 and £1 respectively, to remain the same, as temporarily sanctioned during the season of 1900.

"4. A special allowance of £5, in aid of the cost of providing a horse, will be made to the corps in respect of each efficient who fulfils the special conditions laid down in para. 3.

"5. The contingent and horse allowance referred to in paras. 3 and 4 will only be granted provided that at least 50 per cent. of the strength of the corps make themselves efficient under the above conditions.

"6. Pay and allowance will be issued to all ranks at the rates laid down in the Yeomanry Cavalry Regulations for the actual days in camp, including the days of arrival and departure. Officers who attend for not less than 14 days will be entitled to field allowance, an allowance at half the rate of lodging money for the provision of furniture, and also to mess allowance of 4s. a day.

"7. In order to meet the cost of travelling, marching pay at the rates laid down in para. 191, Yeomanry Cavalry Regulations, will be granted to all ranks on the distances between the places of residence of the men and the headquarters at which they assemble. Cases in which the scale referred to is insufficient, owing to the men having to proceed long distances, will be specially considered. The journey from the headquarters to

the place of encampment will be made under route, the expense being charged against the public.

"8. Leave on full pay at the rate of four days during the period of 21 days' training will be allowed to all ranks who actually attend in camp for 14 days. Additional leave without pay may be granted by the Commanding Officer in very urgent cases to be specially reputed so long as the actual number of days in camp does not fall below 14. No leave will be allowed during the days devoted to musketry.

"9. For members who attend camp for less than 14 full days, the usual pay and grants will be allowed up to a maximum of 13 days."

Additional
Adjutants.

521. In addition to these revised regulations, there would be also required one adjutant for each corps, there being only one for every two regiments at present; 19 additional adjutants would thus be wanted. Taking the (established) strength (1898-99) of the Yeomanry at 11,891, the increase in expenditure for the new allowances, and for the adjutants, would be for that force as approximately shown in Table II, and this, if sanctioned, would have to be incurred from the next annual training.

II.

Increase in
pay and
allowances.

522. Increases proposed to the Staff pay and allowances of the Yeomanry at its present established strength of 11,891, all ranks:—

	Present Strength.	Establish- ment.	Remarks.
	£	£	
A.—Regimental pay—			
Permanent staff, including 19 additional adjutants, one for each corps	17,200	17,200	Pay required for 21 days' annual training
Officers and Yeomen	118,800	148,300	At 10s. per diem for 21 days' training
B.—Contingent and clothing allowance	44,500	60,000	
Horse allowance	43,500	60,000	
Other allowances	1,200	1,200	
C.—Miscellaneous charges (£1,000 as in estimate of 1898-99)	1,000	1,000	
Total	226,200	287,700	Total Increase £149,701, or £211,201.

NOTE.—The pay and allowances of an adjutant amount to £315 per annum, of which the pay only, £182 10s., is included in the above. The establishment is taken at 11,891, but the strength at the average of 9,312. The expenditure during 1900, which was the first year of the new system, cannot be taken as a guide, because the numbers present were less than the average, owing to the war. Two of the corps (Oxford and Somerset) were only present for six days' training. The remainder for periods varying from 14 to 28 days.

Extra cost
during
training.

523. In all, during the training season of 1900, there were about 7,800 mounted, and 100 dismounted men, in camp. For these the total *extra cost* over that incurred during 1898-99, was as follows:—

	£
Contingent and other allowances at £5 instead of £3 per man; 7,900 by 2	15,800
Horse allowance at £5 per man (amount claimed)	39,000
Difference in pay extra, £46,400; ditto regimental allowances, £900; ditto officers' allowances, £5,050; total, £52,350...	52,350
Total	£107,150

524. There were additional expenses for hire of ground, compensation for injuries, medical and veterinary expenses, which cannot be yet estimated, but on the other hand, there was a saving in squadron drill and musketry pay, amounting to about £1,500, as many of the regiments did not complete their separate drills and musketry during 1900.

Pay and
allowances
of extra
strength

525. For the proposed increase to the force, as shown in para. 512, there will be required pay and allowances at the same rates as given in Table II for an additional number of

officers, non-commissioned officers and men—comprised of 15 new corps of 325 each of all ranks. Also, for 38 additional new special service squadrons, to the 38 existing Yeomanry corps at 105 (all ranks) each. The total number of special service squadrons to be 53, viz., 1 additional each for the 38 existing corps, and one each from the establishment (325) of the 15 new corps for each non-commissioned officer and man, of which an additional sum of £12 per annum would be required, as retaining pay, for liability to serve abroad. Clothing, accoutrements, and saddlery would be met from the Capitation Grant, which it is estimated would cost about £15 per man. The allowance for this purpose to be issued, as required, for three years, in advance, for the newly-formed regiments, or those augmented, under the provisions of paras. 239–41, Yeomanry Cavalry Regulations, and an enquiry might be held by the proposed Committee as to how far existing corps are in debt. This estimate must be regarded as approximate only, and is meant to show what the new force would eventually cost, as gradually raised. It is not possible to accurately compute what sum would be required for the first year, as much must depend on the rapidity, or otherwise, with which the force is raised. There are, moreover, other sundry small allowances for the permanent staff, travelling, marching, rations, &c., which cannot be here correctly made out. Neither is it possible to say what would be the exact charges for the Government supply of arms, ammunition, targets, or tents. It is assumed, however, that if the proposed inducements are sanctioned, they are likely to produce, in time, the number of men specified, for an “Imperial Yeomanry Force,” to the name of which considerable prestige will in future be attached. Cost.

526. The additional strength can of course only be gradually obtained, and, therefore, the excess expenditure would be incurred by degrees.

527. There are other inducements besides pay—which would go far towards making the Yeomanry Service more popular—such as exemption from service on juries, and many others. These have been frequently put forward by Volunteer committees on the concessions which might reasonably be made to the Auxiliary Forces. It is needless to recapitulate them here, but it may be sufficient to say that the more liberal the scale of these concessions is, the more probable will be the practical expansion of the Yeomanry Force. Inducements.

528. When the great expenses of the upkeep of British cavalry regiments is considered it is reasonable to assume that it will be distinctly to the advantage of the military service and the public purse to do everything possible to encourage the formation, at a comparatively small cost, of an auxiliary force of cavalry which has proved itself efficient in the field. It is almost needless to point out that as far as the Yeomanry is concerned, the pay and allowances have not been sufficiently liberal, and that further, at a not very distant date, the reduction or even abolition of the force was under consideration. Upkeep of Yeomanry.

529. Although the proposals made only give a Yeomanry Force of six regiments, of 1,800 men, for Ireland there is little doubt that this number may be regarded as very small in comparison with what might be forthcoming if the opportunity be taken to organise in that country, with His Majesty's permission, a body of yeomen. This can only be done by paying the men liberally in return for their services; not by requiring them to pay for the privilege of service, as has practically been the case in Great Britain. There seems little reason why there should not be Irish Yeomanry as well as Irish Militia, as the value of mounted men has increased. The financial results of these proposals are shown in Table III. Ireland.
Financial results.

III.

Cost of
additional
strength.

530. FINANCIAL RESULTS of the proposed addition to the existing strength of the Yeomanry Cavalry, with that shown in Table II., which shows certain increases to the Staff in Adjutants, and pay and allowances of the present force :—

	Strength.	Total.	Establishment.	Total.
	£	£	£	£
A.—Regimental pay—				
Permanent staff—				
(1) 19 additional adjutants	3,500		3,500	
(2) 15 new corps—				
Adjutants	2,740	6,940	6,940	
Instructors	4,200			
(8) 38 new squadrons instructors ..	2,660		2,660	
		13,100		18,100
Officers and yeomen—				
Officers—				
(1) 15 new corps	5,840	9,640	12,660	
(2) 38 new squadrons	3,420			
Yeomen—				
(1) 15 new corps	47,400	69,040	92,050	
(2) 38 new squadrons	44,650			
		78,680		104,710
B.—Regimental allowances—				
Contingent and clothing allowance—				
(1) 15 new corps	17,160		22,870	
(2) 38 new squadrons	15,000		19,000	
Horse allowance—				
(1) 15 new corps	17,160		22,870	
(2) 38 new squadrons	15,000		19,000	
Other regimental allowances—				
(1) Special for general service squadrons	63,600		63,600	
(2) Other allowances	2,100		2,100	
		130,020		149,440
C.—Miscellaneous		1,000		1,000
Total		222,800		268,250

IV.

531. TOTAL of Vote 4 in the Army Estimates, if the increased rates and periods are authorised, also if the new corps and squadrons are raised :—

	Strength.	Establishment.
	£	£
A.—Regimental pay—		
Permanent staff—		
(1) Adjutants	26,800	26,800
(2) Instructors		
Officers and men	197,480	253,010
B.—Regimental allowances—		
Contingent and clothing allowance ..	76,660	101,870
Horse allowance	75,660	101,870
Other regimental allowances—		
(1) Grant for special service squadrons, £12	63,600	63,600
(2) Other	2,100	2,100
C.—Miscellaneous	1,000	1,000
Total	448,300	550,250

NOTE.—The total expenditure on Vote 4 is at present £76,499; thus if the whole of the new proposals be approved the additional cost would be £366,801 calculated on probable strength, or £473,751 calculated on full establishment, towards which a step has been made this year which cost £107,150. See previous paragraph.

Payment of Men. Small Book System.

532. In the second section of this report the defects of the present system of payment in the field have been noticed, and suggestions have been made for the re-introduction of the regimental paymaster with Yeomanry corps on field service. One of the defects of the present system is that payment or advances in the field were often found impossible in the absence of the last pay certificate which was usually not forthcoming. To remedy this defect it is suggested that a "small book" system be adopted for peace and war, in which entry should be made of all payments and advances; being in fact a last pay certificate in itself, as is in force in the Army Service Corps. This book should be always kept in the inside pocket of the service jacket, and would therefore be available when wanted. Many officers consulted are in favour of this system, and it is therefore recommended for adoption in future. It would save much delay being made in payment, and men should be made accustomed to it in peace time.

Payment of
men.
Small-
books.

Annual Training.

533. In order to increase the efficiency of the Force it is thought that the period of annual training should be 21 days. If fixed permanently at a longer time than this, as was the case during the drill season of 1900, it will be difficult to get the men to join or attend. Their general employment is of such a nature that neither they nor their employers can spare them for a longer period, and there is no use in fixing it at a duration which will be found impracticable. Every third or fourth year the Yeomanry, from selected counties, should be called out to join in the regular cavalry manoeuvres in place of their ordinary training. In this manner a third or fourth portion of the entire Force would receive training on a large scale each year, which is clearly desirable. During the annual training the musketry course should be held, and more attention should be paid to the men's riding.

Period.

534. A month's training with a British Cavalry Regiment should be compulsory for every Yeomanry officer on joining, and every officer under field rank should be attached to a Cavalry regiment for at least a fortnight every 3 years. A certain test should be fixed, and if this be not satisfactorily passed, another month in extension should be required. It should be optional with the officer undergoing the test, to extend his period of training to three months or longer should he desire it, and he should be encouraged to get together yeomen to join him. During the time of training he should supply his own horses, or be provided with one from the Remount Department.

Training of
officers.

535. Leave to officers or men should be restricted to four days during the training, and during that period only should pay be allowed to absentees. If extra leave be granted it should only be given at the discretion of the Commanding Officer in very urgent cases, but without any pay whatever.

Leave.

536. The training should be held as near as possible to a good rifle range, and the Force should be encamped under canvas, Government supplying tents, and billeting allowances being abolished. These allowances are really unnecessary, and everything possible should be done to accustom the yeoman and his horse, to the actual conditions of service in the field, and to teach him to occasionally pack up his camp equipment and kit ready for a march, if indeed he cannot be called upon to undertake it. The system of moving camp, packing kits, &c., in light carts, and undergoing the practical work of a march should be taught him just as much as his drill, for by this means mobility only can be learned, and mobility has been proved the greatest desideratum of the mounted soldier. The system of making entrenchments and strengthening positions should also form a greater portion of his training than hitherto, as well as more scouting and less of the ordinary parade movements.

Billeting
allowance.

Mobility.

Regimental versus Troop or Company System.

537. Whether the Yeomanry unit of the future is to be a regimental or a company one for field service must greatly depend on the field of operations. The experiences of the past campaign have shown that when operating over vast districts, and with isolated posts, the company system was most in use. There were comparatively few regimental units kept intact, but when this could be done the regimental system worked best. It had the advantage of keeping the men of counties or adjacent counties together, which they liked, and it enabled the regimental staff to better provide for their efficiency and comfort.

Regimental
versus
troop or
company
system.

538. On the other hand, the break up of the regimental system, which more frequently occurred, deprived the Regimental Commandant and his Staff of their command, leaving them practically little to do. This was one of the features of the campaign, but it could

not be avoided. When there were experienced company officers, the smaller unit did well but in many instances the officers were without much practical military experience. However, both they, and their men, were not wanting in intelligence and common sense and in this respect they were preferred by many general officers to other Forces.

**Special
service
squadrons.**

539. The formation of special service squadrons is the system recommended for the future, as best for the expansion of the Force for foreign service. When these squadrons are expanded, on mobilisation, and are made, in fact, the recruiting dépôts of a larger force, it will be then for consideration whether regiments are to be formed from them or not, depending on the place and nature of operations. If regiments are formed, then the regimental staff should be on the same scale as that allowed for the Imperial Yeomanry. There should, if possible, be a trained quartermaster with each regiment, and a trained quartermaster-sergeant with each independent squadron.

Training.

540. The squadron unit during peace time, should be trained to be as independent as possible in all its arrangements. Marching and scouting, shooting and entrenching should take the place of many of the parade movements, to which much time has hitherto been somewhat unnecessarily devoted. Rank entire movements are generally sufficient, and if the squadron learns these duties well, much efficiency will have been obtained. If the squadron be expanded to the extent required for the formation of a regiment, everything possible should be done to keep men of one county or adjacent counties, serving together. Thus, it may be said that the first object is to secure a really efficient and workmanlike service squadron for each Yeomanry regiment, to be afterwards expanded, up to the strength of a regiment. For this the proposed plan provides.

Mounting the Yeomanry—Horses.

**Mounting
the
Yeomanry.
Horses.**

541. There are two systems either of which will probably have to be adopted in future. One is to allow every yeoman the sum of, say, £5 to provide a horse during his period of training; and the other, to provide the horse for him. The grant of the allowance of £5 will, no doubt, result in a considerable increase to the strength of the Yeomanry, as men who have hitherto held back from joining on the score of expense, would do so with the allowance proposed.

**Horses for
training.**

542. With regard to the system of providing horses for a period of training, this would not be necessary for men able to provide their own, or for those who may wish to hire, but for any considerable expansion of the Force the loan system would be advantageous. If there be kept up in the future any mounted infantry force, as is assumed will be the case, then, it would appear a suitable arrangement to make use of their horses for this purpose during the period of 21 days' Yeomanry training. The musketry course of the mounted infantry might be arranged to take place during May, the month that the majority of the Yeomanry hold their annual training, by which arrangement their horses would be available.

**Obtaining
of horses.**

543. It will be for the Committee proposed, and for the military authorities, to consider the direction from which horses can best be spared—regular service, mounted infantry, remount establishment, registration system, &c.—but there seems no doubt, that if the Yeomanry Force receives the encouragement which is its due, the broad principle should be at once accepted, that for every man who joins the Force for training, either £5 is to be allowed for the hire of a horse, or one should be made available for him by the State, for the required period.

544. The regular cavalry is exceedingly weak in its established strength of horses. If brought up to a greater strength, it might, without much inconvenience, spare the Yeomanry some of its horses for the period required.

**Regular
remount
establish-
ment to
lend horses.**

545. The remount establishment has practically no reserve; if given one, it might be usefully employed by mounted infantry and Yeomanry, until the horses were elsewhere required. The utilisation of a remount reserve during peace time for some practical purpose is about the strongest argument which can be adduced in its favour. Alone amongst European nations there is no reserve remount establishment kept up (except for annual waste); the stud rejections of other countries are purchased during war time, and numerous other horses from foreign sources, are bought in a hurry; but foreign Powers buy the best English horses during peace; they pay higher prices, and have stronger cavalry regiments to mount.

**Riding and
shooting.**

546. The want of proficiency in riding and shooting was a marked characteristic of recent operations as noticed by many general officers. The idea of our being a nation of horsemen is somewhat exploded, at all events in the sense of men being able to ride without

training. Very many who enlisted in the Imperial Yeomanry had never been on a horse before they passed, or tried to pass, the riding test. This points to the desirability of having some system of central riding schools, as is the case with musketry schools or gymnasia. If at some of the chief Yeomanry brigade centres or Yeomanry headquarters, there could be kept up a small number of horses for military equitation, the system would be of much assistance in obtaining, and instructing Yeomanry recruits. Riding schools.

These and other details could, no doubt, be worked out gradually by the proposed Committee for the Auxiliary Forces at the War Office. It is, perhaps, sufficient to refer to them in this report as matters worthy of consideration.

547. The question of mounting the Yeomanry service squadrons for service abroad, should an Imperial Yeomanry Force be again formed, is one which should be settled with regard to past experience. On the whole, the system of companies purchasing their own horses worked well when they were found willing to undertake the duty. It is, therefore, a matter between regimental or company remounting, and one to be undertaken by a remount agency. If the service squadrons are warned beforehand, that on the occurrence of war or mobilisation they will have to make their own arrangements for remounts, then, no doubt, they will in peace time have some agency fixed to which they can resort for a supply of horses on mobilisation. This is thought the best system. If it had been insisted on during the mobilisation of the Imperial Yeomanry, the horses would, no doubt, have been forthcoming. The wider the area over which remounting arrangements are spread, the more probability there is of securing good remounts. Decentralisation is, moreover, desirable in this and other matters, and making squadron commanders responsible for the supply of their own horses is in many ways a sound arrangement. Possibly something might be done by them, under the registration system, for obtaining their horses, as is done in the Regular Remount Department. If so, Government should pay the fixed fee of 10s. per annum for registration, under the same conditions which apply to the registration system elsewhere. It is proposed, under the heading of Adjutants for Yeomanry, para. 582, that these officers should be detailed for this duty in communication with the Remount Department. Mounting Yeomanry for foreign service.

548. The number of horses purchased by regiments and companies of Imperial Yeomanry was 3,789, and more could have been thus obtained were it not that the companies were anxious to get out at once and be relieved of the trouble. A remount agency would, however, in addition, have to be formed to take over the horses before embarkation, and arrange for the establishment of depôts at or near the ports of embarkation and at the base, as it is almost impossible to always arrange for the remounts to accompany the service troops on board ship. This it is suggested should be in future done in communication with the Remount Department. Remount agencies.

Arms and Accoutrements.

549. There seems no doubt whatever that the arm of the yeoman should in future be the rifle. The present service weapon leaves little to be desired in the way of range and shooting power, but it is susceptible of improvement for the use of the mounted soldier, for whom it was not originally designed. The magazine is far from perfect, that of the Norwegian pattern being generally thought better. The rifle could be lightened and made more like a sporting arm. Lighter in the stock and with less heavy woodwork on the barrel. No sportsman would think of using the service rifle and its method of carriage for his own purposes. If he required the longest possible range he would ask his gunmaker to produce him a rifle of the service shooting power, but made as lightly as possible in grip and stock. Soldiers are fitted with boots and clothing, but not so with the rifle, which is looked on as a machine which any man, tall or short, can use. The testing of the sights of rifles seems a matter to which much more attention should be given, as it is well known that some arms had to be recalled after issue for service, in view to their being properly adjusted. The forward sliding sight, with ivory clips, seems an improvement on which experts will doubtless be called on to report, as well as on the plan of having aluminium instead of heavy iron bands on the wood work. Rifle.

550. The officers on service are often to be seen carrying sporting rifles, many of them with a range nearly equal to the service weapon, but much lighter and better made. The sword is often discarded. The revolver is always worn. A repeating rifle may possibly replace the magazine weapon. That is a matter for musketry experts. But it seems clear that the mounted Yeomanry soldier of the future should have a light rifle, and that its method of carriage should be that of slinging it on the back, if this can be comfortably arranged. Arms.

Rifle bucket and sling.

551. The consensus of opinion in regard to the present rifle bucket and sling, is decidedly in favour of doing away with that method of carrying the arm. The pattern of short rifle recently issued to the native troops in India would perhaps be better for the yeoman than that recently used, and it could be more easily slung on the back than the long one now in use in the service. Its range is understood to be, with the latest mark of cartridge, equal to the existing pattern long rifle, with the mark of cartridge hitherto used in it. Proposals are believed to be under consideration, to cut down the long rifle to a shorter length, and a pattern rifle with the improvements mentioned will be submitted to the Small Arms Committee for consideration.

Sword.

552. It is not clear whether great use can ever be made of the sword for officers or men in future. It has no doubt traditions, and a past, but with modern rifle fire it is more often likely to be an encumbrance than anything else. Except for shock tactics it might suitably be discarded, but the sword bayonet might take its place in the ranks. Possibly, a better pattern than that in use can be devised, and this matter is one which a committee of experts might suitably be called on to consider. Officers and non-commissioned officers should, it is thought, wear the revolver, it is indeed well open to question whether this, or a repeating single-barrelled Mauser pistol, might not be worn by all ranks.

Bayonet.**Revolver.****Bandolier.**

553. The bandolier, web pattern, recently used by the Yeomanry in South Africa proved a mistake; the cartridges fell out when dry, and in moist or wet weather they could not be extracted. The best pattern is that of a stronger kind of web, to take a double row of cartridges, and fitted with a triangle on which to hang the haversack. If leather belts are worn they might be made to take cartridges, and spare pockets, or cartridge slides should be made in all uniforms. The number of cartridges carried by the Boers was often amazing, and the waist belt seemed to be the favourite carrier, as it often is with sportsmen.

554. It is the arms and accoutrements which go far to make a really workmanlike and serviceable force. These should be studied with a view to rectifying the errors of the past, not with the object of preserving weapons because they have a history under bygone conditions, which are very seldom likely to be met again. No doubt, amongst many Yeomanry cavalry officers of position and experience, radical changes such as these, will be met with expostulation. If such changes be not introduced partially, or as a whole, by the Army at large, as the result of recent lessons of the war, their objections should be given the utmost consideration. If otherwise, they should be set aside, so as to make the Yeomanry Force of the future what the Field Marshal Commanding-in-Chief was pleased to say it should be—"a useful and workmanlike body of men."

*Uniform.***Uniform.**

555. The Yeomanry must, it is presumed, follow to a certain extent, the changes which may be introduced in the national military attire. If there is to be a "service kit," and that only, then it should be adopted by the Yeomanry, with such distinctive marks for the various corps, and counties, as may be appropriate. If there is to be, in addition to the "service kit," a separate one kept up for parade or holiday purposes, then there seems no reason why Yeomanry corps should not be permitted to also wear something of the sort, provided always its cost is reduced to a minimum and that it does not interfere with the method of carriage of the arms and accoutrements which are believed to be essential for the true efficiency of the Force. One class of uniform would no doubt be better than two, provided it could be made smart and inexpensive. Ornamental additions for officers for ceremonial purposes might be arranged.

Service kit.

556. If the "service kit" is to be retained for service purposes only, then it is suggested that the special squadrons in each Yeomanry corps should be in possession of it, and from the fixed sealed pattern no deviation whatever should be permitted. This pattern should be supplied regimentally, and arrangements should be made with either certain reliable firms or the Pimlico Agency, to provide, on the expansion of the service squadrons, the quantity of service kit required within a given period. This would probably be easily ready before arrangements could be completed for the despatch of any large force abroad.

Pattern.

557. In regard to the details of the "service kit" or uniform proposed, it may be found that recent experience has shown that but few changes are required in the pattern now used. It is understood however that a new material of a neutral tint is to be introduced. The khaki serge jacket might be made a little longer, as it is very apt to shrink. It might be supplemented by a drill jacket of the same pattern—always useful for fatigue work or in hot weather. The coat or jacket known as "British

Service Warm," which is practically an overcoat made to wear over uniform, thick and warm, was in great demand during recent operations in the field and might in future be supplied. It is a matter for consideration whether it might not replace the cavalry cloak altogether. Cloak. The latter is cumbersome and adds greatly to the weight on the horse, especially when wet. The pattern (khaki) supplied to the Yeomanry was generally found too thick to roll, but the colour was preferred to the dark grey or blue, worn by some of the corps. What is known as "the torpedo" pattern cape proved very serviceable, and was liked by the Corps, which used it, being somewhat like a macintosh cape.

558. The breeches should be of Bedford cord which seemed to be preferred to that of any other material. Laced at the knees, instead of with buttons, side pockets preferred to those at the waist. Overalls should also be of Bedford cord. Breeches.

559. The "Stohwasser Company's legging" was generally much preferred to the puttie, and there seems no reason why it should not be universally brought into use for mounted men. It will last out many pairs of putties, and is more easily taken on and off and adjusted. The buckles might be in front of the new pattern instead of at the sides. This company have introduced several new patterns of military equipment, such as blanket-coat-suits, F.S. caps, belts, spurs, &c., all of which seem deserving of consideration. Leggings.

560. Boots, brown, ammunition, as at present. Spurs and straps ditto. Boots.

561. In regard to head-gear the helmet was liked by many better than the slouch hat, and if properly made and fitted, it is a question whether it should not be adopted in future. If worn with any metal badges they should be removable for service. The field service forage cap is suitable for morning and evening wear, but in a strong sunlight there is no protection for the eyes; for this reason, the new pattern flat-topped peaked staff cap is preferred by officers, and if any change is made in the present service forage cap for the men, it should be in the direction of providing them with a peak, or shade for the eyes, somewhat of the pattern of that patented by the Stohwasser Company. (See Appendix No. 95.) Head-gear.

562. The underclothing sent out for the Yeomanry proved very good. There were, however, one or two directions in which improvement might in future be effected. Under-vests were in demand, sufficient not having been sent out. The thick jersey or sweater was useful, but generally too thick, so was the great coat. It is thought that patterns of all underclothing and necessities should be sealed and kept with the headquarters of the special service squadrons. Under-clothing.

563. The future uniform of the Yeomanry should, it is submitted, be of one pattern throughout. The object to be attained should be that of making it as serviceable, smart, and inexpensive as possible, and the present diverse, multifarious, and expensive regimental patterns should be gradually changed for something of a more practical and useful nature. It is proposed to form for the future an "Imperial Yeomanry" service, retaining, however, the territorial names and titles of the several county corps. There seems nothing in this proposal to prevent the retention of such facings, badges, or devices on the universal pattern uniform, as may be considered appropriate for the regiments concerned. All of these have traditions and associations which it is no doubt desirable to preserve, but none of these are likely to exceed in value the prestige attached to the name of "Imperial Yeomanry," for services rendered to the country in the recent field operations in South Africa. Future uniform.

564. In regard to the exact pattern of the future uniform, this can best be settled by a representative Committee of Yeomanry officers, as soon as the general principle proposed receives the authoritative stamp of official approval. A smart jacket of the general service kind, breeches and leggings, with overalls for foot parades, cap, and helmet or hat, seem to be the chief requirements. If officers desire to provide themselves with expensive full dress or mess uniforms, this should be a matter for separate consideration, subject to eventual official sanction, but it may be remarked such expenses in costly uniforms have often, hitherto, had a deterrent effect on officers wishing to join the Yeomanry, and, therefore, if they can agree to have one, instead of two classes of uniform, it will be best. Pattern of future uniform.

565. These proposals will not, perhaps, meet with the universal concurrence of Yeomanry Cavalry Commandants, but it is thought that when the matter is fully considered by their representatives in committee, objections likely to interfere with the efficiency of the force will be removed. It must be remembered that one of the chief causes for the decline in the established strength of the Yeomanry (14,139 in 1889-90 to 11,891 in 1898-99) has been the excessive expenses which both officers and men have been put to in the up-keep of their uniform and kit. Some regiments are considerably in debt,

and into this indebtedness close inquiry should be made. Any attempt to expand the force on existing expensive lines will fail, whereas reconstruction on a more modest and practical basis is likely to succeed. These remarks are submitted with some diffidence, as they are not the result of any very extensive consultation with Yeomanry Commandants, but the majority will probably have the good sense and judgment to accept any changes likely to be for the advancement of the force to which they belong. It is proposed hereafter to submit patterns for approval, in accord with designs being now considered by military committees. Once patterns are decided on, they should be sealed, and no deviation therefrom in uniform, accoutrements, or saddlery should be permitted without official sanction from Army Headquarters.

**Clothing
and
equipment.**

566. The usual articles in clothing, accoutrements, and saddlery, with prices paid in a Yeomanry regiment, will be found in Appendix No. 91. From this it will be seen that the initial cost of the articles provided by the regiment from contingent funds, cost about £10 3s. per man, whilst those which are provided at the Yeoman's expense cost £8 11s. 6d. This, however, varies in different regiments. A soldier of the Cavalry of the Line costs in clothing annually £4 15s. 7d. It is thought that in future, any such articles required on the new scale, should be supplied from Pimlico, or Government departments, either in material or made up. The system of making the Yeoman pay, at his own expense, almost half the cost of his uniform, should be abandoned. It is, indeed, a question whether he should not be clothed and equipped under the same system as any other branch of the Cavalry service, even though this may call for a total revision of the Capitation Grant. The details of this matter can best be worked out by the Headquarter's Staff, and Yeomanry officers proposed. For the present, the estimates are framed on the contingent and clothing allowances shown in the tables, which may possibly be considerably reduced under the proposed arrangements.

Saddlery and Horse Equipment.

Saddles.

567. Of the various kinds of saddle used by the Yeomanry, the plain flapped pattern without the cantle, was perhaps the best. The great desideratum is lightness and strength. The Indian pattern was the one which nearest reached this. Everything superfluous should be dispensed with, such as heavy wallets, shoe cases, cruppers, and breast plates. Bridle, plain, and with headstall. Pelham bits are preferable to the heavy military pattern, but they should be broader and stronger than those hitherto supplied. There seems a general opinion that the horse is much overlaid, and that everything possible should be done to lighten his burden, and to carry all that can be dispensed with in light carts. The Boers were more mobile than our mounted troops, in consequence of their dispensing with everything possible from the horse's back, and carrying their kit in waggons or carts or on spare horses. Light saddlery, one blanket, and a pipkin, or small cooking tin, with "biltong" food was about all they carried. The nearer we approach to this system the greater will be the mobility secured, but preconceived notions about military saddlery and horse equipment must be abandoned in favour of a practical system of lightening the horse's load, and making the men also dispense with everything they can conveniently transfer from their bodies to the light cart. Many of the Yeomen, not very good riders at first, were so encumbered with kit that they had the greatest difficulty in getting on and off their horses at all, particularly when their mounts exceeded 14.2 in height.

**Lightness
greatly
desirable.**

568. There is no reform more needed for mounted troops than this lightening of the horse's load, and most general officers condemned the manner in which the men were overburdened. Some of the Yeomanry and Colonial Corps who dispensed with all they could, and placed the surplus on carts, were most in demand for rapid movements.

**New
pattern
patent
saddle.**

569. There is a new pattern, patent saddle, the invention of Major-General E. L. Elliot, C.B., D.S.O., Inspector-General of Cavalry in India, which appears to possess considerable advantages over that in use at present. It is automatically adjustable to the shape of the horse, gives a maximum amount of seat room without increasing the length of that portion of the side-bars which distribute the weight, and the component parts are detachable, and interchangeable. It is understood that this pattern is being tried by order of the War Office, and if results are satisfactory, it might be considered with other patterns which will doubtless be submitted as the result of the war. If it is decided to lessen the amount of kit carried on the saddle, it is suggested that the cantle of this saddle be made lower, so as to render it easier to mount and dismount.

570. If spare horses are to be allowed in future for service companies, as remounts and for surplus kit, then it will be necessary to perhaps consider what will be the best pattern saddle for the required purpose. A committee will, doubtless, be appointed to think out the whole question, and the Yeomanry service squadrons should adopt the pattern decided on as a portion of their field equipment.

Regimental or Squadron Kit Carts.

571. Probably a new pattern of kit cart will have to be devised, but its necessity is now proved to be as great as any other portion of the transport of mounted troops. The Boers carried their kits on "buck" waggons, with oxen or mule teams, or in rapid movements on "Cape carts" or "buggies." Much depends on the nature of the ground, but what is required is a vehicle which will go over bad roads, or no roads at all, up and down "spruits" or water courses and across streams. These conditions will have to be met in almost every country where mounted troops operate. Regimental or squadron kit carts.

572. Each Yeomanry service squadron should be provided with the proportion of carts it may require for this purpose. They should be constructed of as light a pattern as possible combined with the greatest carrying capacity, so that every article hitherto thought to be indispensable for the horse and the man, and which must be kept up but can be temporarily got rid of, may be therein placed. Supplied to the Yeomanry.

573. These carts should not be allowed of any unauthorised pattern, but should be of the approved service kind when it is definitely fixed on. They will probably require two horses each, and be of light draught. They should accompany the regiment or squadron in all its marches or manœuvres, packed in the manner they would be under service conditions. Pattern.

574. They should be supplied by Government for the period of annual training of the Yeomanry in the proportion fixed for each squadron, during which period the corps will be responsible for their care and management as well as for the horses and harness lent. Supplied during annual training.

575. Light tongas with the Indian currie draught might be made very useful, as they have been proved efficient in the field. The carts in use in India with the Jeypore transport train, which that State keeps up as part of the Native Imperial Service contribution for the Empire's defence, are as efficient, perhaps, as anything similar which can be desired. Considerable money awards have failed to produce much improvement in the pattern, and for mule draught, they have proved under actual service conditions excellent. Possibly it might be worth while to obtain this pattern, with a view to its utilisation, if nothing better can be obtained. Indian carts.

Appointments from the Yeomanry.

576. Amongst the concessions which might be suitably made to the Yeomanry, towards making service therein more popular, is the grant of commissions in the regular cavalry to officers who have served in the Yeomanry. This privilege is allowed to the Militia, but has hitherto been denied the Yeomanry. There seems no reason why this should be so, and details of the system under which these commissions should be allowed might be worked out by the proposed staff of the Yeomanry, at Army Headquarters. Instances have occurred recently in the field where Yeomanry officers have proved themselves worthy of commissions in the regular cavalry, and they have accordingly been gazetted thereto. There are many Yeomanry officers who are keen soldiers, and have a good knowledge of their profession. It is a mistake to deny them the opportunity of entering the regular service from their own, provided they can show similar qualifications for commissions to those which are required from militia officers. It is considered also that para. 509 of the Royal Warrant for Pay and Promotion should be made applicable to the Yeomanry. Grant of commissions.

Staff of the Future Yeomanry Force.

577. In addition to there being an Inspector-General of Auxiliary Forces for the Headquarters Staff of the Army, there should, it is thought, be representatives of the Yeomanry to assist the Commander-in-Chief in its re-organisation and management. This should be regarded as separate from the duties of inspection. For this purpose a deputy adjutant-general and an assistant adjutant-general should, it is suggested, be appointed, and officers should be chosen of known administrative ability, and with knowledge of the Force and its requirements. It is impossible to expect good results from an inadequate staff, insufficiently acquainted with the subjects with which it has to deal. The organisation of the Imperial Yeomanry is a case in point. No doubt some mistakes were made by the Committee to which the War Office delegated the duty of its formation. It is, however, probable that more would have been made by officers not so well acquainted with the conditions of the Force, and not in touch with it, and the organisation would not have been so rapid. Representatives of the Yeomanry at headquarters.

578. To commence with, at all events, therefore, any new organisation should be conducted at the Headquarters of the Army by those having some practical knowledge and experience of the working of the Yeomanry. Once formed and established, reductions in this staff may be feasible and desirable. If this system be adopted, there will probably be no necessity in the future for an outside agency as was the case when the Imperial Yeomanry was formed. At the same time, however, the system adopted in many respects worked well, and the Staff at Army Headquarters might possibly wish to form a similar agency to assist it when occasion required, provided it can be suitably obtained. There were many directions in which the Imperial Yeomanry Committee were able to organise and assist in the formation of this force, which the War Office admitted were of great value.

**Decentrali-
sation
of work.**

579. In connection with this matter, there may have to be, hereafter, considered the question of the decentralisation of work at Army Headquarters, and if any experience gained in the organisation of the Imperial Yeomanry was found useful in that direction, it may perhaps be considered allowable to refer to it here. The experiment was a novel one, but had satisfactory results. These have been defined by the Secretary of State for War, as having enabled Her Majesty's Government to add to her Forces, more than a whole Army Division of well equipped fighting men. The work which was undertaken could never have been brought to such a successful issue, without the constant co-operation, and assistance of the officials of the War Office, Civil and Military, and to them is greatly due the high expression of approval which was conveyed to the Imperial Yeomanry Committee, in the following terms:—

“Finally, the Marquess of Lansdowne wishes to express on behalf of Her Majesty's Government, their sense of the great debt which the State owes to the Committee of the Imperial Yeomanry, and their appreciation of the manner in which, in response to a sudden call, and without any previous organisation, the Committee addressed itself to the onerous duties which it has performed. Her Majesty's Government cannot but feel that it must be to that Committee, collectively and individually, a just and enduring pride, that at a memorable time, it should have been able to render to the Empire a service of such importance.”

**Yeomanry
Committee
at head-
quarters.**

580. It must be remembered that if such successful results can be obtained for a separate organisation, conducted on non-official business principles, it is an argument in favour of the decentralisation of work in the present system of administration, always provided it be conducted as a branch of the Controlling Authority. Should it be at any time desired to resort to the experiment again, in this decentralisation of work, the suggestion is made, though with some diffidence, that this branch of the service might be allowed a separate office, for the conduct of its own business, under the control of the Inspector-General of the Auxiliary Forces. It has been proposed in para. 515 of this report to have at Army Headquarters two Yeomanry Staff Officers, to represent the Force, assisted by three additional Officers of Yeomanry, to be elected triennially by Regimental Commandants. The services of the latter would only be called for, in Committee, when necessary, but the quorum of five officers would be sufficient to deal with and submit for orders, all questions of organisation and expansion of their own Force which would come before them. This system is in fact much the same as that adopted by the Imperial Yeomanry Committee. It would not, however, be necessary to have so many branches, as no doubt, the sections of Clothing and Equipment, Transport and Finance, need not be entirely separate from those of the Army Departments. Co-operation with them would be required, but the War Office would be relieved of many details with which it must be now over-burdened. In war time this would be of advantage, for the Committee proposed would then be free to think out and organise, matters which might possibly be otherwise overlooked. Moreover, officers and men of the Force would know that it had its own representative body to which to refer, and such references would perhaps be made more freely than to a General Officer. The Force in its constitution is somewhat an exceptional one, and is deserving of special treatment. There were many matters which came before the Committee, and many offers of substantial assistance were made it, regarding which the central bureaucracy would probably have never been approached. The business of augmentation and expansion of the Force proposed in this report, is perhaps more likely to be brought to a successful issue by a separate office of the kind, than by other means. The reason is not far to seek. Those concerned, of all classes, like to be kept in touch with coadjutors of their own, who are in sympathy with them. This may possibly be regarded as a somewhat sentimental view of the question. Nevertheless it has its effects on results, which it is advisable not to wholly ignore. The best method of securing good results should be adopted. If that method was satisfactory in past working, there is every reason to hope it might be made still better in the future. The experience gained is useful, and if properly utilised a much smaller clerical establishment would in future be required, and the business could doubtless be more economically managed in many directions. The principle should be that of utilising existing branches of the Administration as far as possible instead of duplicating them on a small scale. Thus, it has been proposed, for—

example, to utilise the services of Yeomanry Adjutants in the Remount registration system, both for their own Corps, and for the service at large. By this means horses might be secured for both, in larger numbers and at cheaper rates than hitherto. On the occurrence of a sudden demand they could be obtained through the Agency of the Remount Department, instead of under the Committee's arrangements as formerly. Similarly with Clothing and Equipment, the Army Departments of supply should meet the demands of the Yeomanry Agency, instead of its having to resort to the open market, often at an increased cost for stores the mere inspection and passing of which cost both unnecessary time, and money. On the other hand it may be remarked, that when the regular Departments were unable to provide certain stores, the Committee, with a free hand, was able to obtain them rapidly and in a satisfactory manner. This was the case for instance in the provision of saddlery required at short notice for the Rhodesian Force. They were obtained from the Austrian Government and from India, at cheap rates, and proved satisfactory. The principle of decentralisation is applied, in such matters, to the Volunteer Force with good results, the object being to make it as self dependent as possible. With any considerable addition to the regular and Auxiliary Forces, the more this system is adopted, in co-operation with the regular Departments of the Army, the better. The object sought is not to undertake work which these Departments can do best, but to relieve the Central Administration of much unnecessary detail by decentralisation. Any unnecessary duplication of Offices or Agencies is to be deprecated, but real decentralisation of work cannot be effected without some division of labour. This division can be thought out, and formulated by such a Committee as is here proposed.

Future
Imperial
Yeomanry
administra-
tion.

Adjutants for Each Corps.

581. The present regimental staff of the Yeomanry corps is insufficient. There should be a permanent adjutant allowed for every regiment. The present system is to allow an adjutant to each Yeomanry brigade, *i.e.*, one to every two regiments. An assistant adjutant is allowed to the second regiment, but he is not on the permanent or paid staff of the corps, and is usually an officer of Yeomanry instead of the Regular Service. Most commanding officers are of opinion that this arrangement does not work well, and that the efficiency of their corps and their recruitment would be increased if there were a separate adjutant for each regiment. This will be the more necessary if service squadrons are to be formed as is here proposed, and if the period of training is to be increased, and a more practical method of instruction adopted.

Adjutants
for each
corps.

582. It may be possibly considered that there is not sufficient employment to justify the appointment of a separate adjutant to each corps. If this is so, then the duties of the adjutants should be increased. One of the methods by which this might be effected is to depute to them the duty of registering horses for the use of their corps and the service generally, so that remounts would be readily obtainable, both in peace or war. They would be often in touch with Yeomen farmers and others in the counties where horses are bred. Valuable information might be in this way secured, which would be of use to both the Yeomanry, and Regular forces. The system of registering horses for a nominal fee of 10s. per annum is a good one, and it is understood it was found of great help in securing remounts during the past campaign. The adjutants might act in communication with the Remount Department on this subject, giving it all help required, and practically becoming District Remount Agents. Rules could then be prepared showing exactly what they would have to do, and a limit should be placed on the number of remounts to be registered. On this number will depend the financial effects of the scheme, which cannot be here estimated. It is manifest, however, that the registration system, if carefully organised, is as cheap a method of securing horses for war time as can be devised. Its extension, as well as that of the hire system of £5 per annum to each Yeomanry recruit, would not be without good effects on the horse-breeding industry of the country.

Duties of
adjutant
increased.

Appointment of New Yeomanry Committee.

583. Since the foregoing portion of this report was written, the Secretary of State for War decided to appoint a Committee to consider most of the questions which have already been dealt with here, and I was nominated a member. It was considered, however, to be only right to place before this Committee the conclusions which have been here recorded, and with this object in view he was officially addressed in a letter which forms Appendix No. 5 of this report. The Secretary of State concurred in the views expressed in this letter, that the proposals already made should be placed on record, and was good enough to arrange that this Section of the Report should be laid before my colleagues of the Committee for their consideration.

**Constitution
of the
Committee.**

584. The constitution of the Committee was as follows:—

Lieut.-Colonel the Right Hon. Lord Harris, G.C.S.I., G.C.I.E. (Royal East Kent Yeomanry), *Chairman*.
Colonel the Earl of Dundonald.
Colonel Viscount Galway, A.D.C. (Nottinghamshire Yeomanry).
Colonel A. G. Lucas, D.A.G., Imperial Yeomanry (Suffolk Yeomanry).
Lieut.-Colonel Rolleston (Imperial Yeomanry).
Captain the Marquis of Bath (Wilts Yeomanry).
Captain Sir J. Dickson-Poynder, Bart., M.P. (Imperial Yeomanry).
Mr. R. H. Brade, of the War Office, as Secretary.

585. It is not necessary here to detail the discussion contained in the Committee's Report, which has already been submitted for consideration and orders, but it seems desirable to refer to their recommendations, so as to show in what respects the conclusions arrived at agree, or differ, from those already made here:—

**Report to
be circu-
lated to
Yeomanry
regiments.**

(1) The Committee have proposed that their Report should be circulated to Officers Commanding Yeomanry Regiments, as shown in their introductory paragraph. It was not proposed in the foregoing recommendations, to do this in regard to the present report, because experience has shown that when a large number of Officers are consulted, there is a great conflict of opinion in regard to matters of military detail, some of which are often involved in great doubt and uncertainty. Practically, however, it is satisfactory to find that much the same conclusion has been arrived at, for it will be observed that it has been here proposed to appoint a representative body from Yeomanry Commanding Officers elected by them triennially, to consider matters of detail, and to place their suggestions and recommendations before the Secretary of State for War and the military authorities for consideration, before effect could be given to any of them. It is thought that the proposal made to have an elective community to consider the questions referred to, is much the same as that of circulating either this report, or that submitted by the Committee, to Officers Commanding all Yeomanry Cavalry Regiments, for their opinion.

Title.

(2) The Committee propose that the Force should retain its title of Yeomanry Cavalry, or if His Majesty so pleases, be entitled "Imperial Yeomanry Cavalry." The suggestion already made in this Report is to the same effect, with the addition of the word "Cavalry" to the recommendation already made, and on the whole I have accepted the views of my colleagues in this matter.

There was considerable diversity of opinion amongst my colleagues of the Committee as to whether the word "Cavalry" should be used or not, some thinking that the Force of the future would partake more of the nature of Mounted Infantry than of Cavalry, hence the uncertainty. However, this is a matter which need be no longer discussed, as for all practical purposes "Imperial Yeomanry Cavalry" or "Imperial Yeomanry" amounts to much the same thing.

**Regimental
adjutants.**

(3) Restoration of regimental adjutants.

This proposal has already been made in the present Report, and although the reasons for having made it, are not given here in such detail as the Committee has made out, the necessity for the addition of these officers to the established strength has been, it is hoped, clearly defined, and must be regarded as one of the most necessary reforms in connection with the organisation of the Force.

**Permanent
staff.**

(4 and 5) In paragraph 3 of their Report the Committee have recommended an increase to the permanent regimental staff, on the ground that drill instructors are insufficient, that the number of permanent sergeants per regiment should be increased; that the regimental sergeant-major should be allowed warrant rank, and that Officers Commanding the Yeomanry should be consulted as to their experience of the effect of the past reduction of permanent sergeants, and that they should have some voice in the selection of the permanent staff. These recommendations were not included in the present Report. They are, however, excellent, and I am glad to be able to support the views of my colleagues and to express a hope that they will be accepted.

**Pay and
promotion.**

(6) Article 509 of the Royal Warrant to be made applicable to the Yeomanry.

This proposal was made in the present report, and doubtless formed the basis of the recommendation which my colleagues of the Committee have now made.

**Quarter-
masters.**

(7) Regimental quartermasters to be sanctioned.

This proposal has not been made in this Section of the Report. It may be noted, however, that in Section II, which deals with South Africa, the want of regimental quartermasters, or quartermaster sergeants, was strongly brought to notice, and for service in the field it was shown to be clearly necessary that in future, an addition should be made to the staff in this respect. The reasons for making this recommendation, as far as field operations go, were clearly detailed, and I can therefore express entire concurrence with this proposal.

Arms.

(8) Arms: Rifle, bayonet, sword.

What this Committee have recommended is, that the Force should be supplied with

whatever arms are considered by the military authorities to be the most useful in the future for mounted men. This is practically the suggestion made in the present Report. There can be little doubt that the fire-arm will be the rifle, long or short, and the utilisation of the bayonet or sword, must follow the course which the military authorities may adopt in future regarding the mounted service.

(9) Drill to be such as will instruct the Yeoman in reconnoitring and outpost duties, Drill and in the efficient use of the fire-arm in all situations.

This is practically the same recommendation as has already been made, except that here, the matter has been gone into with further detail, showing the reasons for the recommendations set forth, based on what was seen and heard in South Africa.

(10) Drill order.

The dress for drill order to be adapted to the changes and conditions of the drill of Drill order.. the future. A service kit of some neutral colour to be adopted.

This proposal is also practically the same as that already made in this Report, with the addition, that Government might arrange to give the material free of cost, otherwise the expense would be heavy on regiments having to supply their new outfit.

It will be observed in this Report that a proposal has been made to clothe the Yeomen with material supplied from the Pimlico Factory, at army rates; if not, indeed, that Government should undertake the entire supply in the same manner as is conducted for the regular cavalry. This proposal practically agrees with those under para. 8 (c), (d), and (e), of the Committee's recommendations.

(11) Economy to be recommended as regards full dress (para. 8b).

This proposal is the same as that already made in this Report. It is manifestly one, Full dress. without the adoption of which, unnecessary expense will continue to be thrown on Yeomanry officers, and this has been shown to have had a deterrent effect on their joining the Force in the past.

(12) The conditions for home service not to be changed. (Committee's report, paras. 9-23).

No proposal was made in the present Report to change existing conditions for home Home service. service, and it was certainly not in contemplation to adopt a change which would involve compulsory foreign service, as is referred to in para. 9 of the Committee's Report. What was here suggested, however, was the formation of Special Service Squadrons from amongst the various units of the existing Yeomanry Force, or from men who might join it for foreign service, with an increased emolument to encourage them to do so. The Committee have observed that it may be necessary, as regards this foreign service, to amend the present Act, or to make a special one. If this be found essential for the proposals already made for Special Service Squadrons, it will no doubt be given effect to, if the squadrons be formed.

(13) Army Act to apply during annual training (para. 10).

This proposal has already been made here, and it is satisfactory to find that it has Army Act. formed the basis of the Committee's suggestions.

(14) Regiments to train in lodgings, only with the consent of General Officers Annual training. Commanding Districts, but ordinarily to go into camp (para. 11).

In the recommendations made under this head in the present Report, it was said that the training should be held as near as possible to a good rifle range, and that the Force should be encamped under canvas, Government supplying tents, and billeting allowances being abolished. This is practically the same suggestion as has been made by the Committee, which, however, does not recommend a compulsory order on the subject, but that the going into lodgings might be made subject to the approval of the General Officer Commanding the District.

The recommendations made by the Committee that Government should provide for a supply of water, of camping grounds, and should defray expenses in connection with the ranges and musketry are subsidiary, but follow those already to be found in this Report.

(15, 16) Two alternative periods of training, at the option of the Commanding Officer Period of training. (para. 12).

As is shown in para. 12 of the Committee's Report (2) there is a proposal that there should be 21 days' compulsory training, with a minimum of 17 days; musketry to be done during that training. This is practically the suggestion already made, with the addition of an alternative one (1) for a period of 18 days on full pay with 14 days as a compulsory minimum; to include leave not exceeding 4 days on full pay, of which 2 shall be Sundays. Also 1 day's full pay for each day's attendance on the range, for the annual course and for practice for it, not exceeding 3 days in the year. The alternative measure proposed seems worthy of consideration, and is one which, under the suggestions in the present Report, might be discussed by the elective committee of Yeomanry officers proposed.

(17) Officers' Pay and Allowances to be at Regular Cavalry rates, and to be Officer's pay and allowances. consolidated.

It will be observed that in this Report it was suggested that the question of Pay and Allowances should be regarded as one to be very carefully considered hereafter by an elective committee of officers appointed for this object, but that for the purposes of the

Report it was necessary to make some definite proposals, so as to show the approximate financial results, as a basis on which to form a detailed scheme of the Yeomanry of the future. The pay in the statement showing these financial results, was fixed at Cavalry rates, a consolidated sum of not less than 10s. (which was the proposed Yeoman's pay), being fixed for subalterns, who hitherto drew, at the regular Cavalry rates, less than this sum. To all intents and purposes, therefore, the proposals made are the same as those suggested by my colleagues of the Committee, and I agree with them that pay and allowances should be consolidated.

Pay of men. (18) Men's pay to be 10s. a day (para. 13*b*).

This proposal is identical with that already made in this report, and therefore needs no further comment.

Horse allowance. (19) Horse allowance to be fixed at £5 for Yeomen producing a horse approved by the Commanding Officer (para. 14*a*).

This proposal is similarly identical, but has the addition of the horse being subject to the approval of the Commanding Officer, which is an obvious necessity.

Provision of horses. (20) A scheme for the provision of horses to be prepared (para. 14*a*).

This proposal is also identical with that already made, the scheme for the extension of the present system of registration of horses being referred to in much the same manner as that in this report. The proposal that Yeomanry adjutants should be employed on registration duty is one that has also been made, and it is hoped it may be accepted. The Committee's proposal, however, that Government remounts might be sold at a reduced price to Yeomen, with a liability upon the purchaser of a certain number of years' service with the Yeomanry, the horse to be held in readiness for re-purchase by Government if the Reserves are called out, but the purchaser to become the absolute owner at the end of the contract term, is a new one. It is no doubt sound, and in every way worthy of careful consideration.

Injuries to horses. (21) Compensation to be allowed for injury to horses on the recommendation of Commanding Officers (para. 14*b*).

This is a new proposal, which has not found a place in the present report, but is an excellent one, and it is hoped that it may meet with approval.

Contingent grant. (22) Increase in the contingent grant (para. 15*a*).

The first portion of the Committee's recommendations, that an additional £2, as in 1900, should be allowed, to the present rates, for each man who becomes efficient, is one which has already been made here, and the financial statements have been based on the assumption that it would be granted. The proposal, however, that the officers who attend the annual training should draw the contingent grants for their regiments, as is the case in the Volunteer Service, is a new one. The reasons given for recommending it are strong, and it is hoped will be found sufficient to justify its adoption. The fact that some regiments are indebted, to a considerable extent, has been already brought to notice, and forms one of the reasons for the recommendations for the increased grant of £2 referred to. The Committee propose that an enquiry should be held, with a view to ascertaining whether Commanding Officers have been economical or not in the management of their contingent funds, and that they should be relieved of the debt by Government. This proposal is an excellent one, and it is hoped that it may be accepted. It goes further than anything in this respect proposed in this Report, but is manifestly only fair to the corps concerned. In the concluding paragraph of 15*a* of their proceedings, the Committee have recommended that Commanding Officers should be allowed to indent on the funds of future years, in order to pay for the initial cost of clothing, and equipping the recruits of the new unit, instead of having to raise a loan. It is shown, however, in this Section, that the allowance for this purpose, can, under paragraphs 239-41 of the Yeomanry Cavalry Regulations, be issued as required for 3 years in advance for any newly formed unit.

Indebtedness of regiments. (23) Inquiry as to the indebtedness of regiments; debt to be taken over by Government where good cause can be shown.

This proposal has already been referred to above.

Store-room allowances. (24) A grant of £20 per annum per store-room to be allowed (para. 15*b*).

This is a new proposal, which does not find a place in the present Report; it is an excellent one, and good reasons have been shown for its adoption.

Ammunition. (25) Ammunition up to 200 rounds per man to be issued free, and 100 rounds extra at half price (para. 16).

This proposal is also a new one, and it is hoped it may be accepted.

Rifle ranges. (26) Government to assist in the provision of ranges (para. 17).

This proposal was not referred to in this Section, because Government ranges have hitherto, as far as possible, been made available for the Yeomanry. The Committee, however, go further, and propose that all should be placed at the disposal of the Force, equally with any branch of His Majesty's regular forces. It is hoped that the proposal made may be sanctioned.

Yeomanry schools. (27) Re-establishment of Yeomanry schools (para. 18*a*).

The re-establishment of these schools, as proposed by the Committee, was not referred to in the present report, but the recommendation that there should be a compulsory period of instruction for officers, with regular cavalry regiments, has been entered. Thus, if the

school be not re-established, the proposal for instruction with the regiment is practically the same as that already made, but I entirely concur with my colleagues, as to the advisability of re-establishing schools of instruction.

(28) Officers and men to be encouraged to attend manoeuvres, receiving pay at army rates (para. 18b).

Yeomanry
to attend
manoeuvres.

The proposal already made was to the effect that officers should be encouraged to attend such manoeuvres, and that every third or fourth year, the Yeomanry from selected counties should be called out to join in the regular cavalry manoeuvres, in place of their ordinary training.

It is proposed by the Committee that the officers and men should draw pay at regular cavalry rates when attending these manoeuvres, and that they should endeavour to get together detachments of men from their own regiments, or even from several others, for the same purpose. The Committee's proposals go further than those made here, and it is hoped that they will be given effect to.

(29) Representative officers of the Yeomanry to be appointed at army headquarters (para. 20).

Yeomanry
representa-
tives at
head-
quarters.

This is practically the proposal already made in this report, except that one officer is only proposed and that the grade to be held by the officers nominated has not been referred to by the Committee.

(30) Decoration for long service to be granted to the Yeomanry (para. 21).

Decoration
for long
service.

An excellent proposal which has not found a place in this report, and will doubtless be very carefully considered.

(31) Formation of a Yeomanry Staff Corps, and the enlistment of Yeomen for foreign service to be considered with a view to the experiment being tried (para. 23).

Yeomanry
Staff Corps
and enlist-
ment of
yeomen for
foreign
service.

The financial results of the Committee's proposals will be found in Appendix No. 96.

The proposal to establish the Yeomanry Staff Corps in the manner suggested by the Committee is in every way an excellent one. It was not put forward here, because it was considered that if the Force should be augmented in the manner proposed therein, there would be little chance of the formation of any separate corps of officers. The formation of this staff corps, however, is an excellent proposal, and if it can be organised in addition to the augmented units, it will doubtless add to the efficiency of the Force. It may be observed, however, that the Committee's proposal does not define in any way, the exact method by which the Yeomanry Force of the future is to be augmented. Without these details it is impossible to say how far a Force for service at home or abroad, can be expanded, neither is it possible, without definite proposals in this respect, to work out the financial details. Careful thought and consideration was given to the proposals put forward under this head in the present Report, and it is thought that they might, at all events, be tried.

With regard to the proposals made for increasing the Force in men, the Committee have given good reasons for showing the difficulties likely to arise on the part of employers, in sparing young men from their employment for enlistment in the Yeomanry. They very rightly show that they are unable to speak with much certainty of those who may join in future, if a considerable increase is sanctioned, as has been proposed in this Report. They, however, think that the question of expense should be set on one side to make the experiment. With this object in view they propose that foreign service Yeomen should be given something more than 6d. a day, and suggest that a bounty of £12 per annum in addition to all Yeomanry pay and allowances be offered. If Government will accept this liability, there can be no question of its having a great effect on producing the number of men required. It is hoped, therefore, that the question of augmentation, which is a most important one in the present proposals, will be viewed in a liberal spirit, and that the suggestion to grant £12 may be accepted. I have, as shown in my appended remarks on the Committee's proceedings, entered this sum in the estimates framed.

Increase in
strength of
force.

586. In summarising the difference between the Committee's recommendations and those contained in the present report, I am glad to be able to observe that my colleagues have practically accepted eighteen of those here made, three are partially the same, and the others are new. In the latter I have expressed concurrence.

587. My colleagues of the Committee have said in regard to the expansion of the Force (para. 22), that there are in the British Isles areas in which no regiments exist, or over which no recruiting is done, as well as some populous centres where new regiments might be raised. These I have ventured to name in this report, and subject to His Majesty's pleasure, trust they may be resorted to for the increase required. If not there will be difficulty in increasing the Force in the manner proposed. I have been asked, and have promised, to use my utmost endeavours to secure a consideration of His Majesty's Government in regard to a Yeomanry Force for Ireland. The decision to form Yeomanry regiments there would be received with considerable enthusiasm, and although legislation might be necessary for the purpose, it is hoped it may be undertaken.

New
Yeomanry
corps.

Augmentation of strength.

588. The questions contained in this Section of the Report, regarding the formation of Special Service Squadrons to each existing Yeomanry regiment, of raising new corps in counties which at present have none, and of forming corps in large town centres, such as London and elsewhere, will I trust be considered, although they have not been definitely alluded to by my colleagues. Suggested augmentation is of comparatively little use, unless the approximate details of how it is to be done, are worked out. It may be said that such details should be left for the consideration of Yeomanry officers, or Lords Lieutenant of counties, but such important questions have to be in some manner first defined, or, at least, a definite proposal should be laid before them as a line to go upon. Otherwise, it is feared, that there will be great conflict of opinion, with doubtful results.

Paucity of officers.

589. The paucity of officers is a matter also which has to be considered. The augmentation proposed would require a considerable number of officers, and as many as possible should have some military experience. Although I concur in the views of my colleagues regarding the proposed Staff Corps, I trust that the officers for the proposed augmentation may be first secured, and, afterwards, a Staff Corps might be formed to which resort could be made, in time of emergency, or expansion for foreign service.

Finance.

590. In Finance, it is assumed that one of the first requirements is a knowledge of the approximate cost of any proposals which may be set forth. Endeavour has been made to show this in the present report, as without some definite idea of what is to be done, or of what form the augmentation or expansion is to take, it is impossible to frame an estimate. It seems probable that some approximate estimates will be required for budget purposes, but these cannot possibly be produced unless a definite plan or scheme of organisation is forthcoming. The proposal to allow £12 per annum for each Special Service Yeoman, who will thus be liable for service abroad, is vague, unless it can be approximately shown how many are to be offered this bounty, or when, and how, they are to be raised. If regiments, or batteries, in the regular service have to be augmented, or new ones formed, it is usual to state the numbers, and when the maximum, or minimum, number is fixed and sanctioned, a vote for the amount required is asked for, and measures are then taken to obtain the men. It is presumed that a somewhat similar course will have to be adopted with the Yeomanry Force. It seems also necessary to fix some approximate numbers to be worked up to for all Forces. One, in a measure, depends on another. If the Yeomanry strength can be raised to say 20,000 men so many Mounted Infantry more, or less, will be required, and so on, with the other mounted Forces.

Yeomanry officers at headquarters.

591. The necessity for an elective Committee of Yeomanry Officers at Army Headquarters, and of permanent representatives of that Force on the Staff, seems apparent for the proper consideration of such matters. They should be in touch with the military authorities, and be kept informed of what is going on, or what is proposed for other branches of the Mounted Service—strength, constitution, arms, equipment, uniform, horses, and so on. Unless this be done they will be manifestly working in the dark, and the proposals they may make will not be in accord with what is elsewhere under consideration, or proposed. Much thought, and consideration, are required for these, otherwise proposals made must be crude, and incomplete. The opinion of the Field Marshal Commanding-in-Chief, and of some of his Generals, are obviously essential, and until his views are ascertained, no scheme of Yeomanry organisation, for peace or war, can be of much value. When his views on certain cardinal points are known, it would then appear time enough to work out such details, as I have ventured here to roughly sketch out for his consideration.

CHAPTER XIII.

SUMMARY OF RECOMMENDATIONS AND SUGGESTIONS MADE
IN THIS REPORT.

SECTION I.

- Page 24. (1) Suggestions for future Base Dépôt Office at home, should one be formed.
- (a) Officer in charge to be directly under the Deputy Adjutant-General.
 - (b) Officer possessing practical experience in pay, recruiting, and quartermaster's duties to be secured.
 - (c) Suitable storage accommodation with shelves, etc., to be allowed if clothing and equipment is to be issued.
 - (d) Arrangements to be made for drilling the enlisted recruits.
- Page 36. (2) Drafts to be allowed for any future Imperial Yeomanry force, and that it be kept up to its full strength in the field.
- (3) A nominal roll of the whole force to be made.
 - (4) More care to be taken in writing nominal rolls, etc.
 - (5) Special attention to be drawn to the questions *re* "Marriage and Next-of-kin" in the Attestation Form.
 - (6) Also special attention to the Army Forms regarding Separation Allowance and Allotment of Pay.
 - (7) All Army Orders regarding organisation of Imperial Yeomanry to be printed in a pamphlet for ready reference.
- Page 37. (8) The special attention of Officers when appointed to be drawn to the most important military regulations.
- (9) Cases of Army Forms and Books be ready at Yeomanry centres for speedy distribution.
 - (10) The orders to be numbered consecutively throughout.
 - (11) The subject of Officer's rank in the field to be carefully revised.
- Page 40. (12) More care to be taken in filling up the Attestation Forms.
- Page 62. (13) The provision of clothing and equipment took some time, and if the embarkation of the Imperial Yeomanry had been postponed for a month it might have been better arranged.
- (14) Adequate provision to be made for the detailed inspection and passing of all articles of clothing and equipment before issue.
- Page 63. (15) All clothing and equipment to be supplied from the Central Office at Headquarters, or from some central camp as Aldershot or Hounslow.
- (16) A receiving and distributing Dépôt to be formed for Clothing and Equipment if undertaken by a Committee.
 - (17) The exact pattern and style of all articles of clothing, necessaries, and equipment to be laid down.
 - (18) The services of two experienced inspectors to be provided for the proposed Dépôt.

- Page 63. (19) A roster of regiments according to their dates of sailing to be determined, and this should be worked through systematically.
 (20) A thoroughly efficient quartermaster to be engaged at local headquarters.
- Page 64. (21) The material for frocks, trousers, &c., to be issued to regiments to be made up by local tailors if they are to be regimentally equipped.
 (22) A sealed pattern, with full particulars as to stitching, &c., to be sent with the material.
 (23) Hats to be stiffened with insoluble stiffening, as in Vero and Everett's hats.
 (24) Putties to be woven, not torn off the piece, with raw edges. The Stohwasser stocking is a good substitute for putties.
 (25) The colour of jerseys to be drab, and warmth is required, not great thickness.
 (26) Jerseys or vests for underwear in future to be supplied, instead of "sweaters."
- Page 65. (27) The weight, quality, and strength of the flannel for making shirts and belts to be carefully tested.
 (28) Great attention to be paid to the weight, texture, and softness of socks.
 (29) Drawers to be of the best lamb's wool or merino, with double seat-piece.
 (30) Waterproof sheets require strict examination in all details.
 (31) Kit-bags to be of waterproof material.
 (32) Haversacks to be of canvas, not of drill.
 (33) Samples of field dressings to be carefully analysed, to ascertain that they are antiseptic.
 (34) Bandoliers to be woven at the bend, *i.e.* with one edge shorter than the other, and they should be of the new War Office pattern, with double row of cartridges. The ones supplied to the Yeomanry of web were bad.
 (35) Water-bottles to be concave in the inner side, so as to fit closer to the body. Aluminium pattern best.
- Page 72. (36) A Supplementary Report and Statement of Accounts be submitted hereafter.

SECTION II.

- Page 82. (37) The Base Commandant to be kept advised by cable of all shipments of stores, as despatched, with name of vessel.
- Pages 82 and 104. (38) The Yeomanry staff at the Base to be attached to the Military Ordnance and Supply Department for the receipt and issue of stores—not separate therefrom.
 (39) Army Service or Army Ordnance men to be attached to Yeomanry Base Dépôt for store work.
- Page 88. (40) The Base Commandant not to be allowed to leave England until the majority of his staff are secured.
- Pages 89 and 104. (41) The duties of drafting, payment, invaliding, &c., of details of Imperial Yeomanry, to be done at the military rest camp, and not by the Imperial Yeomanry Base Commandant in a separate camp.
- Page 90. (42) Yeomanry letters to be sorted at the General Army Post Office.
- Page 91. (43) One director, with a capable staff of remount officers, to be responsible for the purchase, shipment, and landing of horses, and the formation of a dépôt, is the right system to adopt in future, if remount arrangements are to be conducted separately from that of the Regular Department.
 (44) The Yeomanry Remount officers at the Base to always consult the Imperial Remount Department regarding all matters of organisation, &c.
 (45) Cobs might have been bought in Basutoland, and as many local horses throughout the Cape Colony as possible.
- Page 92. (46) Small horses to be bought in preference to large ones to a greater extent than was done.
- Page 93. (47) A good horse hospital and pharmacy is necessary and should be placed under an efficient veterinary officer and funds required allowed him at the base.
 (48) Harness for dépôt and other work to be made in England of the South African pattern.

- Page 94.** (49) It is a question for an expert committee whether the rifle sling and bucket should not be done away with and the rifle slung on the back.
 (50) Similarly it should be considered whether it is possible to reduce the weight of all articles of saddlery.
 (51) Knee haltering is strongly advocated for South Africa.
 (52) Wooden pegs are generally condemned for picketting purposes.
 (53) Lighter horseshoes for the veldt are thought desirable.
 (54) All articles required for a remount camp should be sent out before the horses arrive.
 (55) Each remount when embarked to be provided with a head-stall and watering bridle separate from articles of the kind belonging to the ship or contractors.
 (56) In all standing remount camps the men's picketting gear and the horses' kit to be kept separate from the line gear required for these camps.
- Page 95.** (57) For South Africa the locally-made strong "buck-wagon" without springs and with a brake in the rear appeared to be the best wagon in use.
 (58) Hickory wheels were best for transport carts and those made in Indiana for wagons.
 (59) Among ambulances, the McCormac-Brook "Wheeled Stretcher Carriage" was notably efficient.
 (60) All vehicles for transport purposes should be supplied to the Yeomanry in future by the Transport Department.
- Page 97.** (61) Trained and qualified cooks to be, if possible, provided for each company with a sergeant regimental cook in charge.
 (62) The bell-shaped tent seemed inferior to the Indian General Service Field Pattern tent.
 (63) Care to be taken that tents are the last thing put on board ship so that on landing they can be easily got at.
 (64) Some tents to be sent on in advance to the Base Dépôt.
- Page 98.** (65) The question of re-establishing the regimental paymaster system to be carefully considered for any future Imperial Yeomanry Force in the Field.
- Page 99.** (66) The credit voucher system should be adopted at the dépôts, instead of cash sales.
 (67) In the final adjustment of accounts the services of Colonel Feilden and Captain Bruce should be retained at either the office of the Deputy Adjutant-General, Imperial Yeomanry, or at Shorncliffe.
 (68) The Field Paymaster's office might with advantage have been at the Maitland Base Dépôt Camp, instead of at Capetown.
- Pages 100 and 105.** (69) All the Yeomanry stores to be in future handed over to the Army Ordnance Department at the Base, with officers of the Imperial Yeomanry to help.
- Page 100.** (70) That better trained quartermasters are necessary in the future.
- Page 101.** (71) Warm jackets ("British Coats, Warm") to be provided on any future occasion.
- Pages 101 and 105.** (72) In future the Imperial Yeomanry advanced dépôts to be incorporated in those of the Regular Army.
- Page 101.** (73) The advanced dépôts, if formed, to be under the general control of the Base Commandant who should be made responsible for them.
 (74) Separate advanced Post Offices for the Imperial Yeomanry are not necessary, as the work might be done by the Regular Army Postal Service.
- Page 102.** (75) The drawers supplied were too thick, and in future material better fitted to wear under breeches should be supplied.
- Page 103.** (76) No regimental transport of diverse patterns to be allowed to be taken by the Imperial Yeomanry in future.
 (77) The Indian saddlery, although very cheap, proved very good.
 (78) The supply of line gear, head and heel ropes, and iron pegs, to be made on a larger scale.

- Page 103. (79) Line gear is essential for standing camps and iron pegs with rings, as wooden pegs are unsatisfactory.
- (80) A better supply of horses could have been kept up for the Yeomanry through their own agency than otherwise.
- (81) In future the Yeomanry might supply their own horses if exigencies require it, but this might be done under the general direction of the Imperial Remount Department.
- (82) Separate Yeomanry rest camps were unnecessary as the Yeomanry might have gone to the military rest camps, under the control of some of their own Officers.
- Page 104. (83) The Base Depot for the Imperial Yeomanry was of distinct advantage to the force, which could not have done without it.
- (84) Officers and men of the Base Depot ought not to be made available for the front until the work is reduced, and then the depot should be gradually dissolved.
- (85) The Yeomanry might be under the same orders as the regular service with regard to discharges, resignations, rejoining, &c., on field service.
- Page 105. (86) A more rigid inspection might be made of the companies before embarkation to ensure their being properly equipped.
- Page 106. (87) A carefully thought-out scheme for Yeomanry colonisation is recommended, Cape Colony seeming to have a great future for horse-breeding.
- (88) Capital is essential for either agriculture or stock-farming, and the State should help in the provision of mares and stallions, besides giving grants of land.
- (89) A scheme might be considered, giving Yeomen who intend to settle in South Africa, grants from the Committee's private funds.
- Page 107. (90) Special facilities to be given to the Imperial Yeomanry so as to encourage them to join the Transvaal Constabulary.
- Pages 108 and 38 (91) It is strongly recommended that all county and private funds should be centralised.
- (92) The machine guns not to be regarded as the private property of separate companies, but to be held available in batteries for the whole force.

SECTION III.

- Page 111. (93) The Yeomanry to be equipped with the rifle of best and lightest possible description and having the longest range.
- (94) The Yeomanry might in future be called the "Imperial Yeomanry" or "Imperial Yeomanry Cavalry."
- (95) The Yeomanry to be brought under the Army Act.
- Page 113. (96) Every Yeomanry Corps to be increased by a special foreign service squadron, each man having an additional grant of £12 per annum, for liability to serve abroad.
- (97) Six Yeomanry Corps to be raised in Ireland, with the gracious permission of His Majesty the King.
- (98) New Yeomanry Corps to be raised in the great mercantile centres, such as London, Manchester, etc.
- (99) Yeomanry Corps to be also raised in counties which at present have none.
- Pages 114 and 126 (100) A permanent Committee of five Officers to be formed at the War Office to deal with Yeomanry questions, three of these to be elected triennially by Yeomanry Commandants.
- Page 115. (101) The pay of the men whilst training to be 10s. per day.
- (102) Each man providing his own horse during the period of training to be granted a £5 bonus.
- Page 117. (103) The clothing, accoutrements, and saddlery of the additional strength proposed to be met from the Capitation Grant which would cost about £15 per man if Government will not undertake the supply.

- Page 117. (104) This allowance to be issued as required for three years in advance.
 (105) An inquiry to be held by the proposed Committee as to how far existing Corps are in debt.
 (106) Additional concessions besides pay might be granted to the Yeomanry, such as exemption from service on juries and many others.

- Page 119. (107) The small book to be issued to the men in time of peace, so that they may get accustomed to it for pay purposes.
 (108) The period of annual training to be fixed at 21 days.
 (109) Every third or fourth year the Yeomanry to be called out to join in the regular cavalry manœuvres.
 (110) During the annual training the musketry course to be held and more attention be paid to the men's riding.
 (111) A month's training with a British Cavalry Regiment to be compulsory for every Yeomanry officer on joining, and every officer under field rank to be attached to a cavalry regiment for at least a fortnight every 3 years.
 (112) A certain test to be fixed and if this be not satisfactorily passed another month in extension to be required.
 (113) It should be optional with the officer undergoing the test to extend his period of training to three months or longer, and he should be encouraged to get together yeomen to join him.
 (114) During the time of training he should supply his own horses or be provided with one by the Remount Department.
 (115) Leave to officers and men during training to be restricted to four days, and pay to absentees be allowed only during that period.
 (116) Extra leave in special cases to be granted at the discretion of the Commanding Officer but without any pay.
 (117) Training to be held as near as possible to a good rifle range.
 (118) During training the force to be under canvas, Government supplying tents; and billeting allowances to be abolished.
 (119) More care to be taken in training the men, who should have to work as if they were in the field.
 (120) The force to be made as mobile as possible, with required transport.

- Page 120. (121) The special service squadrons to be specially trained, whether in regiments or companies, so as to make themselves quite efficient.
 (122) The best system for providing horses for a period of training to be adopted, either through the Remount Department, by hiring or by being borrowed from some mounted infantry force.
 (123) If the established strength of horses in the regular cavalry be increased horses might be lent to the Yeomanry.

- Page 121. (124) A small number of Government horses might be kept at some of the chief Yeomanry headquarters for instruction in riding.
 (125) Special service squadrons to each make their own arrangements for the horses required on foreign service, under the registration system a fee of 10s. per annum being allowed.
 (126) Arrangements to be made for the Remount Department to take over the remounts before embarkation (*see* 129).
 (127) The rifle, which is to be made more like a sporting weapon, if possible with other improvements suggested.
 (128) The rifle to be slung on the back if possible.

- Page 122. (129) The rifle, subject to the approval of the War Office Committee on Small Arms, to be cut much shorter, like that in use with the native troops in India.
 (130) The sword to be done away with, if the Committee of Experts approve and the sword-bayonet substituted instead.
 (131) Officers and non-commissioned officers to carry revolvers.
 (132) The bandoliers to be of a stronger kind of web, to take a double row of cartridges, and fitted with a triangle, on which to hang the haversack.
 (133) If leather belts are worn, they might be made to take cartridges and spare pockets, or cartridge slides to be made in all uniforms.
 (134) The arms and accoutrements to be carefully studied, with a view to rectifying all errors made in the past.

Page 122. (135) The uniform of the Yeomanry to be regulated by that of the regular army, i.e. if there is to be a "service kit," and that only, it should also be adopted by the Yeomanry. One class of uniform considered better than two.

(136) If the service kit is to be retained for foreign service only, then the special service squadrons to be provided with it either by Government or under regimental arrangements.

(137) The khaki serge jacket to be made a little longer, and to be supplemented by a drill jacket of the same pattern.

Page 123. (138) The jacket known as "British Service, Warm," to replace the cavalry cloak, which is cumbersome and heavy.

(139) The "torpedo" pattern cape proved serviceable, and either it or a mackintosh might be substituted for the cloak.

(140) Breeches and overalls to be of Bedford cord, the former laced at the knee instead of with buttons, side pockets preferred to those at the waist.

(141) Leggings might be universally adopted instead of putties.

(142) The new patterns of military equipment made by the Stohwasser Company are worthy of consideration.

(143) It is a question whether the helmet might not possibly be adopted in preference to the slouch hat.

(144) The field service forage cap might be improved by providing it with a shade for the eyes.

(145) The future uniform of the Yeomanry to be of one pattern throughout, regimental badges or devices being retained.

(146) The pattern of the future uniform to be settled by a representative Committee of Yeomanry officers, after the principle is approved.

Page 124. (147) Once patterns are decided on they should be sealed and no deviation therefrom to be allowed.

(148) The system of making a Yeoman pay, at his own expense, almost half the cost of his uniform to be abandoned.

(149) Everything to be done to make the horse's load as light as possible.

(150) Pelham bits preferable to the heavy military pattern, but they should be broader and stronger than those hitherto supplied.

(151) The plain flapped pattern without the high cantle was the saddle most liked by the Imperial Yeomanry, the great desideratum being lightness and strength.

(152) If Major-General Elliot's new patent saddle is adopted the cantle might be made lower, otherwise it would be suitable for the Yeomanry.

(153) The Yeomanry field service squadrons to obtain the best pattern saddle decided upon by the War Office as part of their field equipment.

Page 125. (154) Squadron kit-carts are most necessary, but they should be made sufficiently light to go over bad roads or no roads at all, up and down watercourses and across streams.

(155) Each Yeomanry service squadron to be provided with as many carts as required, they should carry as much of their *personnel* and horse equipment as possible upon these carts.

(156) These carts to be of an authorised pattern and to accompany the squadron in all its marches and manoeuvres in peace time.

(157) The carts in use in India with the Jeypore transport train might be considered if nothing better can be found.

(158) Light tongas with the Indian currie draught might be very useful as they have been proved efficient in the field.

(159) Commissions in the Regular Army might be given to any Yeomanry officer who has proved himself competent.

(160) Para. 509 of the Royal Warrant for Pay and Promotion to be made applicable to the Yeomanry.

(161) There should be representatives of the Yeomanry at headquarters to assist the Commander-in-Chief in its re-organisation and management.

Page 126. (162) If this proposal be accepted, there would be no need in the future for an outside agency such as was found necessary lately.

(163) Work to be decentralised as much as possible.

- Pages 116 and 127. (164) An adjutant should be allowed for each corps, instead of one between two, as previously (*see* Financial Statements).
 (165) If it is thought there is not enough work for one adjutant to each corps, then the duties of the adjutants might be increased by requiring them to register Remounts.

Recommendations of New Yeomanry Committee.

(Paras. marked (a) are practically the same as already proposed here; those marked (b) are partially so, and those marked (c) are new.)

- Page 128. (166) Their report to be circulated to Officers Commanding Yeomanry Regiments (c).
 (167) The force to be called the "Imperial Yeomanry Cavalry" (a).
 (168) Restoration of regimental adjutants (a).
 (169) The permanent regimental staff to be increased, and also the number of permanent sergeants per regiment (c).
 (170) The regimental sergeant-major to be allowed warrant rank (c).
 (171) Officers Commanding Yeomanry Regiments to be consulted as to their experience of the effect of the past reduction of permanent sergeants, and that they have some voice in the selection of the permanent staff (c).
 (172) Article 509 of the Royal Warrant for Pay and Promotion to be made applicable to the Yeomanry (a).
 (173) Regimental Quartermasters to be sanctioned (b).
 (174) The arms to be the rifle, bayonet, and sword (a).
- Page 129. (175) Drill to be more instructive in reconnoitring and outpost duties and in the efficient use of the firearm in all situations (a).
 (176) The dress for drill order to be adapted to the changes and conditions of the drill of the future (a).
 (177) Economy to be recommended as regards full dress (a).
 (178) The conditions for home service not to be changed (a).
 (179) The Yeomanry to come under the Army Act during the annual training (a).
 (180) During training, regiments to be in lodgings only with the consent of General Officers Commanding Districts, but ordinarily to go into camps (a).
 (181) Two alternate periods of training to be allowed, at the option of the Commanding Officer (a).
 (182) Officer's Pay and Allowances to be at Cavalry rates and to be consolidated (b).
- Page 130. (183) The men's pay to be 10s. per diem (a).
 (184) Horse allowance to be fixed at £5 for Yeomen producing a horse approved by the Commanding Officer (a).
 (185) A scheme for the provision of horses to be prepared (a).
 (186) Compensation to be allowed for injury to horses on recommendation of Commanding Officers (c).
 (187) The contingent grant to be increased (a).
 (188) Enquiry as to the indebtedness of regiments to be made, and the debt to be taken over by Government where good cause can be shown (a).
 (189) A grant of £20 per annum per store-room to be allowed (c).
 (190) Ammunition up to 200 rounds per man to be issued free, and 100 rounds extra at half-price (c).
 (191) Government to assist in the provision of rifle ranges (b).
 (192) The Yeomanry schools of instruction to be re-established (c).
- Page 131. (193) Officers and men to be encouraged to attend manoeuvres, receiving pay at army rates (a).
 (194) Representative Officers of the Yeomanry to be appointed at army headquarters (a).
 (195) A decoration for long service to be granted to the Yeomanry (c).
 (196) A Yeomanry Staff Corps to be formed, and the enlistment of Yeomen for foreign service considered (b).
 (197) Foreign service Yeomen to be given a bounty of £12 per annum as a retaining fee for liability to serve abroad (b).

2. The first part of the document is a list of the names of the persons who have been appointed to the various positions of the Board of Directors of the Corporation.

The second part of the document is a list of the names of the persons who have been appointed to the various positions of the Board of Directors of the Corporation.

The third part of the document is a list of the names of the persons who have been appointed to the various positions of the Board of Directors of the Corporation.

The fourth part of the document is a list of the names of the persons who have been appointed to the various positions of the Board of Directors of the Corporation.

The fifth part of the document is a list of the names of the persons who have been appointed to the various positions of the Board of Directors of the Corporation.

APPENDICES.

APPENDIX 1.

STATEMENT SHOWING THE ACTION TAKEN BY LORD LONSDALE TOWARDS THE FORMATION OF THE YEOMANRY FORCE, AT ITS COMMENCEMENT.

On November 9th, 1899, I had ready a fully equipped force of 500 men, and had at that date placed myself in communication with certain firms as regards transport waggons, tongas, saddlery, and clothing which would be necessary in the event of the War Office accepting the services of my Corps. During these investigations I became fully aware of the class and whereabouts of the various necessities for equipment, as I anticipated that a large force might be accepted.

When in India the previous year, I had seen an improved ambulance and transport "Murree" tonga used there, and one of these was imported to this country and tested. I also purchased and bespoke several of the Gloucester Waggon Company's waggons which were adapted for the dual purpose of transport and ambulance. Some of these were used in Westmoreland and tested on the mountains with the most favourable results.

The White Star and Allan Lines were communicated with.

Sir Thomas Lipton undertook to provide all food necessities other than meat rations. The supply of meat was undertaken by Mr. Grant, one of the largest and best-known butchers in London. Forage was to be provided by Mr. Bendelow, the well-known forage-contractor; and pressed hay from Canada, and patent horse food. Blankets were to be provided by the Westmoreland Woollen Company. Boots from a Leicester shoe factory. Waggons were ready, and tongas, at Gloucester. Saddlery from Austria; packs from France, and everything was arranged for, and ready to sail at short notice, except long rifles and ammunition, which I thought would be best left until I knew if this Yeomanry Corps was accepted for service.

I further ascertained, through private sources, that I could obtain a certain amount of saddlery from the Austrian Army, which saddle is undoubtedly of a very serviceable pattern. Pack-saddles were obtainable from France, but only to a small extent. Certain gentlemen in the City of London offered me, if I would undertake the command, to pay for the entire equipment of 1,000 men, transport, and every expense connected with them, provided I would undertake the organisation. I, therefore, wrote to Lord Chesham asking if he would undertake the command, I acting as Quartermaster-General to the little force. At that time, however, Lord Chesham did not think he would do so, and replied declining, but saying that he would consider the matter. Early in November, when I had everything ready to be purchased at very short notice, I saw Sir Evelyn Wood and asked him if the service of such a force would be accepted, but Sir Evelyn assured me that there was no possibility of this being done. On December 18th I again wrote to Lord Chesham, who was then starting with General Kelly-Kenny, and asked him to come up to Town and see me. Lord Chesham did so the following day, and together we went to the War Office where we saw the Under Secretary of State for War and also Sir Evelyn Wood. It was then arranged to raise a force of 3,000 men; and I pointed out to Lord Chesham that the horse department would now become a very important one and that a Committee should be formed.

APPENDIX 2.

LETTER FROM COLONEL A. G. LUCAS PROPOSING A COMPOSITE REGIMENT OF YEOMANRY FOR SERVICE IN SOUTH AFRICA, WITH REPLY RECEIVED NEGATIVING THE SUGGESTION.

November 14th, 1899.

DEAR GENERAL BORRETT,

If it is intended to send out more Cavalry Regiments to South Africa do you think there would be any chance of forming a composite regiment from the Yeomanry? It would be of the greatest possible benefit to the Yeomanry force. The Natal and Cape Volunteer Horse seem to have done good service and I feel sure the Yeomanry would do equally as well.

I would suggest that from ten to fifteen men be drawn from each Yeomanry Regiment, and if thought necessary, each man provide his own horse, and none but first-class shots and men recommended by their Commanding Officers be accepted.

I have not written officially on this question as I thought a private letter sent to you would, if my suggestion were likely to be accepted, save time.

Trusting you will pardon my writing to you.

Yours, &c.,

(Signed) ALFRED G. LUCAS.

Major-General Borrett,
Inspector General of Auxiliary Forces,
War Office, Pall Mall, S.W.

[COPY.]

War Office, London, S.W.,
November 26th, 1899.

DEAR COLONEL LUCAS,

Your proposal to form a composite Yeomanry Regiment for active service has been laid before the Military Secretary, but there is no intention at present of utilising the services of the Yeomanry in South Africa.

Yours, &c.,

Colonel Lucas.

(Signed) S. W. GAY.

APPENDIX 3.

PROPOSAL TO RAISE 5,000 MORE IMPERIAL YEOMANRY AND WAR OFFICE LETTER DECLINING THE OFFER.

SIR,

Imperial Yeomanry,
19th December, 1900. No. 186A.

I have the honour to submit for your consideration, the question as to whether it may not appear desirable, with reference to recent occurrences in South Africa, to increase the strength of the Imperial Yeomanry in that country, to a figure which will make good the casualties which have occurred up to this date.

Those casualties have, up till the 12th instant, amounted to 20 per cent. of the entire strength of the Force, so far as ~~information on the subject is~~ available here. It is probable, however, that sickness and other causes, have still further reduced the strength of the Force, and that the casualties up to date may be computed at about 30 per cent.

Should it be considered desirable to make good these losses, I am prepared to arrange for the enlistment of drafts to the extent of from 3,000 to 5,000 men with the least possible delay. Past experience shows, with regard to the organisation of Imperial Yeomanry, under the Committee appointed by the War Office, that had not recruiting been stopped in May last, a much larger force could have been obtained. Irrespective of the numbers raised at the recruiting centres of the Imperial Yeomanry, the Committee received, and declined, offers from various gentlemen to raise forces amounting to over 5,000 men. There would, in my opinion, be very little difficulty in obtaining a further force to this extent, in the same manner as was previously arranged, and all that would be necessary is the approval of the War Office to the capitation allowances previously given, and sanction to a small supplementary establishment at this office, for the purpose required. The system by which the men could be raised is well known, and the preparation of the report on which I am now engaged gives all details of the method under which a similar force to that sent out, could be rapidly organised.

If active military operations in South Africa continue, it will, I assume, be necessary to relieve many of the regiments of the regular service which have endured considerable hardships for over a year. The men of the Imperial Yeomanry enlisted for a period of a year, or for as long as the war might last. I have no doubt that a large proportion of the Force would more willingly continue on active service, provided they knew that their losses were made good, and that it was the intention of the Government to keep them in the field with replenished ranks, as has been the case with the regular service. The Force has, however, been practically allowed, almost, to die out, and I trust that, under the circumstances, I may be excused for pointing out what has occurred in the past, with reference to the supply of drafts for the Yeomanry.

W.O. 079/
10/C80 of
10th Feb-
ruary, 1900.

It was, at one time, decided that drafts should be provided at the calculation of 10 per cent. of the original numbers (10,000) which embarked. This involved the provision of a Force of the total strength of 11,608 men, as shown in the letter from the Imperial Yeomanry Committee, dated 27th March, 1900. Subsequently, however, this strength was reduced, and it was settled that no more than 10,500 men, Base Depot included, should be enlisted for service in South Africa.

W.O. 079/
10/1790.

In a letter from the War Office, dated 21st May, 1900, it was decided that if any more recruits were required, they would be enlisted for the Imperial Yeomanry, under arrangements to be made by the War Office, but so far as I am aware, none were thus obtained, and, therefore, with the casualties referred to in paragraph 1 of this letter, the strength of the Force in the field must be now a very attenuated one.

I am, therefore, encouraged to make the offer referred to, regarding raising more men, feeling fully assured that with the sanction and support of the War Office, a further efficient contingent of mounted men could be obtained in the manner already set forth.

I have, &c.,

(Signed) ALFRED G. LUCAS, Colonel,
D.A.G., I.Y.

To the Under Secretary of State for War.

War Office,
28th December, 1900.

079/10/
4943.

SIR,

I am directed to acknowledge the receipt of your letter of the 19th instant, and to express the thanks of the Secretary of State for War for the suggestions you put forward with regard to the re-opening of recruiting for the Imperial Yeomanry, and the despatch of drafts to South Africa.

As, however, steps are being taken to enrol a large number of men for service in the South African Constabulary, Mr. Brodrick is of opinion that it is not desirable to recommence recruiting for the Imperial Yeomanry.

(Signed) H. BORRETT,
I.G.R.

Colonel A. G. Lucas.

APPENDIX 4.

LETTER CONVEYING THE THANKS OF THE SECRETARY OF STATE FOR WAR FOR THE WORK DONE BY THE COMMITTEE.

War Office,
24th May, 1900.

079/10/
1426.

SIR,

The Secretary of State for War directs me to acquaint you that in the opinion of Her Majesty's Government the time has now come when the Committee of the Imperial Yeomanry can be safely released from the arduous duties which at a time of national emergency it patriotically assumed. Its important undertaking has been successfully conducted to a point at which its work may be regarded as virtually accomplished.

It is due to the untiring energy and intelligent administration of the Committee that Her Majesty's Government have been able to add to the forces of Her Majesty more than a whole Army Division of well-equipped fighting men.

This valuable force has now taken its appointed place in the Field Army, and Her Majesty's Government gratefully note the testimony of Lord Roberts and his Generals to the excellence of the material of which it is composed, and to the brave and faithful service which it has rendered.

So far as regards the Sub-Committees dealing with Enrolment, Supply, Transport, Clothing, Remounts, &c., the work is practically concluded, and Her Majesty's Government do not doubt that the Committee will agree that it is now fit and proper that the future administration of these Departments should be undertaken by the Secretary of State for War. At the same time certain matters remain to be dealt with on which the advice and guidance of some of those who have been instrumental in raising the Force will be of value for some little time longer. Lord Lansdowne therefore desires to retain, as far as may be necessary, the services of the Department of the Deputy Adjutant-General and of the Department of Finance, and he accordingly invites the Committee to advise him as to how this purpose can be best accomplished.

A large reduction of the present staff of both Departments can, however, it is hoped, be effected forthwith.

Finally, the Marquess of Lansdowne wishes to express in behalf of Her Majesty's Government, their sense of the great debt which the State owes to the Committee of the Imperial Yeomanry, and their appreciation of the manner in which, in response to a sudden call, and without any previous organisation, the Committee addressed itself to the onerous duties which it has performed. Her Majesty's Government cannot but feel that it must be to that Committee, collectively and individually, a just and enduring pride that at a memorable time it should have been able to render to the Empire a service of such importance.

I am, &c.,
(Signed) R. H. KNOX.

The Secretary,
Imperial Yeomanry Committee.

APPENDIX 5.

LETTER TO WAR OFFICE FORWARDING SECTION III OF THIS REPORT.

Imperial Yeomanry,
11th December, 1900.

SIR,

With reference to your letter of the 5th instant, and to our conversation regarding the Yeomanry Committee appointed under the presidency of Lord Harris, I have the honour to say that it will give me great pleasure to serve as a member, or to do anything else in my power to assist in the re-organisation of the Force. No. 183a.

I think, however, it is only right that I should tell you, I have already given much time and attention to the subjects you have referred to, viz., the future organisation of the Yeomanry, terms of their service, periods of training, allowances, increase to their numbers, and the question whether any portion of the Force could be made available for service abroad.

The Section (III) of my report which deals with these subjects is herewith sent you in proof, but it is in a very crude and unfinished state, and must be therefore regarded as by no means complete, as since my return from South Africa, I have had a comparatively short time to prepare it.

Section I of the report deals with the home organisation of the Force, and Section II with the Yeomanry in South Africa. These sections are also in proof, but I do not send them at present.

You are, no doubt, aware, however, that I, as the Senior Yeomanry Colonel of the Imperial Yeomanry Committee, was charged by the War Office with its Presidency and general supervision, as well as with the duty of preparing the final report here and in South Africa.

I propose laying before the Committee which you have appointed the proofs of Section III of the report which I send you. I have not yet submitted it to anyone except yourself, but I desire that the work completed by me to this date may be placed on record, whether my proposals be accepted by the new Committee, or otherwise.

I have, &c.
(Signed.) ALFRED G. LUCAS,
Colonel.

D.A.G., Imperial Yeomanry.

To the Secretary of State for War.

APPENDIX 6.

FIRST ANNOUNCEMENT IN PUBLIC PRESS *re* THE RAISING OF THE IMPERIAL YEOMANRY.

December, 1899.

1. Her Majesty's Government have decided to raise for service in South Africa a Mounted Infantry force to be named "The Imperial Yeomanry."
2. The force will be recruited from the Yeomanry, but Volunteers and civilians who may possess the requisite qualifications (as given below) will be specially enrolled in the Yeomanry for this purpose.
3. The force will be organised in companies of 115 rank and file, five officers being allotted to each company, viz., one captain and four subalterns, preference being given to Yeomanry officers.
4. The term of enlistment for officers and men will be for one year or for not less than the period of the war.
5. The officers and men will bring their own horses, clothing, saddlery, and accoutrements. Arms and ammunition, camp equipment, and regimental transport will be provided by Government.
6. The men will be dressed in Norfolk jackets of woollen material of neutral colour, breeches and gaiters, lace boots, and felt hats. Strict uniformity of pattern will not be insisted on.
7. The pay will be at Cavalry rates, with a capitation grant for horses, clothing, saddles and accoutrements. All ranks will receive rations from date of joining. Gratuities and allowances will be those laid down in Special Army Order of the 10th May, 1899.
8. Applications for enrolment should be addressed to colonels commanding Yeomanry regiments, or to general officers commanding districts, to whom instructions will be immediately issued.

APPENDIX 7.

MEMORANDUM OF OFFICE MANAGEMENT.

Secretary's Office.

This office is to be one for the general register of all letters received. In accordance with orders already passed, letters should all be addressed to the Secretary, and should be opened by him. They will be marked on the envelope as follows:—

D.A.G.'s
Circular
memo. of
6th Feb.,
1900.

General Supervision—Colonel Lucas	"A."
Adjutant-General's Department	"B."
Quartermaster-General's Department	"C."
Finance Department	"D."
Saddlery and Remount Department	"E."
Office of Independent Corps.	

He will then distribute them to the various departments concerned as soon as possible, for them to be there dealt with. Mr. Eaton Smith will have, in addition, the general control over the establishments in the various departments, and settle, subject to the confirmation of the Heads of Departments concerned, their monthly payments, salaries, &c. He has, in accord with decisions already arrived at by the Committee, to communicate to the representatives of the Press such matters as the Heads of the various Departments may consider appropriate. The Secretary has also to arrange for the distribution of tickets of admission to the various inspections which may be held, in London and elsewhere, and at the ports of embarkation. Questions in connection with furniture, stationery, and all other similar requirements of the office have to be dealt with by him on requisitions which he may receive from the Heads of Departments concerned, or otherwise, at his discretion.

APPENDIX 8.

ROYAL WARRANT FOR FORMATION OF IMPERIAL YEOMANRY CORPS.

VICTORIA R.I.

WHEREAS We deem it expedient to provide for the formation of a corps to be entitled "The Imperial Yeomanry";

A.O. 1,
January,
1900.

OUR WILL AND PLEASURE IS that this corps shall be added to those enumerated in the schedule attached to Our Warrant of the 28th January, 1899;

IT IS OUR FURTHER WILL AND PLEASURE that officers and men of this corps shall receive such pay, allowances, &c., as are granted to Our regular cavalry, together with such capitulation rates for horses, clothing, saddlery, and accoutrements, &c., and such gratuities on completion of service as may be determined by Our Secretary of State.

Given at Our Court at Windsor, this 24th day of December, 1899, in the 63rd year of Our Reign.

By Her Majesty's Command,
LANSDOWNE.

APPENDIX 9.

SECRETARY OF STATE'S INSTRUCTIONS FOR THE ORGANISATION AND EQUIPMENT OF THE IMPERIAL YEOMANRY.

Revised instructions for the organisation and equipment of the Imperial Yeomanry have been approved by the Secretary of State, and copies will be issued to all concerned.

A.O. 28,
February,
1900.

These instructions will supersede those contained in the Special Army Orders, dated 2nd January (Army Order 1 of 1900), and 4th January, 1900, which are cancelled.

"The Imperial Yeomanry"—*Secretary of State's Instructions on the Royal Warrant of 24th December, 1899.*

1. The Imperial Yeomanry will be administered by a Committee comprising one department of general supervision and five minor departments. All correspondence will be addressed to the Secretary of the Imperial Yeomanry, Cleveland House, St. James' Square, London, S.W. Envelopes should be marked with the subject of the enclosure in accordance with the classification shown below:—

General Supervision.

Enrolment and Establishment. Interior Economy. Drill. Military Training and Instruction. Musketry. Signalling. Arms. Ammunition. Machine Guns.

Supply. Transport. Shipping. Movements. Distribution and Quartering. Barracks. Camps. Hire of Buildings and Land for Camps. Ranges. Clothing Equipment.

Remounts.

Saddlery and Horse Equipment.

Finance.

In addition to the Committee, the following appointments have been made at the head-quarters of the corps in South Africa:—

- 1 Assistant Adjutant-General.
- 2 Deputy-Assistant Adjutants-General.
- 1 staff captain.
- 1 paymaster.

2. The establishment of the base and remount depôt in South Africa will be as follows :—

- 1 Commandant.
- 2 Deputy-Assistant Adjutants-General.
- 2 staff captains.
- 1 major.
- 2 captains.
- 2 subalterns (1 as quartermaster).
- 1 transport officer.
- 1 medical officer.
- 3 veterinary officers.
- 1 acting sergeant-major.
- 1 quartermaster-sergeant.
- 1 farrier quartermaster sergeant
- 6 company sergeant-majors.
- 3 company quartermaster-sergeants
- 1 armourer-sergeant.
- 10 sergeants.
- 1 saddler-sergeant.
- 4 farrier-sergeants.
- 20 corporals (including 2 paid lance-sergeants).
- 4 shoeing-smith corporals.
- 2 saddletree-maker corporals.
- 2 saddlers.
- 24 shoeing smiths.
- 6 buglers.
- 500 privates (including 16 paid lance-corporals).
- 22 bātmén.

The corps will be organised in units of battalions of four companies each, with the following battalion staff :—

- 1 lieutenant-colonel.
- 1 major (second in command).
- 1 adjutant.
- 1 quartermaster.
- 1 medical officer.
- 1 veterinary officer.
- 1 acting sergeant-major.
- 1 quartermaster-sergeant.
- 1 sergeant cook.
- 16 privates.*

4. Each company of Imperial Yeomanry will consist of—

- 1 major or captain.
- 4 subalterns.
- 1 colour-sergeant.
- 5 sergeants,
- 1 farrier-sergeant.
- 3 shoeing smiths.
- 1 saddler.
- 2 buglers.
- 6 corporals (including paid lance-sergeants at the rate of 2 per battalion).
- 97 privates (including 4 paid lance-corporals).

Total 121 of all ranks.

5. Each battalion, provided it furnishes two guns, may be allowed a machine-gun section, not exceeding the following strength, in addition to the establishments for battalion staffs and companies :—

- 1 subaltern.
- 1 sergeant.
- 1 corporal.
- 6 privates.
- 6 drivers.
- 2 bātmén.

Total 17 of all ranks.

* 12 bātmén, 2 clerks, 2 orderlies to medical officer.

6. A distinguishing number will be allotted by the Committee to each company in the order of seniority of Yeomanry corps, and to each battalion in the order of seniority of the senior Yeomanry corps furnishing a company.

7. The selection of the battalion staffs will be controlled by the War Office.

8. The selection of the company officers, and the composition of each company, will be controlled by the Imperial Yeomanry Committee, subject to approval by the War Office.

9. Individuals selected for commissions, who do not already hold commissions in the Regular Forces, will be granted temporary commissions in the Army. If members of the Militia, Yeomanry Cavalry, or Volunteers, they will be supernumeraries in their corps and reabsorbed at the expiration of hostilities.

10. The Imperial Yeomanry will be recruited from—

- (a) Yeomanry.
- (b) Volunteers.
- (c) Civilians.

11. The following will be the qualifications for service:—

- (a) Every Imperial Yeoman must enlist for 1 year, or for the war. In the event of the war being over in less than 1 year he will have the option of being discharged at once or of completing his 1 year's service.
- (b) He must be not less than 20 nor more than 35 years of age for service in the companies; for service at the base, candidates may be accepted up to 45 years of age.
- (c) He must, before being selected, first satisfy the officer commanding a Yeomanry Regiment, or such other officer as may be appointed for the purpose, that he is a good rider and a marksman according to Yeomanry standard.
- (d) He must be of good character.
- (e) He must be up to the following physical standard:—Height, 5 feet 3 inches and upwards; chest measurement, 34 inches and upwards; weight, 115 lb. and upwards. No relaxation of standard will be allowed.
- (f) He must be medically fit for active service.
- (g) Preference should be given to unmarried men, or widowers without children. Married men and widowers with children should be accepted only in the event of an insufficient number of single men or widowers without children volunteering.

12. Applications for enlistment should be addressed to Officers Commanding Yeomanry Regiments. Candidates for enlistment should be furnished with copies of Army Form B 112, and their attestations will be made out on Army Form B 111.

13. Candidates for enlistment will present themselves at the headquarters of a Yeomanry Regiment, or at such other place as may be directed, for the purpose of being medically examined and attested.

14. Candidates for enlistment residing in Ireland, may apply to Captain the Earl of Longford, 2nd Life Guards, the Castle, Dublin, or to the officers mentioned in paragraph 18.

15. In carrying out the medical examination of candidates it should be borne in mind that it is unnecessary that they should fulfil all the conditions of fitness required of a recruit enlisting for the full term of service in the Regular Army. It is sufficient that the candidate should be free from organic disease or other defect likely to prevent him from doing his work during the duration of the present war.

16. Recruits, after attestation, will be finally approved by the officer commanding a Yeomanry Regiment, or by some other officer appointed for this purpose. Third class railway fare from home to the place of enlistment will be allowed in the case of all finally accepted candidates.

17. Men who, after attestation, are found "not likely to become efficient soldiers," whether on medical or military grounds, may be discharged, without reference to higher authority, by the officers competent to finally approve recruits for those forces.

The discharges in such cases will be carried out by an entry in the record of service on the third page of attestation, and each man will be furnished with a discharge certificate on Army Form B 2079.

18. In Ireland any of the above-mentioned duties to be discharged by officers commanding Yeomanry Regiments will be entrusted to the officer commanding at Newbridge and the officer commanding the 83rd Regimental District, to whom candidates for enlistment should apply.

19. After the recruits have been finally approved, the officer commanding each company will make his own arrangements for its assembly.

20. The original and duplicate attestations of all approved recruits will be kept at the headquarters of yeomanry brigades. The attestations belonging to corps not affiliated to yeomanry brigades will be kept by the Imperial Yeomanry Committee.

21. Muster rolls of each company will be prepared and submitted to the Imperial Yeomanry Committee, where they will be retained for reference.

22. Imperial Yeomen will receive from date of enlistment pay, rations, and messing and other allowances of their rank as Regular cavalry soldiers. Any pensioner in receipt of a Chelsea pension will retain such pension while serving with the Imperial Yeomanry. Should a married man be accepted, his family will be entitled to separation allowance, which will be issued, in Great Britain by the station paymaster of the Yeomanry Regiment, and in Ireland by the station paymaster at Belfast or Naas, according as the man is enlisted at Belfast or Newbridge. The paymaster will receive the necessary information on Army Form D 418, and reports of casualties from the officer commanding the Yeomanry Regiment in Great Britain, or in Ireland, from the Officer Commanding 83rd Regimental District, or the officer commanding mounted troops, Newbridge.

The allowance to families of married men enlisted for the base depôt will be paid by the station paymaster, Hounslow, who will receive Army Form D 418, and reports of casualties from the commandant of the base depôt.

Service in the Imperial Yeomanry will entitle an officer or yeoman, who at the time of his joining was borne on the strength of a Volunteer corps, to be considered efficient for the year, and the Volunteer corps will receive the Volunteer Capitation Grant accordingly.

23. In addition to any gratuity given to the troops at the end of the war, an Imperial Yeoman will receive, on completing his period of service, a gratuity of £5.

Men discharged in consequence of wounds, injuries, or disability received or contracted while on service, will be entitled to pension in accordance with the Royal Warrant for Pay, &c., of the Regular Army.

24. A capitation grant of £25* will be allowed for the supply of the following articles:—

Clothing.
Personal equipment.
Horse equipment.
Stable necessities.

And the sum of £40 will be allowed to every Imperial Yeoman who brings his own horse if the horse is accepted. Officers will be allowed £40 for each of two horses. A preference should, as a rule, be given to small horses. The sum of £17† will be allowed for each company to cover the cost of camp equipment. Transport will be supplied by Government or at Government expense.

25. When the company assembles, the men and horses may be billeted, unless the officer commanding the company prefers to draw lodging, forage, and stable allowances at the daily rate of 6d., 1s. 6d., and 9d. respectively. Forage and stable allowance at these rates will be allowed for each horse from date of purchase.

26. Officers will be allowed to purchase Government pistols at Government prices.

27. Arms, ammunition, and tents, will be supplied to the Imperial Yeomanry on demand at the public expense in the following proportions:—

Arms.

Pistols, Webley, complete—one for each acting sergeant-major, quartermaster-sergeant, farrier quartermaster-sergeant, saddler-sergeant, farrier-sergeant, sergeant-cook, armourer-sergeant, bugler, and driver.

Rifles, M.L.E., complete—one each for all other ranks.

Ammunition.

50 "cartridges, small-arm, ball, .303-inch, cordite, Mark IV.," per rifle (for practice prior to embarkation—not to be taken on board).

25 "cartridges, small-arm, ball, .303-inch, cordite, Mark IV.," per rifle, for 25 per cent. of the strength (for practice during the voyage—none of this is to be landed in South Africa, each commanding officer being held responsible that the whole is expended on the voyage).

24 "cartridges, small-arm, ball, pistol, Webley," per pistol (for practice on the voyage).

360 "cartridges, small-arm, ball, .303-inch, cordite, Mark II." per rifle; and

36 "cartridges, small-arm, ball, pistol, Webley," per pistol, will be issued prior to embarkation and taken on board ship for use in South Africa.

Tents.

"Tents, circular, single linen, complete," will be issued in the proportion laid down for cavalry on active service in Section II, Part II, Equipment Regulations.

Issues on Prepayment.

1 pistol, Webley, complete, 1 per officer	} If required.
36 "cartridges, small-arm, ball, pistol, Webley," per officer			
3 gallons rifle oil			
½ gallon rangoon oil			} Per 100 rifles.

* Afterwards raised to £35.

† Afterwards raised to £222 10s.

28. Articles of clothing, camp equipment, and all other stores will be obtained by the Imperial Yeomanry, and paid for out of the capitation allowance.

29. All horses for the use of the force must be passed by a veterinary surgeon as workably sound, and the certificates forwarded to the officer in charge of the Remount Department.

30. All horses will be subjected to a veterinary examination 24 hours before embarkation in order to prevent the spread of infectious diseases.

31. The instructions laid down in the Field Service Manual, South Africa, for a Mounted Infantry Company will be followed as far as applicable.

32. As soon as the company is formed the officer commanding the Yeomanry Regiment will report to the General Officer Commanding the District that the company is ready to be inspected. In the case of special corps this report will be made by the Imperial Yeomanry Committee. The General Officer Commanding will then cause the company to be inspected, and will report to the War Office whether or not it is fit for service in South Africa.

33. Should any company not be up to the standard required for service in the field, it will not be allowed to proceed to South Africa.

34. When a company is passed fit for service in the field the officer commanding it will at once transmit to the War Office, through the Committee, a return on the form shown in Annex 2.

35. On the departure of a company from the United Kingdom, the Yeomen composing it will be supernumeraries in their corps, if they joined for service from the Militia, Yeomanry Cavalry, or Volunteers.

ANNEX 1

The following officers form the Imperial Yeomanry Committee, and will deal with the subjects stated against their names:—

Name of Officer.	Department.
(1.) Honorary Colonel A. G. Lucas, Loyal Suffolk Hussars.	General supervision.
(2.) Honorary Lieut.-Colonel E. W. Beckett, Yorkshire Hussars	Finance.
(3.) Honorary Colonel Viscount Valentia,* Oxfordshire Yeomanry.	Enrolment and Establishment.
(4.) Colonel T. A. St. Quintin, retired pay	Remounts.
(5.) Honorary Colonel the Earl of Lonsdale, Westmoreland and Cumberland Yeomanry.	Saddlery and horse equipment.
(6.) Captain the Hon. W. L. Bagot, Reserve of Officers	Clothing and equipment.
(7.) Colonel the Right Hon. Lord Harris, G.C.S.I., G.U.I.E., Royal East Kent Yeomanry.	Transport and shipping.

Mr. John Eaton Smith is Secretary to the Committee.

The following appointments have been made:—

Lieut.-Colonel H. Graham, Reserve of Officers. . . .	Commandant at Base Dépôt, Cape Town.
Sir Simeon Stuart, Bart., late 5th Dragoon Guards ..	} Staff Officers to Commandant.
Major E. W. Baird, late 10th Hussars	
Captain R. N. S. Lewin, Duke of Cornwall's Light Infantry.	Officer in charge of victualling, &c., on transports.

* Viscount Valentia will be succeeded, after embarkation, by Colonel the Hon. H. G. L. Crichton, Reserve of Officers

APPENDIX 10.

ARMY ORDERS REGARDING PENSIONERS AND MARRIED GOVERNMENT CLERKS ENLISTED IN THE IMPERIAL YEOMANRY.

** Issue of Pension to certain Pensioners enlisting for service in South Africa.*

A.O. 32,
February,
1900.

Under the powers conferred by Royal Warrant dated the 27th October, 1884, the Secretary of State has decided, with the concurrence of the Lords Commissioners of Her Majesty's Treasury, to allow Army pensioners serving in the Imperial Yeomanry, or in the forces raised from the Volunteers for service in South Africa, to continue to draw their pensions, in addition to pay and allowances.

** Issued as a Special Army Order on 17th January, 1900.*

** Grant of Half-pay to the Families of (Embodied) Militiamen, Imperial Yeoman, and Volunteers, employed in Government Departments at the time of joining the Colours.*

A.O. 33,
February,
1900.

1. Half the pay, wages, or rating of a married man who has joined for service with the colours from a Government Department will be granted to his family during such service, if he is a non-commissioned officer or private of—

- (a) Embodied Militia;
- (b) The Imperial Yeomanry;
- (c) Imperial Volunteers, except waiting companies; or
- (d) A waiting Volunteer company, whilst undergoing the training prescribed by the Reserve Forces Act, 1882.

2. Heads of all Army Departments will at once report to the War Office the names of any married men employed in their departments, whose families are entitled to the advantages granted by paragraph 1, stating, in each case, the regimental number, rank, and regiment of the man, if previously serving, and the weekly rate of wages of which he was in receipt when he joined the colours. In the case of men employed on piece-work, the day work rating will be regarded as the rate of wage.

3. The payments will be made monthly in advance by the paymaster who issues the separation allowance, the amount being included in the same Army Money Order. The paymaster will be furnished as soon as possible with lists of payees. The charge will be shown separately in the special post-office advice list, in a column provided for that purpose.

** Issued as a Special Army Order on 17th January, 1900.*

APPENDIX 11.

** ARMY ORDER REGARDING SOLDIERS ON SICK FURLOUGH AFTER SOUTH AFRICAN SERVICE.*

A.O. 83,
April, 1900.

Soldiers invalided home from South Africa will, on proceeding on sick furlough, be granted free conveyance from the hospital or military station to their destination, and free conveyance in the case of any subsequent journeys which they may undertake under military orders.

During the continuance of their sick furlough, all soldiers whose families were in receipt of separation allowance will be allowed the lodging money of their class, and the families will continue to draw separation allowance and half-pay, if any, in respect of previous Government employment, for a period not exceeding three months.

Should the sick furlough exceed 3 months, the question of the further continuance of separation allowance and half-pay will be specially submitted to the War Office.

These regulations will apply to any soldiers who have arrived in this country as invalids from South Africa, and are now on sick furlough.

** Issued as a Special Army Order on 29th March, 1900.*

APPENDIX 12.

ARMY ORDERS REGARDING GOOD CONDUCT PAY AND PENSIONS TO WIDOWS AND FAMILIES OF IMPERIAL YEOMEN.

A.O. 108, *Good-Conduct Pay of Soldiers re-enlisted in the Imperial Yeomanry, The City of London*
May, 1900. *Imperial Volunteers, and Volunteer Companies.*

VICTORIA R.I.

WHEREAS WE deem it expedient to amend the regulations governing the grant of good-conduct pay to soldiers, who have re-enlisted in The Imperial Yeomanry, The City of London Imperial Volunteers, or the Volunteer companies for service in South Africa;

IT IS OUR WILL AND PLEASURE that a soldier who has re-enlisted in those forces after having been discharged from Our Regular Army, shall receive, under the usual conditions, the rate of good-conduct pay (if any) to which he was entitled at the date of his former discharge; and that he shall reckon towards the grant of any additional good-conduct pay all previous service which so reckoned.

A.O. 113, *Pensions, &c., for Widows and Families of Imperial Yeomanry, City of London Imperial*
May, 1900. *Volunteers, and Volunteer Companies for South Africa.*

1. The following will be inserted at the end of paragraph 23 of the Instructions for the Imperial Yeomanry issued with Army Order 28 of 1900:—

The widows and families of officers of the Imperial Yeomanry, who may be killed in action, or die of wounds received in action, or of disease directly traceable to active operations in the field, will be entitled to pensions or gratuities from Army funds, at the same rates and under the same conditions as are laid down in Articles 627 to 644 of the Pay Warrant for widows and families of officers of the Regular Army.

The gratuities provided by Article 1262 of the Pay Warrant will similarly be issuable to the widows and orphans of non-commissioned officers and men, if the Commissioners of the Patriotic Fund are unable to award a pension or compassionate allowance.

APPENDIX 13.

ARMY ORDERS REGARDING CUSTODY OF ATTESTATIONS, ENLISTMENT OF PAY CLERKS, GRATUITIES, SMALL BOOKS.

A.O. 115, *Imperial Yeomanry.—(a.) Custody of Attestations and Discharge Documents.—The*
May, 1900. *following will be inserted after paragraph 20 of the Imperial Yeomanry Instructions issued with Army Order 28 of 1900:—*

20A. The attestations of men who are discharged under paragraph 17, and the discharge documents of men who may be discharged otherwise than as invalids during, or at the expiration of, their services in the Imperial Yeomanry, will be forwarded to the Officer* Commanding, 2nd Cavalry Brigade, Canterbury, for custody. In the case of men discharged as invalids, the discharge documents will be forwarded to the Secretary, Royal Hospital, Chelsea, London, S.W.

(b.) *Enlistment of Pay Clerks.*—The following increase in the establishment of the base and remount depôt of the Imperial Yeomanry in South Africa has been approved, in order to provide for the employment of pay clerks:—

- 1 staff sergeant-major (if a re-enlisted warrant officer).
- 2 staff quarter-master-sergeants.
- 3 staff-sergeants.
- 3 sergeants.
- 3 corporals.

They will receive the rates of pay provided by the Pay Warrant for similar ranks in the Army Pay Corps. If pensioners are re-enlisted they may continue to draw their pensions under Army Order 32 of 1900, and, if employed in a Government Department at the time of re-enlistment, their families will be entitled to half-pay under the conditions laid down in Army Order 33 of 1900.

* Amended by Army Order 187 of 1900, Appendix 18.

Paragraphs 2 and 22 of the instructions issued with Army Order 28 of 1900 will be amended accordingly.

(c.) *Imperial Yeomen to be regarded as efficient Yeomen or Volunteers.*—The following will be substituted for the last sentence of paragraph 22 of the Instructions for the Imperial Yeomanry, issued with Army Order 28 of 1900:—

“Service in the Imperial Yeomanry will entitle an officer or Yeoman, who at the time of his joining was borne on the strength of a Yeomanry Cavalry Regiment or Volunteer Corps, to be considered efficient for the year, and the regiment or corps will receive the clothing and contingent allowance, or capitation grant accordingly.”

Gratuities to Imperial Yeomen and Volunteers.—1. Imperial Yeomen, City of London Imperial Volunteers, and members of the Volunteer Force enlisted for service in South Africa (except members of the waiting companies), who are discharged medically unfit, will be granted a gratuity as follows:— A.O. 115,
May, 1900.

(a.) If discharged medically unfit before embarkation, a gratuity of £2.

(b.) If after embarkation, a gratuity of £5.

2. A gratuity of £5 will be issued to the representatives of Yeomen and Volunteers dying in the Service.

Small Books.—1. It is notified for the information of all concerned that Army Form B 50 (“The Small Book”) will be issued to each militiaman on embodiment, and to all Imperial Yeomen, City of London Imperial Volunteers, and members of Volunteer service companies not already in possession of a Small Book, and will be kept up in accordance with paragraphs 692 to 695 of the Queen’s Regulations and Orders for the Army, 1899. A.O. 121,
May, 1900.

2. The use of Army Form E 532 (militiaman’s Small Book) will be discontinued during the embodiment of the Militia.

APPENDIX 14.

*IMPERIAL YEOMANRY COMMITTEE; THANKS OF THE SECRETARY OF STATE—DISSOLUTION OF THE COMMITTEE. A.O. 185,
June, 1900;

The Secretary of State wishes to express to the members of the Imperial Yeomanry Committee his high appreciation of the patriotic services rendered by the Committee, and of the value of the Force which has been so successfully raised and equipped under its direction.

The work for which it was constituted having been successfully accomplished, the Committee will be dissolved.

APPENDIX 15.

ROYAL WARRANT REGARDING THE ISSUE OF PAY TO PRISONERS OF WAR.

VICTORIA R.I.

WHEREAS WE deem it expedient to amend the regulations governing the issue of pay to soldiers who may be made prisoners of war; A.O. 185.
September,
1900.

OUR WILL AND PLEASURE is that the following shall be substituted for Article 954 of Our Warrant for the Pay and Non-Effective Pay of Our Army:—

954. A soldier shall not forfeit his right to pay during the period of his absence as a prisoner of war, unless it shall have been proved before a court of enquiry, convened by order of the General Officer Commanding, that such soldier was taken prisoner through neglect or misconduct on his own part. In that case he shall forfeit any balance of pay unissued to him during the period of imprisonment.

Given at Our Court at Osborne, the 30th day of August, 1900, in the 64th year of Our Reign.

By Her Majesty’s Command,

LANSDOWNE.

* Issued as a Special Army Order on 25th May, 1900.

Secretary of State's Instructions.

The issue of pay to a soldier while a prisoner of war must depend on circumstances. On rejoining no further issues will be made until it has been decided whether a court of enquiry shall be held. If such court is held and decides that the soldier was taken prisoner through his own neglect or misconduct he will, as provided in the Warrant, forfeit any balance of pay unissued at the date of rejoining. In all other cases the unissued balance will be paid to the men.

APPENDIX 16.

A.O. 186,
September
1900.

ROYAL WARRANT REGARDING THE PAY AND GRATUITIES OF RETIRED OFFICERS AND OTHER PERSONS SPECIALLY EMPLOYED AT TIMES OF NATIONAL EMERGENCY.

VICTORIA R.I.

WHEREAS WE deem it expedient to amend the regulations governing the issue of outfit allowance and gratuities to retired officers and other persons employed on military duties as officers;

OUR WILL AND PLEASURE IS that the following amendments be made in Our Warrant for the Pay and Non-Effective Pay of Our Army, and in the Regulations for the Allowances of Our Army, with effect from the 1st October, 1899:—

Pay Warrant.

The following shall be substituted for Articles 601A to 601D:—

601A. An officer who retired with retired pay or gratuity, if specially taken into employment during a national emergency, or serving with the embodied Militia, shall be granted any increase of retired pay or gratuity for which his further service (excluding any period for which he draws retired pay) may qualify him. This shall not apply to officers who draw pay under Article 488 (b).

601B. An officer whether of the reserve or not, specially taken into employment during a national emergency shall, upon ceasing to draw full pay, be entitled to a gratuity of £100, and after the first 12 months of service a further gratuity of £50 for each year of service at home, and £100 for each year of service abroad, portions of a year being calculated at the same rate, and subject to the following conditions:—

1. That the officer serves for the full period of his engagement, or of the emergency in respect of which he is employed, unless a shorter period is specially approved by the Secretary of State.

2. The gratuity shall not be given to an officer who obtains an increase of pension or gratuity under Article 601A, or to an officer paid under Article 488 (b).

3. The following officers are eligible, provided that they fulfil the above conditions:— Re-employed retired officers; officers of embodied Militia, except those of the permanent staff; officers of Auxiliary Forces employed upon Army Service; ex-officers or civilians appointed to military positions in Imperial Forces,* or in Colonial Forces paid at Imperial Army rates.

Allowance Regulations.

The following shall be substituted for paragraph 675:—

An officer who has retired from the Army or from the Auxiliary Forces and is taken into employment with the Regular Forces during a time of national emergency, will be granted, in aid of his outfit, a sum not exceeding £100.

* *Secretary of State's Instructions.*

1. Officers employed in the Royal Reserve Regiments, or in the Imperial Yeomanry, or proceeding with Volunteers upon active service, are included among those entitled to the gratuity under the above conditions.

2. A gratuity due under the above regulations will be issued by the paymaster or agent who makes the final payment of full pay to the officer concerned, without special authority.

(8470)

U 2

This rule does not apply to officers who are at the time of re-employment upon the effective establishment of the Army.

Given at Our Court at Osborne, this 25th day of August, 1900, in the 64th year of Our Reign.

By Her Majesty's Command,
LANSDOWNE.

APPENDIX 17.

ARMY ORDER REGARDING PAY AND GRATUITIES OF RETIRED OFFICERS AND OTHER PERSONS SPECIALLY EMPLOYED DURING NATIONAL EMERGENCY.

The Secretary of State's instructions on Articles 601A and 601B of the Pay Warrant, promulgated in Army Order 227 of 1900, will be amended as follows:— A.O. 27 of January, 1901.

(a) The following will be substituted for paragraph 1:—

1. Articles 601A and 601B will apply to employment commencing between 1st October, 1899, and such date as may hereafter be determined upon, including employment with the Royal Reserve Regiments, the Imperial Yeomanry, or Volunteers proceeding on active service.

(b) The following will be inserted after paragraph 3:—

4. Officers of embodied Militia who have been granted commissions in the Regular Forces will receive the gratuity referred to in Article 601B on ceasing to draw full pay as officers of Militia. The issue will be made by the Paymaster or agent who makes the final issue of the officer's pay as an officer of embodied Militia.

APPENDIX 18.

QUEEN'S REGULATIONS.

Custody of Cavalry Documents.—1. On and after 1st October, 1900, the original attestations of soldiers serving in the cavalry of the line at home and abroad will be in charge of the Assistant Adjutant-General for Cavalry, 41, Pall Mall, London, S.W. The proceedings on discharge and on transfer to the reserve of cavalrymen, and the discharge documents of the Imperial Yeomanry will also be placed in the custody of the assistant adjutant-general for cavalry. All arrangements for mobilisation and demobilisation of cavalry will be under that officer, and officers commanding regiments and reserve squadrons at home will transmit to him all original attestations in their charge as soon after that date as possible. A.O. 187, September, 1900.

2. Army Order 115 of 1900 and paragraph 28 of the Army Reserve Regulations, and all references on Army forms and in books of regulations to the officer commanding 2nd Cavalry Brigade as the officer in charge of cavalry documents, will be amended accordingly.

APPENDIX 19.

INSTRUCTIONS FOR PRELIMINARY MOBILISATION OF IMPERIAL YEOMANRY FOR SERVICE IN SOUTH AFRICA.

1. Each Yeomanry Brigade will at once call for volunteers, both men and horses, for active service; the men to be enlisted for the duration of the War. Numbers to be forwarded by telegram as soon as possible.
2. Officers Commanding Yeomanry Brigades will at once submit the name of officers Imperial Yeomanry Circular, December, 1899.

they recommend as squadron leaders, &c., which will be forwarded by telegram to Lord Chesham at 12, Suffolk Street, Pall Mall, London, S.W.

3. The men volunteering will be medically examined under arrangements to be made by brigade adjutants.

4. Details as to clothing and equipment will be issued later. The headquarters of the Officer Commanding the Imperial Yeomanry are at present at 12, Suffolk Street, Pall Mall, London, S.W., where all enquiries should be addressed.

APPENDIX 20.

CIRCULAR TO OFFICERS COMMANDING YEOMANRY REGIMENTS REGARDING ORGANISATION AND EQUIPMENT.

December, 1899.

1. The Committee of the Imperial Yeomanry, which has been formed by the Secretary of State for War for the purpose of raising this force, desire to call the attention of Officers Commanding Yeomanry Regiments to the following recommendations.

2. The Committee in no way desire to control the independent action of Commanding Officers, and hope that these will use their own discretion in all matters relating to the enrolling, clothing, equipping and horsing of their squadrons or companies. Such articles of equipment as in the opinion of the Committee it would be difficult for Commanding Officers to obtain in bulk will be supplied from this Office as previously notified, deduction being made from the Capitation Grant. Enrolment.
Equipment.

3. Similarly the Committee will supply horses to complete establishment either at home or on arrival at Cape Town when Commanding Officers find it difficult to do so.

4. Officers will be appointed by this Committee on the recommendation of Commanding Officers Yeomanry Regiments. The Committee earnestly desire to impress on Commanding Officers the importance of appointing officers with some previous military training in cases where sufficient experienced Yeomanry Officers are not available. It is not necessary for civilians anxious to serve in the above force to be appointed to a Yeomanry Regiment. All candidates for commissions in the Imperial Yeomanry, whether Yeomanry Officers or not, will be attested* in the usual way and given acting commissions. Appoint-
ment of
officers.

5. A register is kept at this office of gentlemen desiring commissions in the Imperial Yeomanry, giving their qualifications and previous service, if any, which can be inspected at any time. The Committee will be glad to recommend such officers. If there are any candidates for commissions, whether Yeomanry Officers or suitable civilians known to and recommended by the Commanding Officer, for whom there are no vacancies with their local company, the Committee will be glad to register their names. Commis-
sions.

The Committee wish it to be clearly understood that many Yeomanry Officers, though anxious to proceed on active service, may, by their local influence, be of infinite value at home, and the fact, therefore, of an officer not proceeding to South Africa with his local Yeomanry is no aspersion on his character as a soldier.

The Committee will be glad of the names of the officers selected by Officers Commanding Yeomanry Regiments for each company at an early date, the previous services in the Army or Auxiliary forces being distinctly stated in each case.

6. The Committee recommend that great care be exercised in the selection of men both as regards character and efficiency in riding. Civilians should not be enlisted unless they are in the habit of riding. Cape Colonists should not be taken without strict enquiry being made as to their previous career. Men.

7. The standard of musketry fixed by the War Office is that of "Marksman," according to Musketry Regulations (Yeomanry), and Commanding Officers are therefore advised to practise their men at once until they attain this standard. Musketry.

* Under verbal orders from the War Office the attestation of candidates for Commissions was discontinued at a later date.

- Saddlers, farriers, trumpeters. Uniform. Saddlery. Servants. Chargers.
8. A register of applicants for enrolment from these trades is kept at this office and can be consulted.
9. There is no sealed pattern uniform for any ranks. Commanding Officers can use their own discretion as to this.
10. Yeomanry saddles must, in the first instance, be used as time does not admit of new ones being made. Should a Yeomanry Regiment be in a position to raise more companies than it has saddles for, these must, of course, be made. Colonial saddles or the best hunting saddles are quite useless as they cannot carry the necessary kit.
11. Officers' servants must be borne on the strength of the companies and be properly enlisted.
12. *Two chargers are allowed to each officer, and it is very undesirable for them to be more than 15·2 hands.

APPENDIX 21.

LISTS OF CLOTHING, NECESSARIES AND EQUIPMENT REQUIRED BY EACH YEOMAN.

5th January, 1900.

1. The following amended lists of clothing, necessities and equipment, to be in possession of every N.C.O. and man are issued :—

CLOTHING and Necessaries.

	No.		No.
Frocks	2	Field cap with chin strap	1
Putties (pairs)	2	Haversacks	1
Trousers (pair)	1	Canvas shoes (pair)	1
Spurs (pair)	1	Hat with chin strap and puggaree	1
Field dressing	1	Boot laces (pairs)	2
Flannel belts	2	Brushes, cloth	1
Braces or belt	1	Brushes, shaving	1
Brushes, hair	1	Fork	1
Comb, hair	1	Spoon	1
Table knife	1	Shirts, flannel	2
Razor and case	1	Mess tin and strap	1
Socks, worsted (pairs)	3	Clasp knife and lanyard	1
Towels	2	Drawers, cotton (pairs)	2
Housewife	1	Dubbin, tins of	1
Shoulder strap numerals (set)	1	Clothes bags	1
Corn sacks	1	Holdalls	1
Nose bags	1	Jerseys	1
Horse rubbers	1	Caps, worsted	1
Soap, pieces of	1	Blankets	1
Cloak and belt	1	Handkerchiefs	—
Waterproof sheets	1	Plates, enamelled iron	1
Emergency ration	1	Horse brush	1
Enamelled iron mug or cup	1	Curry comb	1
Pantaloon (pairs)	2	Sponge, stable	1
Ankle boots (pairs)	2	Flannelette, packet of	1

NOTE.—Brown boots are recommended and extra spur leathers should be taken; spare buttons should be sewn on waistband of trousers and breeches.

* The final decision of the War Office regarding chargers was, for Commanding Officers of Battalions, 3 each; medical and veterinary officers and quartermasters, 1 each; and other officers, 2 each.

EQUIPMENT.

	No.		No.
Water bottle, enamelled iron, with strap	1	Bandoliers	1
Saddlery, set of, complete with wallet, head rope, horse blanket, and rifle bucket	1	Surcingle pad	1
Rifle loop	1	Rifle, bayonet and scabbard	1
Horse shoes, extra	1	Hoof pickers	1
Section of built-up rope	1	Pickers for gear, set of	1
		Wire nippers, per company	10
		Waist-belt and frog	1

Of the above lists of clothing, necessities and equipment, the following will be supplied under arrangements made by this office direct to regiments, who, should they have already obtained by private arrangements any of the articles set forth below, will as soon as a complete company has been equipped render a return to this office of all material or articles which they have remaining on hand :—

	No.		No.
Flannel belts	2	Emergency rations.. .. .	1
Hats with chin strap and puggaree	1	Hoof pickers	1
Field dressing	1	Clasp knife and lanyard	1
Mess tin and strap.. .. .	1	Water-bottle, enamelled iron, with strap	1
Housewife	1	Picketing gear, set of	1
Bandoliers	1	Corn sacks	1
Wire nippers, per company	10	Waist-belt and frog	1
Shoulder strap numerals, set of	1	Caps, worsted	1
Nose bags	1	Rifle buckets	1
Jerseys	1	Waterproof sheets	1
Putties (pairs)	2	Haversacks.. .. .	1
Blankets, men's	1	Dubbin, tins of	1
Rifle loop	1	Clothes bags	1
Cloak and belt	1	Section of built-up rope	1
Holdalls	1	Flannelette, packet of	1

NOTE.—Every article is to be marked with the man's regimental number.

2. Identity cards made out as follows will be sewn inside the left skirt of each frock :—

No. _____ Rank _____
 Name _____ Company _____
 Regiment _____ Imperial Yeomanry.

3. Blue serge frocks and cloth pantaloons in possession of actual Yeomen may be taken for use on board ship at the discretion of commanding officers.

4. Commanding officers are recommended to have eyelet holes made in the men's blankets in order that they can be strung up as shelters.

5. Officers commanding companies are recommended to supply their companies with a sufficient amount of cord for the purpose of making blanket shelters

6. Camp equipment as generally laid down in the War Office Mobilization Store Tables for mounted infantry units for the Field Army will be supplied to units either previous to embarkation or will be shipped in advance for issue at Cape Town as it is found feasible.

7. Copies of the Field Service Manual for mounted infantry companies of the regular forces in South Africa are forwarded herewith to officers commanding Yeomanry Regiments, and the instructions laid down therein will be adhered to as far as possible.

8. It is again notified that material for making up breeches is being despatched to corps as quick as the manufacturers are able to deliver it.

9. Application has been made to the War Office for the immediate despatch of a further supply of rifles to those regiments which have not received them.

APPENDIX 22.

INSTRUCTIONS REGARDING ARMS, AMMUNITION, AND TENTS FOR IMPERIAL YEOMANRY.

Sir,

10th January, 1900.

I am directed by the Secretary of State for War in reference to Special Army Order, dated 2nd instant, dealing with the formation of the Corps of Imperial Yeomanry, to acquaint you that arms, ammunition and tents will be issued by the Army Ordnance Department. 57/Cape/
7337.

Pistols for officers with 36 rounds of ammunition for each, will, if so desired, be obtained on prepayment, also 3 gallons of rifle oil, and $\frac{1}{4}$ gallon of Rangoon oil, per 100 rifles, being a supply for 6 months.

Tents should be demanded according to the authorised proportions laid down for Cavalry on active service in Part II, Equipment Regulations, also 2 cavalry swords and 2 pistols per company, as well as ammunition in the quantities detailed below, will be allowed.

Special instructions in regard to rifles will be issued as necessary.

All other articles of clothing, camp equipment, and other stores, except ammunition, will be procured by the Imperial Yeomanry in the open market.

Small arm ball ammunition .303 inch, *Mark II*, at the rate of 360 rounds per rifle, and 36 rounds per pistol, will be taken by the corps on embarkation for use in South Africa, where further supplies may be obtained as required—25 rounds of *Mark IV*, .303 inch, ball ammunition per man for 25 per cent. of the strength, and 24 rounds per pistol may also be taken for practice during the voyage, but each Commanding Officer will be held personally responsible that the whole of this *Mark IV* ammunition is expended during the voyage, and that none of it is allowed on any account to be landed in South Africa.

Demands for the above-mentioned stores should be sent by the Commanding Officer of each company of the Imperial Yeomanry to the Army Ordnance Depôt of the district in which the company assembles, the officer in charge of which will arrange for the issue.

I have, &c,

(Signed) R. MONTGOMERY,
for Director-General of Ordnance.

The General Officer Commanding District.

APPENDIX 23.

STATEMENT SHOWING THE FIRST 25 COMPANIES OF THE IMPERIAL YEOMANRY REPORTED READY TO EMBARK FOR SOUTH AFRICA.

CORPS.	HEADQUARTERS.
Wiltshire (2 companies)	The Barracks, Trowbridge.

APPENDIX 26.

IMPERIAL YEOMANRY.

RETURN SHOWING DATE WHEN COMPANIES WILL BE READY TO EMBARK.

Unit	Station.	Officers.	Warrant Officers.	N.C.O.'s and Men.	Horses.	Guns.	Vehicles.		Date when Ready to Embark.	Remarks.
							2-Wheel.	4-Wheel.		

APPENDIX 27.

INSTRUCTIONS TO BE OBSERVED IN CONNECTION WITH THE EMBARKATION OF THE IMPERIAL YEOMANRY.

1. Roll of officers showing date of commission should be sent to Embarking Staff Officer, Rupert Lane Barracks, Liverpool, *at once*.
2. On arrival at railway station each man should sling his rifle and commence detraining horses; the dismounted party should be detailed to load the kits and baggage on carts, which will be provided.
3. On arrival at the shed horses will be watered, and the ship's halters will be put on, after which the horses will be embarked.
4. Each man will lead his own horse on board, and on arrival at the stable deck he will hand it over to a man who will place the horse in the stall and secure it; each man will then return to the shed and fall in for the purpose of being detailed in messes.
5. Each company, hospital, or section should bring an embarkation return duly completed and signed; this return should be handed to embarking staff officer on arrival.

APPENDIX 28.

INSTRUCTIONS TO BATTALION COMMANDERS REGARDING ESTABLISHMENT OF BATTALION STAFF.

To —

Your appointment to command the battalion of Imperial Yeomanry consisting of has been approved by this Committee and sanctioned by the War Office.

2. The following will be the strength of your battalion staff, whom you will have to select and appoint yourself:—

Officers:

Second in Command.
Adjutant.
Medical Officer.
Veterinary Officer.
Quartermaster.
Machine Gun Section Commander.

N.C.O.'s and Men:

1 Acting Regimental Sergeant-Major.
1 Quartermaster Sergeant.
1 Sergeant Cook.
2 Clerks (privates).
2 Medical Orderlies.
2 Servants per Officer.

The two Clerks (privates) will receive private's pay and 1s. a day extra duty pay. (W.O. 079.10.181.)

The remainder will receive cavalry rates of pay and allowances; the Acting Regimental Sergeant-Major will be classed as colour-sergeant, and with allowances under Class 17.

3. When your battalion staff is complete you will forward to this office a complete list of your officers, giving in each case their Christian names and surnames, and military qualifications.

4. The appointment of men other than officers rests entirely with you and need not be referred to this office; they must be between the ages of 20 and 45, and duly sworn-in and attested.

5. You will be required to make your headquarters with one of your companies to which your staff will be attached for all purposes, and returned on the nominal roll of this company.

6. If you have a machine gun section attached to your battalion its strength will be as follows:—

Subaltern, 1
Sergeant, 1
Corporal, 1

Privates, 6
Drivers, 6
Bâtmen, 2

Horses.

Private, 2.
Public, Riding, 4. (Two mounted privates accompany each gun.)
Public, Draught, 12.
Guns, 2.

This machine gun section will be attached for all purposes to the Headquarter Company, numbered and entered on the nominal roll of this company.

7. The return of the Headquarter Company will be made as in the form annexed, it being understood that the numbers on the attached form are the maximum numbers which can be embarked.

8. You will draw arms for your Battalion Staff and Machine Gun Section on a requisition sent direct to the Director-General of Ordnance, War Office, stating where the arms are to be sent.

- (1.) For Battalion Staff.
- (2.) For Machine Gun Section.

9. You will forward :—

- (1.) A return of the nearest-of-kin, showing the degree of relationship, of all officers, non-commissioned officers and men of the Headquarter Staff and Machine Gun Section. The addresses of the nearest of kin should be given.
- (2.) A report giving the names of any Members of Parliament who may belong to the above details.
- (3.) A composition return of the above. *See* Appendix 2, Royal Warrant, Army Order 28 of February, 1900.

APPENDIX 29.

INSTRUCTIONS REGARDING PAY AND ALLOWANCES AND THE MODE OF ISSUE OF SAME.

079/10/18

War Office,

1st January, 1900.

SIR,—With reference to paragraph 4 of the Memorandum relating to the terms of service, &c., of the Imperial Yeomanry, I am directed by the Secretary of State for War to inform you that the funds necessary for the payment of the men will be issued in Great Britain by the Paymasters paying the Yeomanry Regiments to the Adjutants of the Yeomanry Brigades, and in Ireland by the District Paymasters, at Belfast, and the Station Paymaster, Naas, to the Acting-Adjutant of the 83rd Regimental District and the officer deputed for the duty at Newbridge. The Adjutant will issue to the officers in command of companies such sums as they may require. Pending the completion of the company organisation the Adjutant will make such cash issues to the men as may be absolutely necessary on account of pay and allowances or travelling expenses to place of enlistment. A careful record of such issues of cash will be kept in the company pay list (Army Form N 1507), or if found more convenient the company pay and mess-book (Army Form N 1504) may be utilised. A supply of these forms will be sent to the officers concerned.

Pay.

Mode of issue.

Pay lists.

The pay will be charged on the active service form of pay list (Army Form N 1507), a separate pay list being prepared for each company which may be formed. These pay lists will be made out to the last day of January, and if the company has embarked by that date will be rendered in ordinary course to the officer of the Army Pay Department by whom the unit is paid in South Africa. In the case of a company still in this country on that date the pay list will be rendered to the Paymaster at home who will in any case render every assistance to the adjutant or company officer in the compilation of his accounts.

The messing allowance of 3d. a day will be payable from date of enlistment.

Charges for billeting and any necessary expenses incurred in the veterinary examination of horses prior to the assembly of the company will be paid by the officer commanding the company, and recovered from the Station Paymaster.

Messing, billeting, lodging, forage and stable allowances.

Any sums due to the men for lodging, forage, and stable allowance to date of embarkation should be credited to their accounts in the company pay list, any vacant column being utilised for the purpose. The customary vouchers for these allowances will be dispensed with and replaced by a certificate signed by the Commanding Officer that the amounts charged have been expended and credited to the men's accounts in the company pay list. Railway fares for the men on coming up for enlistment should be similarly treated. The charge should be supported by a statement of the places to and from which the men have travelled, certified by the approving officer. Warrants, a supply of which can be obtained from paymasters, will be issued for necessary subsequent journeys.

Railway fares.

Payments to yeomen for their horses, clothing, accoutrements, &c., and to companies for camp equipment, will only be made through the Imperial Yeomanry Committee, 12, Suffolk Street, Pall Mall, London, S.W.

Horses and clothing.

Separation allowance to families of married men will be issuable from date of enlistment and will be paid in the manner prescribed in paragraph 14i, Army Order 203 of 1899, by the Station Paymaster of the Yeomanry Regiment in Great Britain and by the Station Paymasters, Belfast and Naas, in Ireland. In Great Britain the Officer Commanding the Yeomanry Regiment, and in Ireland the Officer Commanding 83rd Regimental District, and Officer Commanding Mounted Troops, Newbridge, will obtain the declaration on Army Form D 418, and will supply the Paymaster with information as to date of enlistment and subsequently as regards casualties, &c.

Separation allowance.

Officers are entitled to pay from the date of enlistment. The pay will be issued through Messrs. Cox and Co., who will, on embarkation, issue the usual advance of 40 days' pay. Messrs. Cox and Co. will also make an advance of 91 days' field allowance on embarkation.

Pay of officers.

I am, &c.,

To General Officer Commanding

APPENDIX 30.

RULES AND CONDITIONS UNDER WHICH INDEPENDENT CORPS MAY BE ENROLLED WITH THE SANCTION OF THE IMPERIAL YEOMANRY COMMITTEE.

1. The conditions of enlistment and all other provisions laid down in the Army Order 28 of February, 1900, must be strictly adhered to.
 2. Every corps must in all respects conform to these regulations, and be under the direction and authority of the Imperial Yeomanry Committee.
 3. No corps or person may enlist men under the title of Imperial Yeomanry except with the sanction of the Central Committee at Cleveland House, or may enlist more men than the number prescribed by the Imperial Yeomanry Committee.
 4. Every corps must submit the names of its officers to the Committee, and be prepared, if required, to make such alterations as may be ordered by the Committee.
 5. Every corps must pass its recruits through all the tests in riding and shooting prescribed by the regulations to the satisfaction and approval of the Commanding Officer of the regiment to which the corps is attached, or of such officer as is appointed.
 6. The Imperial Yeomanry Committee reserves the power of allotting to each corps as many horses as they think fit, and an application for such horses as are required must be made in the first instance to the Imperial Yeomanry Committee.
 7. Subject to Rule 6, each corps may draw upon the Imperial Yeomanry Committee for such horses as they provide for themselves at the rate of £40 per horse (but only on the condition that the horse is approved by the Commanding officer to which the corps is attached, and that they have a man to put on him who has passed the tests) and for equipment at the rate of £25* per man, deducting the cost of such equipment as may be provided by the Imperial Yeomanry Committee.
 8. Pay and allowances will be drawn as per letter issued by War Office on 1st January to all General Officers Commanding Districts.
 9. All such expenses as cannot be charged upon the Imperial Yeomanry Committee or paid by the Regimental Pay Master must be defrayed out of private funds.
- By order of the Imperial Yeomanry Committee.
(Signed) A. G. LUCAS, Colonel.

APPENDIX 31.

APPENDIX 33.

FORM OF AGREEMENT OF MEDICAL OFFICERS.

To Her Majesty's Principal Secretary of State for the War Department.

I _____

of _____

being qualified to practice medicine and surgery, and being registered under the Medical Act now in force in the United Kingdom, hereby offer to serve as a Surgeon to Her Majesty's Forces in South Africa on the following conditions:—

1. The period of my service hereunder shall commence as from the day on which I shall embark from England, and shall continue until the expiration of 12 calendar months thereafter, or until my services are no longer required, whichever shall first happen.

2. My pay shall (subject as hereinafter appears) be twenty shillings a-day for the said period.

3. In addition to such pay, I shall receive a free passage from England to South Africa and (subject as hereinafter appears) a similar free passage from South Africa to England at the end of the said period; and so long as I am on active service hereunder, I shall receive the field allowance of a Captain in the Army, the use of a Government horse, and a soldier or civilian servant, and rations while in the field.

4. During the said period I will devote my whole time and professional skill to my service hereunder, and will obey all orders given to me by Commissioned Military or Naval Officers, or by the Permanent Medical Officers of either of those services.

5. In case I shall complete my service hereunder to your satisfaction in all respects, I shall receive at the end of the said period a gratuity of two months' full pay, at the rate hereinbefore specified, but in case I shall in any manner misconduct myself, or shall be (otherwise than through illness or unavoidable accident) unfit in any respect for service hereunder, of which misconduct or unfitness you shall be sole judge, you shall be at liberty from and immediately after such misconduct or unfitness to discharge me from further service hereunder, and thereupon all pay and allowances hereunder shall cease, and I shall not be entitled to any free passage home or gratuity.

Dated this

day of

62nd Company Middlesex (3).

APPENDIX 40.

EQUIPMENT OF COMPANIES.

079/10/
1077.

SIR,

War Office,
12th March, 1900.

I have been directed by the Secretary of State for War to draw your attention to the fact that it is reported from South Africa that companies of Imperial Yeomanry are arriving there deficient of equipment.

I am consequently to request that you will be good enough to issue such instructions as will ensure that no further companies proceed unless fully equipped.

I am, &c.

F. S. ROBB, D.A.A.G.

The General Officer Commanding.

APPENDIX 41.

INSTRUCTIONS REGARDING GENERAL EFFICIENCY OF COMPANIES BEFORE EMBARKATION.

079/499.

SIR,

War Office,
15th January, 1900.

I am directed by the Secretary of State for War to forward you the following instructions relating to paragraphs 3, 4, and 5 of the Special Army Order of the 4th instant relating to the Imperial Yeomanry.

All Officers Commanding Companies of Imperial Yeomanry, raised in your command, will be directed by the Imperial Yeomanry Committee to report to your Chief Staff Officer as soon as their companies are formed.

On receipt of this information you will at once take steps to have each company thoroughly tested in musketry, riding and general efficiency as well as to ascertain that all officers, non-commissioned officers and men composing it fulfil in every way the qualifications specified in the Special Army Order of the 2nd instant.

For this purpose you may utilise the services of your District Inspector of Musketry, Brigade Adjutants of Yeomanry, or any specially selected Field Officer serving in your command.

As soon as the inspection is completed you will be good enough to telegraph at once to this department whether you are satisfied that the company fulfils the qualifications laid down and whether in your opinion it is fit for service in South Africa.

Should the general efficiency of the company be satisfactory, and only a few individuals below the necessary standard, it will be unnecessary to finally reject the company, or to have a further inspection of it, but you will ensure that any individuals subsequently drafted into it are individually inspected and that no officer or man proceeds to South Africa who does not fulfil the required conditions or who has not satisfied the inspecting officer.

I am, &c.

LESLIE RUNDLE, D.A.G.

The General Officer Commanding.

APPENDIX 42.

MEMORANDUM OF THE ARRANGEMENTS MADE FOR DEALING WITH THE SICK AND WOUNDED ARRIVING IN THIS COUNTRY FROM SOUTH AFRICA.

General
hospitals.

1. On arrival at the port of disembarkation, sick and wounded will be conveyed direct to one or other of the larger hospitals in accordance with instructions from the War Office. The hospitals which are likely to be so utilised, and which for this purpose will be regarded as general hospitals, are:—

Royal Victoria Hospital, Netley.
Herbert Hospital, Woolwich.
Cambridge Hospital, Aldershot.
Connaught Hospital, Aldershot.
Station Hospital, Devonport.
" " Colchester.
" " Shorncliffe.

2. Beds will be kept vacant at these hospitals by the following methods of evacuation:—

- (a) Men permanently unfit will be at once discharged from the service (*see* paragraph 1814, Queen's Regulations), with the exception that in the case of men suffering from wounds rendering them permanently unfit, the discharge will not be carried out until the wounds have healed.
- (b) With the exception of venereal and infectious cases, men who have been so discharged, and who still require hospital treatment (as noted under paragraph 444, Regulations for Army Medical Services) should be sent to one or other of the civil hospitals which have offered beds for their reception. A list of these hospitals, and the accommodation offered, has been sent to Principal Medical Officers, and these latter should arrange direct with the authorities of the civil hospital for the reception of the men whom it may be desirable thus to transfer from time to time.
- (c) Men not likely to be permanently unfit, but who still require hospital treatment, will be retained in the general hospitals until sufficiently recovered to proceed on sick furlough or to convalescent homes (*see* below), or they may be transferred, under orders of the Principal Medical Officer through the General Officer commanding, without reference to the War Office, to *any other military hospital in the district in which the general hospital is situated*. (For the purposes of this paragraph the P.M.O., Woolwich, is authorised to transfer patients from the Herbert Hospital to the military hospitals of the Thames district, of which he has the administrative medical charge.)
- (d) Further evacuation of sick and wounded requiring treatment will be arranged, as necessary, by transfers to hospitals in other districts, but such transfers will only be carried out by War Office authority. Similarly it may be necessary to utilise vacant beds in civil hospitals should the military hospitals become congested; and in such case too the War Office will issue the necessary instructions.
- (e) Men sufficiently recovered to leave hospital as convalescents will be granted sick furlough without delay:—
 - (i) To their own homes.
 - (ii) To private convalescent homes (*see* below).

These men will not return to the general hospital from which they were granted furlough, but will be dealt with in accordance with the instructions in Annex "A." Clothing will be issued to them in accordance with the instructions contained in Annex "B." Medical history sheets and other medical documents bearing upon the case will be forwarded for custody to the Officer Commanding the station at which the invalid will report himself at the expiration of his sick furlough, for the information of the medical officer who examines him in accordance with paragraph 6 of Annex "A."

Station
hospitals.

3. Sick and wounded transferred under paragraphs 2c and 2d to station hospitals will be dealt with as follows:—

- (a) Men permanently unfit will be brought forward for discharge under Section VI, Regulations for Army Medical Services, but whenever practicable the invaliding

board should be held at the hospital where the man is under treatment, so as to avoid the necessity of transferring him to the headquarters of the district (*see* paragraph 441, Regulations for Army Medical Services).

- (b) Civil hospitals should be utilised for men who are discharged the service as permanently unfit, but who still require hospital treatment, in accordance with the procedure laid down at paragraph 2 (b) for general hospitals.
- (c) When men are sufficiently recovered to proceed on sick furlough or to convalescent homes, they will be dealt with as prescribed at paragraph 2 (e) for general hospitals. *They will not be sent back to the general hospital from which they were transferred.*
- (d) Men who are fit for duty will be discharged from hospital and taken temporarily on the strength of the station, and attached to a unit until they can be disposed of.
- (e) Men who report themselves at the nearest military station on completion of their sick furlough to their own or private convalescent homes, granted them either from the general hospitals or the station hospitals (*see* paragraphs 2 (e) and 3 (c)), will be admitted into the hospital of that station if they are found to be sufficiently ill to require hospital treatment, and thereafter dealt with as in the preceding paragraphs; otherwise they will be dealt with as in paragraph 7 of Annex "A" attached.

4. The medical officer in charge of station hospitals will apply to the officer commanding the station for any documents that may be required in connection with the foregoing precedures.

5. All enquiries connected with the utilisation of convalescent homes for men granted sick furlough will be made direct to the Soldiers' and Sailors' Help Society, 17, King Street, St. James's, S.W. Nominal rolls of men desirous of availing themselves of these homes will be sent weekly from the hospitals concerned to the Secretary of the Society. Convalescent homes.

5A. A list of the convalescent homes available will be hung up in every ward of the general and station hospitals.

6. The names of men who originally elected to go on sick furlough to their own homes but who thereafter express a desire to be sent to a convalescent home will also be notified to the Society. Men will be told on going on sick furlough to their own homes that they may afterwards apply to the nearest military station for admission into a private convalescent home, and the Commanding Officer of the station, on such application being made to him, will arrange accordingly.

7. It is not intended that the time spent in convalescent homes shall count against the men as ordinary leave, and the men should be informed accordingly.

8. The movements of sick and wounded from the general hospitals to civil hospitals or to hospitals in the district under 2 (b) and 2 (c) will be carried out locally. Sick transport.

9. With regard to movements that may have to be carried out under 2 (d) the instructions in Annex "C" will be followed. The railway companies should be requisitioned to provide the most suitable vehicles for the purpose. Five special railway ambulance carriages have recently been constructed, each capable of conveying 12 lying down and 12 convalescents, with medical officer and orderlies. If it is considered necessary that one or more of these carriages should be used, application must be made to the War Office; but General Officers Commanding will understand that these carriages are for special cases only, and may not always be available.

10. Sick and wounded officers, desirous of availing themselves of treatment in private hospitals or convalescent homes, should apply to the Honorary Secretary, Sick and Wounded Officers' Fund, Hampden House, Green Street, London, W. Sick and wounded officers.

11. Statistical returns will be rendered for all sick and wounded from South Africa under treatment in military or civil hospitals, in accordance with the instructions laid down under the heading of Statistical Returns in the Memorandum of the medical arrangements for the South African Field Force. Statistical returns.

12. For this purpose a separate section of the admission and discharge will be opened for sick and wounded from South Africa in order to keep them distinct from the ordinary sick of the station and other invalids from abroad.

13. Sick and wounded transferred to civil hospitals will be entered in the admission and discharge book of the nearest military hospital and shown in the returns from that hospital, in accordance with paragraph 406 Regulations for Army Medical Services.

14. In order to maintain accurate entries in the admission and discharge books, nominal rolls (Army Form A 36) of men transferred to civil hospitals will be sent by the medical officer in charge of the hospital from which they are transferred to the officer in charge of the nearest military hospital, and the authorities of the civil hospital should be instructed to intimate to the latter whenever anyone so transferred is discharged hospital by death or otherwise.

ANNEX A.

Throughout the duration of the present operations in South Africa, the following instructions will be observed as regards sending soldiers on sick furlough or to convalescent homes from the hospital at which they are first received on arrival in the United Kingdom. Gen. No. 16
1650.

1. Soldiers will be sent on sick furlough from this hospital to their own or convalescent homes direct.

2. All such soldiers will be provided with railway warrants to their place of residence or convalescent home, and from their place of residence or convalescent home to the military station nearest thereto, and the Officer Commanding at that station, as well as the Officer commanding the unit which the soldier will eventually rejoin, will be notified by the Assistant Adjutant-General, Netley, or by the Chief Staff Officer at other stations, of the number, rank, name and address of any such soldier, together with the date of the expiration of his furlough.

3. Warrants will be made out by the route which will entail the fewest changes of carriage and detention at junctions, and not necessarily by the cheapest or most direct route. Care will be taken that the hours of arrival and departure are not before daylight or after nightfall.

4. All soldiers on proceeding on furlough should be warned that, if the railway warrant issued to enable them to rejoin a military station on the conclusion of their furlough is used for any other purpose than that for which it is issued, the cost will be recovered from their pay.

5. They will also be warned that should they change their place of residence during their furlough, they will only be entitled to conveyance at the public expense to the same amount as if they had rejoined from the place to which they originally proceeded on furlough.

6. On the expiration of the sick furlough the soldier will, if he resides at his own home, be required to rejoin at the military station to which he has warrants given him, and on reporting himself, he will be medically examined and, if fit, he will be provided with warrants at the public expense to rejoin the unit* laid down in paragraph 1814,

Queen's Regulations, as amended by War Office Letter ^{No. 114} Cav. of 23rd December, 1899, ₄₃₂

except that in the Cavalry the reserve squadron will take the place of any regiment or affiliated regiment which may have left the United Kingdom, and the line details the place of the home battalions. If he is at a convalescent home, the medical examination will be carried out by the medical officer in charge of the home.

7. Should the soldier not be fit to rejoin, his furlough may be extended within the limit laid down in the Queen's Regulations, and he may be provided with warrants at the public expense to his original place of residence, or to any other selected place of residence of not greater distance, and on the completion of this extension he will be dealt with as at the original expiration of his furlough.

8. In the event of a furlough being extended, the Officer Commanding the unit which he will rejoin will be notified of the fact, as well as of any change of address, by the officer extending the furlough. In the case of men in convalescent homes, the medical officer in charge will apply to the Officer Commanding the regimental district in which the home is situated in all cases in which he considers an extension of a soldier's furlough necessary.

9. The authorised advance of pay and allowances should be made before the men proceed on furlough, and should be charged in the accounts of the Paymaster of the station from which the men first proceed on furlough. The men's accounts will then be transferred to the unit referred to in paragraph 6, and any further advances of pay and allowances that may be necessary will be made by the Officer Commanding that unit.

10. A supply of printed forms containing instructions for the guidance of soldiers whilst on sick furlough has been distributed to all concerned, and a copy will be given to every soldier before he proceeds on furlough.

11. These instructions will apply to all invalids from abroad, and not to those from South Africa only

* The unit for the Imperial Yeomanry was the Provisional Battalion, Shorncliffe.

ANNEX B.

Arrangements will be made to complete the kits of all invalids from South Africa prior to their quitting military hospitals to the following :—

- 1 pair boots or shoes,
- 1 home pattern frock or jacket,
- 1 " " pair trousers or trews,
- 1 field cap or glengarry,
- 1 great coat,
- 1 jersey,
- 2 shirts,
- 2 pair socks,
- 1 pair mitts,

at Netley by the Assistant Adjutant-General, from a stock which will be maintained by that officer for the purpose ; and for the present at other military hospitals by the Principal Medical Officer, who will ascertain the deficiencies in the man's kit, and telegraph for the necessary articles to complete from the depôt or unit to which the man belongs. Officers Commanding depôts and units will be responsible for the prompt dispatch of the articles on demand, utilising as far as possible any articles stored for the man under paragraph 8 of the special scales for South Africa.

In the case of invalids proceeding to convalescent homes, the Principal Medical Officer will issue in addition, for wear in the house or grounds, a suit of hospital clothing (consisting of gown, neckerchief, shirt, slippers, trousers and waistcoat, and furnish the manager of the home with a detail of the articles sent. This clothing will be returned by the manager when the man quits the home.

ANNEX C.

120

Home

8247

With the view of providing accommodation from time to time at the general hospitals for the sick and wounded arriving from South Africa, and invalids from India, the principal medical officer of the district will be instructed by the Director-General Army Medical Service as to the disposal of such men as can be removed to civil and military hospitals in other districts.

The General Officer Commanding will carry out movements on the requisition of the P.M.O., making the necessary notification to districts concerned, and reporting moves under paragraph 1349 Queen's Regulations.

APPENDIX 43.

DETAILED DESCRIPTION OF THE UNIFORM WORN BY THE IMPERIAL YEOMANRY.

Serge patrol jacket	..	Khaki.
		Buttons dull bronze, centre crown surrounded by "Imperial Yeomanry."
		Shoulder straps, 1-inch letters "I. Y." with number of company above.
		Roll collar.
Cloak	Cavalry of the line.
		Blue or khaki cloth.
		Buttons and badges as jacket.
Hat	Slouch.
		Khaki colour.
		Left brim turned up with regimental badge.
	or	
Helmet	Khaki.
		With regimental badge over peak.
Field service cap.	..	Khaki serge.
		Regulation cavalry pattern.
Hunting breeches	..	Bedford cord or other suitable material.
		Strapped with continuations.
		Horn buttons.
Trousers	Khaki serge.
		As infantry of the line.
Boots	As for mounted infantry.
Spurs	Cavalry of the line.
Putties	As for mounted infantry.
Waist belt	Army pattern.

LIST OF SADDLERY SUPPLIED TO IMPERIAL YEOMEN.

A mounted infantry saddle with fans.
 A bridle with steel Pelham bit.
 A head collar.
 A collar rope.
 A pair of wallets, double gussets.
 A set of wallet, cloak, and baggage straps.
 A numnah.
 A gun bucket.
 A shoe case (to hold two shoes).
 A horse service blanket.
 Girths, leathers, irons.
 Eye fringe.
 Eye net.

APPENDIX 44.

INSTRUCTIONS REGARDING THE PROVISIONAL BATTALION AT SHORNCLIFFE FOR RETURNED VOLUNTEERS.

War Office,
28th April, 1900.

114/Cape/
130.

SIR,

I am directed by the Secretary of State for War to inform you that it has been decided to form at Shorncliffe a dépôt for all Colonial non-commissioned officers and men who have been sent to England from South Africa.

The dépôt will be attached to the Provisional Battalion.

I am therefore to request that you will arrange to send to that station any convalescents of Colonial corps who are fit to travel.

If fit for further service they should be dealt with under Appendix B of the "Memorandum of Arrangements for dealing with Sick and Wounded from South Africa," except that a suit of drab serge clothing, with two pairs of woollen drawers, should be substituted for the home pattern suit therein referred to.

All who are unlikely to be fit for further service should be provided with a suit of plain clothes, a civilian great-coat, and also one jersey, two shirts, and two pairs of socks, if such articles are not already in their possession.

If belonging to Great Britain, but enlisted in Cape Colony or Natal, they are entitled to receive, until finally discharged, the rates of pay for which they were enlisted.

If Canadians or Australasians, they will be entitled to pay, until finally discharged at Army rates.

I am, &c.

The General Officer Commanding.

APPENDIX 45.

DISPOSAL OF RETURNED INVALIDS.

War Office,
31st May, 1900.

079/10/
1667.

SIR,

I am directed by the Secretary of State for War to inform you that the following procedure has been approved for the disposal of non-commissioned officers and men of Imperial Yeomanry, and City of London Imperial Volunteers returning invalided from South Africa to this country.

Convalescents who are medically fit, or are likely to become fit, to return to South Africa, will be sent to Shorncliffe for attachment to the provisional battalion.

Invalids for discharge will be dealt with in the manner laid down for soldiers of the regular forces.

In all cases in which such soldiers, or soldiers of Colonial Forces, whose services are not immediately required, are desirous of taking furlough, it may be granted, under the usual conditions.

I am, &c.

F. S. ROBB, D.A.A.G.

The General Officer Commanding.

APPENDIX 46.

MEDICAL TREATMENT OF RETURNED INVALIDS AT THEIR OWN HOMES.

SIR,

War Office,
15th June, 1900.

079/10/
2087.

I am directed by the Secretary of State for War to inform you that it has been brought to the notice of the Commander-in-Chief that some of the non-commissioned officers and men of the specially raised Corps, such as the Imperial Yeomanry, City of London Volunteers, and Volunteer Companies, invalided home from South Africa, are desirous of proceeding to their homes for medical treatment rather than of being admitted into Military Hospitals, and are so circumstanced that they can provide themselves with proper medical attendance.

I am, therefore, to inform you that there is no objection to any such non-commissioned officers or men being permitted to be treated in their own home, provided that they are fit to travel, and that they give a written undertaking that they or their friends can guarantee the responsibility for care and medical attendance, that they quite understand that no claim for medical attendance will be admitted as a charge against the public, and that they will keep the officer in charge of their attestations informed of their address.

The cost of conveyance to their homes may be admitted as a charge against the public.

I am, &c.

F. S. ROBB, D.A.A.G.

The General Officer Commanding.

APPENDIX 47.

DISPOSAL OF RETURNED INVALIDS.

SIR,

War Office,
23rd June, 1900.

079/10/
2113.

In reply to your letter of the 18th instant relating to the disposal of Imperial Yeomen returned from South Africa, I am directed by the Secretary of State for War to inform you as follows:—

1. All Imperial Yeomen will be attached to the Provisional Battalion, Shorncliffe.
2. It is immaterial for this purpose whether they belong to Companies affiliated to Regiments of Yeomanry or whether they belong to Independent Corps.
3. (a) Imperial Yeomen who are fit for service in South Africa will, for the present be sent back to that country. As soon as it is possible to dispense with their services, there will be no objection to any of them in the United Kingdom being allowed to take their discharge.
- (b) The case of those desirous of furlough with a view to obtaining civil employment is already met by paragraphs 1933 to 1951, Queen's Regulations.
- (c) Those claiming to remain serving for the full year will remain attached for the present to the Provisional Battalion, Shorncliffe. Their subsequent employment will depend on the numbers who elect to serve the full year.
4. The General Officer Commanding South Eastern District will be directed to have all casualties affecting the Imperial Yeomen reported to you.
5. It is not considered necessary to notify this in an Army Order.

I am, &c.

F. S. ROBB, D.A.A.G.

Deputy Adjutant-General Imperial Yeomanry.

APPENDIX 48.

CONVEYANCE OF CONVALESCENTS TO THEIR OWN HOMES.

14/Gen.
No./4857.

SIR,

War Office,
24th June, 1900.

I am directed by the Secretary of State for War to acquaint you that the provisions of Appendix A of the Memorandum of Arrangements made for dealing with the sick and wounded from South Africa may be extended to cover the free conveyance of men sent from convalescent homes before the expiration of their sick furlough to their own homes.

2. On receipt of medical certificates that the invalids in question are fit to proceed on sick furlough to their own homes, warrants thereto will be issued at the military stations nearest the convalescent homes and from thence to the military stations nearest to the men's homes, the procedure thereafter being as laid down in paragraph 6 of Appendix A of the Memorandum referred to.

3. In the cases of men going home on extended sick furlough, the medical history sheets and other medical documents will be forwarded from the military stations nearest the convalescent homes to those at which the men will report themselves at the expiration of their furloughs.

I have, &c.

J. E. LINDLEY, D.A.G., Q.M.G.

The General Officers Commanding.

APPENDIX 49.

INVALIDS ALLOWED TO GO HOME.

079/10/
2262.

SIR,

War Office,
9th July, 1900.

With reference to previous correspondence regarding the disposal on arrival home, invalided from South Africa, of non-commissioned officers and men of specially raised corps—Imperial Yeomanry, City of London Imperial Volunteers, Service Volunteer Companies, &c. :—

I am directed by the Secretary of State for War to inform you that the letter of 15th ultimo from this Department (No. 079/10/2037) appears to have been misunderstood in some cases. It is not intended that the men dealt with under its provisions should not be attached for payment to the Provisional Battalion, Shorncliffe.

Before soldiers are dealt with under the above quoted letter, they should be informed that their Commanding Officer whilst in England is the Officer Commanding the Provisional Battalion, Shorncliffe, to whom they should address themselves on all matters and report all changes of address, as well as to the officer in charge of their attestations.

I am to add that a return of all men dealt with under the letter of 15th June should be sent to the Officer Commanding the Provisional Battalion.

I am, &c.

F. S. ROBB, D.A.A.G.

The General Officer Commanding.

APPENDIX 50

REGULATIONS REGARDING THE DISCHARGE OF IMPERIAL YEOMEN.

War Office,
4th September, 1900.

SIR,

1. With reference to Army Order 175 of the 1st ultimo, I am directed by the Secretary of State for War to acquaint you that the following arrangements have been approved by his Lordship for the disposal of Imperial Yeomen, City of London Imperial Volunteers, and members of the Volunteer Force enlisted for service in South Africa, arriving home from that country :—

- (a) Men medically unfit for further service should be discharged under that heading, the procedure laid down in the Queen's Regulations being followed in the case of each man, and the discharge documents being forwarded to the Secretary, Royal Hospital, Chelsea, London, S.W., for consideration as regards the question of pension.
- (b) Men not medically unfit for further service, who wish to be discharged, may be released at once from the liability to further service, the procedure laid down in the Queen's Regulations being also followed in their cases, and the cause of discharge being recorded as "in consequence of his own request on return from South Africa, his services not being further required."

2. Those who have over five months still to serve, and do not desire to be discharged, will be allowed to rejoin their Corps in South Africa, provided that they express a wish to do so in writing.

3. The gratuity of £5 issuable under paragraph 23, Imperial Yeomanry Regulations, issued with Army Order 28 of 1900, paragraph 13 of Army Order 29 of 1900, paragraph 12 of Army Order 30 (a) of 1900, paragraph 13 of Army Order 30 (b) of 1900, paragraph 17 of Army Order 31 of 1900, and paragraph 7 of Army Order 58 of 1900, will be paid to each man on discharge. Further instructions will be issued, in due course, in regard to the payment of the War gratuity.

I have, &c.,

The General Officer Commanding.

APPENDIX 51.

INSTRUCTIONS REGARDING ISSUE OF CLOTHING TO RETURNED INVALIDS.

War Office,

October 2nd, 1900.

A.C.D/
R.A.M.C./
5295.

SIR,

With reference to the Memorandum of Arrangements for dealing with the Sick and Wounded arriving in this country from South Africa, and to Circular letters 114/Cape/130, 28/4 and A.C.D./S. Africa/1208, 29/5, I am directed by the Secretary of State for War to inform you that all invalids from that country discharged unfit for further service, or proceeding on furlough pending such discharge, should be in possession of the following articles:—

A pair of boots or shoes.

A suit of plain clothes.

A civilian greatcoat (if discharge takes place between October 1st and March 31st 1901).

One pair of woollen drawers.

A jersey.

Two flannel shirts.

Two pairs of socks.

Any of these articles not in possession of the men should be issued free until further orders; but if any of the articles named have been issued to the invalid when leaving hospital or proceeding on furlough a second issue will not be made when the discharge is being completed.

This applies to all invalids for discharge as unfit for further service, whether regulars (including reservists), militiamen, Imperial Yeomanry, volunteers, or colonials. For such invalids it replaces the scale in the first paragraph of Appendix B of the Memorandum referred to and may be regarded as superseding the instructions given in letters quoted above. Regular soldiers invalided, other than Army reservists, will not draw the allowance granted by paragraph 93, Clothing Regulations, unless they have already received a suit of uniform under Appendix B, in which case they will receive the allowance on discharge, instead of the suit of plain clothes.

I am, &c.,

The General Officer Commanding.

APPENDIX 52.

WEEKLY RETURN SHOWING NUMBER OF RECRUITS.

Yeomanry Cavalry

RETURN showing the Number of Recruits for the Imperial Yeomanry finally Approved by the
 Officer Commanding the above Regiment up to Saturday, _____, 1900
 _____, 1900.

	Number of Recruits finally Approved for Imperial Yeomanry.		Remarks.
	From Yeomanry Corps.	Volunteers and Civilians.	
During week ended Saturday, _____, 1900	
During previous weeks..	
Total	

Signature _____

The Certificate of final approval on the second page of Attestation should not be completed until the recruits' acceptance is final and independent of conditions not already fulfilled.

No man is to be included in this Return amongst those finally approved until he has passed all the required tests.

This return is required weekly and should be made up to Saturday inclusive *and posted on the evening of that day.*

The form of the Return should not be altered but must give the total for the week and the grand total up to date.

APPENDIX 53.

REPORT ON THE RAISING, &C., OF THE 46TH, 54TH, AND 60TH COMPANIES IMPERIAL YEOMANRY, AT BELFAST, BY COLONEL F. J. GRAVES.

Belfast,
21st August, 1900.

1. I was requested to raise a Company Imperial Yeomanry in October, 1899.

I immediately appealed through the press all over the North of Ireland for volunteers. The response was such that I offered to raise a second company and was directed to do so, and very soon had more men than were required, and in January, 1900, I was asked could I raise a third? I consented and shortly completed the third company.

When the third company was completed I was asked whether I could raise a fourth, my reply was that I would raise a fourth company if the Authorities would supply me in the first instance with the necessary officers. As this could not be done the fourth company was not raised.

2. Owing to there being no Yeomanry in Ireland the question of officers was my chief difficulty all through. I applied to several regiments of Yeomanry in England as well as to Lord Longford for officers without effect, owing to the great demand for Companies raised in England. I had, therefore, to fall back upon the Militia Brigade Royal Irish Rifles and other local units for the necessary supply, and with the exception of two had to find my own officers for the three companies.

I appointed Captain R. Robinson, Adjutant, 13th Battalion Imperial Yeomanry, Acting Adjutant, and to command the men enlisted, pending the appointment of officers.

The want of officers seriously hampered my efforts for a considerable time. To meet the difficulty I obtained the assistance of officers, 3rd Dragoon Guards, to carry out the riding tests I laid down, and of the Musketry Instructor, Royal Scots, for the shooting tests.

I cannot speak too highly of the help given me by Captain Kent, 3rd Dragoon Guards, and Captain Nash, Royal Scots, in these duties.

3. I applied for permanent staff sergeants of English Yeomanry, but could not obtain one! I, therefore, had to select the most likely men from among the enlisted men and appoint them provisionally. These, I was pleased to observe, were confirmed in their posts afterwards.

4. To complete three companies I had 1,175 men tested who volunteered.

The first test was, of course, the medical.

The second was the riding test. This test occupied a considerable time as men poured in and the horses were limited, and the officers had other duties to perform in their own corps.

Owing to the want of officers and experienced non-commissioned officers belonging to the Imperial Yeomanry the work of testing both in riding and shooting was a matter of great difficulty, for it was reported to me by a non-commissioned officer, Imperial Yeomanry, that several attempts at *personation* had been made, and that some men were passed who had not either ridden or shot.

I took the necessary steps to prevent this, and retested a number of men, and eventually expelled 22 men who did not satisfy me as to their efficiency.

In a good many cases men showed that they would with but little practice become good horsemen. These I advised to go to a riding-master in Belfast and take lessons.

Lord Dunleath and the Hon. S. Ward and others took in, boarded, and lodged relays of such men, and gave them riding and shooting lessons until fit to be tested by me again. All the men thus helped by Lord Dunleath and Mr. Ward passed satisfactorily.

The third test was shooting. This was, of course, the most onerous and trying, and required great judgment on the part of the officer conducting it, as not one in 100 of those being tested ever fired with a military rifle before. Most of them were game shots, and some had shot with a rook rifle. The result was that so many got within a few points of the standard required who could ride well, that I gave many such several chances, and was glad to observe that, with rare exceptions, they improved each time, and finally reached the standard.

5. Owing to the want of officers, Imperial Yeomanry, referred to above, I had to detail adjutant, acting-quartermaster, and company officers from the Depôt Royal Irish Rifles. Further, a separate orderly room and quartermaster's office and stores were established. Quarters were allotted separate from the Regulars and Militia. The Yeomanry officers took charge as they were appointed. Cooking and messing were put on the same footing as in the Depôt.

(8470)

2 A 2

- Equipment.** 6. Owing to the enormous demand, many things could not be supplied from the Yeomanry Committee's stores, and I had to compete in the open market both as to labour and material. This affected the price of some things very much, especially saddlery, which was most difficult to procure. However, I am pleased to state that the three companies were fully clothed and equipped, every man having two of every article of clothing, and yet I have a balance of some £4,000 to meet their needs now.
- Accounts.** 7. These, owing to the circumstances of the case, have and still cause me a great deal of trouble. Owing to the very heavy work at the Depot, recruiting generally, &c., I was compelled to appoint an officer as sub-accountant, then, as captains were appointed to command the several companies, they were given charge under my direction and supervision of the equipment and accounts of their companies. This may have increased the trouble of adjusting accounts where no less than six officers had a share in dealing with them, but it was unavoidable, and had one good effect, *i.e.*, it made the Yeomanry officers feel their responsibility more than if everything was done for them.
- Training.** 8. There were some 30 men enlisted who were old soldiers; some of them were qualified to instruct and drill. I obtained the services of several non-commissioned officers 3rd Dragoon Guards, and three of my own Militia Sergeant-Instructors of Musketry. With this staff I put the whole through a course of mounted infantry foot drill twice a day, and also through the firing exercises. I obtained the use of 30 troop horses and sent the men to riding school and out into the country at the rate of 90 per day.
- Further, all men who did not pass their shooting test the first time were sent down in batches to the range for practice.
- I have pleasure in recording my high opinion of the work done by Captain M'Gee, late 10th Hussars, who trained the drafts for the three companies, and also helped to train the 60th Company.
- Discipline.** 9. Considering that only some 30 of this body of men had served before, the general behaviour in quarters was excellent. I was for five years adjutant of a Yeomanry regiment myself, and was in a position to advise the Yeomanry officers as to their way of dealing with such a class. The result was that I had to dismiss only 4 for misconduct. This, I think, reflects great credit on the Yeomanry officers, of whom 14 were supplied from the Royal Irish Rifles Militia Brigade, and others of the North of Ireland.
- Physique.** 10. To be short, the three companies were as fine a body of men as could be seen.
- General remarks.** 11. The circumstances obtaining in Ireland were special and peculiar, owing to the fact that there is no Yeomanry force in the country to draw upon.
- Should, therefore, such a force be again raised in Ireland, I think it important that before the men are enlisted, company officers should be appointed.
- During two months of the time I was engaged with the raising, &c., of the Imperial Yeomanry, I had not only to carry on the, then, very heavy work of the 83rd Regimental district, but also had to command the Belfast District in the absence of a General Officer Commanding. The tension and mental strain of such an accumulation of work can easily be understood, and to carry the greater part of it out to a successful issue without officers or qualified Yeomanry non-commissioned officers for a great part of the time made the burden almost too heavy to bear, hence my declining to raise a fourth company unless supplied with officers.
- Further, a reasonable proportion of Yeomanry Permanent Staff sergeants, qualified trumpeters or buglers should be allotted. Further, officers charged with the clothing and equipment of such a force should not be compelled to compete in the open market for what they require.
- Further, each captain of a company should be made responsible for the company equipment and capitation accounts. In my case this was not possible, as I had the men of two companies enlisted before a single officer was appointed, and the first company was almost clothed and equipped.
12. In conclusion I have to say that I trust the heroic stand made by the Ulster companies at Lindley for nearly five days against tremendous numerical odds, only to give in when artillery fire was brought to bear on them, and when they were reduced to a few meat tablets and a spoonful of jam to eat, is sufficient proof that the men were carefully selected and trained as far as time and the circumstances permitted.

(Signed) FRANK GRAVES, *Colonel*,
Commanding 83rd Regimental District.

APPENDIX 54.

REPORT ON RAISING PAGET'S HORSE.

Committee.

His Grace the DUKE OF SOMERSET.
Major-General H. COOK.
Colonel FRED HILL.

The raising of this corps originated with Mr. George Paget, subsequently appointed Major and 2nd in command. Report.

His first idea was an independent corps of gentlemen, but it was somewhat modified by the War Office, who sanctioned the enlistment of two companies (afterwards increased to 4) consisting of five officers and 120 men, each affiliated with, and under the Imperial Yeomanry Committee.

The enlistment was effected by means of advertisement and notices in clubs, &c., and in time the necessary number of officers, non-commissioned officers and men were got together and embarked for South Africa. Subsequently, a Gun Section consisting of an officer and 16 non-commissioned officers and men, with two Maxim guns (purchased out of private funds) was raised, equipped, and sent out.

The enrolment was from the first carried out under very great difficulties—there was no suitable accommodation—the whole of the clerical work had to be done by officers as they were from time to time appointed, so that there was no continuity of responsibilities.

A small and utterly unsuitable office was used as headquarters for enlistment.

The men, after being passed fit by the medical officer and sworn in, were sent in detachments to drill at Chelsea Barracks and other available places, then, through a course of riding on hired horses, principally in Hyde Park, then to Bisley to pass the shooting tests.

The equipment was carried out by various private firms in a not altogether satisfactory manner, the more so, on account of the hurried manner in which it had to be done.

With a view of meeting a similar "call" in the future the Committee would recommend that, in raising a corps such as this, much delay and inconvenience would be avoided, and the work more thoroughly done, were suitable premises provided and experienced clerical assistance given, the extra remuneration for which, to come out of private funds; that the names of the officers should be submitted direct to the War Office and, on being approved, should at once commence their duties; this would prevent much delay and inconvenience; that facilities be afforded for assembling and drilling the recruits, and (for a mounted corps) horses and a qualified instructor be placed at disposal; and that barrack or camp accommodation be provided.

Suggestions.

Firms should be appointed by the War Office for supply of clothing and equipment at fixed prices.

FRED HILL, Colonel,
For Committee.

APPENDIX 55.

REPORT ON THE ORGANISATION, &C., OF THE 77TH MANCHESTER COMPANY IMPERIAL YEOMANRY, BY COLONEL R. BRIDGFORD, C.B., V.D.

Manchester,
21st August, 1900.

The authority for raising the Company was dated 3rd March, 1900, at the request of myself, knowing the strong feeling there was in Manchester and district to serve in South Africa.

A strong desire existed among the members of the Mounted Infantry and other members of Volunteer Corps, to offer their services, and prior to the formation of the 77th Company they were accepted by the Duke of Lancaster's and also Sherwood Rangers Yeomanry Corps. As soon as it was known that authority had been received to form the 77th Manchester Company, over 400 applications were received, and from these the men were selected who ultimately joined the corps which left Manchester on Good Friday, 13th April, 1900, and embarked in the steamship "Canada" on the following day.

By the kindness of the Directors of the Trafford Park Estate I was able to train the men in the park, as well as billet them in Trafford Hall, which had been placed gratuitously at our disposal.

It would have been quite easy to form a second company, which at one time was approved, to be named the 64th Manchester Company, and great regret was expressed when we were informed that the 77th Company was the last that would be sanctioned.

The formation of the 64th Company was cancelled as, on the 31st March, 1900, the War Office stopped all recruiting for the Imperial Yeomanry, and consequently no companies which were not complete in every detail and ready to sail on the steamship "Canada" were allowed to leave England for South Africa.

R. BRIDGFORD, *Colonel*,
2nd V.B. Manchester Regiment.

APPENDIX 56.

APPENDIX 57.

INSTRUCTIONS TO COMMANDING OFFICERS REGARDING FINANCE.

SIR,

January 11th, 1900.

In order to facilitate the work connected with the returns and accounts to the War Office, I shall feel obliged if you will be good enough to note the following instructions which it has been deemed necessary to issue :—

1. All advances received by your local honorary treasurers from the Imperial Yeomanry Committee, should be paid into a bank selected by you to the credit of an account called "Imperial Yeomanry Defence Fund."
2. An advance will be made for immediate requirements upon your formal application.
3. It is necessary that all applications for further moneys should be accompanied by an account of the expenditure to date, supported by vouchers, and it is requested that, in any event, accounts should be sent at intervals of not more than seven days.

The necessary forms are enclosed.

4. All liabilities incurred locally in respect of your contingent should be discharged as promptly as possible.

I am also to ask commanding officers to note that certain certificates in respect of the expenditure will be required from them before the troops are embarked, in order to enable the Committee to obtain the Capitation Grant from the War Office. The forms of certificate are in course of preparation, and will be forwarded to you at an early date.

This Committee is also directed by the War Office to inform you that the charges for carriage on first delivery of parcels of equipment should be regarded as forming part of the cost of the equipment concerned, and therefore the grant of £25 per man must include such charges.

If the commanding officer is in doubt as to the source from which any expenditure is to be defrayed, he had better communicate with the Imperial Yeomanry Committee.

I am, &c.,
(Signed) E. W. BECKETT,
Colonel.

The Officer Commanding.

APPENDIX 58.

FINANCE.

LETTER OF THANKS FOR DONATIONS RECEIVED.

1900.

I am desired by the Imperial Yeomanry Committee to acknowledge your letter of the _____ and to convey their thanks for your contribution of £ _____ to the Funds.

I am, &c.,
(Signed) E. W. BECKETT,
Colonel.

APPENDIX 59.

FINANCE. FORM OF REQUISITION FOR FUNDS REQUIRED BY CORPS.

From the Officer Commanding

at

To the Imperial Yeomanry Committee.

1900.

I have to request that you will be good enough to advance the sum of _____ pounds for the requirements of this Contingent, as specified below, and that the same may be paid to the _____ branch of the _____ Bank to the credit of my account.

Commanding _____

PURPOSES FOR WHICH THE ADVANCE IS REQUIRED.

Approved:—

APPENDIX 60.

FINANCE. CIRCULAR REGARDING DEPARTMENTAL ACCOUNTS.

From Finance Department to

Department

It would greatly facilitate the work connected with the Return and Accounts to the War Office if your Department would be good enough to forward to this office (Room 15) Invoices for articles ordered and delivered, *as early as possible*. Such invoices should, in order to avoid unnecessary labour to the War Office and to the Officers of the Imperial Yeomanry, hereafter bear evidence that the articles have been received and have been duly examined and approved as to quality and quantity, and that the prices charged are in accordance with the terms arranged by contract or at date of purchase.

As this Department is unable to check the stores and equipment, it may be desirable to add that, when invoices are being examined, the staff of your department should exercise special care to ascertain invoices are not passed in *duplicate*.

APPENDIX 61.

FINANCE.

CERTIFICATE IN SUPPORT OF CLAIM FOR CAPITATION ALLOWANCE FOR MEN OF IMPERIAL YEOMANRY CORPS.

Company }

APPENDIX 62.

FINANCE.

CAPITATION GRANT.

SIR,

16th January, 1900.

The Imperial Yeomanry Committee are desired by the Under Secretary of State for War to forward you Forms of Certificates on which the claim is to be made, through the Committee, for the capitation payment for the equipment (including horses) of the men of the Imperial Yeomanry Corps, together with copies of the certificate in which the claim for the company allowance is to be preferred.

I am desired to state that it would be a convenience to have all the names of the men in each company on one Form, if possible, and also to use a separate Form for each company.

I am, &c.,
(Signed) E. W. BECKETT,
Colonel.

For the Imperial Yeomanry Committee.

APPENDIX 63.

FINANCE.

NOTIFICATION TO BANKERS.

1900.

DEAR SIRS,

Please place the enclosed cheque for _____ to the credit of
the Officer Commanding the _____
Contingent of the Imperial Yeomanry.

I shall feel obliged if you will be good enough to acknowledge receipt of the enclosure.

Yours, &c.,
(Signed) E. W. BECKETT,
Colonel.

APPENDIX 64.**FINANCE.****NOTIFICATION OF GRANT OF FUNDS.**

_____ 1900.

SIR,

I am desired by the Imperial Yeomanry Committee to inform you that in response to your application of the _____ they have forwarded to the _____ Bank _____ a cheque for £ _____ to be placed to your credit in respect of necessary disbursements on behalf of your Regiment.

I am, &c.,

(Signed) E. W. BECKETT,

Colonel,

For the Imperial Yeomanry Committee.

APPENDIX 65.**FINANCE.****CAPITATION GRANT. -FURTHER ADVANCES.**

SIR,

12th February, 1900.

I am desired by the Imperial Yeomanry Committee to ask you to be good enough in the event of your applying for further advances on account of the capitation grant, to forward with such application a return in duplicate on the enclosed forms, showing the articles retained by your contingent and those which will be returnable to the Committee's stores.

It will also be of considerable assistance if commanding officers will state whether, and if so, how many, horses have been supplied to the contingent by this Committee.

The above information will enable the Committee here to deal more speedily with the remaining applications for stores and horses.

Should commanding officers desire to return empty packing cases to contractors carriage paid, they will be credited with the cost of such cases.

I am, &c.,

(Signed) E. W. BECKETT,

Colonel.

The Officer Commanding.

APPENDIX 66.**FINANCE.**

APPLICATION FOR ADDITIONAL ADVANCES.

24th January, 1900.

SIR,

I beg to call your attention to *Paragraph 3* of the enclosed circular, copy of which was sent to you on the 11th instant, and have to state, for your information, that until its provisions are complied with no further advances will be granted

I am, &c.,

(Signed) E. W. BECKETT,

Colonel,

For the Imperial Yeomanry Committee.

The Officer Commanding

APPENDIX 67.**FINANCE**

CAPITATION ALLOWANCE.

SIR,

3rd July, 1900.

As it is important that your Capitation Allowance should be dealt with by this department before the staff is disbanded, I shall be glad if you will be good enough to complete and return the formal memorandum as to Capitation Allowance which was sent you some time since.

I am, &c.,

E. W. BECKETT,

Colonel.

APPENDIX 68.**FINANCE.****PAYMENT OF ACCOUNTS.**

SIR,

3rd July, 1900.

With further reference to my letter enclosing cheque in payment of the balance which appeared to be due to your company, I am to point out that that remittance represents a provisional settlement on the part of this Committee, who have assumed the accuracy of the figures supplied by Commanding Officers.

In the event, however, of its being subsequently found that articles of equipment other than those credited in your accounts have been supplied by the Imperial Yeomanry Stores at Cape Town, the Committee will apply to you for the cost of same, and Commanding Officers are desired to make the necessary enquiries in this direction, and if they find that such further claims are likely to be made, sufficient funds should be reserved by them for this purpose.

I am, &c.,
(Signed) E. W. BECKETT,
Colonel.

APPENDIX 70.

FINANCE. FINANCIAL REQUIREMENTS OF COUNTRY CONTINGENTS.

The Officer Commanding

SIR,

2nd February, 1900.

It has been brought to the notice of this Committee that delay has arisen in certain cases in dealing with the financial requirements of country contingents in consequence of the non-compliance by Local Officers of the regulations laid down.

This applies more particularly to the Certificates required from Approving Officers, and to accounts relating to articles of equipment supplied by the Committee.

It is therefore earnestly requested that if your Company has been completed and you have not yet forwarded the formal Certificate in support of the claim for Capitation allowance, you will be good enough to do so, and in the event of your applying for further advances it will much facilitate matters if you will state what articles of equipment have been received from the Committee and utilised by your men, so that the necessary deductions can be made from your grant.

I am, &c.,

(Signed) E. W. BECKETT,

Colonel.

INCREASE OF CAPITATION GRANT.

SIR,

3rd May 1900.

I am desired by the Imperial Yeomanry Committee to inform you that the Secretary of State for War has agreed to a revision of the rate of capitation allowance to officers and men in respect of clothing and equipment, which has now been raised from £25 to £35 per head.

The Committee are therefore in a position to make further advances to the local contingents, but desire to point out to the responsible officer that the accounts and returns are in many cases incorrect or incomplete, and that no further payments will be made until a statement on the enclosed form has been filled in and returned, and compared with the Committee's accounts and records.

No credit will be given the contingents for articles returned to the Imperial Yeomanry Depot until further particulars of such returns, stating explicitly to what company the articles returned are to be credited, signed by the responsible officer, have been received and acknowledged as correct by the Imperial Yeomanry Committee.

The attention of officers commanding is directed to Imperial Yeomanry Orders, 17th April, 1900, paragraph 5:—

“Officers commanding are informed that reserves of clothing and equipment for 10,000 men for six months are now being despatched to Base Depot, Imperial Yeomanry, Cape Town. Further supplies of clothing and equipment should therefore not be forwarded unless the cost of the articles is being defrayed from private funds.”

I am, &c.,

(Signed) E. W. BECKETT.

Colonel.

FINANCE.

PAYMENT OF EXTRA DUTY PAY.

SIR,

August, 1900.

With reference to the accounts which have been submitted to this Committee in respect of extra duty pay to officers and non-commissioned officers in connection with the formation of the Company of the Imperial Yeomanry, I beg to inform you that your claim has been submitted to the War Office for approval, and in accordance with their authority I enclose cheque for £ in discharge of such pay as is due to the various officers and non-commissioned officers, as shown by the enclosed statement. I shall feel obliged if you will be good enough to distribute the various amounts, and acknowledge receipt of the remittance forwarded herewith.

For your information I append an extract from War Office Minute relating to extra duty pay, and I am to add that the various claims have been dealt with strictly on the lines laid down by the Secretary of State.

Extract.

“The schedules have been examined and in each case the rate admissible is indicated thereon They are all returned herewith for payment.

“In some instances the schedule contains claims for other than personal remuneration, and may be dealt with by the Paymaster concerned, or if not passed by him should be sent again separately.

“In one or two cases no claim can be admitted”

I am, &c.,

(Signed) E. W. BECKETT,

The Officer Commanding.

Colonel.

APPENDIX 82.

COPIES OF TELEGRAMS RECEIVED BY THE EARL OF LONSDALE FROM LIEUTENANT CLARENCE WILSON, REFERRED TO IN CHAPTER V OF THIS REPORT.

From Melbourne, 18/12/99—*To Earl of Lonsdale, Lowther Castle, Penrith—*

"Misunderstood word hundred; could find hundred horses suitable for chargers probably averaging twenty-five pounds—Clarence."

Melbourne, 19/12/99—*To Earl of Lonsdale, &c.—*

"Would undertake collection transport; any number procurable; could probably ship two or three hundred within fortnight; wiring to-morrow more definitely regarding total likely obtainable—Clarence."

Melbourne, 21/12/99—*To Earl of Lonsdale, &c.—*

"Could guarantee two thousand between fourteen two and fifteen three, not fifteen two; between five and ten not six and ten; this best offer horses here; furnish sooner (*sic*); think impossible get three thousand; if horses ordered think could arrange transports; have arranged any horses unbroken be broken before shipment. You don't realise difficulty procuring numbers in time—Clarence."

Melbourne, 23/12/99—*To Earl of Lonsdale, &c.—*

"Can arrange transports; would send 650 horses within three weeks; remaining 1,350 within five; will do utmost send sooner; first transport would leave about January 8th, taking seventeen days to Cape; cable me port of disembarkation; believe steamers drawing over 20 feet can't cross bar at Durban to discharge at wharf; all horses sent will be broken; have arranged fodder &c.; cable immediately definite order buy two thousand; will undertake it, also transport, but Government must send here direct guarantee or authority to incur liability or provide me money before I can enter into contract; if horses be paid for on delivery, suggest paying three-fourths on shipment, balance on disembarkation; freight for transports heavy but if Government requires coal or fodder for war could fill up transports with these thus reducing freight of horses. Quite satisfied with position you offer me thanks—Clarence Wilson."

Melbourne, 1/1/1900—*To Earl of Lonsdale, &c.—*

"Cables *re* price of horses were explicit; thirty-five pounds each, costing about ten more to land them, only same as given for Australian remounts landed in India; if had some months could buy much cheaper but time means money; if two thousand of best sort must be shipped within five weeks horses bought for twelve pounds would be unsuitable; those bought for first Victorian contingent averaged about thirty pounds landed but were of inferior quality and only two hundred instead of two thousand which are guaranteed me with option to purchase for fortnight from 22nd December expiring 6th January. If you want me buy, please get cable immediately from Government authorising me and arranging payment—Clarence."

APPENDIX 84.

COLONEL GORDON'S REPORT ON REMOUNTS INSPECTED AT LIVERPOOL, APRIL 5TH AND 6TH, 1900.

There were 186 remounts at Liverpool, which I inspected, and found 83 to be suitable as Yeomanry remounts. The remaining 103 are unsuitable.

Of those which are, in my opinion, "suitable," many are in a very low condition, some have been newly docked, and it is doubtful whether all of them will be fit to embark by the 18th inst.

As regards the unsuitable remounts, some are physically unfit, owing to bad conformation and want of power, some are too old, and many have been newly docked, and in the opinion of the Veterinary Surgeon (in which I concur) the newly docked horses ought not to be embarked. I attach the numbers of the "suitable" and "unsuitable" horses respectively.

In forming the above opinion I have been guided by the assumption that these remounts are required for embarkation at a very early date. If, on the other hand, Government can afford to wait two or three months, until they are in good condition, then some of the horses now described as "unsuitable" might develop into fair remounts for Mounted Infantry.

Their present condition is, however, speaking generally, deplorable, and the latest arrivals from Ireland are now suffering from strangles, in an epidemic form.

The further information called for by "Minutes," dated 4th inst., is here given:—

From whom obtained.

Except when otherwise noted against the numbers of the horses, the remounts I inspected were obtained from Ireland.

Price.

Major Studdert reports the price paid for the remounts to average £30. With very few exceptions I do not consider them worth that amount.

Condition.

With very few exceptions the condition of the remounts was very bad, and a large number were suffering from strangles and were otherwise sick.

Apropos of the condition, in a letter dated 4th inst. (received by me on the 7th inst.) from Major Studdert, he writes as follows:—

"I consider they were a good lot and in good condition, with very few exceptions, at least they left here looking well."

Responsibility of the Purchasing Agent.

The Remount Agent is, of course, responsible for passing horses which were unsuitable at the time he inspected them, but in the absence of Major Studdert's explanation, written or verbal, (he did not attend the inspection), and without personal knowledge of the condition of the horses at the time they were "passed," I am not in a position to say where the responsibility for the present wretched condition of the horses rests.

COPY OF GENERAL TRUMAN'S REPORT.

I inspected the horses belonging to the Imperial Yeomanry at Liverpool on the 7th inst.

There are in Lambeth Road Station 128 horses purchased from Major Studdert, 14 of which I found fit for service.

In Holmes's stable, 40 horses, also from Major Studdert, 9 of which I found fit for service.

There are also in these stables, 82 horses, which, for various reasons, have not been sent to South Africa; 34 of these I found suitable.

Those I cast, I consider physically unfit for service, and in dreadfully bad condition.

Total horses	250
Cast	193
Fit for service	57

(Signed) W. R. TRUMAN, *I.G.R.*

APPENDIX 85.

TONGAS.

Ordnance Office,
The Castle,
Cape Town,
7th August, 1900.

SIR,

With reference to your communication with Colonel Noel-Clarke, Principal Ordnance Officer, South Africa, relative to the disposal of a certain number of tongas by the Imperial Yeomanry, I have to inform you that, after reference to the Director of Transport and full consideration, it is regretted that the purchase of these vehicles for service use cannot be recommended.

The Director of Transport considers that the tonga, in its present state, is quite unsuitable for work in this country, even at the Base. It is abnormally heavy for a two-wheeled vehicle, and has, in addition, other objections.

The Director of Transport is also of opinion that, to expend money in their alteration, in the hopes of rendering them of use to the Army in South Africa, would not be advisable, as it is not evident that the Tonga is capable of being converted into a useful service vehicle.

I am, &c.

(Signed) GEORGE R. HOBBS,
Lieut.-Colonel,
Chief Ordnance Officer,
Lines of Communication,
South Africa.

Colonel Lucas.
(8470)

APPENDIX 86.

LIST OF STORES SUPPLIED TO IMPERIAL YEOMANRY BEFORE EMBARKATION FOR SOUTH AFRICA.

Contracting Firm.	Number.	Price.	Remarks.
BLANKETS—			
Samuel Bros., Ludgate Hill ..	1,500	£ 5 0	Sent to base depôt 22.1.1900. Satisfactory.
Westmoreland Woollen Co.,	500	0 4 2	
Kendal	1,000	0 5 0	
Harrod's Stores, Brompton	4,000	0 4 6	
Road, S.W. ,	1,400	0 5 0	
	1,000	0 5 0	Satisfactory.
Military Equipment Co., 7,	2,000	0 5 0	Satisfactory.
Waterloo Place			
Chase and Co., 55, Farringdon	1,000	0 5 3	Purchased when prices were up.
Street, E.C.			Satisfactory.
BANDOLIERS—			
Mill's Woven Cartridge Belt	10,000	0 8 0	Wallace and Co., agents. Articles
Co., Victoria Street, West-			satisfactory.
minster			
BEDFORD CORD—			
D. C. Apperley Carson and Co.,	15,460 yards	3s. to 4s. 9d.	Much of this was very unsatisfactory. The prices ranged from 3s. to 4s. 9d. per yard, and some of the higher priced material was of fair quality. The suppliers stated on enquiry that if a higher price had been offered, they could not have secured a better class of material owing to large demand and scarcity.
5, Cripplegate Buildings,			
Wood Street, E.C.			
Harrod's Stores Brompton	24,000	0 6 3	This consisted of three different sorts of material, and was purchased when the article was scarce and dear. There were 5,000 yards of excellent Bedford cord, 17,000 yards of a very strong drab material (trade name saddle cloth), and the remainder of a lighter but similar material. A large proportion of this contract was utilised in making pantaloons for reserve stores.
Road, S.W.			
VELVET CORD—			
D. C. Apperley Carson and Co.,	19,070 yards	0 3 0	Unsatisfactory.
5, Cripplegate Buildings,			
Wood Street, E.C.			
BUCKETS, WATER—			
Harrod's Stores, Brompton	1,020	0 4 3	Sent to base depôt 6th February.
Road, S.W.			
Stanley Docking, 62, Dingwall	1,600	0 4 3	Water buckets and nose bags com- bined. Sent to base depôt 27th January by ss. "Scot."
Road, Croydon			
CLOAKS AND BELTS—			
Samuel Bros., 65, Ludgate Hill	1,500	1 9 6	Unsatisfactory.
	1,500	1 8 0	
The Don, Cheapside	3,000	1 9 6	Cloaks well made, but dye in material not sufficiently fast.
	1,000	1 10 3	
Harrod's Stores, Brompton	3,000	1 9 6	
Road, S.W.			Satisfactory.
			Satisfactory.

NOTE.—In no instance did contractors render correct statements of account. In one case the statement was against the contractor.

APPENDIX 87.

LIST OF RESERVE STORES SENT TO BASE DEPÔT, CAPE TOWN.

Contracting Firm.	Number.	Price.	Remarks.
		£ s. d.	
BLANKETS—			
M. Oldroyd and Sons, Hunslet Mills, Leeds	2,000	0 5 4½	Satisfactory.
T. Lee and Sons, Earlsheaton, near Dewsbury	2,000	0 5 3	Satisfactory.
From Surplus (Chase and Co., Farringdon Street)	1,000	0 5 3	Transferred. Satisfactory.
BRUSHES—			
CLOTH—			
W. Vowles and Son, Bristol.	3,000	0 1 0	Satisfactory; only 10 rejected.
HAIR—			
G. B. Kent and Sons, 75, Farringdon Road, E.C.	3,000	0 1 4	Very satisfactory.
SHAVING—			
N. C. S. Stores, 28, Haymarket, S.W.	2,000	0 0 5	Satisfactory, though not quite to the pattern required.
BRACES—			
Whitehouse, Hartley, and Co., Walsall	6,000	17. 2s. per doz.	Article satisfactory; but delivery unduly prolonged owing to difficulty in obtaining webbing.
BOOTLACES—			
Johnson, Clarke, and Parker, Princes Street, Ipswich	20,000	2l. per 1,000	Satisfactory. 58 pairs rejected.
BANDOLIERS—			
Mills Woven Cartridge Belt Co., Victoria Street, Westminster	500	0 8 0	From surplus stores. Satisfactory.
BOOTS, ANKLE—*			
J. Kingsmith, Raunds	2,500	0 12 6	Very satisfactory. 100 rejected.
Adams Bros., Raunds	2,500	0 12 10	Fair. 492 rejected.
J. and E. Reynolds, Chesham, Bucks	2,500	0 10 3	Good. 358 rejected.
Joseph Dawson and Sons, Overstone Road, Northampton	2,500	0 14 0	Unsatisfactory. 1,495 pairs were rejected before 1,489 pairs were shipped.
CAPS, FIELD SERVICE—			
Hobson and Sons, Lexington, Street, Golden Square, W.	3,330	0 2 4	Satisfactory, but should have been better quality for the price paid.
CLOAKS AND BELTS—			
From Surplus Stores.	980	1 6
CLOTHES BAGS—			
Hindley and Co., 62, Queen Street, Cheapside	998	0 1 9	From surplus stores. Fair.
CLOTHING, SERGE FROCKS—			
Hebbert and Co., 35, Bethnal Green Road, E.	1,000	0 18 10	Very satisfactory, although made with stand collars in lieu of the Regulation stand and fall collar.

* The examination of all these boots was very thorough and searching and resulted in the shipment of boots of very high quality.

The boots were made on special lasts. They were standard screw pattern with heels also screwed on. The sole was flatter than the Infantry boot, and two semicircular rows of special nails were put on the toes for climbing purposes.

- " N 1487, 1504.
- " O 1618, 1735, 1736, 1762, 1771, 1796, 1797, 1810, 1811.
- " P 1905, 1927, 1934, 1940.

Stationery (foolscap, envelopes of all sizes, memo. forms, note paper, penholders and pens, pencils, rulers, inkstands, office knives, ink, blotting paper, with erasers).

The list of Army Books and Forms, packed in stationery boxes (mobilisation equipment), necessary for three months, for a Company or Unit of Mounted Infantry when mobilised, and obtainable from the Chief Ordnance Officer of the district, is detailed in the Tables issued with Army Orders, dated 1st December, 1899.

* Only needed if clothing and necessaries are to be issued

APPENDIX 95.

STATEMENT SHOWING THE ARTICLES OF MILITARY EQUIPMENT SUPPLIED BY MESSRS. J. STOHWASSER AND CO., WITH COST.

	£	s.	d.
Leather leggings—cavalry model—			
Pigskin, rivetted	1	1	0
" sewn	1	2	0
Brown hide, 1st quality, sewn and rivetted	1	0	6
" 2nd quality, rivetted	0	15	0
" " sewn	0	17	0
Blanket tent cloak	0	9	10
Muffler cap	0	9	0
Patent field service cap	0	8	0
Puttee stockings, unlined	0	6	6
" " lined	0	7	3
Bandolier (sectional)	0	6	6
Bronzed metal spurs and straps	0	3	0
Aluminium water bottle	0	6	0

Most of these articles have been tried in the field in South Africa, with favourable results.

APPENDIX 96.

ESTIMATED ADDITIONAL COST INVOLVED IN THE RECOMMENDATIONS OF THE YEOMANRY COMMITTEE AS SET FORTH IN PARAGRAPH 24 OF THEIR REPORT AS DISTINCT FROM THOSE OF THE DEPUTY-ADJUTANT-GENERAL, IMPERIAL YEOMANRY.

	£
No. 3. Cost of 19 additional adjutants—	
Pay	£3,467
Allowances	£2,517
	5,984
No. 4. Increase in permanent staff (undetermined)	—
No. 5. Increase of pay to 38 Serjeant Majors as Warrant Officers at 1s. 6d. a day	1,040
(There would also be a higher prospective pension charge.)	
Nos. 15–18. Cost of training for 21 days, giving Officers consolidated rates of pay based on Cavalry rates, and Yeomen 10s. a day, and including marching pay. Total strength for last year, 9,812	118,800*
Normal cost of present permanent duty including marching pay, and pay for drills and musketry	£33,100
	85,700
No. 19. Grant of horse allowance to Yeomen (8,700 at £5)	43,500
No. 22. Increased grant of Contingent Allowance (£5 maximum grant instead of £3), and grant for Officers—	
Men	£17,400
Officers	£3,000
	20,400
No. 24. Allowance for store room; 200 troops at £20 each	4,000
No. 25. Issue of 140 extra rounds of ammunition per man free, and 100 at half price	8,000
Total	168,624

* The cost of a seven days' training and three days' musketry practice, as recommended in paragraph 4 of the Report by Lord Dundonald and Sir John Dickson-Poynder, would be £60,700. The cost of a further optional training cannot be estimated.

CORRESPONDENCE.

266/367.

SIR,

War Office, 2nd July, 1900.

I AM directed by the Secretary of State for War to acknowledge the receipt of your letter of the 25th ultimo, 10,517/1900, dealing with the proposed reserves of guns, &c. for the Army, and in reply, I am to state that the Marquis of Lansdowne is glad to learn that their Lordships are prepared to consent to the proposal made in War Office letter of 14th instant, the purport of which is as stated in the letter under reply.

As regards the point raised in the last paragraph of your letter, a statement is enclosed giving the required information.

As their Lordships are aware, and as was stated in paragraph 89 of the report of Sir F. Mowatt's committee, the amounts that can be spent during the present financial year (over and above the amounts already provided in the estimates) on the various services specified in Treasury letter of 31st May last must necessarily be very small. Apart from the expenditure on stores to meet the "carry over" on the 4.7 guns, it is proposed to commence the works services included in the programme, some of which are of a very urgent character. It is hoped that out of the total amounts required the following sums can be spent before 31st March, 1901.

	Total Cost.	Estimated Expenditure in 1900-01.
	£	£
1. Works in connexion with the re-armament of the sea fronts - - - -	938,000	100,000
2. Improvements of buildings and machinery at the Ordnance Factories - - - -	366,100	135,500
3. Additional storage accommodation - - - -	500,000	100,000
Total - - - -		2335,500

Lord Lansdowne will be glad to receive at the earliest possible date their Lordships' sanction to the immediate commencement of the services above specified, and to be informed as to the manner in which the funds are to be provided whether by loan, or on estimates.

As regards the first item, their Lordships are doubtless aware that the services contemplated are to a large extent an enlargement of those already provided for under Head I. of the Military Works Act, and, as a matter of financial propriety, it would be advisable to provide for this continuance by loan. It may be pointed out that, should it be considered inadvisable in the present year to add to the existing Military Works Loan, there are sufficient funds under Head I. of the present loan to meet all expenditure that might be incurred up to 31st March 1902.

As regards Item 2, these services should, it is considered, be provided for in the Estimate of the Ordnance Factories. If this view is accepted, it is proposed to revise the estimate for the present year, which has not yet been taken in Committee of Supply.

Item 3, for additional storage accommodation, is practically a new service, and might with equal propriety be provided for either out of estimates or on loan, although, in view of the invariable difficulty of ensuring that the sums provided in a particular year for buildings will be fully expended, the latter method is preferable.

There are also other services of an urgent character, to some of which the Government is already pledged, but as they are in no way connected with the question of reserves of stores, a separate communication is being addressed to their Lordships as to the provision of the necessary funds.

I am, &c.
(Signed) *Frank T. Marzials.*

The Secretary to the Treasury.

11,575/1900.

SIR,

Treasury Chambers, 5th July, 1900.

I HAVE laid before the Lords Commissioners of Her Majesty's Treasury, Mr. Marzials' letter (266/367) of the 2nd instant, on the subject of the additional works services required in connexion with the recommendations of the inter-Departmental Committee on the reserves of war-like stores for the army.

The services in question are stated as follows:—

	Total Cost.	Estimated Expenditure in 1900-01.
	£	£
1. Works in connexion with the re-armament of the sea fronts - - - -	938,000	100,000
2. Improvements of buildings and machinery at the Ordnance Factories - - - -	866,100	185,500
3. Additional Storage accommodation - - - -	500,000	100,000
Total - - - -	£1,804,100	£385,500

The total cost of these items is that quoted in the Treasury letter (No. 7704) of 31st May last. In that letter My Lords undertook to provide a lump sum of 10½ millions for these and other services, "but not necessarily to the exact extent specified in the several items," and their assent to the total estimates of the above works services must be taken as being subject to that condition.

As regards the mode of charge, My Lords are in agreement with the Secretary of State, that Items 1 and 3 (Re-armament and Storage) should be met out of the Military Works Loan, Head I., under which sufficient funds exist to meet all expenditure that might be incurred up to the end of next financial year.

There remains the question of providing funds for the Ordnance Factories item. Their Lordships agree that this charge should most fittingly be borne by Votes of Parliament, and they concur in the proposal that, as the Factories Estimate has not yet been reached in Committee of Supply, it will be proper to include the new item in a revise of that estimate to be submitted to the House of Commons forthwith.

I am, &c.

(Signed) Francis Mowatt.

The Financial Secretary,
War Office.

Gen. No., 24/619.

SIR,

War Office, 9th July, 1900.

WITH reference to the concluding paragraph of War Office letter of the 2nd instant 266/367, I am directed by the Secretary of State for War to acquaint you, for the information of the Lords Commissioners of the Treasury, that in addition to the works services therein specified which are required in connexion with the reserves of stores, &c., there are the following services of an urgent character for which no provision has as yet been made:—

	£
1. Rifle Ranges for Volunteers - - - -	130,000
2. Rifle Ranges for Regulars and Militia - - - -	100,000
3. Acquisition of land for Artillery Ranges at Shoeburyness - - - -	80,000
4. Land for new depôts and barracks, and for additions to existing depôts - - - -	100,000
5. Barracks for British troops at Khartum - - - -	100,000

As regards 1, 2, and 3, they are practically an extension of services provided for in the Military Works Loans of 1897 and 1899.

1. Rifle Ranges for Volunteers.

The additional sum for Volunteer ranges is required partly to assist certain Volunteer corps in meeting heavy expenditure incurred in the acquisition of ranges, and partly for the purchase of land for central ranges for the use of Metropolitan corps.

2. Rifle Ranges for Regulars and Militia.

I am to point out that the sums provided under Head III. (2) of the Military Works Act of 1897 for ranges have practically all been allotted, while fresh demands for new ranges are constantly coming in, many of which are of an important character.

It should be borne in mind that of the total amount, 950,000*l.*, provided under Head III. (2) of the Military Works Act of 1897, 500,000*l.* was included for rifle ranges. But owing to the necessity of purchasing additional land for manœuvring and training the troops, the balance remaining available for ranges was reduced to 330,000*l.*

Among the various requirements that will shortly have to be met, are ranges for the troops in South Africa, and at Newcastle in Jamaica. A new range is also urgently wanted for the troops in the Woolwich District.

Again, many of the War Department ranges have not as yet been converted on the "gallery" system, iron targets being in use, which, in the interests of economy as well as of safety, will have to be replaced by canvas targets. It is not possible to estimate the total cost of the requirements under this head, but it is considered that 100,000*l.* will be sufficient to meet the necessary expenditure for some considerable time to come.

3.—*Acquisition of Land for Artillery Ranges at Shoeburyness.*

Provision is made in Head III. (1) of the Military Works Act to the extent of 79,000*l.* for Artillery Ranges, made up as follows:—

	£
(1) Purchase of land at Shoeburyness - - -	51,000
(2) Purchase of land at Glen Imaal, Ireland - -	28,000
	<hr/>
	£79,000
	<hr/>

It was subsequently found necessary to acquire additional land at Shoeburyness to admit of trials in connexion with high explosive projectiles, the reasons for which were set forth in War Office letter of 19th July, 1899, Shoebury, 8/108, and approved by Treasury letter of 26th July, 1899, 12047/99, on the understanding that funds were available on the Military Works Loan. At the time it was anticipated, as stated in the War Office letter above referred to, that the cost could be met out of the 51,000*l.* provided in the loan for the portion of the sands already in possession of the War Department, as it was considered highly improbable, owing to the difficulties in establishing the titles of the various vendors, that the money would ultimately be charged against the loan. Recently, however, the titles have unexpectedly been made good, and the money has been paid over, the amounts, both in this case and in that of the land at Glen Imaal being somewhat in excess of the provision made.

This, together with the amount paid for the high explosive range, has caused an excess of 27,550*l.* over the amount taken under Head III. (1).

Furthermore, in order to complete the scheme for the explosive range, it is considered necessary to acquire additional land for firing purposes and for the diversion of right of way by the construction of roads at a further cost of about 44,200*l.* Thus, allowing for legal expenses, contingencies, &c., it is considered that a total further amount of 80,000*l.* will still be required under this head.

4.—*Land for new Depôts and Barracks and for Additions to existing Depôts.*

In connexion with the recent permanent increase to the Army, it is necessary to purchase land required for the erection of new depôts and for the extension of certain existing depôts where accommodation can be made available for the recruits, &c., of the new battalions.

The question of the barracks for the new depôts and units themselves, and the expenditure that will be involved, is not yet ripe for submission to their Lordships.

5.—*Barracks for British Troops at Khartum.*

The necessity for this service has already been fully represented to their Lordships in War Office letter of the 27th ultimo, 7700/9288.

As regards the provision of funds for the above-mentioned services, Items 1, 2, and 3, as already stated, are an extension of services being carried out under Head III. (1) and (2) of the Military Works Acts of 1897 and 1899, while Items 4 and 5 are analogous to those being carried out under Head 2.

The necessary additional funds might, therefore, be provided by a new loan, or by an addition to the existing Military Works Loan. If, however, it should be considered undesirable to introduce another Loan Bill during the present year, I am to point out that, although the moneys provided under the existing loans are fully allotted to specific services, actual funds are, and will be, available for some considerable period (see Parliamentary Paper, Cd. 82 of 1900).

It will, therefore, be possible, with their Lordships' sanction, to carry out these services temporarily by means of the existing loan funds, without deviating from the present approved programme, on the understanding that later on additional funds will be provided.

Their Lordships have already sanctioned this course in the case of the works services required in connexion with the increased reserves of stores (*see* Treasury letter of the 5th instant, 11,575/1900).

I am, therefore, to request, that their Lordships will be similarly pleased to approve the above five services being proceeded with under the existing Military Works Acts, Nos. 1, 2, and 3 under Head 3, and Nos. 4 and 5, under Head 2 of the Military Works Act, 1897.

As regards Head 3, it is possible that the total amount provided may be exceeded before the 31st March next; if that should prove to be the case, I am to request sanction to the excess being met temporarily out of Head 1, on which funds are, for the present, available.

As regards the probable amount of expenditure during the present financial year on these various services, it is not possible to frame any reliable estimate; but it is not considered that the total will be large, and Lord Lansdowne will undertake that only the most urgent services are proceeded with for the present.

I am, &c.

(Signed) *Frank T. Marzials.*

The Secretary to the Treasury.

12,039/1900.

SIR,

Treasury Chambers, 14th July, 1900.

I HAVE laid before the Lords Commissioners of Her Majesty's Treasury Mr. Marzials' letter (Gen. No. 24/619) of the 9th instant, and I am directed to request you to inform the Secretary of State for War that they assent to the expenditure on the following urgent works services, viz. :—

	£
1. Rifle Ranges for Volunteers - - -	130,000
2. Rifle Ranges for Regulars and Militia - - -	100,000
3. Acquisition of land for Artillery Ranges at Shoeburyness	80,000
4. Land for new Depôts and Barracks, and for additions to existing Depôts - - -	100,000
Total - - -	<u>£410,000</u>

As the Marquess of Lansdowne points out, the items numbered 1, 2, and 3, are practically an extension of services provided for in the Military Works Loan, Head 3, and My Lords observe (from Cd. 82 of 2nd March 1900) that of the total sum of 9,458,000*l.* provided by the Military Works Acts of 1897 and 1899, a sum of over 6,000,000*l.* will, it is estimated, remain unexpended on 31st March 1901. It would, accordingly, be premature to apply this Session to Parliament for a further provision of funds; and My Lords consequently feel justified in sanctioning the proposal to carry out these three additional services from existing loan funds as charges against Head 3.

My Lords are dealing separately, in a letter of even date, with the mode of charge for the barracks at Khartum; and there consequently remains only the question of providing for the 4th item above, viz.—100,000*l.* in respect of land for new depôts, &c. This service, as Lord Lansdowne points out, is analogous to services now being carried out under Head 2 of the loan, and falls within the general description of that Head in the Schedule to the Military Works Act of 1897, though not contemplated at the time when the programme, embodied in the subsequent Act of 1899, was prepared. Regard being had to the fact that, while the 1897 provision under Head 2 was 2,989,000*l.*, the total expenditure on this Head under the Acts of 1897 and 1899 together to 31st March 1901 is estimated at only 1,072,887*l.* My Lords assume that payment for the new service can be made out of the unexpended balance on that Head under the Act of 1897; and they sanction the charge of this service accordingly.

As regards Head 3, I am to say that, if an excess should arise under that Head in the present year, a further communication should be addressed to this Board, with a view to the mode of temporarily meeting such excess in accordance with the statutory powers vested by the Loan Acts in this Board.

Lord Lansdowne will perhaps be of opinion that, as the additional services now in question involve important changes in the Loan Works Programme, communicated to Parliament on 2nd March last, it will be proper to present a revised statement to Parliament before the close of the present Session.

I am, &c.

(Signed) *Francis Mowatt.*

The Financial Secretary,
War Office.

MILITARY WORKS ACCOUNT, 1900-1901.

REPORT of the COMPTROLLER and AUDITOR GENERAL upon the ACCOUNT prepared under the Provisions of the MILITARY WORKS ACTS, 1897 and 1899.

1. This is the fifth Account of expenditure under the Military Works Acts.

Issues from the Consolidated Fund, and Expenditure to 31st March, 1901.

2. Issues from the Consolidated Fund were made to the War Office in 1900-1 to the amount of 1,200,000*l.*, raising the total issues to 3,673,216*l.* 1*s.* 6*d.*

Expenditure was incurred in 1900-1 to the amount of 1,222,103*l.* 2*s.* 4*d.*, making, with that previously recorded, a total of 3,633,719*l.* 18*s.* 4*d.*

Available Balance.

3. There remained a balance of 5,824,280*l.* 1*s.* 8*d.* unexpended at 31st March 1901 out of the total amount of 9,458,000*l.*, then authorised for the purposes of the Acts.

Terminable Annuity.

4. It will be seen by Statement II., page 2, that an annuity of 47,802*l.* has been created to repay the money (850,000*l.*) borrowed in the calendar year 1900, being part of the sum of 1,200,000*l.* issued for the purposes of the Act in 1900-1. The annuity was set up on 4th January 1901, and the first payment falls due in 1901-2, provision for which has been made in Army Estimates, 1901-2, under Vote 10, Sub-Head K.

Expenditure in 1900-1 beyond the Provision made by existing Acts.

5. It will be seen by the correspondence appended to the Account that works representing an enlargement of, or additions to, those already provided for under Heads 1, 2, and 3, in the Military Works Acts of 1897 and 1899, were urgently required to be commenced in 1900-1.

The Treasury sanctioned their commencement and directed that the charges in respect of them should be met out of funds available under the respective Heads to which the works pertained. The additional works thrown upon Head 3 have caused the "Revised Estimate" (2,063,149*l.*) in Statement IV., page 8, to be increased beyond the "Statutory provision" for the Head in the Acts of 1897 and 1899 (1,189,000*l.*), but the expenditure to 31st March 1901 (1,135,369*l.* 9*s.* 9*d.*) is well within the statutory limit; and the introduction of these new works has been subsequently covered by the later Act of 1901, 1 Edw. 7, c. 40; under which a sum of 6,352,500*l.* has been provided for additional expenditure under the respective Heads beyond the total amount of 9,458,000*l.*, provided under the Acts of 1897 and 1899.

Connellmore Brickfields.

6. As mentioned in paragraph 5 of my Report on the Barracks Account, 1900-1, the Connellmore Brickfields have been transferred to the Military Works Loan, and their value (22,453*l.* 18*s.* 11*d.*) has been charged under Head 2, Completion of Large Camps, Item, The Curragh, 37,781*l.* 6*s.* 5*d.* (page 4).

The effect of the transfer is that the relative position of the two funds is reversed, and the expenses of working the fields are now thrown upon the Military Works Loan, which will recover from the Barracks Reconstruction Fund the value of such bricks as may be taken over for use in completion of works under the Barracks Act.

7. The Balance Sheet of the Brickfields was only received in my Department on the 28th instant, and it has not been possible to examine the Production Statement.

I notice, however, that a considerable rise in the cost of making and delivering bricks on site at the Curragh has taken place in 1900-1 :—

Rate per 1,000.

	1899-1900.	1900-01.
	£ s. d.	£ s. d.
Common bricks -	2 9 6	3 3 5
Facing bricks -	3 0 8	3 15 7

with regard to which the Balance Sheet gives no explanation.

The Balance Sheet continues, as a matter of convenience, to be published with the Papers appended to the Army Appropriation Account (page 164).

D. C. Richmond,
Comptroller General of the Receipt and Issue
of His Majesty's Exchequer, and
Auditor General of Public Accounts.

Exchequer and Audit Department,
31 January 1902.

MILITARY WORKS ACTS, 1897 AND 1899.

ACCOUNT,
1900-1901.

ACCOUNT for the period ended 31st March 1901,
together with the Report of the COMPTROLLER
and AUDITOR GENERAL thereon.

(Presented pursuant to Acts 60 Vict. c. 7. s. 8 (3) and
62 & 63 Vict. c. 41. s. 1.)

Ordered, by The House of Commons, to be Printed,
26 February 1902.
